Taking note of the fact that people still had questions about his position, Mr. Carter fielded preselected inquiries about a range of questions in a show he called "untarnished and direct and unrehearsed, a good presentation of the proper relationship between the future president and the people he hopes to serve."

He called the Ford administration's record on the economy "absolutely terrible" and said he intended to be tough on Pentagon waste. "I'm trying to cut out waste, and he's [Mr. Ford] defending waste," Mr. Carter said in response to a question.

At one point, Mr. Carter replied to a questioner of Hispanic ancestry by speaking in Spanish, and an English translation was run across the screen.

Mr. Carter made his final campaign appearance last night in a convention hall in Flint, Mich., along with his running mate, Sen. Walter Mondale. The two men embraced in the steamy, overcrowded hall, and Mr. Carter drew cheers from 7,000 persons as he spoke on familar themes—unemployment, inflation, trust in government. He repeated, "It's time for a change in Washington."

Since Mr. Carter began his long quest for the presidency in January, 1975, he has given 1,495 speeches, visited 1,029 cities and flown 461,345 miles, according to a memo issued by his staff.

Carter staff workers voiced confidence aboard his plane last night that their man would win enough electoral votes to put him in the White House. But they obviously were nervous about closeness indicated in public opinion polls.

Sen. Mondale also voted early in Afton, Minn., his home t He joked that he was "unopposed," but then assured repo he had voted for "Jimmy Ca and his running-mate."

Heavy Demand Reported in U.S On Absentee V

NEW YORK, Nov. 2 (AP)— A heavy demand for abs ballots was reported in sections of the United States terday and in a close election could hold the balance of p for the presidential winner.

Most absentee ballots counted along with the res ones but there are enough ceptions so that a hairline fi between President Ford and my Carter could go undec for up to a week.

Washington, for example, ported a return of "hund boxes" of absentee ballots, w will not be counted until a after today's election.

In Florida, where an estim 150,000 absentee ballots mailed, the votes will not counted until the day after tion day. The same holds for an anticipated 17,500 abse votes in Rhode Island.

Most states do not keep of the number of absentee ba that are distributed and thu not know the total absentee until it is counted—usually the same time regular votes tallied.

Ford Votes in Grand Rapid Unveils Mural on His Life

(Continued from Page 1)

Transportation Secretary William Coleman, plus his onetime Navy commanding officer and a former college classmate.

The President spoke directly to the electorate only at the end.

He spoke while seated in his office in his official airplane. He was in his shirtsleeves, a vest and a rakish red tie.

His voice husky and circles around his eyes apparently indicating fatigue, Mr. Ford appealed for the ballots and prayers of Americans.

"I promise and I pledge you that I will not let you down," Mr. Ford said.

Old Home Movies

Mr. Ford's program—each network half-hour cost $100,000—included old home movies, old photographs and shots of Mr. Ford as a Michigan football player. He also was shown with world leaders, his children and his staff in the Oval Office.

He mentioned a cut in spending and a cut in inflation. Foreign affairs were recalled with a film segment of Mr. Ford's trip to China and one showing Secretary of State Henry Kissinger's return from Mideast talks.

Rousing marches gave way to violin music as a narrator introduced Betty Ford as "loving wife, mother and campaigner." With the music swelling, the narrator said: "Gerald and Betty Ford are a love story."

He is, daughter Susan Ford said in the broadcast, "very much like any other parent."

In Russell, Kan., Sen. Dole end- ed his campaign today by ri with his family and joinin large crowd that "if anyth goes wrong today I might h to move out."

Hundreds of persons tur out to greet Sen. Dole on front lawn of his mother's h before he cast his ballot. Ma Roger Williams proclaimed Dole Day" in this community 5,500 where Sen. Dole grew

Nixons Voted Early By Absentee Ballot

SAN CLEMENTE, Calif., 2 (UPI).—Richard Nixon and wife, Pat, who is recovering a stroke, voted by absentee in advance of today's presidential election.

Mr. Nixon's aide, retired mil Col. Jack Brennan, voted with them, told waiting newsmen. Nixons voted absentee ballo Asked how Mrs. Nixon, who suffered a stroke July 4, was fee Col. Brennan shrugged and s "It's a slow process, but she doing well."

Greece, Turkey Open 2 Aegean Conferences

PARIS, Nov. 2 (UPI).—Gre and Turkish diplomats open negotiations here today in the nations drawn-out dispute ov the use of air space over th Aegean Sea.

The talks coincided with th start of a parallel negotiating Bern, over shipping and oil e ploration rights in Aegean Se areas close to Turkey's coast an to Greek islands.

Winning in Electoral College or House

Presidents Lost in Popular Vote

y David E. Rosenbaum

ASHINGTON, Nov. 2 (NYT). ree times in U.S. history a dent has taken office after ving fewer popular votes than opponent.

ie possibility exists because, r the Constitution, presidents elected not by popular votes nwide but by the Electoral ege.

ere are 538 members of the toral College, a body that r meets as a group and se members are little known he public.

Each state has as many electors as it has senators and representatives combined. There are also three electors from the District of Columbia. All the electoral votes from a state go to the candidate with the highest popular vote in that state, regardless of the size of his majority or plurality.

Thus, a candidate who carries Alaska receives three electoral votes, whether he wins the state by 50 votes or 50,000. Similarly, a candidate who carries California will receive all 45 of its electoral votes even if he has only a few more popular votes than an opponent.

To be elected, a candidate must receive a majority, or 270, of the votes in the Electoral College. If no candidate wins a majority of the electors, the election is decided by the House of Representatives.

Although in years past there has been a real possibility of the decision's being thrown into the House, such an occurrence was regarded as highly unlikely this year. It was considered inconceivable that any third-party candidate could carry a state and thus win electors. It was thought certain that the only way that the House could be called on to settle the election was if Jimmy Carter and President Ford each receive 269 electoral votes.

If the election should by chance go to the House to be resolved, each state delegation would get one vote, and the candidate winning the majority of delegations would be declared the winner.

It was in the 19th century that three men who had lost in the national popular vote were elevated to the presidency.

In 1824, four candidates received electoral votes, but none received a majority. The election was decided by the House, which gave the presidency to John Quincy Adams, although Andrew Jackson had received half again as many popular votes.

In 1876, Rutherford Hayes won in the Electoral College by a one-vote margin, although Samuel Tilden had received nearly 51 per cent of the popular vote and better than 280,000 more popular votes than had Hayes.

In 1888, Benjamin Harrison, by carrying such large states as New York and Pennsylvania with small pluralities, won a clear victory in the Electoral College, although Grover Cleveland polled 100,000 more votes nationwide.

Four times in this century—1916, 1948, 1960 and 1968—small shifts of the popular vote in a few selected states would have changed the outcome in the Electoral College.

In 1960, a shift of fewer than a total of 12,000 votes in five states would have elected Richard Nixon instead of John Kennedy.

In some states, electors are not bound to vote for the candidate who has carried their states, and occasionally electors have cast ballots for other candidates. Such stray votes, however, have never affected the outcome of an election.

The winning electors will meet Dec. 13 in their state capitals to cast their votes. The ballots will be sent to the president of the Senate, Vice-President Rockefeller, who will open them before the Senate and House on Jan. 6.

Senate Races

WASHINGTON, Nov. 2 (AP).—A total of 33 senators were o be elected today. The seats were held by 10 Republicans, 21 Democrats, one Conservative-Republican and one Independent.

The 67 Senate seats not up for election are held by 27 Republicans and 40 Democrats.

The political affiliation of the senator who now holds each seat is indicated after the state name.

Incumbents seeking re-election are followed by the notation (I). Senators elected today are in bold face.

Electoral Votes

WASHINGTON, Nov. 2 (AP).—The President of the United States is chosen by the Electoral College, whose members are elected in popular vote.

In voting for a presidential candidate, voters are actually voting for a slate of electors pledged to the candidate.

Each state has as many electors as it has members of Congress. The District of Columbia has three electoral votes. A minimum of 270 votes in the Electoral College is needed to win.

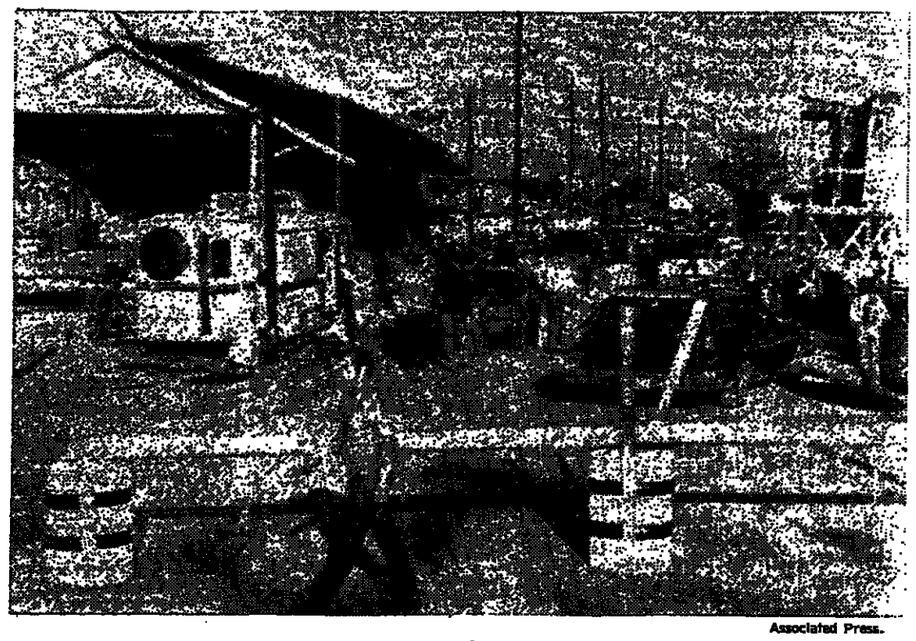
Governors



WASHINGTON, Nov. 2 (AP).—Governors were to be elected in 14 states today. The offices being filled are now held by 6 Republicans and 8 Democrats.

Seven Republicans, 28 Democrats, and one independent hold the 36 governorships not subject to elections this year.

The length of the governor's term is listed after the name of each state where there is a race this year. The notation R or D at the end of this line shows the party of the incumbent governor.

The names of incumbents seeking re-election are followed by the notation (I). Governors elected today are in bold face.

OVERFLOWING—The once quiet town of Plains, Ga., home of Jimmy Carter, was bursting at the seams as newsmen and tourists poured in on Election Day.

After His Church Bars Preacher

Black Democrats Rally to Carter's Defense

WASHINGTON, Nov 2 (AP).—Black Democrats flocked to Jimmy Carter's defense while President Ford's backers yesterday dispatched a telegram to some 375 to 400 black ministers and field workers questioning Mr. Carter's response to a racial incident at his Baptist church in Plains, Ga.

The Carter supporters said the church incident may have been politically motivated but would have either no impact on today's vote or would actually help the Democratic presidential candidate.

A black preacher and activist, the Rev. Clennon King of the nondenominational Divine Mission in Albany, Ga., applied for membership in the Plains Baptist church last week. His application was rejected by vote of the church deacons. Sunday's services were canceled and Mr. King was turned away when he arrived with reporters.

The Ford group's telegram recounted the incident and questioned, "If the former Georgia governor and lifelong member of the Plains Baptist church cannot influence the decisions and opinions of his own church, can we expect him to influence the issues and opinions of the United States Congress?"

The telegram was signed "President Ford Committee, Washington, D.C."

Committee Repudiates It

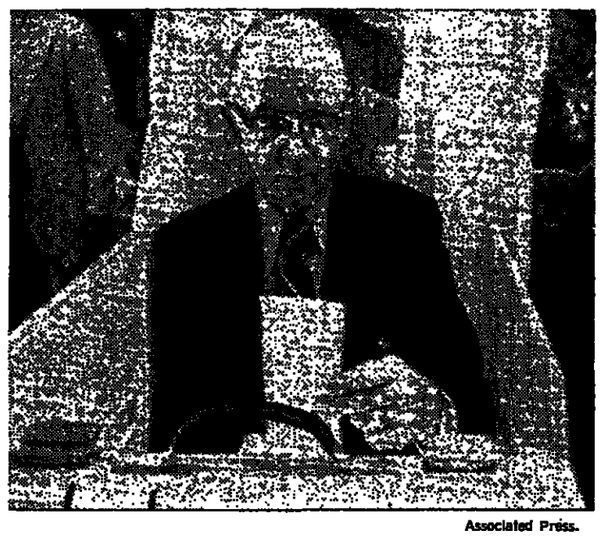
A President Ford Committee spokesman said today that the telegram was "in terrible taste, and if we had known about it, we would have stopped it."

Ron Weber, the Ford campaign spokesman, denied that the campaign's head, James Baker 3d, had authorized the telegram signed the "President Ford Committee."

Mr. Weber said the telegram was drawn up and sent out by Martin Dinkins and several others on the People for Ford Committee's "black desk." The People for Ford Committee is a component of the President Ford Committee. The "black desk" focuses on issues concerning black voters.

"Sunday afternoon the black desk got this information from AP radio and sort of took it upon themselves to send it out," Mr. Weber said. It should have been cleared with higher campaign officials, who would not have authorized it, he added.

In St. Louis, Rep. William Clay, D-Mo., a Carter backer, called a news conference with 10 black ministers who had received the telegram to denounce it. Rep. Clay said, "It surprised me that the Ford people would attempt to exploit the Bible and the church for political purposes, especially at this late hour of the game."



'Too Low a Politics'

In Atlanta, deputy Carter press secretary Betty Rainwater said, "I feel that such manipulation and an effort to lay the blame on Jimmy Carter for all of this is a little too low a politics for the President Ford Committee to be taking part in, but we have grown to expect that from them."

Yesterday morning, Mr. Carter called a news conference in Sacramento, Calif., on a few minutes' notice to say he disagreed with the deacons' action but would not resign from the church. He said the incident may have been "partially at least politically motivated," noting that Mr. King is not from Plains, not a Baptist and has run for public office as a Republican.

Meanwhile, on Mr. Carter's campaign plane, Mrs. Coretta Scott King, widow of Dr. Martin Luther King jr., said, "We think that the raising of this issue at this time has been instigated and is consistent with the low level on which the campaign against Gov. Carter has been run." The Albany minister is not related to the King family of civil-rights fame.

Earlier, Dr. Martin Luther King sr., father of the slain civil-rights leader, said in Atlanta, "Jimmy Carter may be part of that congregation, but he's never been one to keep people out of the church over their race."

Associated Press.

VOTING FOR HIMSELF—Lester Maddox, the American Independent party's candidate for president, voting in Marietta, Ga. The former governor and former lieutenant governor of Georgia had to stand in line for almost an hour before he got his turn at the machine. Alabama Gov. George Wallace was AIP candidate in 1972.

China Scorns Election in U.S., Asserts Tough Foreign View

By Ross H. Munro

PEKING, Nov. 2.—A Chinese government official, asked yesterday what China expects from the next president of the United States, brushed off the importance of today's election.

"We expect nothing from the American president elected by the monopolistic bourgeoisie of the United States," an official with the Ministry of Foreign Affairs was reported to have told a group of visiting French journalists.

The official, according to an Agence France-Presse correspondent who was present at a briefing for the French journalists, then reiterated, in relatively tough language, China's policy toward the United States.

Relations Criticized

"Since the signing of the Shanghai communiqué [in 1972] Sino-American relations have improved. We are happy to develop relations with the United States on the basis of Shanghai principles but so far relations have not been normalized. The United States must bear full responsibility for that and not China."

"To realize normalization," the official continued, "the United States must break with Taiwan, must break its defense treaty and must pull out its troops."

The Chinese official's dismissal of the U.S. presidental race is in line with indications that China is not particularly enthralled with either President Ford or Jimmy Carter. If Chinese officials had a favorite candidate it probably was Sen. Henry Jackson, D-Wash., because of his calls for a stronger defense posture vis-à-vis the Soviet Union, but who withdrew from the Democratic party primaries this spring after suffering a number of defeats.

Mr. Ford's biggest drawback, from the Chinese point of view, has been his Secretary of State, Henry Kissinger, who is viewed with suspicion by the Chinese for his advocacy of U.S.-Soviet détente.

More Than 90 Per Cent

Swedes, West Germans Seen Tops in Voter Participation

By Murray Seeger

BONN, Nov. 2.—Two European democracies, West Germany and Sweden may have found the practical limit for voluntary voter participation in national elections.

In both countries this fall, more than 90 per cent of the eligible voters took part in parliamentary elections and in each case the turnout was within a small number of the national record for participation.

Foreign analysts studying both elections have found several reasons for the strong interest individuals display in politics in the two countries—reasons associated both with the practical procedures for voting and the national cultures.

Like most Europeans, Swedes and West Germans vote on Sundays, when there are fewer activities to take attention away from voting.

ID Cards

Neither country requires registration in advance for voters. On the other hand, citizens of both countries are required to carry government identification cards from the kind of central register that many civil libertarians have charged would be unacceptable in the United States.

In Sweden and West Germany, voting by mail is easy for people away from their homes on election day. The ballots only have to be postmarked before the polls close.

Another major factor in turning out voters is that Swedes and Germans truly belong to their parties, paying dues and receiving membership cards.

Party members meet in caucuses and send delegations to national conventions, where the decisions are made on platforms and the election of leaders. There are no primary elections to nominate candidates, as in the United States.

Friends, Neighbors

On elections days, party members work hard to get their friends and neighbors to vote. Union members are especially important in helping the Social Democratic party, but all parties have their foot soldiers.

West Germany and Sweden have proportional electoral systems and votes for small parties really matter. The only barrier is that parties must achieve a minimum vote level of 5 per cent in order to elect members to parliament.

The countries' chiefs of government are then chosen by parliamentary majorities. In West Germany, the current majority is a coalition of Social Democrats and Free Democrats.

In Sweden in September, the election produced a new government coalition composed of the conservatives, Liberals and Center party members. After 44 years of dominating government, the Social Democrats lost power.

Every Vote

The outcome in Sweden was determined by a shift of only 1 per cent in the total vote, giving individuals a strong feeling that every vote counted.

In both West Germany and Sweden, the societies are stable and homogeneous. Families are less inclined to move from one town to another, as is characteristic in the United States.

To most observers, however, these factors provide only part of the explanation of why West Germans and Swedes turn out at the polls in such large numbers.

"There is a strong sense of duty in both countries," an American who has lived in both countries commented. "People just think it is important to vote."

Old, Young

The Swedes have one of the oldest parliamentary democracies in the world and the West Germans have one of the youngest. Germany had experimented briefly with the system during the 1920s, a test that ended with the assumption of power by Hitler in 1933.

The first postwar election in West Germany, in 1949, brought out 78.5 per cent of the voters. In each succeeding election, the percentage has been higher, with the last two elections—in 1972 and last Oct. 3—registering 91 per cent participation.

To many foreign experts, the West Germans seemed to be displaying their skill and interest in making a democracy function well following the Nazi experience.

But there also seemed to be another factor motivating the West Germans—that their country borders two of the most tightly controlled Communist regimes of Europe, East Germany and Czechoslovakia.

Proxy Vote

"Remember, you are voting for the people in East Germany, too," Foreign Minister Hans-Dietrich Genscher, chairman of the Free Democrats, repeatedly told campaign audiences this fall.

Reports filtered across the heavily guarded border that the East Germans, most of whom can receive television and radio programs from the West, showed intense interest in the election.

West Germany has received 4.25 million refugees from Communist Eastern European in the last 25 years, and the refugees not only take an active part in West German politics but also provide an example of the differences in life in Western and Eastern Europe.

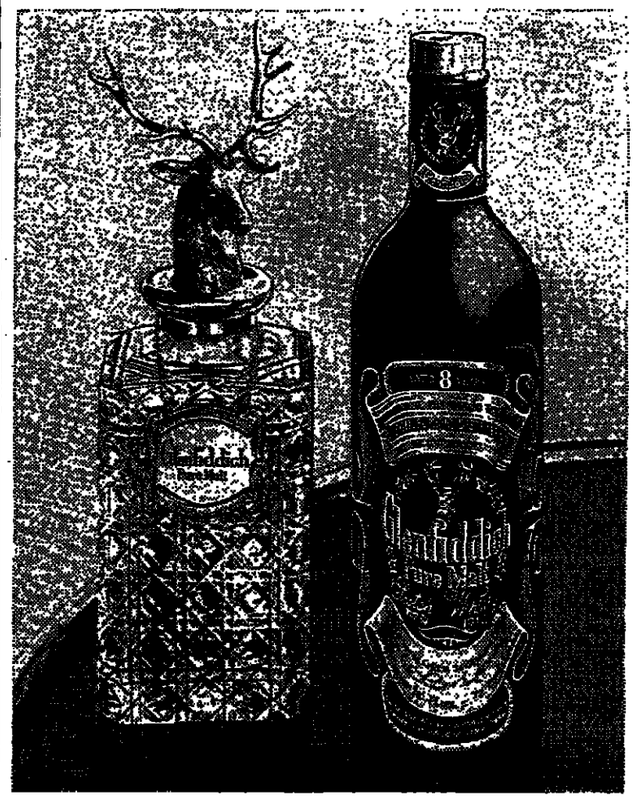
Betting Turning Toward Carter At Ladbroke's

LONDON, Nov. 2 (UPI).—Although President Ford remained the favorite in the presidential election, betting at a top London bookmaker late today was turning toward Jimmy Carter.



Ladbroke's said that £20,000 ($32,000) had been bet on Mr. Carter by mid-afternoon, changing Mr. Ford's odds from the day's high of 8-11 to 4-5. Ladbroke's quoted Mr. Carter at even money.

Bookmaker William Hill said that it was still calling 4-5, Mr. Carter 21-10. Mr. Carter had been the favorite until yesterday when £25,000 were placed on Mr. Ford.

Ford Wins at Harry's

PARIS, Nov. 2 (UPI).—Gerald Ford edged Jimmy Carter by 277 votes to 274 when the ballot box was opened today in a straw vote conducted by Harry's New York Bar here. Eugene McCarthy received 7 votes.

Discover the distinctive taste of Glenfiddich pure malt.

Unlike blended whisky, Glenfiddich has a full-bodied smoothness all of its own.

Its pure taste comes from the fact that it is 100% pure malt.

And from the fact that it's still made in the same traditional way by the fourth generation of the Grant family.

So when you discover the distinctive taste of Glenfiddich for yourself, you'll soon appreciate why it's the world's finest Scotch whisky.

Ford Aides Deny Charges Of Politicking

Farm, Israel Moves Unaffected by Vote

By George Lardner Jr.

WASHINGTON, Nov. 2 (WP).—When President Ford agreed to provide Israel with new, highly sophisticated weaponry last month, the White House disdained suggestions that it was an effort to court the Jewish vote.

Two days later, the administration announced a 50-per-cent increase in wheat-price supports and smaller increases for corn and other grains, again dismissing any insinuation that the action was politically inspired.

Never mind that the higher farm-price supports were ordered just 24 hours after officials at the Department of Agriculture had solemnly announced that there was "no economic justification" for such assistance.

Forget that the electronic military equipment approved for Israel had been previously denied that nation. Or that the White House setting for the arms announcement came just a day before Mr. Ford was to meet with Jewish leaders in Brooklyn. Such thoughts were, in the words of White House Press Secretary Ron Nessen, "unworthy of an answer."

Moving into the final days with the muscle power of his incumbency solidly flexed, Mr. Ford arrived in Cincinnati, Ohio, to issue his long-awaited statement on nuclear policy.

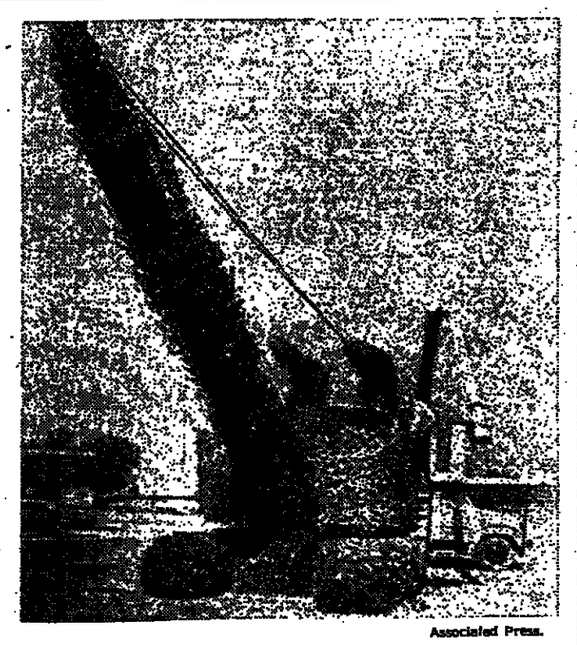
The plans, he said, included money to expand the government's uranium-enrichment plant in Portsmouth, Ohio, spelling "6,000 new jobs for southern Ohio."

Administration straight men, meanwhile, assured reporters that presidential politics had nothing to do with the substance or timing of the nuclear news.

Neither, of course, did the Ford administration's simultaneous announcement in New York City of nearly $90 million in federal transit subsidies for subways, commuter rail and bus systems, and even a start on waterborne mass-transit service.

Federal mass-transit officials dispatched to New York for the announcement denied any politics, as usual. The New York Daily News, which has endorsed Mr. Ford, gave the story a front-page banner headline, "We Get 90M Dollars in Transit Aid." The New York Times, which has endorsed Jimmy Carter, consigned it to relative obscurity on an inside page in its second section.

Blessings for Washington, D.C., came Saturday with an administration move to give more public construction dollars to minority (race, national-origin, etc.) contractors bidding for work on the metro subway system. Minority contractors around the United States will get similar treatment.



The announcement was made, after gathering dust at the Department of Transportation for more than a month, by the only Republican incumbent on the District of Columbia City Council, who said, grinning broadly, that he had "nothing to do with the timing" of the federal decision.

Then there was Mr. Ford's proposal of a 10-year program to "double America's heritage of national parks, recreation areas, wildlife sanctuaries, urban parks and historic sites."

It turned out that all of the $141 million he requested for the current year previously had been authorized by Congress, and that the parks plan depends mostly on using vast acreage already owned by the federal government in Alaska.

Soviet Army Promotion

MOSCOW, Nov. 2 (AP).—Soviet Col. Gen. Anatoly Gribkov, who was recently appointed chief of staff of the Warsaw Pact nations, has been promoted to the rank of general of the army, an official announcement said.

Associated Press.

Dating From Colonial Days

Atmosphere of Old Germany Thrives in Changing Namibia

By Henry Kamm

SWAKOPMUND, South-West Africa (NYT).—"Heil Hitler," said the black gas station attendant matter-of-factly to the departing customer, raising his right arm to the traditional height.

He offered the outdated salute after a pleasant conversation in which he explained the fluency of his German by the fact that his father had been a feldwebel, or sergeant, in the German imperial army in this former German colony. It appeared not to be a joke, but rather a greeting that he had exchanged before with German customers.

"When I first came here," the German girl at the reception desk of the Hansa Hotel said, "I could hardly believe it. This place is more German than Germany."

Swakopmund was a coastal resort built for the refreshment of colonial society from the heat of South-West Africa's interior. South Africa, which conquered it in 1915, has built its own buildings in this town in which 7,000 whites live. A comparable number of blacks and "coloreds" are housed on the other side of the tracks. But South Africa's influence has not changed the town's Wilhelmine appearance.

German Names

Kaiser - Wilhelmstrasse is the name of the main street. Near the shorefront, it is traversed by a street named after the Kaiser's chancellor, Bismarck; many of the other cross streets bear the names of the Kaiser's generals. But Goeringstrasse is not named after the Nazi leader but his father, a colonial administrator. The shop signs are mainly in German; many of the goods on sale are imported from Germany or made in the German tradition. The bookstore would do proud by a German city much larger than Swakopmund, the Café Anton offers all the traditional *Kuchen* and *Torte*, with or without a gob of *Schlagsahne*.

On the monument to the marines who fell in the Herero uprising of 1904—adjudged by historians to be a classic genocide of an indigenous people by colonial forces—the flag of the Kaiser's army is flown on festive occasions. The territory is called Sudwest by the quarter of the white population whose first tongue is German. A strong Nazi movement existed in South-West Africa until the Germans were interned during World War II, and vestiges, strengthened by Nazis who took refuge here after the war, survive. They dream of restoring the Sudwest that used to be white.

The rest of the world is considering how long it will be before this South African-ruled territory will become a free country with 765,000 black citizens taking over the government from 100,000 whites. But Germans are also in the forefront of the political struggle to create an independent, multiracial country of Namibia, as the territory is known by nationalists. The German-language daily Allgemeine Zeitung strongly expresses that view.

Germans have offered no more resistance to the integration of many public facilities than other whites in the territory. Since last year, South-West Africa—unlike "the republic," as South Africa is called here—has removed separate entrances to public buildings and lifted the color bar at hotels and restaurants.

It is the slightly more relaxed atmosphere between the races, as well as the depth of the German tradition, that most strike the visitor from South Africa.

Racial Attitudes

But there are hard limits in racial attitudes that differ little from those in "the republic" and which were expressed in many casual conversations. A hitchhiker, a 23-year-old Afrikaner teaching woodworking at a uranium mine near here, expounded what probably were representative racial views in 200 miles of driving.

He thought he was typical of his generation, he said, more modern than that of his parents. They would not accept multiracial government; he would. He would accept blacks living in the house next door and their children sharing classrooms with the children he and his wife are hoping for.

But he added that whatever he said did not go for his wife, who comes from "the republic." She is unhappy in South-West Africa, he said, because of the racial situation now and its prospects for the future. If majority rule comes, he said, they will probably cross the border with many others.

The young man did not exchange a word with the black hitchhiker who rode along for half the way, although they work at the same mine. After the black got out, the young man was asked if he had minded the other man's presence. "No," he said, reluctantly. Would he have minded if his wife had also been in the car? "Probably," he replied.

Viking Ends Search for Life on Mars

Fails in New Test On Sample of Soil

By Thomas O'Toole

WASHINGTON, Nov. 3 (WP).—Viking-2 found no dead organic matter in the soil sample it took from under a rock on Mars, and scientists have given up using Viking to confirm or disprove the existence of life on the planet.

"That's just about it, the last chance we had to find fossils on Mars with Viking," Viking planning director Gentry Lee said yesterday from Pasadena's Jet Propulsion Laboratory, the site from which Viking is directed. "I think we have to conclude that there is no hope of finding dead organisms on Mars with Viking."

The last of three tests by Viking-2 of a soil sample dug from under a rock rolled over by the spacecraft's mechanical arm showed no signs of fossil life. The test was done by heating the sample to 900 degrees, hot enough to break down any complex amino acid that would have been left behind if living organisms had perished there.

The sample was the second analyzed by Viking-2 for fossil organics and almost surely the last. The instrument that does the organic analysis on Viking had only two of its three ovens in working condition. An oven can only be used once for each soil sample.

Life Itself

If scientists have given up looking for the fossils that would confirm life, they have not given up looking for life itself on Mars.

A fourth sample, dug up by Viking-1 on Mars, was analyzed today for evidence of photosynthesis, which it found. It was the third time Viking-1 found that something in the soil was synthesizing its own organic matter.

"The question of life on Mars is still up in the air but the question of organic synthesis is not up in the air," Mr. Lee said. "Organic synthesis is going on in the soils of Mars."

Mr. Lee said that life could be producing the organic synthesis or that an exotic inorganic chemistry could be responsible.

R.M. McClintock, Long U.S. Envoy, Dies in Accident

BEAUNE, France, Nov. 2 (AP).—Robert Mills McClintock, 67, the U.S. ambassador to Lebanon when in 1958 President Eisenhower ordered the U.S. Marines into that Middle East country, was run over by a car and fatally injured last night.

Mr. McClintock suffered fractures of the skull and legs and died in a Beaune hospital.

A career diplomat, he joined the U.S. Foreign Service in 1931 and served in it for 44 years, retiring as ambassador to Venezuela in 1975.

He was ambassador to Cambodia, Lebanon, Argentina and Venezuela and held lesser posts in Panama, Chile, Japan, the Dominican Republic, Finland, Sweden, Belgium, Egypt, Vietnam and at the United Nations.

Mr. McClintock had been in Lebanon less than six months when a Moslem uprising led by Saeb Salam, Kamal Jumblat and Rashid Karami threatened the country's Christian President, Camille Chamoun.

Mr. Chamoun appealed to President Eisenhower, charging that the Moslems wanted to open the country to Soviet influence. The U.S. president ordered U.S. forces to land in support of Mr. Chamoun. They were withdrawn after the installation of a compromise president, Fuad Chehab.

Pierre Lyautey

PARIS, Nov. 2 (AP).—Pierre Lyautey, 83, a journalist and author who was the nephew of French colonial army leader Marshal Louis Lyautey, died here yesterday, his family announced.

Peru Purchases 36 Soviet Planes

LIMA, Nov. 2 (AP).—The Peruvian Air Force has bought 36 supersonic fighter planes from the Soviet Union, the government announced today. It is the first such purchase by a Latin American country other than Cuba.

Confirming a New York Times report of two weeks ago (IHT, Oct. 14), Foreign Minister Jose de la Puente said at a news conference today that the Russians made the "most attractive" offer in bidding by arms suppliers from the United States, the Soviet Union, France and Britain.

Well informed sources said that the planes cost about $250 million under lenient credit terms. Western intelligence experts say that the planes are export versions of the Sukhoi-22, which is believed to fly at twice the speed of sound.

...ctivities of Tongsun Park

...S. Korean Bribes in U.S. Said Condoned by Regime in Seoul

By John Saar

SEOUL, Nov. 2 (WP).—Evi...ence is mounting here that the ...outh Korean government poli...ew of wheeler-dealer Tongsun ...ark's questionable political ac...ities in Washington and con...ned them, at least to the extent ...permitting his Seoul-based ...sinesses to flourish.

A South Korean legislator said ...esterday he has been warning ...e government for four years ...at Tongsun Park was damaging ...e country's image in the United ...ates.

"I warned them," said opposi...on national assemblyman Oh Se...ing, "there was reason to be...eve that what he was doing over...ere was bribery."

Had the government wished to ...m in Tongsun Park, it could ...ve moved against his Seoul ...ading group, but the influential ...sinessman has prospered, ac...rding to commercial sources in ...is capital. Tongsun Park runs ...shipping firm and two trading ...mpanies from offices in Seoul ...and has purchased a high school, a supermarket chain and a $400,...000 house this year.

U.S. newspapers, citing U.S government sources, have reported that Tongsun Park is a private businessman who worked for the Korean CIA under the direction of President Park Chung Hee to buy congressional support. Such allegations cannot be investigated in the heavily restricted environment of South Korea. However the apparent absence of government sanctions against Mr. Park's business operations offers circumstantial support to the theory.

Assemblyman Oh, who studied at American University and is an expert on U.S.-South Korean relations, said he has constantly criticised Tongsun Park as "a careless, irresponsible businessman."

Mr. Oh said he plans to ask tomorrow for a government inquiry into allegations that Tongsun Park made illegal payments to past and present U.S. congressmen on orders from the South Korean government. Mr. Oh said he would argue that a continuing news blackout on the controversy was against the national interest.

"If the government is not linked to Park, why don't we have a free discussion of the subject? Our country is being damaged. There is wrongdoing by somebody and we must dig into it," he said.

Clarification Urged

Mr. Oh said that the presidential decree which crippled press freedom should not be used to protect possible criminal conduct. He said he doubted that Tongsun Park is a paid KCIA agent, but believes it essential "to clarify whether he worked for the government."

Under the government of President Park, critics of its policies often have been jailed. Making critical comments to foreigners has been considered particularly reprehensible.

It now seems there was a split in official Korean attitudes to Tongsun Park's activities. While he was allowed to continue operating for years after rumors first began circulating, South Korea's ambassador to Washington, Hahm Pyong Choon, is known to have disapproved. Other officials sought to have him barred from the presidential residence in Seoul.

A U.S. source called the corruption scheme "downright dangerous." "Korea needs us and these things are going to undermine their support in the Congress," he said.

The United States sold $563.2 million worth of goods on concessional terms to South Korea from 1962 to last year. Another $321 million worth was given in grants for humanitarian relief.

If, as has been alleged, Tongsun Park took commissions from U.S. funds, Western diplomatic sources here believe he must have rigged the bidding through the Department of Agriculture.

Mr. Oh claimed that the visit to Korea in April, 1974, of 22 congressmen under the leadership of Congressman Thomas O'Neill, D-Mass., was organised by Tongsun Park. The then U.S. ambassador to South Korea, Philip Habib, spotted Tongsun Park among the welcoming committee and advised the host officials that he would leave unless Tongsun Park was removed. Tongsun Park, who was on a first-name basis with the congressman, disappeared but only briefly, Mr. Oh added.

Sworn Statements

WASHINGTON, Nov. 2 (WP).—U.S. Army investigators have obtained sworn statements alleging that some Defense Department employees overseas are part of the ring which has been rigging bids on U.S. military contracts in South Korea.

A Korean businessman in one such statement told the Army's Criminal Investigation Division that several U.S. procurement officials in Korea were bribed from the start to the finish of the contracting process.

Bribe Backer Named to U.S. Trade Panel

BOMBING IN PARIS—Jean-Marie Le Pen (right), leader of the far right National Front, talking to reporters yesterday in front of his bomb-destroyed apartment.

Bomb Injures 6, Wrecks 12 Flats At Address of Paris Rightist Chief

PARIS, Nov. 2 (AP).—A powerful bomb this morning wrecked a Paris apartment building housing French extreme rightist leader Jean-Marie Le Pen, injuring two adults and four children.

One of the injured was a baby who was hurled from the fifth floor to the ground but suffered only a broken arm. Mr. Le Pen and his family escaped injury.

Twelve apartments in the building were wrecked by the bomb, estimated by police to have been made of at least five kilograms of dynamite.

Mr. Le Pen's National Front held its annual congress last weekend. Its theme was "the lack of security and the fight against crime in France."

Mr. Le Pen said it was the third bomb attack against him but "the only one really designed to kill." He said the Paris police chief had told him there were an average of two bomb attacks in the city each week.

CIA Threat to Its Security Still a Preoccupation in Cuba

By David Binder

HAVANA, Nov. 2 (NYT).—On the west side of Havana's Plaza de la Revolucion there is a large billboard with a simple legend in huge letters: "CIA" in white, overlaid with "murderer" in black.

It is one of the many illustrations of Cuba's preoccupation—some Cubans call it an obsession—with what is seen as a continuing security threat from the U.S. Central Intelligence Agency. The preoccupation dates from the CIA sponsorship of the Bay of Pigs invasion in April, 1961.

"Your administrations come and go, but the CIA goes on and on with its plans to destroy us," remarked a student at Havana University, as if to say that the intelligence agency was a totally separate entity in Washington living its own clandestine life.

Premier Fidel Castro underscored this attitude in his last major speech, on Oct. 15, saying: "Those who believe the CIA has changed one iota because of the denunciations its hair-raising actions have caused within U.S. society itself are deeply mistaken. Its methods will simply become more subtle and perfidious."

Agent Planted

Mr. Castro also asserted that the CIA had planted an agent in his government with access to the office of Osmani Cienfuegos, secretary to the Executive Committee of the Council of Ministers, or Cabinet.

However, Mr. Castro also asserted that "the presumed agent recruited by the CIA kept the Cuban government informed, from the very beginning and for 10 years, of all details of every contact he had with it, the equipment and instructions he received."

Officials said Sunday that the double agent would probably be revealed next month.

Cuban concern with the CIA has also been highlighted recently in television interviews, lasting hours, with two men said to be former CIA agents, Manuel des Armas and Carlos Rivero Collado, both of Cuban origin. Last June, the Cuban Institute of Books published Mr. Rivero's book, "The Nephews of Uncle Sam," detailing connections between the agency and anti-Castro Cuban exile activists in Miami.

The CIA is also held responsible in the Cuban press for the sabotage of a Cuban airliner that crashed Oct. 6 off Barbados, killing 73 persons, including 57 Cubans.

An American visiting in Havana is treated these days with a good deal of circumspection by ordinary Cubans and by Cuban officials. The topic of the CIA is rarely raised directly.

CIA Bars Comment

WASHINGTON, Nov. 2 (NYT).—A spokesman for the CIA agency said yesterday that his office would have no comment on the allegation by Mr. Castro that the CIA had planted an agent in the Cuban government.

Last month, a spokesman for the State Department denied charges by Cuba and Guyana that the CIA had been involved in the sabotage of the Cuban airliner that crashed Oct. 6.

Burundi President Micombero Is Deposed by a Military Coup

BUJUMBURA, Burundi, Nov. 2 (Reuters).—President Michel Micombero was overthrown in a bloodless coup by the military last night, the state radio reported today.

It broadcast an armed forces communiqué which said that Gen. Micombero, who ruled for 10 years, was stripped of all his powers and Burundi's only political party, the Uprona, was dissolved.

The commander in chief of the Burundi Army, Lt. Col. Thomas Ndabemeye, was also dismissed, the communiqué added.

The armed forces, the communiqué said, had been forced to take power against "clans of self-interested politicians avid for personal power and material wealth."

Gen. Micombero had seized power in a bloodless coup in November, 1968, and at first brought relative political stability to this densely populated central African state, which had been the scene of bloody tribal and clan feuds for years.

100,000 Killed in 1972

Tribal strife flared again in 1972. Gen. Micombero said then that almost 100,000 people were killed in the suppression of Hutu tribesmen allegedly attempting a coup.

Gen. Micombero belonged to the Tutsi tribe. Its members total only about 15 per cent of the population, but they have ruled Burundi since they conquered the less warlike, more numerous Hutus almost four centuries ago.

The armed forces' broadcast communiqué said that no one was hurt in last night's coup and the country was calm. But an overnight curfew was being imposed, Bujumbura's airport was shut indefinitely and frontiers were closed, it added.

There was no word of Gen. Micombero's fate.

The country's political and economic situation had deteriorated seriously and "anti-national" groups had taken over with the general's encouragement and protection, the armed forces communiqué said.

(In Brussels, diplomatic sources said that Gen. Micombero might be replaced by Lt. Col. Nelbagaza, described as the No. 2 or 3 man in the army. They named a Maj. Nzabimana as, also being a key man in the coup.)

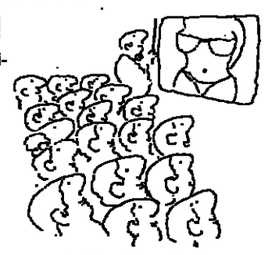
Burundi, which has a population of 3.5 million, was administered by Belgium until it gained independence in 1962.

Neighboring Rwanda was part of the same Belgian-administered League of Nations trust territory, but in Rwanda the Hutu tribe rules.

Gen. Micombero replaced Burundi's ancient monarchy with a one-party state that repressed its opponents, particularly those from the Hutu tribe.

He trained at the Brussels Military Academy, returned home as a young police officer with the rank of captain, and quickly surfaced in Burundi's political infighting, where assassinations were commonplace. He went on to become commander in chief of the army.

Husak in Moscow, Pins Medal on Brezhnev



MOSCOW, Nov. 2 (AP).—Soviet Communist party leader Leonid Brezhnev met today with Czechoslovak Communist chief Gustav Husak and received from him a second "Hero of Czechoslovakia" gold medal, Tass reported.

Mr. Husak, who arrived in Moscow earlier today, discussed Soviet-Czechoslovak cooperation and international problems with Mr. Brezhnev, the agency said.

China Regime Says 4 Leftists Obstructed Industrial Output

By Fox Butterfield

HONG KONG, Nov. 2 (NYT).—China's new authorities have accused Mao Tse-tung's widow, Chiang Ching, and three other senior leftists of disrupting industrial production and interfering with the management of China's economy.

A front-page story in yesterday's edition of the party paper, Jen Min Jih Pao, charged that the leftists had "carried out criminal activities to energetically disrupt socialist production." In a reference to an anti-rightist campaign earlier this year, the paper added that the leftists had put a "big cap" of being rightists on anyone who advocated increasing production.

The paper called on China's workers to "make up for the loss in production inflicted by the 'gang of four'"—the name given to the leftists since they were arrested and disgraced last month.

Because of the criticism of those who favored increased production and because of heightened political factionalism, China's industrial output is believed to have declined this year from its average growth rate of almost 10 per cent a year during the last 15 years. Chinese statistics for the first half of this year showed an increase of only 7 per cent, and a broadcast yesterday from Kwangtung Province said its factories had achieved only a 4.4-per-cent rise through September of this year.

More Pragmatic

The new allegation about the leftists' adverse influence on production is the latest in a series of indications that China's new leaders intend to return to a more pragmatic and conventional policy stressing economic growth.

They have already said they will reinstate the late Premier Chou En-lai's ambitious program to modernize China by the year 2000 and hinted they may adopt a less restrictive policy toward art and literature.

In addition, in an important editorial two days ago in the army paper, Chieh Fang Chun Pao, they proclaimed a more conservative attitude toward leadership, saying that China should be governed by "the most authoritative, influential and experienced" officials. That differs sharply with Mao's policy of more rapid promotion for younger party workers.

So far, Hua Kuo-feng, the new chairman of the Chinese Communist party, and his allies among the senior party bureaucrats and army commanders, have moved with surprising speed and apparently have encountered little opposition.

'Nonsense' Cited

In the article accusing the four senior leftists of disrupting production, Jen Min Jih Pao charged that the four had "reeled off the following nonsense: 'When the revolution is well led, production automatically increases.'"

That allegation could also be interpreted as a direct refutation of one of Mao's own most cherished notions, that China's economy would advance fastest only if its leaders preserved the revolutionary values of hard work and mass enthusiasm.

Ranking Chinese officials have also told foreign visitors in the last few days that Miss Chiang and her fellow leftists had constantly interfered in economic decision-making, disrupting party meetings to interject their own poorly conceived ideas.

AP.

MONUMENT IN MOSCOW—A statue of Friedrich Engels was dedicated yesterday in Kropotkin Square.

Subway Hit By Slowdown In Madrid

Action Hinders Traffic Snarled by Bus Strike

MADRID, Nov. 2 (UPI).—A partial slowdown on the subway system and the interruption of a suburban railroad line today added to Madrid's transport problems created by a six-day-old bus strike.

The strike is one of Spain's most bitter and violent in recent years. It started over basic issues, but now mainly turns around the question of the workers' right to freely choose their representatives.

The 7,000 drivers, conductors and mechanics of the municipal bus company struck last Thursday in a dispute involving wage hikes and fringe benefits.

The failure to reach agreement was rooted in the insistence of the workers that the bus company deal with a newly elected bargaining committee all of whose members belong to outlawed leftist labor groups. The company, in turn, has said that it can legally deal only with the labor representatives picked under the government-controlled Franco-era trade union system.

Dispersed by Police

In what has almost become a ritual in the last few days, thousands of workers today gathered for a strike meeting near the main bus garage, only to be dispersed by riot police. Hundreds of strikers then marched to the central Plaza de España square, where police used truncheons and smoke bombs to scatter them.

Underground labor unions have threatened to call out subway workers, taxi drivers and industrial workers in support of the bus workers. They were believed to be behind a slowdown on some subway lines this morning.

Traffic soon returned to normal, but a railroad linking Plaza de España with suburban Carabanchel then went out of operation for two hours, reportedly because of an electrical failure.

This added to the traffic chaos in the city center. Authorities have chartered 400 private buses and manned another 500 with army and police drivers, but service is still spotty and many bus users prefer to go to work in their own cars.

Yesterday, the bus workers decided not to resume negotiations until authorities free seven arrested colleagues and the company rehires 33 employees fired as alleged strike agitators.

Labor lawyers said today that the Public Order Court—the political arm of the judiciary—has indicted the seven on various charges.

UN Council Lets PLO Join Debate On Israeli Actions

UNITED NATIONS, N.Y., Nov. 2 (AP).—The Security Council ignored U.S. opposition and voted yesterday to let the Palestine Liberation Organization join a debate on Israeli treatment of Palestinians in occupied Arab territories.

By a vote of 11-1, with three abstentions, the Council decided the PLO could participate with all the rights of a UN member country but without a vote.

The United States cast the negative vote, because of the form in which the invitation was issued, while Britain, France and Italy abstained.

The negative U.S. vote did not constitute a veto, because the issue was procedural and not substantive. The five permanent members of the 15-member council have veto power.

Before voting on PLO attendance, the council gave general consent to participation by Egypt, Jordan, Syria and Israel. They are not council members but are UN member states.

Delegates of Egypt, Jordan, Syria and the PLO addressed the council before the debate was adjourned until Thursday.

They accused the Israelis of beating Arabs in the occupied West Bank of the Jordan River and in the Gaza Strip, of condoning the desecration of Moslem holy places and of planning Israeli settlements in the occupied territories.

Belfast Detective Killed by Gunmen

BELFAST, Nov. 2 (UPI).—Unidentified gunmen fatally shot a plainclothes policeman today in the Roman Catholic area of west Belfast.

Police said the officer, not immediately identified, was seated in an unmarked car only a few yards from the offices of Sinn Fein, the legally operating political front of the outlawed Provisional Irish Republican Army, when the gunmen fired a burst of shots into the vehicle.

The officer, hit six times, was dead on arrival at Royal Victoria Hospital 200 yards away.

Boy Slain, 11 Wounded In Violence in Turkey

ISTANBUL, Nov. 2 (AP).—Unidentified gunmen today fired on a group of students at the Technical University here, killing a 14-year-old and wounding three other youths, police said.

Five persons were wounded in Ankara and three in Izmir in clashes between rightist and leftist student gangs, police said. Campus violence in Turkey has claimed more than 50 lives in the last year.

Nothing's changed about Beefeater for over 150 years.

Some things you simply cannot improve upon. That is why, since 1820, Beefeater's secret recipe has remained unchanged. The same family has taken the same care in achieving the same unmistakable taste and inimitable character that makes Beefeater unquestionably the world's finest gin.

Beefeater from London. Unquestionably the world's finest gin.

'Brains' of $10-Million Theft

French Lionizing Confessed Bank Robber

By John Vinocur

PARIS, Nov. 2 (AP).—He leaves police headquarters and the crowd applauds as if he were a hero in handcuffs. He smiles, a childhood friend breaks through the barrier of cops, and claps him on the back, Good ole Albert!

"The only thing missing was that the bank director wasn't there to shake his hand," Le Journal du Dimanche wrote with only a trace of sarcasm.

Albert Spaggiari, the photographer who identified himself as the leader of the sewer gang which robbed the Nice branch of the Société Générale in July of $8 million to $10 million, has become a five-day sociological wonder: the sympathetic, clever, self-confessed crook who loves his wife, has to call in a neighbor to wring the necks of his chickens on his poultry farm, and signs *what is being called the bank job* of the century with a note that read, "Without arms, without hatred, without violence."

It is as if Spaggiari, in spite of his admitted fascist sympathies, has been able to transmit to many Frenchmen the joy and excitement that made Willie Sutton, the greatest U.S. thief, say he never felt so alive as when he was hitting a bank.

AP.

Albert Spaggiari

"It was a lark," Spaggiari said "When we finally got into the safe deposit vault, there was an explosion of joy. We worked in a mood of euphoria for two and a half days, every minute filled with good comradeship. No rush, no excitement. At the end we were going to write 'Thank you, Mr. Director,' but that seemed too ordinary. So we decided on 'Without arms, without hatred, without violence."

The newspapers seem to have agreed on an approved vocabulary list to describe the 40-year-old former paratrooper: brainy, relaxed, smiling, elegant, adventure-loving, free of tension, and the chief of the sewer boys. He smokes cigars while talking to the police, and always remembers to smile at the cameramen.

"My client," said lawyer Jacques Peyrat, "has been able to remain a simple, un-pushy person. In this way he's earned the consideration of the police and judges."

Like the Swedish bank robber Clark Olofsson, whose popularity there was held up as emblematic of Western corruption by the Soviet press, Spaggiari is being sketched as a bank robber who could never hurt a soul.

His wife, Audie, 32, told a France-Soir reporter that "guns are his passion, but he doesn't like to kill. Just the contrary, he's a pacifist, he'd never kill an animal. When I wanted to roast a chicken I had to call someone from the village to twist its neck. Albert always refused."

Lack of Understanding

And like Olofsson, who may have been the victim of bureaucratic lack of understanding, Spaggiari, newspaper readers are told, was denied what he wanted most—a child—because the state would not allow him to adopt one. The refusal was based on the fact that he was a former member of the banned Secret Army Organization, which tried to assassinate Charles de Gaulle during the struggle over Algerian independence.

Even Spaggiari's youth is being painted romantically, with accounts of how at 17 he tried to join the Sicily outlaw band of Salvatore Giuliano, the good-guy thief of the era.

The newspaper Le Figaro acknowledged that many Frenchmen felt favorably about Spaggiari, but reminded those who did of a statement by Jacques Médecin, the mayor of Nice, who said, "It's typical for an intelligent crook to hide his real nature behind an honest or quiet front."

What the police suppose Spaggiari is hiding is the names of accomplices they believed worked with him in the vast tunneling operation. Nine arrests have *been made in the case so far.*

Ethiopia Executes 23 Tried as 'Dissidents'

LONDON, Nov. 2 (Reuters).—Ethiopia has executed 23 members of the Marxist-Leninist Ethiopian People's Revolutionary party and "other dissidents," Addis Ababa Radio said today.

They were found guilty of murdering farmers, teachers, students and others, the radio said in a broadcast monitored in London. The executions followed trial by court-martial.

Unesco's Best Course

An effort by Communist states, backed by some Third World states, to gain international approval for their own narrow view of the role of communications in society is climaxing at the current United Nations Education, Scientific and Cultural Organization conference in Nairobi On the table is a comprehensive draft declaration whose central feature is: "States are responsible for the activities in the international sphere of all mass media under their jurisdiction." This draft, anathema to open societies with a free-press tradition, was approved at a preliminary conference in Paris last December by 41 of the 80 or so delegations there. Had the United States and 13 other Western nations not just walked out on an anti-Zionism resolution, it would have failed. But it carried and is now the centerpiece at Nairobi. Realizing that approval of this Communist-model draft—on top of Unesco's previous anti-Israel moves—would wipe out what's left of U.S. support for participation in Unesco, the U.S. delegation is trying to head the draft off.

* * *

There is, fortunately, some reason to hope the United States will succeed For awareness has spread in the West that the draft would legitimize internationally the principles of closed Communist societies, and contradict Unesco's mission to promote "the free flow of ideas by word and image." Western nations seem to have conveyed their concern to enough other countries, and to enough Unesco bureaucrats, including Director General Mahtar M'Bow, a Senegalese, to have made it likely that the Paris draft will be sidetracked.

Unesco's resolutions are not binding on member states, and so it normally proceeds by determinations of consensus. When matters become so politicized that they are brought to votes, as they were (by Yugoslav initiative) in Paris, then the essential purpose of this voluntary organization has been undermined. In Nairobi, where the feeling is strong that Unesco is hanging on for its very life, the only available way to build a consensus is to slide away from the Paris draft.

The Western interest in maintaining a Unesco reasonably faithful to its libertarian charter would thereby be served. If other states are not to heed the charter's principles in their own policies, then the least they can do is to leave them formally intact for those who hold them dear At the same time, practical steps can be taken in behalf of Third World states which are faced with real problems in organizing their communications but which do not have the resources or desire or self-confidence to solve those problems in a Western fashion. It would be wrong for Third World countries to place further controls over news sent from or to their territory by foreigners, for instance, but it would be well for them to be helped, if they so wish, to gather and disseminate more—and more reliable—news themselves. One does not have to accept Third World charges that Western news agencies are cultural and political predators in order to understand a country's reluctance to have its picture of the world, and the world's picture of it, drawn entirely by foreigners who are sometimes sympathetic and knowledgeable, sometimes not, but nevertheless are foreigners.

* * *

Unesco has another task: to end the crisis created by the Arabs' post-1973 attempt to convert international institutions, starting with Unesco, into Arab-controlled clubs. The attempt was successful only in Unesco. Arab-sponsored moves against Israel in that organization led, however, to suspension of financial support by various Western governments and to wide disruption of Unesco programs, many of which depend on voluntary individual participation. Under procedures arranged by Mr. M'Bow, the Nairobi conference will have the opportunity to let Israel return to a normal role so that the work of Unesco can go on. Whether this actually happens will hinge on the position of certain Third World swing states. By importing a political grievance into Unesco, the Arabs almost wrecked it By re-exporting that grievance, Unesco can undo the damage to itself, nullify a noxious international precedent and, not so incidentally, give a small boost to the prospects for Arab-Israeli peace.

THE WASHINGTON POST.

Rhodesia's Alternatives

It's commonly said that the alternative to negotiated majority rule in Rhodesia is, in turn, white collapse and black civil war. That sequence, producing a wasted land, would be bad enough, although a case can be made that 1) the whites of Rhodesia long ago forfeited their claim for a happier outcome and 2) that the blacks of Zimbabwe are as entitled as anyone else to have a bash at each other—after all, we Americans did. But there could be an even grimmer alternative. South Africa, hearing a Rhodesian SOS, perhaps seeing whites die on home television screens, might respond in force, half out of feeling for white kin and half out of the calculation that the coming racial war had best be fought at a time and place of Pretoria's own choosing. Crazy? Perhaps. But not out of the question. The Cubans, of course, would surely come in. One hesitates to finish writing out the likely scenarios. They're all appalling.

Contemplation of those stark choices would, we believe, substantially improve the prospects for agreement between the white Rhodesians and the black nationalists now negotiating, or rather, posturing, under British auspices in Geneva. And here is yet another set of considerations they could usefully regard. If the negotiation succeeds, the new nation can fairly expect significant outside support for its multiracial development. But if the negotiation fails, and especially if Americans see it to fail not as a result of Ian Smith's obstinacy but despite his good faith, then there will be a corresponding U.S. reluctance, we suspect, to help out. The U.S. initiative for negotiated majority rule enjoys broad nonpartisan support. Analytically speaking, we doubt that anything like the same degree of support could be mustered in the event that the U.S. initiative was grossly abused, by either blacks or whites.

It took a minor miracle to get the parties into the same hall in Geneva but it will take a major miracle to break the freeze that clutched the negotiation the instant it began. Ian Smith is clinging to what he, and he alone, imagines is a U.S. life preserver. The black nationalists are jockeying for position against each other; whether any of them controls the guerrillas who are increasingly active, is doubtful The British profess to see a glimmer of light but others see only a great gap on the key question of how and when the transition to majority rule will be made.

So great is the gap, in fact, that the United States seems to be trying to push Britain into accepting a more direct and even a physical role on the ground to bring the transition off. Preoccupied—to put it mildly—at home, the British are understandably wary. Yet the estrangement created by black distrust of white intentions, and white fear of black reprisal, is so overwhelming that something just that difficult may have to be attempted. As we say, the alternatives—not only civil war but foreign involvement—are appalling.

THE WASHINGTON POST.

International Opinion

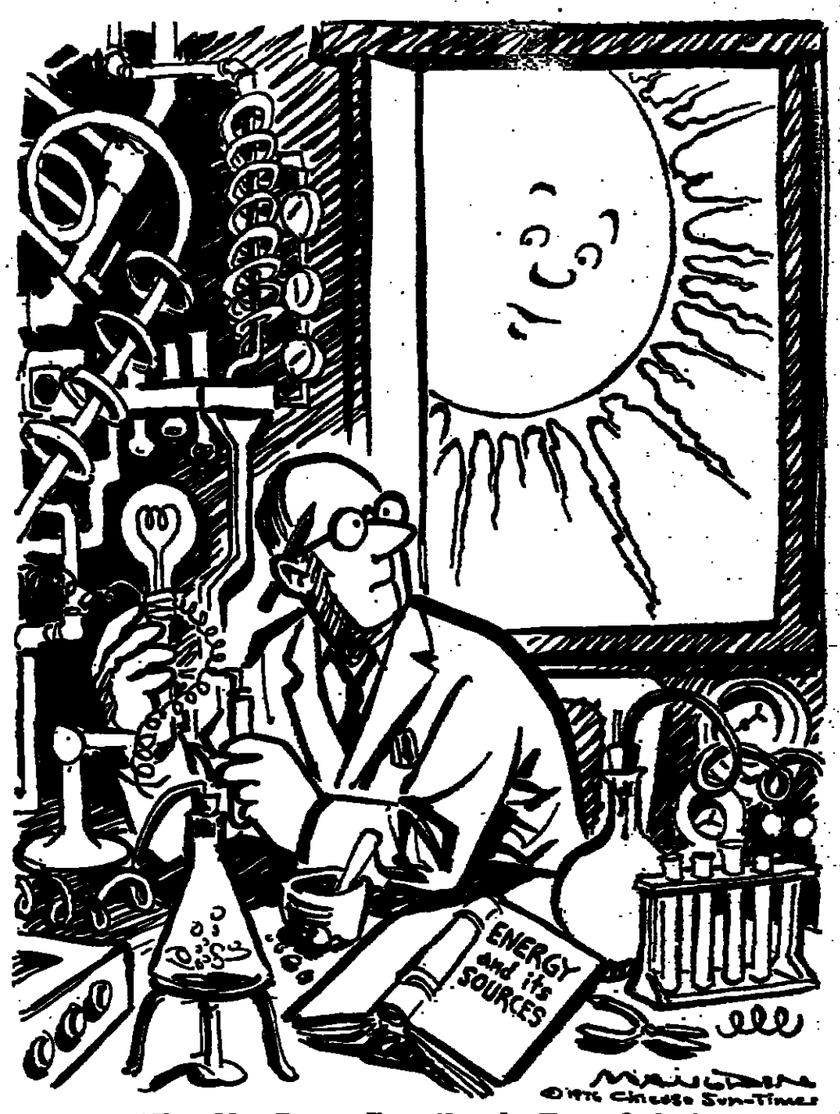
Land Reform in India

It is 25 years since the first announcement of land reform in India, but the project remained on paper until 1972, when a second attempt was started. On the strength of the overwhelming electoral victory Mrs. Gandhi had gained in that year, she put pressure on state governments to push ahead with reform without fear or favor. The aim was to limit how much land could be held by a single family, to distribute the surplus among landless peasants and to provide investment aids for facilities such as deep wells to help make the smaller holdings thus formed viable However, once again the plan bogged down in regional objections and administrative complications. So when Mrs. Gandhi declared her state of emergency 16 months ago she gave as one of the reasons for doing it the necessity to get things moving in land reform at last. During the first few weeks that followed a few hundred thousand acres were in fact redistributed and some progress was made in other directions. But in spite of all the talk, the best Agriculture Minister Jagjivan Ram can currently offer as a practical program is to declare 1976–77 the "Year of the Land Register." The big landowners of the Congress party are still at the brake.

—*From the Neue Zuercher Zeitung (Zurich).*

In the International Edition

Seventy-Five Years Ago



November 3, 1901

PARIS.—Considerable changes are now being made in the rooms on the first floor of the Louvre devoted to Egyptian and Greek antiquities. Their main object is to "bring up the smaller curiosities to the front," like German verbs in Mark Twain's suggestions for reforming the language, so that they may be visible to the naked eye.

Fifty Years Ago

November 3, 1926

NEW YORK.—Democratic Gov. Al Smith has been elected for the fourth time as governor of the State of New York. Latest estimates tonight placed his plurality at 500,000 votes in New York City. Nationally, the Democrats seem to have cut into the Republican majority, but all the returns are not in, so conclusions and rejoicing will have to wait

'Try Me, Doc—I'm Already Turned On.'

What the Election Means Abroad

By C. L. Sulzberger

ANKARA.—Although the dull U.S. electoral campaign featured many and often confusing appeals to the so-called ethnic vote, most foreign countries were genuinely indifferent about the results save for a few with very special interests, such as Greece which figured it might get more support against Turkey from a Democratic than a Republican president.

But this bored attitude abroad is due for an abrupt change before the fresh administration's first year in office ends. For it is perfectly clear that no matter who is chosen to start things off at the State and Defense Departments next January, major shifts in actual policy goals will gradually become identifiable. One may also at least hope that some reform and restructuring of policy methods will be achieved.

Growing interest in Third World relationships that became increasingly marked in Washington from 1973 on will unquestionably have to take a major leap forward. It would be sound for the administration to contemplate the wisdom of Peking's long-term policy of cementing Chinese relationships with developing nations everywhere.

Tardy

For much too long a time we have been tardy in that respect. The only things that really woke us up were the energy crisis following the OPEC embargo in 1973 and southern Africa's crisis following the Portuguese empire's dismantling.

Likewise, there is bound to be an increasingly visible moral tone in policy developments—bound to be, because the American people increasingly manifest a desire for it. This must ultimately imply more pressures against excessively dictatorial regimes in Latin America—although the United States is certainly not going to intervene forcibly for or against any ideological credo—and also gradual encouragement to U.S. concerns to reduce their activities in South Africa, unless its pace of racial reform perceptibly mounts.

Benjamin Franklin urged that honesty was the best policy. Morality, it can be argued, or at least an identifiable moral content, is the best foreign policy. Only when this becomes apparent to other nations will our position in the UN and our access to reasonably priced raw materials improve.

Democracy, as we know it, is a dwindling form of government on this crowded earth. If we wish to invigorate the system we so fervently prefer, we must take the lead in facing international problems such as population, food distribution, cheap financing of poor lands, etc. To date we have talked more than we have acted in these domains.

Defense Strategy

Finally, it is time the architects of our defense strategy should reconsider the appalling lag behind the Soviet Union and China with respect to passive nuclear defense programs such as mass evacuation plans and anti-fallout shelters.

Ignoring this facet of implicit danger in our contemporary world is stupid—as both Moscow and Peking openly acknowledge by their actions. In an emergency, as things are, we might find ourselves in the position of a family that spent the home insurance money on finer furniture instead of protecting the house.

One may hope, also, that serious consideration will be given to naming two cabinet ministers of equal rank to handle U.S. overseas relations: a secretary of state who stays home and tends shop, including congressional relations; and a secretary for foreign affairs who handles the ceaseless negotiations in which we are involved abroad.

In that way both our organization and application of policy will be effectively improved. Even Kissinger has expressed himself in favor of this idea.

Banal Speeches

Of course, the emphasis outlined above may not initially be greeted with enthusiasm by our European allies who have felt for years, primarily because of the long Vietnam war, that we tended to ignore them—despite banal speeches and adages.

This area—the sphere of NATO's military planning—is in wobbly condition with a new recession creeping over the horizon and a tendency to doubt U.S. intentions. Moreover, a combination of previous U.S. unilateralism and massive corruption by some of our leading firms has encouraged the Euro-Communism we both fear and condemn—the latter in a provocative, possibly counterproductive way.

One means of helping our friends is by insuring that the next crop of envoys we send—everywhere, but above all to our allies—is experienced, intelligent and professionally competent. All too often in the past we have made the mistake of half-emulating Caligula. That Roman emperor made his horse a consul. We have made too many horses' rear-ends ambassadors.

On the Crest of a Small Wave

By George F. Will

WASHINGTON—Electorates are regularly advised that the next election will decide whether there will be desolation and despair, charnel houses and spectral voices wailing in the air, muffled drums of tragedy, heresies, schisms, tempests, tumults, brawls, hurricanes, floods, plagues and shipwrecks, or whether the air will smile, the earth will exult, and the land will flow with milk and honey and nectar.

But the United States has come of middle age. It is hard to excite or disappoint. And neither candidate seems genuinely passionate about any issue. As columnist Murray Kempton has said, the absence of honest passion is an attribute of professional wrestlers.

Both candidates have experienced fits of generosity of the sort that seize characters in Charles Dickens's novels. In the final debate they were asked what sacrifices they would ask Americans to make. President Ford replied that the nation must stiffen its spine and bravely endure a tax cut. Jimmy Carter said that his administration would require less sacrifice than Ford was contemplating. This was an appropriate ending to a campaign that began with the candidates competing to see who could most emphatically assure farmers that national policy never will be allowed to interfere with the farmers' profitable business of alleviating the Soviet Union's food shortage.

An 'If'

The most interesting question of this political season is how this came to be a close election. Since 1928 Republicans have won just four presidential elections, twice with a war hero and twice when the Democratic party was drawing and quartering itself. If the 1968 election had been two days later—or if LBJ's Vietnam peace initiative had been made on the Saturday before the election rather than on Thursday; that is, if it had been made too late to allow President Thieu time to reject it before election day—Republicans probably would have held the White House only eight of the last 44 years, and then only thanks to a five-star general who could as easily have been elected as a Democrat.

The GOP limped into the 1976 campaign crippled by the worst political scandal in U.S. history. (Surely, the remarkable fact is not that Walter Mondale has tried to make an issue of Watergate, but that only he has tried, and that he has had to try so hard). Then came a bitter and protracted nomination battle.

Ford would have lost the nomination if, in February, 800 New Hampshire Republicans had switched to Reagan; if Reagan had begun his better television appearances, or his slashing attacks on Ford's foreign policies, a few weeks earlier. Having won the nomination, Ford saddles himself with a running mate whose campaigning has been something of an embarrassment. Yet today Ford and Carter are stumbling toward the finish line so close together that it is reasonable to believe that any number of other possible Republican nominees would have beaten Carter easily.

The Democratic candidate, like his rival, has been brought low by, among other things, a greater leveler, the grotesque campaign process.

During the 1952 campaign, Dwight Eisenhower, just seven years after commanding the greatest military force in history, sat in a New York television studio. The face that had felt the sting of sea spray off Normandy was now caked with pink makeup, and a flack was reciting a script for a commercial. Eisenhower sighed: "To think an old soldier should come to this."

The 1976 campaign has been about five times as frenetic and generally degrading as the 1952 campaign was. It has demonstrated what such a process can do to candidates whose public stature is rather less than Eisenhower's was.

Whoever wins will be washed into office by the smallest wave of enthusiasm since the wave that deposited Franklin Pierce 124 years ago. This matters. To the extent that the government has an engine, the presidency is it; to the extent that the nation has a political will, the President expresses it. The presidency is an inherently—meaning constitutionally—weak office. It is made formidable only by the respect and affection of a public that today feels little of either for either candidate. So, unfortunately, the field in which the weed of weak government will flourish has been ploughed and fertilized by this campaign. The harvest will come.

Peter Lennon From London:

The present explosion of panic over educational standards is related, like everything else, to the economic crisis.

LONDON.—After the deep baritone warning from Prime Minister James Callaghan two weeks ago about low standards of basic education in Britain, the air has become full of the falsetto cries of the packs who have for long been eager to rend the present informal system of teaching here and replace it with a system of rigid control.

The British educational system gives rare freedom to teachers as regards the methods they employ and the content of their curriculum. Neither local authorities nor the Department of Education can effectively interfere. The school inspector, that image of predatory authority, knows that it is as much as his peace of mind is worth to actually go and assess the performance of teachers or the achievements of classes throughout the school year. He seems to spend his time at a tactful distance in vague analysis of general trends.

Enjoy Experience

The result of this freedom has been a perplexing number of free-wheeling experiments which deliberately reject old systems of learning by rote, or learning for mundane practical reasons, in favor of creating a climate where Britain's 9.5 million pupils could enjoy the experience of learning. Surveys have shown that teachers tended to rank accuracy well below attributes such as learning to develop confidence, tolerance and a worthwhile set of values. They seemed to have gone into the business of shaping personality rather than simply nourishing the mind.

This was partly modern pedagogical thinking, but it contained some features, in more democratic guise, of the ancient tradition of turning out chaps who did not have to know much that was useful but would know the right tone of voice to use to get things done. Unfortunately there was little proof that the present approach was turning out beautifully balanced little ladies and gentlemen, but there was every evidence that it was delivering a generation of illiterates to the work force.

The present explosion of panic is emotionally related, like everything else, to the economic crisis. Employers have been clamorous in their complaints about the low standard of basic education they find in their young recruits. Mr. Callaghan decided that the country needed better educated people to help regenerate industry. He said that there was a need for a more technological bias in science teaching (rather than just playing with Bunsen burners and chemicals which provide a jolly stink, presumably). He wanted studies which would lead to practical applications in industry rather than just academic achievement. He warned that there was a danger in going so far in the direction of training people in liberal arts subjects from now on links between education and industry would play a key part in government policy.

It was a rousing call to smarten up the boys and pack them off to industry. It rather illustrated the fact that when they got there would be no jobs for them—not with over 1.5 million unemployed.

But a reform in the educational system is now a major issue.

If one were to choose the cloud over which most dissatisfaction has hovered it would be mathematics. It was the "new math" which helped intimidate parents into acceptance of experimental methods. They were persuaded for years that their little offspring was being turned into a new mathematician.

This is because when he came home from school and you asked him if he had any sums he would scornfully reject so primitive notion. What he was doing deep into was number theory, the binary system, computers and statistics. This was the sort of thing that could get you to the moon.

The parent who had not suffered mental paralysis at the thought of even old fashioned math was out of his depth. If asked to demonstrate, he could, with weightless ease, on a quick line of numbers progression, reduce half of them to zeros and scoop up what was left in a simple addition. Whether he did this or what this actually meant was a mystery to the parent. It gradually became clear that it was a mystery to the child, too. Indeed, a survey revealed that a lot of teachers were not too clear about what they were teaching.

The showdown must have come when parents took a close look at the binary system. In this, as one offspring claimed, one said "one" and no longer made two but zero, was unnervingly like the mumbo-jumbo music made by the decimalization of the pound sterling. That was much, particularly when it became clear that while the new math might be able to pilot him to the moon he could not be relied on to make his way around the supermarket without grave financial loss.

Great Battle

So the great battle began. The first cry, and one raised by the Prime Minister, was for a "core curriculum" which would be common to all schools. This would mean that teachers could no longer make up their own *bouillie* of colorful, playful projects.

But this apparently pragmatic suggestion carries a load of political dynamite. It would mean that for the first time teachers would be taking dictation from the central government. Teachers tend to see this as an attempt to return to the old pyramid of authority with government, school inspectors and dominating teachers on top, and the children snugly underneath. Certainly now that teachers, unlike the old days, are practiced in reading ideological hints into books set by government departments, there would be a lot of conflict.

Many teachers are no longer confident that the old experimental ways work. The products, themselves a product of the free-wheeling experimental system, may well be passing on their own inadequate basic skills to their pupils.

Letters

India's Population

Control of population growth is the single most important factor in the eventual health of Indian economy and survival of India as a viable nation. Although already tardy, the few measures recently adopted are perhaps the only advantage of the current state of emergency.

Mrs. Gandhi is against compulsory sterilization only because she does not wish to aggravate public opinion already very much against the corrupt and power-hungry war lords. If the Muslim minority in India cannot be prevailed upon to accept facets of a secular society, tolerated by the majority, should be free to emigrate.

After all, many people dislike curtailment of personal freedom, and so on and so forth, nothing is being done to assuage them. Sterilization should be immediate and compulsory throughout India as a national priority and so maintained until the masses are able to temper privileges with duties required for the functioning of any democracy.

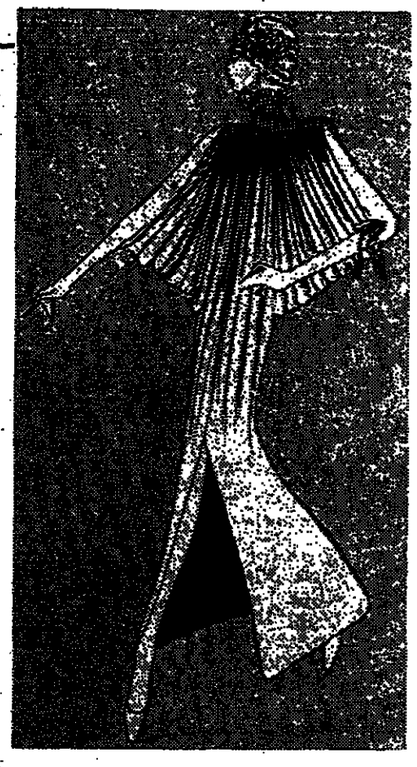
ASHION—eckoning ith London esigners

By Hebe Dorsey

NDON, Nov. 2 (IHT).—"We buy almost as much in En- d as we do in France," said aldine Stutz, the savvy presi- of Henri Bendel of New , whose store is a fashion ss and pioneer in promoting pean styles.

there are a lot of young, in- nsive clothes here," she d. "Enormous individuality at levels."

s Stutz is right. The Lon- an fashion season which end- here this weekend left you a strong feeling that the ish designers must now be oned with.



he big name designers showed heir own. Other ready-to-wear ections were in four different ns, of which the most or- ized was the mass-oriented don Collections at the Inter- ntinental Hotel. The most in- sting was the London De- ers Collection (27 designers ped at Café Royal). With idence and pride, they dis- ed unusual inventiveness, a arch of detail and a way with ics that proved that, qualify not necessarily mean mire- ing banality. Most of these igners were trained at one of ree, state-run art colleges.

Art Schools

nsidering that courses in gns and fashions are given to minimum of 25 students at a , the number of graduates impressive. The courses last m five to seven years and take alk sides of fashion designing. at is why, even on a mass el, the graduates contribute h a personal, cottage-industry

• The Ann Buck look—suede, other fabrics pieced together for summer.

• Classic from John Bates—the pleated evening dress finished with a ruffle.

People like Bruce Oldfield, Ja- nice Wainwright, Juliet Dunn, Ann Buck, Wendy Dagworthy and Benny Ong are already well known and are still growing. Others, such as Kay Cosserat and Ulla Heathcote, are making giant strides in knitwear.

The scene is still dominated, and strongly influenced, by the four stars of British fashions, Jean Muir, John Bates, Zandra Rhodes and Bill Gibb with Japa- nese Yuki coming up fast.

On the whole, British designers are still very much involved with mat jersey, with the queen, Jean Muir, still doing an A-plus job. Her new shape is a fuller, pina- fore dress that ties loosely in back. She repeats it with equal success in bois de rose jersey or silky suede. She still does her distingué, Wallis Simpson-style skinny dress, with the flat, scal- loped collar and cuffs. But she has added a new, narrow shape that swells from bust to hips in a soft hobble. "The kind of dress that make men absolutely potty," remarked Prudence Glynn, of the Times (London).

Where the elusive Miss Muir seduces, Bill Gibb and Zandra Rhodes dazzle. The fantasy look, that most European designers are now doing with frenetic but un- even success, started here with Gibb and Rhodes as the most brilliant exponents. Both of them have superb, uninhibited talent. In the past, Gibb has often been too exuberant. Now, he has de- signed a more disciplined, edited collection without losing his flamboyant spirit.

There is still a lot going on in the Gibb collection — floating scarves of cobweb gold lamés, multi-colored ribbon trimmings, quilted and encrusted boleros. But the most interesting were the romantic white eyelet embroidery dresses with lots of ruffles, pet- ticoats, aprons, camisoles and naughty peribboned pantaloons.

The other good idea: Hand- knitted jackets over big lace skirts, all done in matching, soap-bubble colors. Other big evening gowns were Empire. Worn with flat, patent leather shoes and ribbons criss-crossing up the legs they had the delicate quality of a Romney painting.

Rhodes

Zandra Rhodes is another ebul- lient designer, a free spirit that only strong personalities love and understand. This time, she show- ed one-shouldered chiffon dresses held by a diagonal quilted satin strap and strapless chiffon dresses, the bosom nested in a huge, pleat- ed satin bodice. Her sarong crepe dresses, that wrap around and around are equally exciting. But the newest of all her shapes is the crinoline dress. As always, her delicate prints on chiffon are the most poetic in town.

John Bates also came on very strong, with one of his most ac- complished and personal collec- tions. The Establishment designer, Bates designs with that special, to-the-manor-born touch. His daytime clothes included pants worn with big blousons and striking white shirts with high, stand-up Byronian collars. The big, leg-of-mutton sleeves and the generous spurts of knife-pleats are very Bates and he uses lots of them, including a pleated-all- over evening gown, its strapless top finished by a giant ruffle.

Yuki's entire collection was stolen a few days before he was scheduled to show. But he recoup- ed with more of his effortless draped dresses, done with a strong couture sense.

His favorite coat shape is still the T-shaped kimono, usually black but lined with vivid red satin—an ideal theater cover-up. His newest direction is the low- pleated blouson dress, done again with a minimum of seams.

The Changing Attitudes Toward Custody Battles

By Lawrence Van Gelder

EW YORK (NYT)—Court bat- tles over custody of children nothing new. But in cases ided in the United States in last year, courts have award- children to a stepfather over objection of their mother, who not considered unfit; to ndparents, although neither mother nor father was con- red unfit; and, in a case of gitimate twins, to their father. n each instance, the court as- ed that its action was pred- ed upon the "best interests" the child or children.

n New York recently, the te's highest court indicated t under certain circumstances mother's traditional right to ody could be superseded by er parents.

ecisions like these reflect not y an erosion of the traditional sumption in favor of mothers custody disputes involving ng children, but also an ef- by courts—acting in response ocial change and new theories parenthood—to decide, with re flexibility and sophistication n in the past, precisely what "best interests" of a child are a time when, as widely re- ted, more and more fathers asserting custodial claims, at sort of criteria are U.S. rts using to determine the t interests" of a child when her parent is unfit and each s custody? Or, for that ter, when the contest is be- en foster parents or relatives the biological parents?

hese questions are being raised answered mainly in terms parents disputing custody in courts through attorneys who argue the disputants' claims for what is in the best interests of the child. But there is a growing tendency to believe that the child should have indepen- dent legal representation. Some experts are advocating adoption of a children's bill of rights that would embody such protection.

Harry Fain, a lawyer in Beverly Hills, Calif., who served for nearly a decade as the chair- man of the custody committee of the American Bar Association, said that, in general, courts still shy away from depriving mothers of custody in the absence of good cause through the pre-school years.

"The real issues arise when the child is a little older and ex- pressing attachments and feel- ings toward the father," Mr. Fain said. Custody disputes arising at or after this time, he indicat- ed, have figured in many juris- dictions in the evolution of guide- lines for the determination of eventual custody.

"Michigan, in my opinion, has the best set of criteria so far," said Dr. Doris Jonas Freed, chair- man of the committee on divorce law and procedures of the family law section of the American Bar Association. Dr. Freed points out that, among other things, the Michigan guidelines give the real, or psychological, parent "a fair shake" against a biological parent in a contest between the two.

"And a child who has been in a foster home for many years and developed an attachment is given a fair shake when it comes to that so-called cliché: blood is thicker than water," Dr. Freed said.

PARIS FILMS

'Hollywood Cowboy'—Spoofing the Talkies

By Thomas Quinn Curtiss

PARIS, Nov. 2 (IHT).—"Holly- wood Cowboy" (at the Lux- embourg and at Elysées Point- Show in English) is not related to "Midnight Cowboy." But it bears a resemblance to Harry Leon Wilson's "Merton of the Movies."

Like the small-town grocery store clerk, Merton, who goes to break into pitchers, its central figure is a farm boy making the same pilgrimage in hopes of be- coming another Zane Grey. In- stead he ends up as a stunt man in horse operas. Mel Brook's "Silent Movie" has spoofed the mute cinema; this latest arrival sends up the early talkie days.

Jeff Bridges is the naïve youngster lured by a mail-order promise to transform him into a best-selling novelist. He tracks down the men who run the "college" in a remote Nevada town, mistakenly lifts their trea- sury and gets work as an extra in the movies, taking all the risks that more seasoned players pass up.

Howard Zieff, the director, and Rob Thompson, his scenarist, have extracted some hilarious sequences from their material.

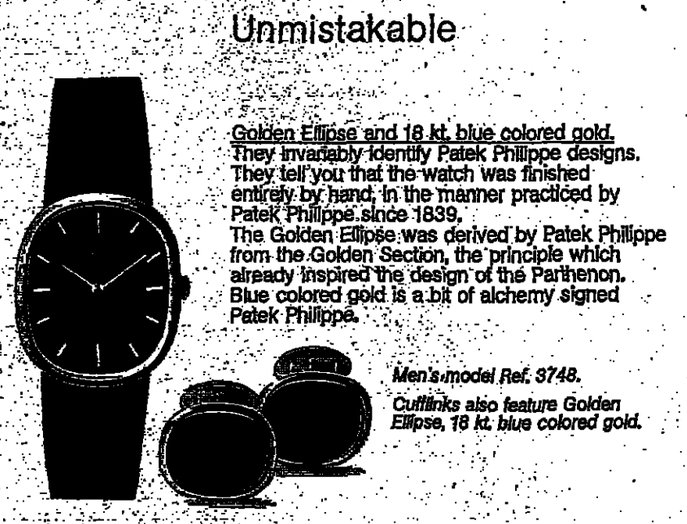
Bridges is a capable young ac- tor and as the innocent-at-large contributes an appealing perfor- mance. Andy Griffith as a de- moted Western star, Donald Pleasance as a pulp publisher with affectations and Alan Arkin as the vulgar studio czar aid in lifting "Hollywood Cowboy" above the average product. In all, a very funny film.

Jeff Bridges in film "Hollywood Cowboy."

Claude Sautet's "Mado" (at the Marignan, Français and George V) is exceedingly solemn. As it is a grave moral lecture on chi- canery and promoters, it has been received with great respect. It is unquestionably sincere—if that is a virtue—and it has been conscientiously directed.

The players are well chosen, matching their assignments neat- ly. The episodes of countless business conferences and shake- downs are convincingly pictured. A version of the family picnic scene, apparently a necessary in- gredient of recent French films about bourgeois activities, is in- cluded, presumably to fill in the humor shortage.

One never doubts the veracity of the script, but it is constantly in need of theatrical tonic, the carefully prepared, studied man- ner of its presentation draining it of energy. The main purpose is to disclose the devious prac- tices of hard-pressed financiers as they are seen through the eyes of the younger generation, in particular through those of the Mado of the title, a prostitute of whom a middle-aged double- dealer is enamored.



Michel Piccoli is the misogynic businessman and Ottavia Piccolo is the on-looking girl. In support are Jacques Dutronc, a recently acquired employee, who is also struck by the wicked ways of his elders; Julien Guiomar as an oily finagler, and Jean-Paul Moulinot as an aged capitalist with a taste for fine wines. "Mado" has some- thing to say, but what it says has often been said better—with far more wit by Pagnol in "Topaze," for example. Although it is a hit, and although there are several excellent perfor- mances, I cast a dissenting vote.

• • •

Claude Lelouch is a filmmaker of many admirable qualities. He can fill the screen with brilliant images and he understands, un- like some of his contemporaries, that moving pictures should be continuously on the move. His flair as a cameraman is perfectly displayed in his new short, "Rendez-vous," a motorcycle dash across Paris. As a scriptwriter, however, in his latest feature, "Si C'Etait à Refaire" (at the Publicis Saint-Germain, Biarritz and Pub- licis Champs-Elysées), he is so behind the times that he might reach out and touch hands with the author of "The Price She Paid," a Clara Kimble Young special of World War I days.

Here we have the poor working girl whom heaven fails to protect. She is seduced by her caddish boss who puts a sleeping draught in her Champagne. She is sentenc- ed to prison for his murder and her child grows up not knowing who his mother is. But, as you might suspect, there is a joyful reunion of mother and son when she is released 15 years later, and a rainbow finale awaits us. At least the traffic of this tear-jerker is swift and its interpreters pleasant company with Catherine Deneuve as the jailbird mother, Anouk Aimée as her liberated cell-mate, and Jean-Jacques Briot as the adolescent boy. All the unlikely situations are framed with pic- torial verve.

Unmistakable

Golden Ellipse and 18 kt. blue colored gold.
They invariably identify Patek Philippe designs. They tell you that the watch was finished entirely by hand, in the manner practiced by Patek Philippe since 1839.
The Golden Ellipse was derived by Patek Philippe from the Golden Section, the principle which already inspired the design of the Parthenon.
Blue colored gold is a bit of alchemy signed Patek Philippe.

Men's model Ref. 3748.
Cufflinks also feature Golden Ellipse, 18 kt. blue colored gold.

BONN, Nov. 2 (Reuters).—V German industrial produc rose an adjusted 1 per cent September over August a gaining the same amount August over July, an Econo Ministry spokesman reported.

FOCUS ON ENERGY

December 6, 1976
a special report by the
International Herald Tribune

The 1973 oil embargo brought about a spectacular shift in the energy plans of the Western world and has made a major impact on the economies of Europe and of the United States.

In its first in-depth study on energy, the International Herald Tribune will report on energy financing, the different sources of energy, and how the various Western governments are trying to tackle energy-related problems.

In addition to regular distribution with the newspaper, Focus on Energy will be sent by the International Herald Tribune to 1,800 leading industrialists and bankers throughout the world.

For details and advertising information contact:
Larry Sears
International Herald Tribune
21, rue de Berri
75380 Paris Cedex 08
Tél.: 225 28 90 / Télex: 280 509
or call your local Herald Tribune representative.
Addresses are listed on the back page.

This announcement appears as a matter of record only.

U.K. Denies Seeking World Loan

TOKYO, Nov. 2 (Reuters)—...ain has told Japan it has ...intention at present of seek... international loans totaling ...een $1 billion and $10 bil... to reduce the burden of ...ing's reserve status, Finance ...istry sources said today.

...BC report from London ...Friday said Britain wanted ...borrow this amount from ...wealthy countries including Japan to help in reducing obligations to foreign holders of sterling balances of £6.3 billion.

The report, and one on similar lines in Business Week magazine, gave sterling a brief boost on foreign exchange markets at the end of a week of record falls.

The Japanese sources said today that a senior British government official, whom they declined to identify, had made the disclaimer in reply to a Finance Ministry inquiry.

Authoritative sources in London have described reports of moves to arrange a $7-billion to $10-billion loan as premature, although Prime Minister James Callaghan said last week that he would like to be rid of sterling's reserve role.

IMF Gets Priority

British officials emphasized that whatever form action to reduce the liabilities of the sterling balances may take, priority for the moment is going to negotiation of the $3.9-billion credit Britain has applied for from the International Monetary Fund.

Alan Whittome, the head of an IMF team which is to make a detailed examination of Britain's economic situation, is now in London and is expected to stay for at least two weeks. British sources in London do not expect the loan to be approved before the end of the year.

One way the problem of the sterling balances could eventually be tackled is by reviving the Basel agreement of 1968, under which Britain negotiated a $2-billion facility with 11 major central banks and the Bank for International Settlements. This enabled Britain to offer a guarantee to Commonwealth holders of sterling against extensive exchange rate falls.

But the Japanese sources said today it would be difficult to renew the Basel agreement, because few countries would be interested in supporting sterling balances.

...apan TV Companies Agree ...n British Market Conditions

TOKYO, Nov. 2 (Reuters)—...esentatives of the British ...Japanese electronics indus... have reached a "most sat... factory" understanding on ...ditions in the British mono... ...me and color television mar... in 1977, a joint statement ...d today. It gave no details.

...the statement was issued by ...boru Yoshii of the Electronic ...stry Association of Japan ...d Lord Thorneycroft, chairman ...the British Radio and TV ...dustrial Council, at the end of ...wo-day conference.

...he two delegations also ex...anged information about spe...ic fields of the audio equip...nt market and the British ...ronics market in a construc...e spirit, the statement said.

...Industry sources said the main ...nference subjects were business ...ditions in Britain and the ...

...K. Money Reserves

LONDON, Nov. — (Reuters).—...ritain's monetary reserves fell ...55 million during October to ...7 billion, the lowest level since ...ry, 1971, the Treasury said to...

British market and Japanese exports of electronic equipment to Britain.

In another development, the Finance Ministry said Japan's letter of credit exports in October rose 12.8 per cent above the October, 1975, level to $4.06 billion, the 11th consecutive year-on-year increase.

The ministry said the October figure was up 9 per cent on September.

The export gain was attributable to increases in sales to all major regions, including the United States and Europe.

Seasonally improved exports of vehicles, mostly cars, and a sustained high level of exports of electrical equipment also helped the October figures.

Letter of credit exports to the United States rose 21 per cent from a year ago to $1.5 billion, and those to Europe gained 10 per cent to $536 million.

Machinery exports in October rose 20 per cent from a year ago to $2.31 billion, including a 25-per-cent rise in exports of motor vehicles to $1.02 billion and a 27-per-cent increase to $701 million in exports of electrical equipment.

Gloom Deeper At U.K. Firms

LONDON, Nov. 2 (AP-DJ).—Pessimism about the general business situation in Britain has risen sharply with the continued depressed level of manufacturing activity and the prospect of mounting costs, the latest survey of industrial trends by the Confederation of British Industry (CBI) shows.

Growing pessimism about the business climate was particularly pronounced among large companies, the study reported, for many companies were less confident that the value of total new orders over the coming four months will increase in line with forecasts in April and July.

According to the October quarterly survey 27 per cent of the respondents were less optimistic about the situation in Britain than in July, and 55 per cent said their attitude was unchanged. Only 18 per cent saw any reason to report an improvement in economic conditions.

The depressed level of activity in the manufacturing industry remained widespread, with 68 per cent of the firms working below capacity. The proportion, however, represented the third successive quarterly improvement in business activity, up 10 per cent from the severely depressed levels of January, 1976, the CBI said.

Over the July-October period, a majority of firms reported an increase in the value of output, although much of the increase was linked to inflation, the study indicated.

Only 35 per cent of the concerns posted an upturn in the volume of production, while the majority said output was either unchanged or below levels in April through July, the report said.

Nissan Motor Net Rises to Record

TOKYO, Nov. 2 (AP-DJ).—Nissan Motor Co. announced today its net profit in the first half rose to a record 41.97 billion yen ($142 million) from 19.4 billion yen in the year earlier period.

Sales totaled 1.002 trillion yen, compared with 826.08 billion yen in the year earlier half year.

The company said that favorable increases in exports of vehicles to the United States and Middle East, along with higher prices for the export vehicles, were behind the record levels of profit. The company said fixed costs also have declined.

Markets Closed

All stock exchanges and banks were closed Tuesday in France for All Souls day and in the United States for election day.

Goof by IRS Endangers Probe of Tax Avoidance

WASHINGTON, Nov. 2 (AP-DJ).—A bureaucratic blunder by the U.S. Internal Revenue Service is threatening to undermine the government's biggest tax-fraud investigations, a years-long effort to learn how wealthy businessmen, entertainers and some organized crime figures evade taxes by concealing income abroad.

The mistake, which the IRS maintains was committed unintentionally by low-level employees, delivered into the hands of four defendants in a major tax case 90 pages of secret documents outlining the government's progress and strategy in pursuing Project Haven, the code name for an intensive investigation into the use of offshore trusts for tax avoidance.

One defendant, Burton Kanter, senior partner in a Chicago law firm, obtained the IRS documents for $9 simply by filing a routine request under the Freedom of Information Act. The IRS gave him the material even though it identifies Mr. Kanter and his associates as chief among the talented lawyers who "purvey" the very tax-saving devices that the IRS is seeking to curb.

The IRS goof could have serious consequences. A damage analysis prepared in the chief counsel's office concludes that release of the documents endangers both successful prosecution of the fraud case against Mr. Kanter and his associates and the success of Project Haven itself.

In fact, Mr. Kanter is already using the government documents against the government. In Chicago Federal Court the four defendants recently filed a supposedly secret five-page IRS memo titled "current status and future plans" of Project Haven as part of a motion to suppress the government's evidence.

Judge Dismisses Part of Suit Against Top U.S. Drug Firms

MINNEAPOLIS, Nov. 2 (AP-DJ).—A major portion of a U.S. anti-trust lawsuit against five of the nation's largest drug manufacturers has been dismissed by a federal judge.

U.S. District Court Judge Miles Lord dismissed one of three counts in the suit that was filed in 1969. If upheld in an appellate court, the dismissal will reduce from $203 million to about $41 million the amount of damages the government could collect.

Judge Lord dismissed the section of the suit which alleges that three of the drug firms used deceit to help one firm obtain a patent on certain antibiotics, and then sold the antibiotics to government agencies at inflated prices.

Judge Lord dismissed the section of the suit which alleges that three of the drug firms used deceit to help one firm obtain a patent on certain antibiotics, and then sold the antibiotics to government agencies at inflated prices.

The three drug firms involved in the dismissal are American Cyanamid Co., Charles Pfizer & Co., and Bristol-Myers Co. The two firms involved in other portions of the anti-trust suit are Squibb Inc. and Upjohn Inc.

Judge Lord said the section of the suit was dismissed because the government was aware that fraud may have been used to obtain the patents before the drugs were purchased by federal agencies. The ruling is expected to be appealed.

The suit by the federal government is among more than 100 court actions that have been taken against the drug firms since 1968. More than $230 million have been paid by the firms to various plaintiffs, including $50 million to five plaintiffs that joined the federal government in the current suit.

The government is the last major plaintiff in what has been called one of the largest and most complex anti-trust suits.

U.S. Group Calls For Elimination Of Company Tax

NEW YORK, Nov. 2 (WP).—The corporate income tax should be eliminated and replaced by taxation of these earnings as part of shareholders' personal income in order to improve the U.S. level of capital formation, a symposium on capital needs has concluded.

The change in the tax laws was one of several recommendations included in the final report of the fifty-first meeting of the American Assembly, a non-partisan public affairs forum.

The assembly met under the auspices of Columbia University in Harriman, N.Y., for four days ending last Sunday and participants included representatives from government, business, the academic community and the press.

"In and of itself, a simplified tax structure would improve economic efficiency," according to the summary report. "Elimination of the corporate income tax and its replacement by taxation of corporate earnings (both distributed and undistributed) as part of stockholders' personal income would result in important efficiency gains."

"Integrating these two taxes would also lessen the bias in favor of debt as against equity financing," the report states. It also recommends that "the tax system should be further directed to equal treatment of all forms of income, correctly measured."

U.S. Auto Output Drops by 8 Per Cent

DETROIT, Nov. 2 (AP-DJ).—U.S. auto production in October dropped 8 per cent from the October, 1975 level, largely reflecting the United Auto Workers' union strike at Ford Motor Co.

U.S. auto makers built 689,707 cars during the month, down from 749,868 last year. Production was the lowest for October since 1970, when a strike at General Motors Corp. held down output.

Most of the latest decline was due to the strike at Ford, where auto production of 70,771 units was 65 per cent below last year's level.

U.S. Lends to Poor-Credit Nations

WASHINGTON, Nov. 2 (AP-DJ).—About two-thirds of the U.S. Export-Import Bank's outstanding loans to borrowers abroad at the close of 1975 were to buyers of U.S. exports in the "less creditworthy countries," a congressional group disclosed yesterday.

In a review of Exim Bank lending operations, the Congressional Budget Office said the agency has lent "substantial amounts" to borrowers in the most-creditworthy countries but "the structure of its portfolio indicates also that much of its activity is aimed at countries less likely to receive credit in the private market."

The Congressional Budget Office staff report was not critical of the Exim Bank on this point—in fact, the report noted that some supporters of the U.S. export credit agency argue that the bank is needed not only to overcome "real barriers to the supply of domestic funds of export financing, but also because private lenders do not want to raise credits to borrowers in some countries."

The congressional staff report indicated that the Exim Bank, as recently as December, 1975, considered the top-rated countries as including France, West Germany, Britain, the Netherlands, Sweden, Italy, Venezuela, Canada, Australia, Japan and Iran.

Some of the "poorly-rated countries," the report added, are "Sierra Leone, Afghanistan, Pakistan, Indonesia, Zaire, Korea, Argentina and Peru."

The reference to Korea was applied to South Korea, since North Korea is not eligible for Exim Bank loans.

The congressional report said that the Exim Bank had about $23.34 billion in outstanding loans and guarantees to borrowers abroad at the end of 1975; approximately 61.3 per cent involved credits to borrowers in less-creditworthy countries.

The report also said that Congress has used the bank as a "tool of foreign policy" for some time, by permitting or prohibiting certain types of transactions. The bank, for example, currently is prohibited from authorizing any new loans to the Soviet Union, although a few years ago Congress eased earlier restrictions to permit such credits.

European Car Makers See Slow Growth in Next Decade

By Barth Healey

TURIN, Nov. 2 (AP-DJ).—Top officials of several of Europe's major automakers said today they expect slower growth for their industry over the next decade.

With the exception of Fiat's president Giovanni Agnelli, they question whether they will be able to meet Japanese competition, and whether productivity can be raised.

The views were expressed during a press conference to open the Turin auto show. Mr. Agnelli did not take part in the conference, but spoke to reporters at a reception afterward.

Gaetano Cortesi, president and managing director of the state-owned Alfa Romeo company, opened the conference by declaring, "The Italian industrial sickness is low productivity."

His views were mirrored by Carl Eric Haggstrom, marketing director of the Volvo auto division, who said that in some older Volvo plants absenteeism is at 18 per cent, an Italian level.

This and other problems will keep the annual growth of European auto production to about 2 per cent through 1985, according to Nicola Tufarelli, director of Fiat's auto division.

Karlheinz Radermacher, research and development director for Bayerische Motoren Werke, expects an increase in competition among European producers. "This will become more harsh," he said, "and thus prices will be affected downward, which could have a negative effect on quality. In addition, restrictive legislation, not only in the tax area, is hindering our programs."

But he and others insisted that this competition must not lead to greater government control over the industry and protectionism. What there must be, he said, is "proper regulation of competition" and freer trade.

Mr. Agnelli, speaking at the reception, agreed, especially in regard to possible Japanese competition. "But we have to accept this, we have to have freer trade," Mr. Agnelli continued. "There is really no way for a European or American firm to compete with the productivity of the Japanese, but we have to accept this challenge."

MARITIME FRUIT WARRANTS
Notice to holders of Share Subscription Warrants of Maritime Fruit Carriers Company Limited ("MFC") Governed by Warrant Agency Agreement, dated as of August 31, 1972, among MFC, Maritimecor, S.A. ("Maritimecor") and Bankers Trust International Limited, as Warrant Agent ("Warrant Agent").
Manufacturers and Traders Trust Company ("Trustee"), as Trustee under the Trust Agreement, dated as of August 31, 1972, among MFC, Maritimecor and the Trustee hereby gives notice to each of the aforesaid warrant holders that the Secured Obligations (as defined in said Trust Agreement) were declared on June 3, 1976, to be immediately due and payable in accordance with the provisions of said Trust Agreement. The holder of each such warrant therefore has the right to surrender such warrant to the Warrant Agent for the purpose of requiring Maritimecor to purchase such warrant in accordance with the terms and provisions of the Warrant Purchase Agreement endorsed on such warrant. The obligation of Maritimecor to purchase such warrant is guaranteed by MFC. The Trustee has been advised that holders of warrants to purchase in excess of 75% of the aggregate total of MFC's Class A Shares which may be purchased pursuant to all of the warrants have to date surrendered or indicated their intention to surrender their warrants to the Warrant Agent. Each warrant may be surrendered by signing the Exercise of Rights Under Warrant Purchase Agreement form on the back of the warrant and mailing or delivering it to the Warrant Agent at its address at 56-60 New Broad Street, London EC2M 1JJ, England, accompanied by (1) a declaration by the holder thereof that such holder is surrendering such warrant for the purpose of requiring its purchase by Maritimecor in accordance with provisions of the Warrant Purchase Agreement endorsed on such warrant and (2) a specification of the name and address of the person to whom payments are to be made. Payments in respect of a warrant purchase obligation from funds held by the Trustee cannot be effected until the warrant has been properly surrendered to the Warrant Agent.

BOOKS

AMERICA'S WORKING WOMEN
A Documentary History—1600 to the Present
Compiled and edited by Rosalyn Baxandall, Linda Gordon, Susan Reverby. Random House. Illustrated. 408 pp. Hardcover, $ 15; paperback, $6.95.

NOBODY SPEAKS FOR ME!
Self-Portraits of American Working Class Women
By Nancy Seifer. Simon & Schuster. Illustrated. 477 pp. $10.

WORLDS OF PAIN
Life in the Working Class Family
By Lillian Breslow Rubin. Basic Books. 268 pp. $11.95

Reviewed by Alden Whitman

IN the last couple of years the American women's movement has shifted its attention from liberation to working-class women out of a realization, no doubt, that the earlier feminism was bounded by the professional and middle-class concerns out of which it was born. These concerns not only produced the powerful "The Feminine Mystique," but they also led women to ponder their special historical experience.

Studies of this experience, particularly in the United States, have brought women generally out of the shadowland they had for so long inhabited; but, once in the sunlight, it was perceived that women, like men, could best be defined by the work they performed. Furthermore, in questioning why appeals against sexism and in favor of equality made so little dent among the majority of women, it became evident that working-class women were different, that "sisterhood" was not a universal bond. Women workers, it was discovered, toiled under an overriding economic and social inequality.

The attitudes of women workers, it was found, are shaped by two basic factors: They sell the labor power for wages—often cut-rate wages—outside the home; and they also work "free" as housewives and mothers. They are the victims of a double exploitation. And the sexual division of labor in the factory and in the home leads to the chauvinism with which they are often treated by their husbands. If there is such a thing as a triple bind, women workers are in it.

Like everything else, this has a history, which "America's Working Women" sets out to chart coherently for the first time. As a result of diligent hunting, the book's editors and compilers demonstrate that women workers have left a record of their thoughts, concerns and activities over the years, and that an optimistic native radicalism diffused them. To comprehend the depth of this feeling one has only to read Leonora Barry's "Reports to the Knights of Labor," written in the late 1880s.

Ordinarily, documentary history is as dull as dishwater, but the freshness of this book's material—it includes dozens of first-hand reports like Miss Barry's—makes it as sparkling as a glass of champagne.

One of the book's implications is that women workers have strong feelings of frustration, an attitude that Nancy Seifer deals with in "Nobody Speaks for Me!" Armed with a tape recorder, Miss Seifer, a former ethnic specialist in the administration of former Mayor John Lindsay of New York, has put down the life stories of 10 working-class women. For most of them, it has been *one step forward, two steps back.* The battle for survival is barely won.

These oral histories are authentic testimony to the pervasive effects of women's liberation among women of the working class. Although they do not relate to most of its goals, what has seeped down is the importance of individual identity. Miss Seifer and her tape recorder have done an excellent job of showing how these women are battling, often against traditional value systems, to express themselves in some personal manner. Their frustrations are very real. As one woman recalls:

"I finally did go to college just part time for a couple years, but my parents didn't want me to go at all. I'd even have a year all together, but when I was going, they wouldn't help me out at all. I lived at home and paid for room and board.

"My mother thought I should get married, have kids and stay home. She was upset when I went back to work after raising my kids, and she was very upset when I took this job. It's not a woman's job! But she doesn't think woman should work period."

Miss Seifer attempts to let her interviews into focus in an introduction which can be skipped. It is full of jargonese, a special jargon. Miss Seifer has had the misfortune to acquire to the detriment to clear, pure English. I am certain, nonetheless, that Miss Seifer's book is in the right place, for she is an obviously sensitive interviewer and has achieved a sensitive rapport with her subjects.

Her women do come through and the book should be read for what they have to say. The women—and others like them—are quite evidently the real giant of the women's movement.

The portrait of everyday life in the working class that emerges from Miss Seifer's book is reinforced by Lillian Breslow Rubin's "Worlds of Pain," a sociological study of some 50 American West Coast families who live on incomes well below the national median of $12,000 a year.

Writing without cant and in plain English, Miss Rubin describes a grim world of work without pleasure, of marriage without communication, of life without love, of aspiration without fulfillment. In her family life is so barren that men and women do not even bother to grin and bear it. It is a landscape that perhaps only a Dickens could do justice to.

As Miss Rubin sees it, promises of American bounty and ways just elude the grasp of workers, who have been conditioned to prize such middle-class status symbols as color television sets and shiny motor cars. But their incomes, though, would sink into unending debt to obtain what they regard as the amenities of life. Their near-poverty is also emotional and political, in Miss Rubin's illuminating description.

Workers' wives are also affected by the myth of affluence. The envelope their low estate. The virtues they most esteem in a husband are all negative. "He's a steady worker; he doesn't drink, he doesn't hit me," they say. "Women," Miss Rubin observes, "generally suffer silently." And she adds:

"Despite all the publicity generated by the women's movement about the dissatisfactions with experience in marriage, working-class women continue to believe that their feelings are uniquely theirs. Few have any contact with the movement or the people in it, few feel any support for their struggle. They feel that quarter."

Compassionate and sensitive, Miss Rubin forces us to look unidealistically at the inner lives of American life in a new way. Her families are hard working but they are also disquietingly adrift, with only limited consciousness of themselves and their possible political strengths. The one they trust speaks to or for them.

Above all, these are real people. There are, to be sure, a few isolated good times. Miss Rubin concludes that for the working class, the price of building a family, of making a living for it, of maturing and maintaining the individuals in it 'costs worlds of pain.'"

Alden Whitman is a book reviewer for The New York Times.

BRIDGE — *By Alan Truscott*

Three hearts ended the bidding in the diagram and in view of the 30 part-score this was a game contract. West would have done well with the lead of the spade ace, badly with the lead of the club ace, but preferred a neutral diamond. South, naturally, won in the dummy with the ace and threw a club loser.

Without sufficient thought, South decided to play trumps immediately. He led to the ace, collecting the queen, and played the jack. East was now able to maneuver two spade ruffs to beat the contract. He took the heart king, led a spade, and after one ruff was able to play a club to reach his partner's hand for the second ruff.

South could afford to lose two trump tricks but not three, and it was vital to cut the defenders' communications in clubs. South suggested a sophisticated way of doing this: Leading the diamond queen from dummy at the second trick and discarding the club king.

A simpler alternative was to lead a club, either at the second trick or after taking the heart king. All these plays guarantee the contract against all but the two and four-one trump breaks, unless one defender has K-Q-J-x of trumps combined with a singleton spade.

Mitchell, Jones Carry Colts, 38-14, Over Oilers

By Dave Brady

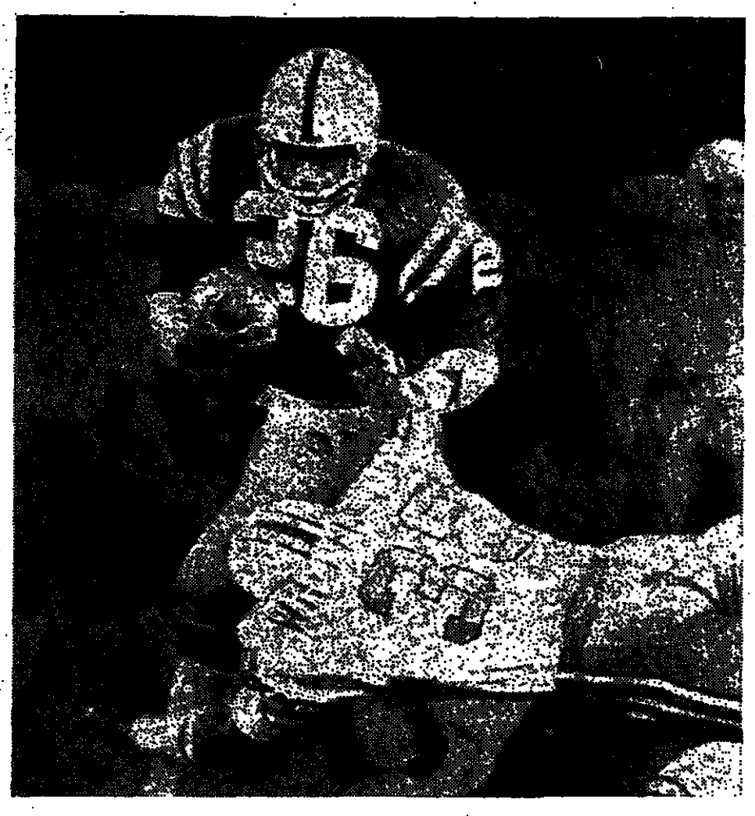
BALTIMORE, Nov. 2 (WP).—...was Baltimore by an avalanche ...night. The Colts' offense ...8 yards of it against the ...ston Oilers for a 38-14 vic... that put them two games ...ad of the New England ...pilots in the AFC East with ...-1 record.

...or Lydell Mitchell, it was a ...decide triumph as he set up ...first four touchdowns with ...yards in 28 carries and caught ...asses for another 46 yards.

...ert Jones was the catalyst of ...ll with his selection on plays ...f 19 completions in 28 at... ...pts for 197 yards against ...at was supposed to be the ...mid-best defense in the Amer... ...n Football Conference.

...ones turned over a 31-0 lead ...Bill Troup at the start of ...fourth quarter, after Roose... ...Leaks ran four and one ...d touchdowns and Don Mo... ...ley plunged for two one-yard ...res.

...hn Linhart contributed a 25-...rd field goal and reserve Ron ...s accounted for the longest run of all, 59 yards for a touchdown in the fourth quarter.



There was a sellout crowd of 60,020 that shouted itself hoarse with glee as the Colts' defense sacked the Houston quarterbacks six times.

This pride in the Colts' defense was the more savory because the Oilers came here leading the National Football League with 35 sacks to the Colts' 33. Houston trapped Jones once tonight.

The Oilers did not score until after Dan Pastorini, the starting quarterback who gave way to John Hadl at the start of the third quarter, returned to the game in the final period and passed 53 yards to wide receiver Ken Burrough for a touchdown and threw 53 yards to tight end John Sawyer to the Baltimore nine-yard line.

Joe Dawkins scored from the two-yard line to give the Oilers a slight aspect of respectability.

The loss represented the first time that Houston had dropped three straight games under coach Bum Phillips and it left the Oilers with a 4-4 record.

Colts' Lydell Mitchell gets first down before being stopped by Oilers' C.L. Whitington during game in Baltimore. Mitchell picked up over 100 yards rushing in first half.

UPI

NHL Canadiens Defeat Sabres, 3-2

Shutt Avenges Weekend Role

MONTREAL, Nov. 2 (UPI).—Steve Shutt cast the Buffalo Sabres in the role of a whipping boy last night when he avenged his costly weekend mistake against the Boston Bruins.

The 24-year-old left wing fired a pair of goals as the Montreal Canadiens defeated Buffalo, 3-2, for their league-leading 10th victory. Montreal now has 21 points, also tops in the National Hockey League.

Shutt's two goals gave him 12 for the year, tying him for the goal-scoring lead with New York Rangers rookie Don Murdoch.

"I gave away a goal to Boston Saturday, so it was time for me to make up for that mistake," Shutt said. "I could have even had a third goal, but I guess I played the puck too carefully."

Shutt, who had a career-high 45 goals last season, said, "If everything works out alright, and if everything falls into place, I'll set my sights on a 50-goal season."

Shutt scored first a 17:02 of the opening period to give Montreal a 2-0 lead. His 25-foot slapshot at 14:07 of the final session proved the winner. Mario Tremblay opened Montreal's scoring only 3:16 into the first period.

"It was a defensive battle all the way," said Montreal coach Scotty Bowman. "When you play the Sabres, you've got to check them closely. You can't allow that French Connection line (Gil Perreault-Rick Martin-René Robert) to get loose or get any chances. That's why I used Doug Jarvis, Bob Gainey and Jimmy Roberts out there a lot."

Islanders 3, Canucks 2

At Vancouver, Denis Potvin scored two goals and assisted on Clark Gillie's winner to pace the New York Islanders to a 3-2 victory over the Canucks.

The victory enabled the Islanders to break a deadlock for first place with idle Philadelphia in the National Hockey League's Patrick Division and take a two-point lead over the Flyers. Vancouver remained in third place in the Smythe Division.

Potvin, voted the league's top defenseman last year, brought the Islanders back from 1-0 and 2-1 deficits. Lorne Henning set Potvin up in front of goalie Curt Ridley for New York's first goal. Potvin completed a break with Billy Harris to tie the game at 2-2 heading into the third period.

Gillies scored the winner midway through the final period when the Canuck defense was trapped in the Islander zone.

Maple Leafs 6, Barons 3

At Richfield, Ohio, Darryl Sittler and Lanny MacDonald each scored a pair of goals while defenseman Borje Salming ran his assist total to 10 in his last three games by setting up four goals as Toronto took a 6-3 decision over Cleveland.

After Al MacAdam of Cleveland scored the first of his two goals on a power play that cut the Toronto lead to 2-1 at 14:51 of the first period, Sittler and MacDonald scored 26 seconds apart to give the Maple Leafs a 4-1 lead after the first period.

Sittler, who has combined with MacDonald for 18 of Toronto's 47 goals this season, scored with only 17 seconds gone in the second period and MacDonald ended the Toronto scoring at 11:42 of the final session.

Associated Press.

Buffalo goalie Gerry Desjardins lies stretched on the ice and teammate Jerry Korab is too late as puck enters net.

Pittsburgh's Dorsett Is Trying to Gain in the Other Election

By Dave Anderson

NEW YORK, Nov. 2 (NYT).—...e candidate was wearing a long ...wn leather coat over rust ...cks and a pale rust sweater. ...the Pittsburgh Airport and on ...e morning flight to New York, ...veral people recognized him but ...e candidate strolled unnoticed ...rough LaGuardia Airport into ...waiting limousine.

And now, with a gold No. 1 ...arm dangling from a thin gold ...ain around his thick neck, Tony ...rsett was having lunch with ...e New York football writers at ...e New York University Club ...sterday. Displaying his in...tive moves as a broken-field ...ner, the candidate hurried ...rough the fillet of sole but side-...pped the French fries.

He was not there for lunch. He ...s there for votes in the Hei...an Trophy election. Johnny ...ajors, his coach at the Univer...y of Pittsburgh, and Al Ro...no, a middle guard big enough to win the Gallic wars by himself, also were there along with Dean Billick, the sports information director, alias Tony Dorsett's campaign manager. All over the room were stapled sets of statistics and accolades titled "Heisman Trophy candidate" that Billick had carefully placed alongside each napkin.

"It's an honor," Dorsett was saying now in his smooth manner, "to have Heisman put in front of his name."

Too Close

For several weeks the election appeared too close to call. But during the weekend, T.D. (the perfect initials for a candidate) ran for 241 yards against Syracuse while Ricky Bell, the candidate at the University of Southern California, aggravated a hip injury while gaining only 78 yards. Dorsett now has run for 1,313 yards this season, to 1,154 for Bell, and suddenly T.D. appears to be a winner.

"I can't say I'm happy Ricky's hurt, I respect him as a person and as a player," T.D. said, "but it's good to know I'm first."

Dorsett complained last year when Archie Griffin, then at Ohio State, became the first two-time winner of the Heisman.

"If I continue to have the year I'm having," T.D. said, "it would be more distasteful to me than last year if I didn't win."

The deadline for votes is Nov. 30, set by the Downtown Athletic Club Committee. That deadline is too early. Most of the 1,125 sportswriters and sportscasters eligible to vote will have cast their ballots before the Pitt-Penn State and USC-Notre Dame games the previous weekend. Another week would produce a more valid vote, if a valid vote is possible.

Each Is Valid

Many voters are influenced more by publicity than performance. Dorsett and Bell each is a valid candidate, two of the best runners in college football history, but Billick and the USC campaign manager, Jim Perry, are working to make sure the publicity equals the performance.

"I've spent about 60 per cent of my time this season on one player," Billick said. "Interviews, letters, phone calls."

And when President Ford's aides asked for a meeting with Dorsett last week, Billick obliged. Or obeyed. Jimmy Carter didn't try for the football vote by having his picture taken with Dorsett and Bell, but Carter is a tennis player. Ford was a football player at Michigan and he chatted with Bell on the USC campus.

"I'd rather run against Jimmy Carter," the President had said, "than against Ricky Bell."

At their brief meeting at the Pittsburgh Airport last week, Dorsett presented the President with his "38" jersey and with a "Pitt No. 1" button.

"He told me," Dorsett recalled, "'You're not going to try to beat out my team for No. 1, are you?'"

Billick believes that the Heisman Trophy should be determined on two issues—one, that Dorsett is the career rushing leader in college football with 5,447 yards; two, that Dorsett has done more than any player in college football history to turn a program around.

"Pitt was 1-10 the year before he came," Billick said. "At USC, at Ohio State, at Oklahoma, only the names change. The game when Ricky Bell originally hurt his hip, his sub scored four touchdowns."

The week before, Bell had run for 347 yards in 51 carries against Washington State on a Saturday night, USC's fourth Saturday night game. Much of Bell's yardage this season didn't appear in eastern newspapers until the Monday morning roundups.

"Ricky was running in the dark," Jim Perry said over the telephone. "It hurt his exposure."

Perry also has two Heisman Trophy issues—one, that Bell has outrun Dorsett over two seasons (3,111 yards to 2,867) and two, his versatility. As a freshman, Bell was a linebacker. As a sophomore, he was a blocking fullback. But his hip injury also scrubbed Bell from sharing this week's Sports Illustrated cover with Dorsett.

"That cover is supposed to be a jinx," Bell says. "But it jinxed me before I was even on it."

But to both Dorsett and Bell, the Heisman Trophy can't be all that important. When they were roommates in Chicago while there to pose for Playboy magazine's preview All-America, they never mentioned the Heisman Trophy.

"We were at the Playboy Club," recalled Dorsett, "and we had other things on our mind."

European Cup Soccer Takes Last Fling Before the Winter

By Brian Glanville

LONDON, Nov. 2 (IHT).—The UEFA Cup apart, European cup football has its final fling tomorrow before plunging into its customary winter hibernation. The UEFA Cup is afflicted with the unreal and swollen complement of 64 teams, which means that a third round is necessary. The European Cup and the Cup-winners' Cup will resume in the quarterfinals next March.

Who will still be there? Certainly Dynamo Kiev, whose 4-0 home victory over PAOK Salonica was what I expected, and who will certainly not give four goals away in Greece. How well they will do thereafter will in large measure depend on how much use the Soviet international team intends to make of its players for World Cup matches. Meanwhile, I think one should salute the resilience of a team which, only a few months ago, seemed to be virtually on its knees.

West Germany may well have two survivors. Bayern Munich, which has been bewilderingly inconsistent this season, lost 2-1 away to the Czechs of Banik Ostrava, who should have won by more: How often has that been said of Bayern's home-leg conquerors in the European Cup? But in Munich, I have little doubt that Bayern, which is nothing if not a team for the great occasion, will pull itself together to sink Banik.

Without Jensen

Farther north, Borussia Munchengladbach, excellent 2-1 winners away against Turin, doubtless will be doing the same against the Italian club. Pecci's broken leg robbed them of a vital inside-forward in midfield, and Borussia has plainly learned to live without Henning Jensen, who may find himself out of the Cup, together with Real Madrid, when it plays tomorrow night in Bruges. The well-knit, physically powerful, intelligent Belgian side gives very little away at home, and the admirable Lambert may give it the goal or goals it needs.

The match in Eindhoven, which pits the Dutch champions, PSV, against Saint-Etienne, is less easy to forecast. Will it and the tie follow the pattern of last season, when PSV was held to a draw after losing by a similar score in France? It might be that French football is in a buoyant mood and form at the moment and PSV has labored a little this season. Piazza, that resilient Argentinian, helped by the goalkeeping of Curkovic and the versatility of Dominique Bathenay, may again be able to keep PSV and the dashing Van der Kerkhof twins at bay.

I expect Liverpool, the English champion, to come through against Trabzonspor, the resourceful and surprising Turkish team that beat them, 1-0, in Turkey. But Trabzonspor has an excellent defense, one which conceded but 14 goals in its league championship season, and Liverpool may suffer for its lack of midfield flair.

The UEFA Cup provides several interesting games, none more so than the return between Juventus, previously conqueror of Manchester City, and Manchester United, in Turin. United, like City, takes a fragile one-goal lead to Turin, but it is more likely than City to come out and attack Juventus. What it lacks is Juventus's great experience of European football, and for all the buoyancy of Coppell and Gordon Hill—the goal-scorer in Manchester, on the wings—this may decide things.

Youth Becomes the Favorite For Saturday's International

LAUREL, Md., Nov. 2 (UPI).—Youth, the French Derby winner owned by Nelson Dunker Hunt of Texas, was the early favorite among 10 horses from seven countries officially listed for the 25th running of the Washington, D.C., International at Laurel Race Course on Saturday.

Youth is one of three horses from France, there are two from the United States and one each from England, West Germany, Brazil, Norway and Japan.

The Soviet Union initially accepted an invitation to enter two horses, but unexpectedly withdrew last week, giving no reason for the decision.

The other two French entries are Ivanjica, winner of the Arc de Triomphe, and On My Way, winner of the Prix du Conseil de Paris, with no jockey selected yet. England's entry is Rose Bowl, owned by Mrs. J. Engelhard and to be ridden by W. Carson.

Noble Dancer, winner of the Oslo Cup, will give Norway its first representation in this race, with Lester Piggott aboard. From Germany it will be Windwurf, with J. Jednaszewski as jockey, and Brazil will be represented by Janus II, winner of the Gran Premio Brasilia, with 6. Almeida as jockey.

Japan's entry is Fujino Panshia, winner of the Emperor's Cup, with S. Ohsaki aboard.

The U.S. horses are Improviser and Effervescing.

Since the race's inception in 1952, 23 nations have been represented. Visitors have won 13 runnings, with 11 won by U.S. horses. France has won eight races, including the last three. Last year, the French finished first, second and third, with Nobiliary, Comtesse de Loir and On My Way, in that order, over the 1 1/2-mile turf course.

Melbourne Cup

MELBOURNE, Nov. 2 (UPI).—Van de Hum, a late-installed favorite, made light of a heavy, rain-soaked track today to win Australia's classic distance horse race, The Melbourne Cup, by three quarters of a length over Golf and Black. Kyathera and Reckless were third and fourth, respectively.

NBA Cavaliers Triumph in 'Strange Game' Against Nets

UNIONDALE, N.Y., Nov. 2 (UPI).—There was something about the situation that made Bill Fitch uneasy. The Cleveland Cavaliers' coach had brought his unbeaten team to New York last night to play the faltering Nets, a team demoralized since the sale of superstar Julius Erving to Philadelphia. Somehow Fitch knew it was not going to be easy.

"I feel like we're walking into a trap," Fitch said before the game.

For three quarters it looked as if Fitch was going to be right. But, as New York's Nate Archibald said afterward, "The game isn't played in three quarters and that's where we lost it, in the end."

The Cavaliers rallied from a 64-54 third-quarter deficit to defeat the Nets, 82-75, for their sixth victory without a loss, by far the best start in the team's seven-year history. Before this season Cleveland had never won a season-opener.

The game was not an artistic success. Fitch called it "a strange game."

Dick Snyder, whose three-point play with 1:43 remaining put Cleveland ahead, 77-75, said he hadn't seen the usually sharp-shooting Cavaliers take so many poor shots.

"So we have to feel fortunate," Snyder said about the victory.

Backup center Jim Fox scored eight points in the second quarter to help the Nets break a 16-16 tie and take a 38-32 halftime lead. Cleveland made only 13 of 38 shots from the field and committed 15 turnovers while scoring its lowest first-half total since getting 28 against Milwaukee in a 1971 game.

Kings 105, Knicks 101

At Kansas City, guards Ron Boone and Bryan Taylor combined for 40 points and the Kings overcame a lethargic fourth quarter for a 105-101 victory over the New York Knicks.

Boone, who finished with 22 points, scored his only two points of the fourth quarter on a pair of free throws with 14 seconds to play for the winning margin. Taylor had 18 points and 6 steals, and forward Scott Wedman added 17 points and 9 assists for the Kings.

Cleveland's Dick Snyder grabs rebound from Jan van Breda Kolff of New York during the Nets-Cavaliers match.

Hayes Has 2-Stroke Victory n Pensacola Golf Tourney

PENSACOLA, Fla., Nov. 2 (UPI).—Mark Hayes fired a five-under-par 66 yesterday to come ...m two strokes behind and win ...e $125,000 Pensacola Open by ...o shots.

Hayes, who earlier this year ...n the Byron Nelson Classic, ...t four birdies on the front ...ne and added two more on the ...k nine. His only bogey was on ...e par-four 15th but he re...nded with a birdie on the ...th and pars on each of the ...al two.

The victory was worth $25,000 ...r Hayes, bringing his total ...nings for the year to $151,689. ...Lee Elder, the tournament win...r in 1974, finished second at ...ne-under-par for the 72 holes. Frank Beard shot a 70 and fin...ed tied with Tom Purtzer for ...rd with a six-under-par 278. ...rtzer shot a 69. Tied for ...rth were George Archer, Chi ...e Rodriguez, Jerry McGee and ...ll Rogers, all with 279.

Wints Falters

Gary Wints, who went into the ...al round leading by a stroke, ...ot a 75 for a 72-hole total ...282, tying him for 17th place ...d earning him only $1,625.

Hayes's first birdie came on a ...-foot putt on the par-three ...ond hole. He sank a two-...ter on the fifth hole for a ...ird-three, then dropped in a ...2-foot putt on the next hole, ...par-five. He finished the front-...ine by holing a six-footer on the ...par-four ninth hole.

After turning in 31, he sank a ...5-foot putt for a birdie on the ...par-five 14th, then three-putted ...the par-four 15th for his only ...bogey. He clinched the victory ...with an eight-foot birdie putt ...on the par-three 16th hole.

Elder shot a 68 for his total of 277. He birdied the first, fifth, 10th, 12th and 18th hole, relying on his short irons except for two 15-foot birdie putts. He bogeyed only the par-five 14th when his drive landed behind a tree.

Conteh to Defend Title

BUENOS AIRES, Nov. 2 (Reuters).—John Conteh, Britain's World Boxing Council light-heavyweight champion, has agreed to defend his title against Argentina's Miguel Angel Cuello on Dec. 9, Cuello's manager said here.

...ngsurin to Defend

BANGKOK, Nov. 2 (AP).—...iland's Saensak Muangsurin ...o recaptured his world junior ...erweight boxing title from ...in's Miguel Velasquez during ...weekend, is to defend his ...e against American Monroe ...oks within six weeks, his ...nager said.

Observer

The Exclusive Club

By Russell Baker

NEW YORK—I wish our public scolds would ease up on the poor devils among the electorate who didn't vote.

If you are one of these nonparticipants, you have hardly been able to open a newspaper or light your tube lately without being subjected to the abuse of high-minded experts on the democratic condition.

Baker

All this nonvoting, they say, will be the end of American democracy if it isn't stopped. I doubt it. I think American democracy will go on pretty much as it always has, for better or for worse, leaving us, as usual, at the mercy of providence and maniacs. A big turnout? So much the better, of course.

The facts about nonvoting are more interesting than the critics suggest with their talk about public cynicism and callousness toward the democratic tradition.

One fact is that the American system has long operated on the assumption that it is unhealthy to have too many people voting. Another fact is that, to prevent this unhealthy situation from arising, the American system has always deliberately made it very hard for people to vote. It still does.

The system, of course, is made up of the persons elected to operate the system. Once a person gets elected, why should he wish to change the composition of a constituency which has been wise enough to put him in office?

Quite naturally, he reasons that any electorate that elects him must be the best of all possible electorates. He becomes uneasy when someone proposes that strangers be admitted. Such people could be ignorant, hotheaded, foolish, dangerous. The law must be fashioned to guard the republic against such people.

And this, of course, is the way the law is still fashioned. The more blatant methods for keeping people from voting have been gradually tucked away in the history books, but the subtle devices for keeping the vote small continue to do the job.

The aim of these devices is to make it hard for people to vote, to make it so hard that the politicians will not have to fret about any but the most resolute of citizens.

Among the obstacles to voting are the registration laws. To the timid classes these pose difficulties of which our more learned commentators seem unaware. You have to know that you can't vote unless you are registered. Many people don't know that.

Many of those who do know it don't know when, where or how to register, or how to find out. The registration office may be open only during a person's working hours. Getting there may require a trip across town, hours off from the job.

Persons terrified of bureaucracies—and let us not casually dismiss such people as insensible—have the additional fear of realizing that when they have lost a couple of hours in pay, arrived across town and found the registrar's office, they may have to endure the insolence of office.

If the American system really depended upon heavy voter participation, it would be easily obtained. The use of registration as a device to prevent people from voting can be abolished.

A bill calling for registration by postcard was before Congress this fall. It would have made it easier for many more people to vote. Not surprisingly, Congress let it die.

In a country as big as ours, there is no reason why the voting should be confined to a day.

There is no reason why the business must be settled within a constricting time span. An election is not a football game. The tight time limit on voting gives a big advantage, however, to the organized candidate with the resources to get his vote to the polls. We are not likely to see this fellow voting for amendments which will destroy his advantage.

Not likely. American politics has flourished on the small vote. It is unnatural to expect the system to change now simply because Messrs. Carter and Ford have less to stimulate the nonparticipants than most previous candidates they haven't voted for or against.

People who didn't make it to the polls needn't feel rotten about it. The small vote is as American as a "closed for lunch" sign at the voting-registration office at city hall.

Champ Eric Elfman relives the fatal moment when the phone rang, announcing 'thrill of lifetime.'

LAT.

Exclusive! Champ Reveals Winning Secrets

By William Overend

LOS ANGELES—Eric Elfman is just a shade over 18. He has a ready smile, a way with words, and he knows a good thing when he sees one.

Recently he won the Great American Cliché contest, which entitles him to a week of fun in the sun for two at the fabulous Fontainebleau Hotel in Miami Beach.

"I couldn't believe it when I heard the news," Elfman recalled this week in a rare, exclusive interview. "It was like a dream come true."

The tension had been mounting for months. Elfman had seen an ad for the contest at a bookstore. It was a promotion for a book called "The Great American Cliché" by Lawrence Paros.

"I didn't want good fortune to pass me by," Elfman said. "I guess you could say I was ready when opportunity knocked."

Elfman didn't waste any time getting started. He hopped a bus back to his apartment in Westchester, just a stone's throw from the Los Angeles airport.

As he bent over his typewriter, his mind teeming with clichés, he could see the giant silver birds lifting slowly off the tarmac. But Elfman barely noticed. He was buried in his work.

This is what he wrote, the fruit of his labors, a brief but poignant detective story that helped make Elfman what he is today:

It was a dark and lonely night when she walked into my office.

"I'm in trouble," she said.

Suddenly the phone rang.

"This time we mean business," the voice on the other end barked. "Lay off or I'll send over a couple of my boys"

The line in my hand went dead.

When I looked up, she had disappeared. But that's the way it goes in this business. Win a few, lose a few. The case was closed.

Somewhere outside, a dog was barking.

Looking back on it all, Elfman said the idea for his winning entry came to him out of the blue. He didn't think he had a Chinaman's chance of winning. Clichés from all corners of the country were flooding the offices of the Workman Publishing Co., in New York.

"I was a mere lad, just a face in the crowd," Elfman said. "But I hoped against hope. I gave it my best shot. That's really all any man can do."

For Elfman, it was "the thrill of a lifetime" when he ripped open the letter announcing his triumph. His beaming parents were proud as peacocks, but Elfman himself took it all in stride.

"Fame is fleeting," Elfman said. "I'm not going to rest on my laurels. I'm going to keep my shoulder to the wheel and my nose to the grindstone."

Elfman's ultimate goal is a career as a filmmaker. He and a friend produced one movie when Elfman was attending Westchester High School. It was called "Attack of the Killer Peanuts."

"We lost $680 on it," Elfman said. "But there are many pitfalls on the road to success. It's a long, hard journey to the top, and it's lonely when you get there. But I guess there's something inside me that just keeps driving me on."

Elfman's busy as a beaver these days, preparing for his trip to Miami Beach, pursuing his studies in cinema at the University of California at Los Angeles and working weekends as a stock clerk at a discount store.

"I've always said a little hard work never hurt anybody," he said. "If a job's worth doing, it's worth doing right." Nonetheless, his heart is set on "getting away from it all" once he has his bags packed and is actually on his way to Miami Beach. Not only will he be lounging in luxury on the beach, he'll also be wined and dined at such fabled nightspots as he Club Gigi and the Boom Boom Room.

"I haven't decided who to take with me yet," Elfman said. "All my friends have been acting real friendly since I won. You know what they say: With friends like that, who needs enemies?"

Outside Elfman's apartment, gray clouds scuttled across the sky. Occasionally, the din of the rush-hour traffic wafted up through the open windows.

The atmosphere inside was warm and friendly. There was a temptation to linger, but my nose for news told me it was time to go. "Miami Beach is a nice place to visit, but I wouldn't want to live there," Elfman said as I headed for the door.

"Yeah," I mumbled.

The door shut behind me. But that's the way it goes in this business. Win a few, lose a few. The interview was over.

Somewhere, outside, a dog was barking.

To hear Fortune magazine tell it, billionaires are a vanishing breed. The exclusive membership of the club of the very, very rich has shrunk in recent times (J. Paul Getty and Howard Hughes having died). There are now only two billionaires in the United States: Daniel Ludwig and John MacArthur. Ludwig, who built his fortune in shipping beginning with a tugboat fleet, is one of the largest independent shipowners in the world. MacArthur's insurance fortune was based on Bankers Life & Casualty Co. "I work for companies that are rich as hell and I own all the stock," he said. "So maybe that makes me rich."

Vera Zorina, the former ballerina and stage and screen star, becomes artistic director of the Norwegian Opera company next Aug. 1. Miss Zorina, 59, will succeed Gunnar Bronvoll, who has been doubling as artistic chief and managing director. He'll keep the latter post.

* * *

Ellen Proxmire, wife of U.S. Sen. William Proxmire, D-Wis., decided to pay a call on her daughter, Mary Ellen Sawall, an assistant city attorney in Milwaukee. As Mrs. Proxmire put it she just "came to see what Mary Ellen does for a living." She walked in the door to her daughter's office and got punched in the face. A charge of disorderly conduct has been filed against Merrall Czerwinski, 48, who had been waiting for a hearing—also on disorderly conduct charges. Czerwinski later said he did not know that the woman was Mrs. Proxmire. But he offered no explanation. As for Mrs. Proxmire, "I never was so surprised in my whole life."

* * *

Britain's Royal Ballet has lost its two leading dancers for the pre-Christmas season. Anthony Dowell has been ordered by doctors not to perform for several weeks—he has a neck sprain. And Antoinette Sibley dropped out three weeks ago with a knee injury.

Carter Elected by Whisker

Ford Concedes, Congratulates Him

NEW YORK, Nov. 3 (NYT).—Jimmy Carter won the U.S. presidential election, narrowly defeating President Ford by sweeping his native South and adding enough Northern industrial states to give him a bare electoral-vote majority by early this morning.

Mr. Carter proclaimed victory in Atlanta at 4 a.m., after the tension of a long count and a close race, saying:

"I pray that I can live up to your confidence and never disappoint you."

He praised President Ford as a formidable opponent and "a good and decent man."

Mr. Carter, a former governor of Georgia, won the presidency with a 3-per-cent lead in the popular vote, and with at least 272 electoral votes in his column.

Mr. Ford, who had gone to bed early at the White House, suffering from hoarseness and exhaustion from the campaign, acknowledged Mr. Carter's victory shortly after noon with a "Dear Jimmy" telegram pledging a smooth transition of power.

"Although there will continue to be disagreements over the best means to use in pursuing our goals," Mr. Ford told Mr. Carter, "I want to assure you that you will have my complete and wholehearted support as you take the oath of office this January."

Mr. Ford's message to the victor was read for the hoarse President by his wife, Betty, to reporters in the White House press room. Behind them stood other members of the family. All appeared composed, although daughter Susan had tears in her eyes.

"It is apparent now that you have won our long and intense struggle for the presidency," Mr. Ford's telegram said. "I congratulate you on your victory."

Wisconsin, Mississippi

Mr. Carter had surpassed the 270 votes needed for victory in the Electoral College with triumphs in Wisconsin and Mississippi. Mr. Ford had 235 electoral votes.

Two states, Oregon and Ohio, remained close late today, although Mr. Carter held leads in both. Final unofficial returns in Ohio—minus the uncounted absentee ballots—gave Mr. Carter 1,999,481 votes to Mr. Ford's 1,991,881. In Oregon, with 99 per cent of the precincts reporting, Mr. Carter had 476,318 votes to Mr. Ford's 475,661.

Ohio has 25 electoral votes and Oregon has 6.

Even if Mr. Ford carried the two states, Mr. Carter—with 272 electoral votes—would be the next President.

The popular-vote totals from 99 per cent of the nation's precincts gave Mr. Carter 40,134,141 and Mr. Ford 38,396,355.

'Battleground' States

Three of the closely contested "battleground" states—New York, Pennsylvania and Texas—slipped into Mr. Carter's column shortly after midnight. Mr. Carter lost New Jersey, Illinois, California and Michigan, Mr. Ford's home state.

New York teetered between the rivals for hours, contrary to all expectations, before delivering a small majority to Mr. Carter—a majority that gave the Democrat 41 electoral votes.

All 25,000 voting machines in New York had been ordered impounded today by State Supreme Court Justice Edward Conway. Acting at the request of state Republican officials, with the approval of White House officials, he said the closeness of the vote made the impoundement necessary. But later, state Republicans withdrew their demands.

Mr. Ford, the nation's first appointive President, was the first incumbent to lose a presidential election since Herbert Hoover in 1932.

Outpouring Noted

Although the President dominated the Plains and Mountain Regions, he lost several middle-sized states he had counted upon. Among them were Louisiana and Mississippi on the Gulf Coast, and Wisconsin, which went to the Democrats for only the second time in a quarter-century as the result of an outpouring of votes

President Vows to Cooperate

By Fred Farris

WASHINGTON, Nov. 3 (IHT).—Gerald Ford, the first incumbent President since Herbert Hoover to be denied a return to office, sadly thanked his millions of supporters today, then pledged his full cooperation with President-elect Jimmy Carter to insure a smooth transfer of power.

Plagued by a sore throat that prevented his making a fuller statement personally, Mr. Ford, accompanied by his wife, Betty, and their children, came to the White House press room this morning to "express on a personal basis my appreciation and that of my family for the friendship that all of us have had..."

Their daughter, Susan, was near tears as Mrs. Ford, smiling despite the gloom that beset the White House, read the President's statement conceding the hard-fought election.

"The President," said Mrs. Ford, "asked me to tell you that he telephoned personally President-elect Carter a short time ago and congratulated him on his victory.

"He also wants to thank all those thousands of people who worked so hard on his behalf and the millions who supported him with their votes. It has been the greatest honor of my husband's life to serve his fellow Americans during two of the most difficult years in the nation's history."

Mr. Ford, she said, "urges all Americans to join him in giving your united support to President-elect Carter as he prepares to assume his responsibilities."

Then, as the President who took office after what he called

Georgian Hailed by Home Folks

By Helen Dewar

PLAINS, Ga., Nov. 3 (WP).—There had been bigger crowds, more brass bands and louder cheers, but Jimmy Carter had rarely looked more proud—or more deeply moved.

The 39th President-elect of the United States returned here at dawn today and the turnout of his friends, neighbors and well-wishers brought tears.

"I came all the way through 22 months," Mr. Carter began, "and I didn't get choked up until I..."

His voice broke, he hugged his wife Rosalynn and both of them wept as 300 townspeople, gathered before Plains railroad depot to welcome the Carters, cheered and shouted their names.

Speak Warmly

Standing on the platform of the old depot, now used as Carter campaign headquarters, Mr. Carter spoke warmly to the people whose support and help, he said, had sustained him in the long struggle for the Democratic nomination and then yesterday's election.

Mr. Carter said: "I see the sun rising on a beautiful new day, a beautiful new spirit in this country, a beautiful new commitment to the future, and I feel good about it. I love every one of you."

He thanked the band and the choir. Then, with the now-familiar wide grin, he said: "I told you I didn't intend to lose."

Some 3 1/2 hours earlier, at 3:28 a.m., Mr. Carter watched in an Atlanta hotel room as television network projections pushed him over the 270 electoral vote total needed to clinch the presidential election. Then he leaped from his chair, clapped his hands and shouted, "All right!"

Whooped and Hugged

With that signal, his family and staff whooped and hugged and kissed in joy and excitement and some 20,000 Carter boosters who had gathered in a nearby arena to await election results screamed, danced and sang "Happy Days Are Here Again."

Mr. Carter, the first Southerner in more than a century to win the presidency and the first man to defeat an incumbent president since 1932, went to the arena and predicted "a new spirit of unity in the nation."

"I want to congratulate the toughest and most formidable opponent that anyone could possibly have, President Gerald Ford," Mr. Carter told his audience.

"As I've said many times

(Continued on Page 2, Col. 5)

Reagan on '80: Maybe Yes, Maybe No

LOS ANGELES, Nov. 2 (UPI).—Ronald Reagan, who came close to being Jimmy Carter's Republican opponent, says he "would not rule out and wouldn't rule in" another try for the presidency in 1980.

Mr. Reagan voted with his wife, Nancy, near his home here yesterday.

Looking tanned and relaxed, the 65-year-old former governor and movie star was asked whether he felt bitter at not being the Republican presidential candidate after nearly wresting the nomination from Mr. Ford.

"No, I'm at peace with the world," he replied.

Asked what effect the outcome of the presidential election would have on him, he said, "None at all. Regardless of the outcome I intend to go out on a campaign to use the Republican platform to reach a new majority out there for the GOP."

Environmentalists Lose on Tight Safety Bids

Six States' Voters Reject A-Plant Curbs

WASHINGTON, Nov. 3 (AP).—In referenda yesterday, environmentalists suffered a setback in their efforts to impose strict safety controls on nuclear power plants but they fared better in their campaign to cut down the use of nonreturnable bottles and cans.

Proposals that would have limited nuclear development, generally by requiring stringent safety measures and compensation for accidents, were defeated easily in Washington, Oregon, Colorado, Ohio, Arizona and Montana, where opponents had spent heavily.

Supporters of the measures claimed that the proposals were justified by the hazards posed by nuclear power. Opponents said that the measures would hamper nuclear development and lead to electricity shortages. A similar anti-nuclear measure was defeated in California in June.

In Washington, the vote was 62 per cent against to only 38 per cent for. In Oregon, the vote was 58 to 42 against; in Colorado and Arizona, it was 70 to 30 against; in Ohio, it was 68 to 32 against and in Montana, it was 60 to 40 against.

Measures designed to ban or at least require deposits on most nonreturnable beverage containers were approved in Maine, by 58 per cent to 42 per cent, and in Michigan, by 63 per cent to 37 per cent. A similar measure in Colorado was defeated, 68 per cent to 32 per cent.

In Massachusetts, opponents spent more than $1 million to try to defeat the proposal banning pull-tab cans and requiring deposits on other beverage containers. Early today, with almost a million votes counted, there were only 5,000 votes separating the two sides.

Similar measures already are law in Oregon and Vermont. Supporters claim that the bans save raw materials, cut costs and reduce litter.

In other referenda:

• New Jersey voters approved a plan to allow casino gambling in Atlantic City. A proposal to permit gambling in communities which desire it was defeated two years ago, but the Atlantic City proposal won this year by 56 to 44 per cent.

• California voters rejected a proposal to legalize greyhound racing as a means of providing funds for tax relief. Opponents had said the plan would enable organized crime to move in. The measure was rejected by a vote of 75 to 25 per cent.

• A proposal to ban handguns in Massachusetts, prohibiting both the sale and the ownership of the weapons, was defeated. The vote was 71 per cent to 29 per cent.

• A farm-labor initiative designed to guarantee long-ranging funding for union representation elections among agricultural workers was defeated in California by a vote of 61 to 39 per cent. Growers had said the measure was a threat to property rights, and opponents said the defeat was a setback for Gov. Edmund Brown jr.

In Washington, Carl Walske, president of the Atomic Industrial Forum, said: "More than 20 per cent of the U.S. population has had the opportunity to vote on the need for nuclear energy this year, and they have affirmed it by a 2-1 landslide."

No Agreement on Independence Date

Smith Departs After New Geneva Failure

By Bernard Weinraub

GENEVA, Nov. 3 (NYT).—...me Minister Ian Smith of ...odesia left Geneva late today r Salisbury after failing to ...ch agreement with African ...tionalist leaders on fixing a ...te of independence under black ...ajority rule for the territory.

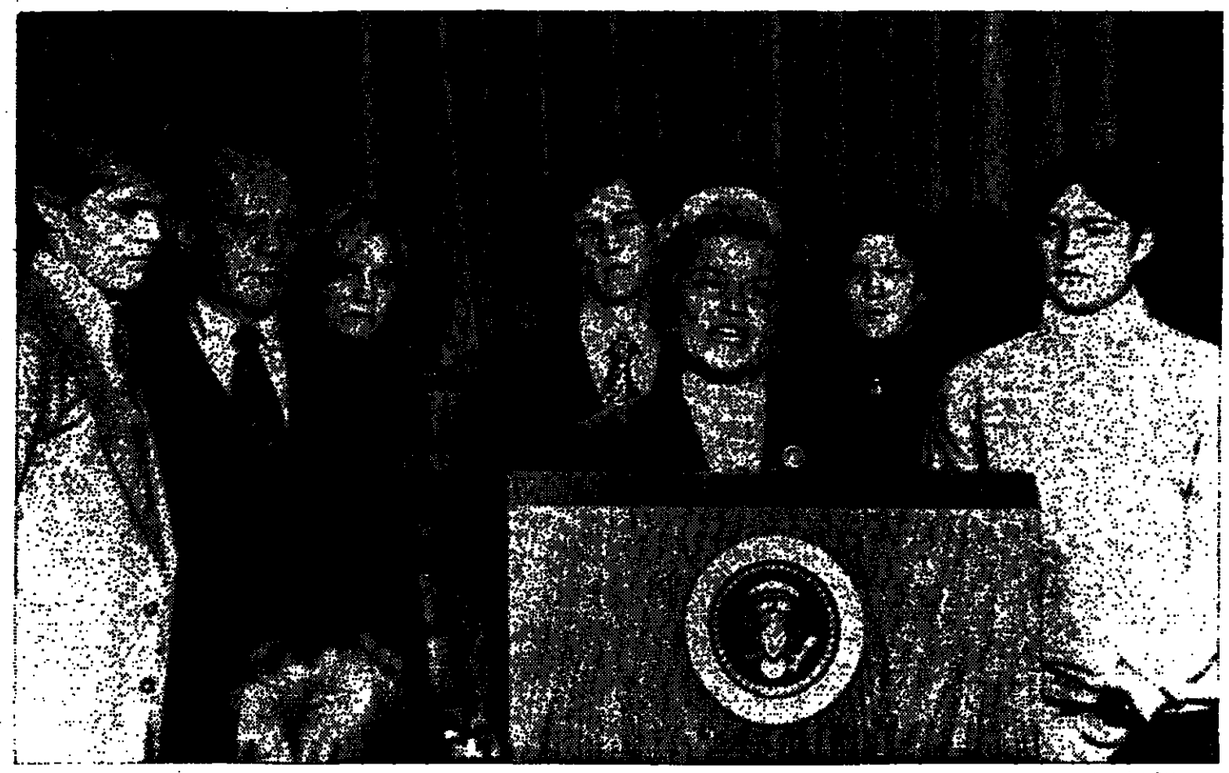
"I can't go on sitting here ...iddling my thumbs," Mr. Smith ...id with anger after a two-hour ...eting with four Rhodesian na...nalist leaders and Tyor Rich...d, Britain's ambassador to the ...ited Nations and the chairman ...the Geneva conference on the ...ture of Rhodesia.

Although Mr. Smith is leaving ...delegation in Geneva, the ...parture of the 57-year-old Rho...sian leader was a clear setback ...r British efforts to work out ...settlement at the conference, ...signed to arrange a transition ...black majority rule.

The setback was especially ...ere because a date of independence for Rhodesia was initially viewed, by both white and black delegations, as a relatively uncontroversial starting point for the conference. Mr. Richard had apparently seized on the issue as being the only one on which there was any prospect for agreement at this stage.

Upset, Puzzlement

Moreover, Mr. Smith's decision to leave his foreign minister, P.K. van der Byl, in charge of the negotiations has upset the British and even puzzled members of the Rhodesian leader's staff. Mr. van der Byl is a hardliner on racial matters whose derisive public comments about Africans have enraged the nationalists.



Within the last two weeks—since Mr. Richard began his talks with the four nationalist leaders and Mr. Smith—there has been no evidence of compromise on the numerous issues that divide both sides. Mr. Smith has voiced anger especially at the slow pace of British negotiations—today was only the second time that the Rhodesian leader has talked with the nationalists—and has emphasised that the conference failed to take up substantive issues dealing with the transition to black majority rule.

"We're here to discuss the Anglo-American proposals," Mr. Smith said, referring to the plan advanced by Secretary of State Henry Kissinger and accepted by Mr. Smith. "As yet we haven't manager to get the others around the table to do it."

The so-called Kissinger plan, according to Mr. Smith, calls for the creation of an interim multi-racial government to guide Rhodesia to independence within two years.

The African nationalists want independence on Sept. 1, 1977, but, according to nationalist sources, Mr. Smith has insisted that it would take 23 months to achieve independence. The time is needed, Mr. Smith asserts, to organize a constitutional confer-

Dollar, U.S. Stocks Drop as Carter Wins

LONDON, Nov. 3 (IHT).—Jimmy Carter's victory over Gerald Ford in the American presidential election caused the dollar to drop fractionally on European markets today while U.S. stocks quoted in Europe fell by up to one dollar.

In New York, stock prices dropped sharply in early trading, the Dow Jones industrial average falling about 15 points. But the decline failed to develop, and the Dow average closed at down 9.56.

The New House of Representatives

WASHINGTON, Nov. 3 (AP).—All 435 members of the House of Representatives were elected yesterday. Number than one name appears under a district, final result was not more available. Incumbents are indicated (I).

Senate Races

WASHINGTON, Nov. 3 (AP).—A total of 33 senators were elected yesterday in 33 states for full six-year terms beginning in January. The seats were held by 10 Republicans, 21 Democrats and 1 Independent. Yesterday's voting saw 11 Republicans, 22 Democrats and 1 Independent elected.

Of the 67 Senate seats not up for election, Republicans hold 27 and Democrats 40.

The political division of the new Senate will be the same as the previous one: 61 Democrats, 1 Independent who caucuses with the Democrats and 38 Republicans.

Here are the results in yesterday's voting. Names in bold face are those of the winners. Incumbents are indicated (I).

R or D beside state indicates seat was previously held by a Republican or a Democrat.

Electoral Votes

WASHINGTON, Nov. 3 (AP).—The President of the United States is chosen by the Electoral College, whose members ar elected in popular vote.

In voting for a presidential candidate, voters are actually voting for a slate of electors pledged to the candidate.

Each state has as many electors as it has members of Congress. The District of Columbia has three electoral votes. A minimum of 270 votes in the Electoral College is needed to win.

Unofficially Jimmy Carter appears to have won 272 electoral votes to 235 for President Ford. A recount has been Ford.

Statehood Figure In Puerto Rico Ousts Incumbent

PUERTO RICO, Nov. 3 (NYT).—In a major upset, San Juan Mayor Carlos Romero Barcelo of the pro-statehood New Progressive party won the governorship of Puerto Rico from the incumbent, Rafael Hernandez Colon, sending the Popular Democratic party to only its second defeat in the governorship contest since 1940.

The governor, speaking to weeping campaign workers, conceded defeat and asked the party faithful "to heed this decision, if confirmed by the final official results, as the will of the people of Puerto Rico."

The election was all the more surprising because the New Progressives also were on their way to assuming control of both of the Puerto Rican legislature as well as winning the mayorship of San Juan.

The results reflected less a mandate for statehood than they did voter discontent with the administrative and economic problems under Mr. Hernandez Colon's leadership.

Figures issued by the New Progressive party gave 419,569 votes to Mr. Romero Barcelo to 364,902 votes for the governor, with 49 per cent of the vote counted.

Regime in India To Delay Voting

NEW DELHI, Nov. 2 (AP).—Prime Minister Indira Gandhi's government formally asked Parliament today to postpone national elections for at least another year.

Officials maintained the action was necessary to combat subversive threats to national security, but did not elaborate.

The lower house, which yesterday passed a sweeping overhaul of India's 26-year-old democratic charter, approved by voice vote the introduction of the election postponement bill. Its final ratification by both houses was practically guaranteed. A few dissenters who did not join the boycott of the session by most opposition parties rose to denounce the postponement.

Soviet Work Week Cut

MOSCOW, Nov. 3 (Reuters).—Coal miners at several Soviet pits have had their working week cut to 30 hours—the shortest in the world according to Tass.

President Pledges to Cooperate

(Continued from Page 1)

the "long national nightmare" of Watergate forced Richard Nixon's resignation stood silently by, Mrs. Ford read aloud her husband's telegram to Mr. Carter:

"Dear Jimmy:

"It is apparent that you have won our long and intense struggle for the presidency. I congratulate you on your victory.

"As one who has been honored to serve the people of this great land—both in the Congress and as President—I believe that we must now put the divisions of the campaign behind us and unite the country once again in the common pursuit of peace and prosperity.

"Although there will continue to be disagreements over the best means to use in pursuing our goals, I want to assure you that you will have my complete and wholehearted support as you take the oath of office this January.

"I also pledge to you that I and all members of my administration will do all that we can to insure that you begin your term as smoothly and effectively as possible.

"May God bless you and your family as you undertake your new responsibilities."

'Thank You'

Then the Ford family—the President, Mrs. Ford, sons Mike, Jack and Steve and daughter Susan—moved among the crowd of reporters, political and White House aides and others, shaking hands and saying "thank you."

Using, as he often does, sports parlance, Mr. Ford, a former University of Michigan football player, said, "We lost, in the last quarter."

He said his 27-month White House tenure and the campaign had been "a lot of fun—we really enjoyed it."

Mrs. Ford said that the family wants to get away soon for a vacation but added that she did not expect the President to agree to an absence of more than a week. "I could never get him away from the desk much longer," she said.

The President told reporters, "We're going to keep working hard to Jan. 20." That is Inauguration Day. "There are a lot of things to do here, and we're going to keep on doing it," Mr. Ford said.

The President went to bed after watching election returns until 3:30 a.m. today without conceding the victory to Mr. Carter. With him were his family and Sen. Bob Dole of Kansas, his running mate.

Mr. Ford had returned to Washington yesterday afternoon after a last emotional public appearance in his hometown, Grand Rapids, Mich. Weary from days and nights on the campaign trial, he took a nap and awoke with his voice almost completely gone, Press Secretary Ron Nessen said.

Georgian Hailed by Home Folks

(Continued from Page 1)

throughout this nation, he's a good, a decent, man and no one could have a campaign that had to be so thoroughly organized, hard-fought, and which has marshaled so much cooperation from hundreds of thousands of people around this country who have had confidence in me. And I pray that I can live up to your confidence and never disappoint you."

'Tap the Strength'

Mr. Carter went on, "It's time to tap the tremendous strength and vitality and idealism and hope and patriotism and a sense of brotherhood and sisterhood in this country to unify our nation, to make it great once again . . .

"I welcome all those in the United States whether they, like you, were supporting me, or supporting Mr. Ford or someone else: It's time for us to get together to correct our mistakes, to answer difficult questions and to make our nation great."

In Minneapolis, Mr. Carter's vice-presidential running mate, Sen. Walter Mondale, said after their victory appeared assured, "President Carter is going to be one of the great presidents in American history. He will help unify this nation, he will help gain momentum again. He will help return America to full employment and to the kind of compassionate and caring nation we want to be."

Sen. Mondale, the Vice-President-elect, changed previous plans and decided against flying today to Plains to confer with Mr. Carter It was not immediately known whether he would go to Plains tomorrow or fly directly to Washington.

Tussaud's on Ford: Off With His Head!

LONDON, Nov. 3 (UPI).—Madame Tussaud's Waxworks wasted no time today in bouncing Gerald Ford out of its group of U.S. presidents and putting in Jimmy Carter instead.

Mr. Carter's new wax portrait went on display at noon, four hours after a Carter victory was announced here. Mr. Ford's wax head "was removed from the exhibition" and will be shipped tomorrow to a store room, a spokesman said.

Over Carter's Victory

World Leaders Show Concern, Hop

By James Goldsborough

PARIS, Nov. 3 (IHT).—World reaction today to Jimmy Carter's narrow victory reflected a mixture of concern and anticipation. While a few capitals publicly acclaimed him, many statements indicated worry over Mr. Carter's foreign policy positions. Little comment was made about the expected departure of Secretary of State Henry Kissinger from the scene.

There was hope in Western Europe that the Carter victory would help European economic recovery. The initial reaction on the U.S. markets today was sour, with prices on the New York Stock Exchange falling and the dollar losing ground against other currencies.

Statements favorable to Mr. Carter were issued by the French and Italian Communist parties, reflecting his more accommodating position concerning their eventual participation in Western European governments.

In Rome, party secretary Enrico Berlinguer said that with the Carter victory, "interferences and pressures on the life of other countries by the past U.S. administration hopefully will come to an end." A French party statement by Politburo member Jean Kanapa was similar.

Mr. Carter also was praised in parts of the eastern Mediterranean. In Athens, where Greek politicians had been openly urging Greek-Americans to vote for Mr. Carter, pro-government newspapers headlined, "End of the Ford-Kissinger Era," and "Greek-Americans Bury Ford and Kissinger." In Nicosia, Cypriot President Makarios declared a half-day holiday and his spokesman said that he was "overwhelmed with joy" at the Carter victory.

Economic Recovery

Western European reaction was mixed, but much of it reflected hope that a Carter administration would lead to faster economic recovery. A statement by the ruling Social Democratic party in West Germany referred to the "pressing problems of the world economy."

French President Valéry Giscard d'Estaing expressed hopes for a developing understanding between France and the United States and cooperation in "the cause of world peace."

In Copenhagen, Social Democratic Premier Anker Joergensen said: "We hope the new President will start tackling the international economic crisis. If full employment is restored in the United States, it will have positive and decisive effects on the situation."

In The Hague, Foreign Minister Max van der Stoel pointed out that Mr. Carter had stressed closer relations with Western Europe and said he expected "a continuing accent on Europe, but probably a heavier accent on the developing nations."

In Moscow, where both candidates had been criticized during the campaign for statements judged to be anti-Russian, the Carter victory was extensively reported but little commented upon. Izvestia, the government newspaper, called the Carter victory an "economic, moral and political protest" against the Republican party." It criticized the voter turnout and said, "apathy on such a scale is a weighty indictment of the two-party system."

Doubts about Mr. Carter's foreign policies were expressed in London, where most British newspapers had supported President Ford. Ian Smart, director of the Royal Institute of International Affairs, criticized Mr. Carter's position on the defense of Yugoslavia, which, he said, "raised some questions about his priorities." Prime Minister James Callaghan wired congratulations to the president-elect, whom he has not met.

Credit to Ford

Praise for President Ford and Mr. Kissinger came from Austrian Chancellor Bruno Kreisky: "We must give credit to Ford," he said, "who did a lot for Europe. Without Ford there would have been no conference on détente at Helsinki." Mr. Kreisky said that "there is much more cooperation between Europe and the United States than many people believe."

Praise also came from Warsaw, where the Polish government spokesman remarked that Polish-American relations had "developed broadly" during the Ford administration.

In the Middle East, reaction in Israel was inconsistent. Moshe Dayan, the former defense minister, cheered the Carter victory and said, "We have had enough of Kissinger," who, he said, "bought Arab support at Israel's expense." But the official reaction by Prime Minister Yitzhak Rabin said that Mr. Ford had "helped Israel both as a congressman and as President."

In Cairo, there was no official reaction. Egyptian officials, however, had strongly supported the Ford administration's peace efforts during the campaign and indicated that they feared a loss of momentum under a new administration.

Yugoslavia and South Korea, two areas that became issues in the presidential campaign, greeted the victory without enthusiasm. A television commentator in Belgrade said that under Mr. Carter, "The policy of détente with the Soviet Union will continue and there should be no change in U.S.-Yugoslav relations."

In South Korea, where Mr. Carter has called for a gradual withdrawal of U.S. troops, a spokesman for the ruling party of President Park Chung Hee said that he hoped Mr. Carter would "understand" that South Korea was threatened with "Communist aggression."

There was no official reaction in Peking today, but two days ago, government officials told a group of visitors that the outcome of the election was of no importance to China.

Despite the considerable dou
being expressed in many capit
about possible changes under M
Carter, telegrams went out fr
most capitals congratulating hi
Spanish Foreign Minister Ma
celino Oreja Aguirre praised t
vote as allowing for "change
clean and efficient elections."

Solid South Solid Again

Carter Is Narrowly Elected, Ford Sends Congratulations

(Continued from Page 1)

from industrial Milwaukee and liberal Madison.

Mr. Carter owed large debts to Mayor Frank Rizzo of Philadelphia, who produced the 250,000-vote margin Mr. Carter needed to carry Pennsylvania; to Robert Strauss, the Democratic national chairman, who worked tirelessly to put together the Texas operation; and to the South and the border states as a whole. The Georgian won every border state and every Southern state except Virginia.

The relatively heavy turnout of voters appeared to aid Mr. Carter.

But Mr. Carter lost Connecticut as well as New Jersey, as his backers had feared.

Former Sen. Eugene McCarthy of Minnesota, who ran as an independent candidate, polled less than 1 per cent of the vote but may have cost Mr. Carter as many as fixe or six states, analysts said.

The closeness of the vote in many states raised questions about absentee ballots, which are handled differently in different states. A check of election officials in 13 states showed, however, that the absentee ballots—whether completely counted or not—were not expected to have any impact on the total.

Among those who said the absentee ballots had already been counted or would have no effect were West Virginia, North Carolina, Oklahoma, Washington, Illinois, Tennessee, Missouri, Kansas, South Carolina, Hawaii, Alabama, Nebraska and Georgia.

In some states, absentee ballots are accepted only until the hour the polls close and they are counted with the other votes on election night.

James Earl Carter jr. will take
the oath as the 39th Presiden
the United States on Jan.
1977. Taking office as Vice-P
dent will be Sen. Walter Mon
of Minnesota, a man who
toyed with the idea of run
for the presidency himself,
then decided against putting
self through the rigors of a
tional campaign.

After eight years of Re
lican control of the White H
the Democrats again will b
command of both the exec
and legislative branches of
ernment. Democratic domina
of the House and Senate was
changed by yesterday's elec
results.

Show of Unity

Mr. Carter's victory margin
slim, in contrast to the huge
some poll-takers gave him
lowing his smooth triumph in
primaries and the show of u
at the Democratic National C
vention last July.

Mr. Ford fought, scrambled
maneuvered, and as the elec
drew closer he steadily narr
ed Mr. Carter's lead until
race was declared too close to
by most forecasters.

It was less a campaign of is
than a campaign during wh
each candidate tried to convi
voters that he could best
trusted with a mandate to l
in the first post-Watergate pr
dential election.

Both men talked about t
nearly as often as they did ab
more traditional issues such
jobs, taxes and inflation.

What are Mr. Carter's pla
Charles Kirbo, an Atlanta l
yer who is one of the Preside
elect's closest advisers, said in
interview that he expects the C
ter administration to get off
a fast start.

Quick Start

"You'll see him move reas
ably quickly on a lot of differ
subjects," Mr. Kirbo said.

A major Carter campaign the
was his intention to streaml
the executive branch of the fe
eral government.

"I think you'll see him movi
before the end of the year to
bills introduced to give him
authority to authorize these mo
he wants to make," Mr. Ki
said.

Hamilton Jordan, Mr. Carte
campaign manager, echoed M
Kirbo's belief that, as Preside
Mr. Carter will push hard
authority to proceed with the
organization of the federal
reaucracy.

"I think he's going to be
occupied with the economy," M
Jordan added.

An immediate task is staff
the new administration.

"I'd say there'll be a lot of
faces," Mr. Jordan said.

"Probably some people that
experienced and whose names
well known, but I'd say mo
them will be people you've pr
ably never heard of before,"
said.

With more than half the sta
still not reporting final vot
figures, the tabulations indica
that just under 52 per cent
the 150 million Americans eligi
to vote had gone to the pol
yesterday.

The turnout, while far from
record, was greater than the lo
turnout—50 per cent or les
some experts had predicted. Ea
yesterday some precincts report
near-record voting, but the tren
slackened later.

In 1972, 55.4 per cent of thos
eligible to vote actually voted.
In 1968, the turnout was 60.7 p
cent; in 1964, it was 61.8 per cen
and in 1960, it was 62.8 per cen

The 1960 turnout was the
highest of any presidential ele
tion year since 1920—when uni
versal suffrage went into effect.
The lowest turnout was in 19
when 51.1 per cent of thos
eligible to vote cast ballots.

McCarthy Given Under 1 Per Cent Of National Vote

WASHINGTON, Nov. 3 (AP).—The independent presidential candidate who campaigned against the two-party system, and said he did not care if he became a spoiler for one of the major-party nominees, found no hero's welcome here.

Former Senator Eugene McCarthy spent election night on a commercial flight en route from California to Washington.

As he stepped from the plane at the airport here, he was practically unnoticed, a lone figure uncheered by crowds of well-wishers, met only by a handful of reporters.

The independent candidate had nothing to say to the reporters. They were waiting to tell him he had been no great spoiler, that he had excited no great flood of voter enthusiasm, that he had chalked up no grand tally in any state.

With 97 per cent of the nation's vote counter, Mr McCarthy had attracted 633,022 votes, less than 1 per cent of the total cast.

Mr. McCarthy arrived in Washington about 11 p.m. It was cold, and the airport was all but deserted.

Mr. McCarthy, a folk hero of the young in 1968, the man whose opposition to the Vietnam War marked the beginning of the end of the conflict, brushed off reporters' questions. "Not tonight," he said. "I'm going home."

Aegean Air Talks

PARIS, Nov. 3 (AP).—Greek-Turkish talks on air traffic control over the Aegean resumed in Paris today. A spokesman for the Turkish Embassy said the talks between experts were going normally.

Carter Theme: Government as Good as People, 'Decent, Compassionate, Competent'

By James T. Wooten

PLAINS, Ga., Nov. 2 (NYT).—The snow began sometime in the night and by the time he arrived at the Manchester Airport early last morning last February, a late New Hampshire blizzard was blowing.

He stood impatiently on the slushy tarmac, shivering in the wind, sipping coffee from a Styrofoam cup, watching the pilot of a small plane scrape ice from the wings, and listening to an aide suggest that the trip might be canceled.

"Screw it," he finally snapped. "People support you or they don't. People support you to support you, very well ask you to come or don't show up."

And off he went into the storm, a slightly built Georgia farmer flying into the teeth of a New England winter looking for one more hand to shake, one more chance to smile and say, "Hi, I'm Jimmy Carter and I'm running for president."

One Thesis

Historians will, no doubt, pronounce his victory Tuesday the end result of Richard Nixon's White House crimes—something better understood perhaps in terms of a Republican forfeit than a Democratic triumph—and their thesis, no doubt, will be as sound as any other.

Yet, there was in that quick, cold moment on that morning in New Hampshire nine months ago as keen an insight into the remarkable rise of James Earl Carter jr. as his grueling, two-year campaign for the presidency would provide.

He believed passionately that if he could talk to enough voters, about a "government as good as the American people," he could win—and from the unlikely beginnings of his pursuit to its heady climax in the voting, he was as stubbornly and as single-mindedly committed to that approach as any man who ever dared dream that dream.

For 99 weeks, through all sorts of storms, including several of his own making, he rummaged about the country, alone at first "and lonely," he remembers, making more than 1,500 speeches in a thousand cities in all 50 states and piling up nearly a half-million miles of travel along the way

Plowboy Gait

In Philadelphia, in the early days, he called a news conference and nobody came. In New York, later on, the papers missed one of his "major addresses." In Hollywood, Fla., deep into the primary season, a woman watched him lope along the street with his slope-shouldered, plowboy gait and asked, after he had passed, who he was.

Still, through it all—even into the final hours of election eve, he campaigned fiercely, ignoring the strain and the fatigue, still smiling that smile, still telling the voters about a government as good as the people.

"He may be a lot of things," his speechwriter, Patrick Anderson, said last month, "but the one thing I know he is is tough. He is probably the toughest guy who ever ran."

Whatever that quality might portend in a president, it has served Mr. Carter well to this point in his career.

Political Start

A graduate of Annapolis, he left a budding career in the Navy's nuclear submarine service in 1953 and came back to this tiny village where he was born to turn the agribusiness his father left him into the lucrative enterprise it has become.

He had three sons by then—John, James Earl 3d and Donnel Jeffrey—and he settled into the predictable rhythms of the hard-working but affluent small town merchant, becoming a deacon in the Plains Baptist church, serving on the local school board, working as the town's scoutmaster and finally, in 1962, getting into politics.

But in that election, the returns showed he had lost his bid for a seat in the Georgia Senate. "He just didn't believe it," his close friend and mentor, Charles Kirbo, remembered recently. "He just wouldn't accept it—and he wouldn't let me accept it either."

So, Mr. Kirbo became Mr. Carter's attorney, and together they pressed and won a suit that reversed the results of the election on the basis of voting irregularities. Mr. Carter was 38, and he was on his way.

"But it never would have happened if he hadn't been so damned stubborn," Mr. Kirbo, an Atlanta attorney, said. "I mean, here was no way he was going to quit."

Runs for Governor

Four years later, he ran for governor, spurning an almost certain seat in the U.S. House of Representatives, spending long days in the hundreds of little towns that dot the Georgia map, and finally losing.

"And it was just like it was before," Mr. Kirbo said. "He didn't even stop for breath. He just kept right on going, just like he actually had been running for the next time all along."

For the next four years, he spent very little time here in Plains. His days were consumed by the unglamourous mechanics of his passion—speeches here, bits of conversation there, and always the search to find someone who would stop.

"Hi, I'm Jimmy Carter, and I'm running for governor," he would say, and in 1970, after a bitter—even by the standards of Southern politics—contest with Carl Sanders, a former governor, he won.

Hard Work

"I think I won basically because I worked harder than he did," Mr. Carter said earlier this year, speaking in that soft fading drawl that has now become so familiar to millions of Americans. "I really worked. Boy, I really worked, and I was so tired when that was over, I didn't want to ever campaign again."

That feeling, according to Jody Powell, his press secretary, lasted "about 10 minutes, more or less."

Still, no one knows precisely how or exactly when his presidential pursuit began, not even Mr. Carter himself. "I guess maybe it might have been there all along, and I just didn't know it," he said. "Maybe it was a gradual realization, but at any rate, all I know is that it occurred to me one day that running for president might not be such a bad idea."

When he formally announced his "idea" on Dec. 12, 1974, only a month before his one term as governor was to end, there were very few people who thought it had much merit.

He was, after all, a white Southerner who, despite impressive gestures and stands, would be racially suspect elsewhere in the country. His name was not, after all, a household word. He would run without holding public office, and he would begin with very little money and no visible base of support.

Hard Promises

But Mr. Carter, Mr. Powell, Mr. Kirbo and Hamilton Jordan, his campaign manager, appraised those factors as assets in a volatile political field, and the candidate hit the road, promising again and again never to lie, never to mislead, never to avoid a controversial issue.

They were hard promises to keep, but as he gathered victory after victory in the winter and the spring—the Iowa caucuses, the primaries in New Hampshire, Florida, North Carolina, Illinois, Wisconsin and finally Ohio—he managed to weather most of the challenges to his credibility.

In doing so, he bared his strategy. Words, skillfully used, could play dual roles for him. Liberals came to conceive of him as one of their own. Conservatives responded to him sympathetically as well. Blacks in Harlem voiced their support. Whites in Mississippi got behind him.

Finally, at the Democratic convention, with the nomination in hand, he brought together on the platform most of the men he had beaten, the ideological symbols of his fractious party, in a feast of unity that included—for good measure—the Rev. Martin Luther King sr. and Gov. George Wallace of Alabama.

"Jimmy told me he was determined to bring the Democrats together again," his 78-year-old mother, Lillian Carter, said in September. "And he did. That's the way he's always been. If he says he's going to do something, he does it. I sort of like that about him."

She gave birth to the future President-designate on Oct. 14, 1924, here in this village, two miles from the family home in the unincorporated Hamlet of Archery.

Segregationist Father

His father, James E. Carter sr., was a product of five generations of Georgia farmers and a segregationist who did not share but seldom argued against his wife's more liberal racial views.

As a boy, the President-designate's playmates were all black children with the exception of his two younger sisters, Gloria and Ruth, and the youngest child in the family, his brother, Billy, who was five when Mr. Carter's lifelong dream of attending the Naval Academy came true.

"He worked at that like everything else," his mother said. "That's what he wanted, and he did everything he could to make it."

He married Rosalynn Smith in 1947, soon after his graduation from Annapolis, and the two of them set off on a series of assignments that took them from Connecticut to Hawaii and finally to Schnectady, N.Y., where he studied nuclear engineering before going to work for Adm. Hyman Rickover, the guiding force of the Navy's nuclear submarine program.

Discipline, Drive

It was the admiral, he later wrote, who shared much of his discipline and drive, and it was he who asked him once why he had not always done his best. That became the title of his campaign autobiography, "Why Not the Best," and one of the central themes of his speeches this year. Such a focus is not unusual, of course, but his oratorical style in expressing it struck many as curious. He seldom raised his voice, often botched well-written lines, stepped on his own jokes, stifled applause with poor timing and, on occasion, went on and on and on.

Six hundred ninety days after he began, Jimmy Carter was still asking people for their support, still smiling that smile, still shaking hands, still showing up.

Americans, he said, were entitled to decent, compassionate honest, competent government because Americans are decent, compassionate, honest and competent. "If Americans were bad people, what has happened to the government in the past few years would not be so—so unacceptable," he said just this last week.

At the final rally of his campaign in Flint, Mich., he sounded the same notes that had signaled its beginning.

"There's absolutely no reason you shouldn't have a government that reflects your own decency," he told his audience, "and next Jan. 20, that's what you're going to get—if you'll help me."

Despite 18 New Members

Senate Partisan Makeup Unchanged

By Robert Sherrill

WASHINGTON, Nov. 3 (IHT).—Despite the largest influx of new members in nearly 20 years, the partisan makeup of the Senate will remain exactly as it was before yesterday's election, with Democrats holding 62 seats and Republicans 38.

Altogether, there will be 18 new faces in the Senate next year, 17 elected yesterday and an appointed successor to Vice-President-elect Walter Mondale, D-Minn. Sen. Mondale is certain to be replaced by another Democrat, probably Minnesota Gov. Wendell Anderson.

In the 33 Senate races decided yesterday, incumbents were re-elected in only 16. Nine incumbents were ousted by their constituents and eight other newcomers were elected to replace retiring veterans.

Democrats won seven seats formerly held by Republicans while Republicans captured an equal number from the Democrats.

There were no real surprises in the voting and no perceptible ideological pattern. The races apparently turned on personal and local questions. In addition, there seemed to be no significant "coattail" effect from the presidential election.

Some of the 16 senators who were re-elected won by overwhelming margins, while defeated incumbents included liberals and conservatives.

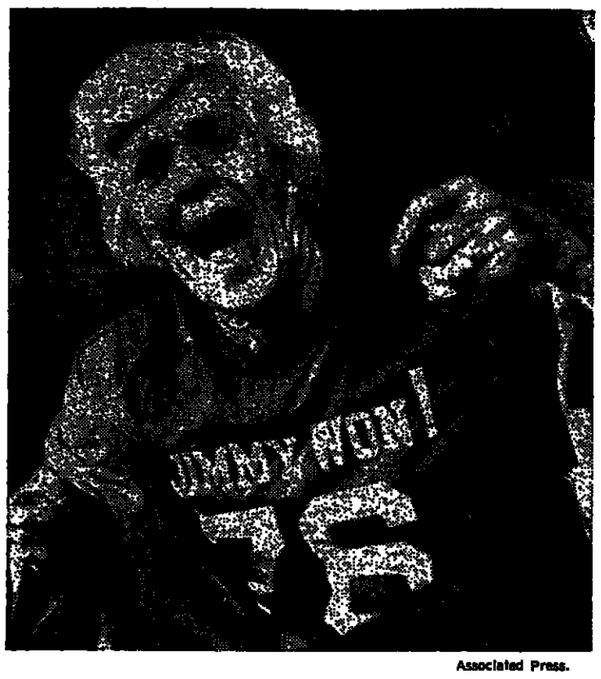
In one of the last races to be decided, Sen. John Tunney, D-Calif., was defeated by Republican challenger S.I. Hayakawa by 50 to 47 per cent of the vote.

Mr. Hayakawa was widely respected in the state for the strong stand he took against student demonstrations while president of San Francisco State College in 1968. He generally took a conservative line and portrayed Sen. Tunney as a liberal lightweight and a playboy.

With the tabulation completed, Mr. Hayakawa had 3,701,024 votes to 3,464,583 for Sen. Tunney.

Across the continent, Daniel Moynihan defeated incumbent Republican-Conservative James Buckley to become New York State's first Democratic senator since Robert Kennedy defeated Kenneth Keating in 1964.

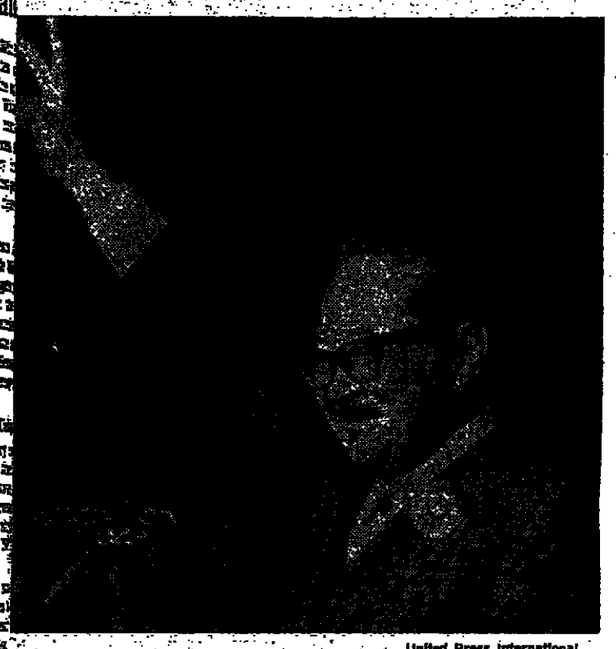
Four senior Democrats were defeated, Sen. Vance Hartke, of Indiana, who was beaten by Indianapolis Mayor Richard Lugar; Frank Moss, of Utah, who lost to Orrin Hatch; Gale McGee, of Wyoming, defeated by state Sen. Malcolm Wallop, and Joseph Montoya, of New Mexico, who surrendered his seat to former astronaut Harrison Schmit.



In addition to Sen. Buckley, three other first-term Republicans were ousted by their constituents, Bill Brock, of Tennessee, beaten by Democratic state party chairman James Sasser; Robert Taft jr., of Ohio, beaten by Howard Metzenbaum; and Glen Beall, of Maryland, beaten by Rep. Paul Sarbanes.

Of the eight seats left vacant by the retirement of Senate veterans, Democrats won five. Omaha mayor Edward Zorinsky winning the seat held by Republican Roman Hruska in Nebraska; Rep. Spark Matsunaga winning a formerly Republican seat in Hawaii; Dennis Deconcini winning a formerly Republican seat in Arizona. Reps. Donald Riegle and John Melcher kept Senate seats vacated by retiring Democrats in Michigan and Montana.

Republicans won three vacated seats with former GOP Gov. John Chafee defeating Richard Lorber for the previously Democratic seat in Rhode Island, State Attorney General John Danforth defeating former Democratic Gov. Warren Hearnes for a previously Democratic seat in Missouri and Rep. John Heinz, 3d, defeating Rep. William J. Green in a race for the Pennsylvania seat vacated by retiring Senate Minority Leader Hugh Scott.



Of the familiar faces who will return in January, Sen. Hubert Humphrey, D-Minn., coasted to victory with a 73 to 25 per cent victory; Sen. Edward Kennedy, D-Mass., won with 71 to 29 per cent of the vote; Sen. Edmund Muskie, D-Maine, was backed by 6 of 10 voters; Sen. Ezra Bentsen, D-Texas, took 58 per cent of the vote; Sen. Henry Jackson, D-Wash., re-elected by 75 per cent of the voters and Sen. Robert Byrd, D-W. Va., won unopposed.

Republican Sens. Lowell Weicker, of Connecticut, Robert Stafford, of Vermont, William Roth, of Delaware, and Democrats Lawton Chiles, of Florida, John Stennis, of Mississippi, Howard Cannon, of Nevada, Harrison Williams, of New Jersey, Quentin Burdick, of North Dakota, Harry Byrd, of Virginia, and William Proxmire, of Wisconsin, all won re-election easily.

Associated Press.

PRIMAL SCREAM (?)—Miss Lillian, 78, mother of Jimmy Carter, whooping it up after he was declared winner.

United Press International.

PROPHET—Even as the votes were being counted in one of the closest Senate races in California history, S. I. Hayakawa waved a victory sign at supporters at a rally in Los Angeles. He defeated Democrat John Tunney.

GOP Drops Suit in N.Y. State Over Voting Machines, Ballots

NEW YORK, Nov. 3 (AP).—Republican officials today withdrew their suit to have all ballots and voting machines in the New York State impounded under police guard in case of a possible recount.

The action came after President Ford conceded defeat to Democrat Jimmy Carter in their close presidential election contest.

Earlier in the day, trucks had been sent throughout the state to pick up the 25,000 voting machines, all impounded by a middle-of-the-night court order carrying White House approval.

The highly unusual action—believed to be a first in this state—was ordered after representatives of Republican officials alleged that irregularities had occurred in yesterday's election.

A spokesman at the Board of Elections in New York City said this morning that trucks were being dispatched "to pick up the machines. They will be removed to a central location and guarded."

The impoundment is meant to safeguard the machines while a recount is conducted. With 98 per cent of the state's vote counted, Jimmy Carter led President Ford by about 250,000 votes and was running four percentage points ahead—52 to 48. That lead was considered far more than could possibly be needed to survive any changes in the state's vote total as a result of a recount.

Absentee Ballots

However, there was confusion over the status of absentee ballots in the state.

A spokesman for the state Board of Elections estimated that 400,000 absentee ballots had been mailed by local boards. Under state law, any ballot received by 9 p.m. yesterday—the hour the polls closed—was counted and is included in the current total.

However, there was no way to immediately determine how many absentee ballots were counted and how many remained uncounted. Any absentee ballot received in New York State after 9 p.m. yesterday is being held by local election boards pending a court test over their legitimacy. They will not be counted until the court decision is made.

Heading Toward 293-142 Margin

Democrats' Victories Increase Their Majority in the House

WASHINGTON, Nov. 3 (IHT).—Democrats will retain their overwhelming majority in the House, having won 288 seats to 142 for the Republicans. Five races were still undecided late today, but Democrats were leading in each of them.

If the trends in the remaining races continue, Democrats would hold 293 seats, three more than in the old Congress, and would better their current 2-1 majority by nine votes.

With a lopsided majority in the new Senate, too, and with Jimmy Carter in the White House, the Democrats will control both the legislative and executive branches of government for the first time since 1968.

The House, like the Senate, will have a number of new faces. Eleven of the 382 incumbents were defeated, and an unprecedented number of veteran congressmen—68 in all—either retired or sought other offices. The total number of House freshmen is, thus, 84.

One of the most disappointing statistics to Republicans was the failure to unseat more than two of the 75 freshman Democrats elected during the Watergate scandals of 1974. Usually such a group is severely cut back when trying for election to a second term. The inability of Republicans to cut into this group augurs ill for any return to near-equality in the House by the GOP in the foreseeable future.

Only two of the losses by 11 incumbents seeking re-election were related to the various bribery and sex scandals that have come to light in the House. The two defeats were those of Allan Howe, D-Utah, who has been convicted of soliciting sex from police decoy prostitutes, and Rep. Henry Helstoski, D-N.J., indicted on a bribery charge.

Some 20 other representatives who had been accused of financial or sexual misconduct won re-election without trouble.

Twenty-two seats changed parties, with the Democrats taking 12 and the Republicans 10.

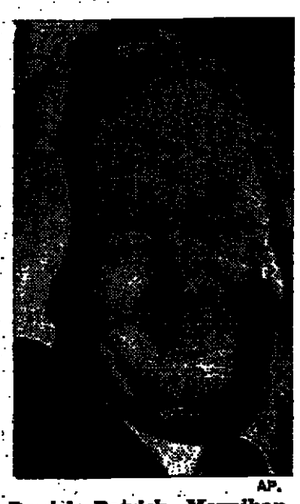
All 17 black incumbents won re-election but 28 other blacks who ran for the House were defeated.

The new House will have 18 women, compared to 19 in the outgoing Congress. Three of the women retired. The 16 other incumbents all won. In addition, two other women won vacant House seats, in Maryland and Ohio. Thirty-six other women ran for House seats but were defeated.

All the House leaders running for re-election from both parties were re-elected. Democratic leader Thomas O'Neill, of Massachusetts, easily won his 13th term. He is expected to become speaker of the House. Rep. John McFall and Rep. Philip Burton, both of California; Rep. Richard Bolling, of Missouri, and Rep. Jim Wright, of Texas, all candidates for the post of House Democratic leader, were re-elected.

Republican House leader John Rhodes, of Arizona, also was easily re-elected but his leadership post may be in jeopardy because of the failure of Republicans to cut into the huge Democratic majority.

Republicans leaders had hoped to gain at least 12 seats, mainly among the traditionally Republican seats won by Democrats in 1974 in the wake of the Watergate scandal.



Not only did these gains not materialize, but Democrats picked up seats in Pennsylvania, gaining control of the delegation.

One of the best known of the handful of defeated incumbents was Rep. Albert Johnson, a six-term Republican congressman from Pennsylvania.

Among the incumbent Democrats who went down to defeat was Rep. Edward Mazvinsky, a member of the House Judiciary Committee, who voted to impeach Richard Nixon.

Despite the similarity in numbers, the new House will not be a carbon copy of its predecessor. It will have more than 60 new members and a larger proportion of juniors members than any Congress in recent years, with about one-fourth having no more than two years of congressional service.

Pollsters hae reported that the outgoing House ranking near bottom in public esteem, but voters decided against substantial change.

AP.

Dixy Ray 1 of 9 Democrats To Win in 14 Governor Races

WASHINGTON, Nov. 3 (IHT). —Democrat Dixy Lee Ray, in a strong showing in the state of Washington, defeated Republican John Spellman yesterday to become the nation's second woman holding a governor's office.

Miss Ray, a marine biologist who was a chairman of the old Atomic Energy Commission, was swept into office on a heavy tide of general election votes that appeared to exceed pre-election expectations. The only other current woman governor is Connecticut's Ella Grasso, also a Democrat.

Miss Ray triumphed despite the fact that President Ford won the state's nine Electoral College votes by a healthy margin over Democrat Jimmy Carter.

In the 14 gubernatorial races yesterday, there were nine Democratic victors and five Republican winners, a split that gives the Democrats control of 37 statehouses to 12 for the Republicans and one independent. That meant a net gain of one for the Democrats.

Upset in Missouri

In Missouri, a race not decided until early today, there was an upset. Incumbent Republican Gov. Christopher Bond had campaigned hard in his heavily-Democratic state and was favored to win. But Kansas City Democratic lawyer Joseph Teasdale, waging an expensive last-minute advertising campaign, defeated him. The Democrat successfully attacked Gov. Bond's tax policies.

John D. Rockefeller 4th, who first went to West Virginia as an anti-poverty worker 12 years ago, won easily in his second attempt to capture the governor's chair in Charleston.

Mr. Rockefeller, 39, outspent his Republican opponent, Cecil Underwood, by a 10-1 margin and survived charges that he planned to use his state office as a platform to national politics. Mr. Rockefeller is the nephew of Vice-President Nelson Rockefeller, a former governor of New York. Another uncle, Winthrop, once served as governor of Arkansas.

In Illinois, Republican James Thompson, 40, won the governorship after beginning as an underdog to Michael Howlett, 62, the choice of Chicago's Mayor Richard Daley.

Mr. Thompson was propelled to political prominence by his role as an aggressive U.S. attorney who successfully prosecuted more than 200 persons on government corruption charges, including more than two dozen associates of the mayor.

White House Bids

Political professionals in both West Virginia and Illinois were speculating today that eventually Mr. Rockefeller and Mr. Thompson will seek to become presidential candidates.

In Delaware, Pierre duPont, a member of the chemical dynasty in Wilmington, ousted Gov. Sherman Tribbitt and thereby kept intact a 20-year Delaware record of not re-electing governors. Mr. duPont is a three-term congressman, who won his 1972 race with 62.5 per cent of the vote—the largest margin achieved by any House candidate in nearly a half century.

In most other gubernatorial races, the candidates were unknown outside their states.

By winning in North Carolina, Lt. Gov. James Hunt jr. restored a firm tradition of Democratic control in the state. He defeated David Flaherty, a former state secretary of human resources.

In Indiana, Republican Otis Bowen, a former small-town physician, captured 57 per cent of the vote to become the first governor in the state's history to succeed himself, reflecting a recent change in the Indiana Constitution.

Arkansas Gov. David Pryor began the night with an early lead which expanded steadily to give the Democrat a 4-1 landslide victory over Republican Leon Griffith, a plumber and contractor making his first try at politics.

Lt. Gov. Joseph Garrahy was elected governor of Rhode Island, succeeding fellow Democrat Philip Noel, who ran for the Senate but lost in the primary.

In New Hampshire, Republican Gov. Meldrim Thomson defeated Harry Spanos.

In Vermont, Stella Hackel, another woman candidate, lost to Republican Richard Snelling by 11,000 votes.

Thomas Judge, the Democratic governor of Montana, defeated Robert Woodahl.

In North Dakota, Democratic incumbent Arthur Link beat Richard Elkin.

In Utah, Democrat Scott Matheson won over Republican Vernon Romney.

Confirmation by Helms

Partisan Pattern Prevailed

Union Members Provided Pivotal Support for Carter

By James M. Naughton

NEW YORK, Nov. 3 (NYT).—Labor union members, who abandoned the Democratic party four years ago, supported Jimmy Carter's candidacy yesterday to provide a pivotal ingredient of his narrow victory over President Ford.

At least 6 of every 10 union households across the nation responded to the sophisticated, computerized exhortation from labor leaders to vote for the former Georgia governor, according to the findings of a CBS News Election Day survey made available by special arrangement to The New York Times.

The survey, of voters emerging from polling booths, showed a contest that developed along partisan, ideological, class and residential patterns.

The President, whose campaign had centered on the contentions that he had restored faith in the White House—which he had inherited from a disgraced predecessor—and that he was a decent national leader, clearly benefited from those who found trust and likability important.

Outlook, Inclination

But an electorate in which one out of every five voters professed uncertainty about which candidate to choose until the last days turned out to be traditionalist in outlook and inclination.

Six in 10 of the Democrats who had helped produce Richard Nixon's landslide victory over Sen. George McGovern, D-S.D., in 1972 voted for Mr. Carter yesterday. At the same time, nearly all of Sen. McGovern's fragment of the electorate four years earlier stuck with the Georgian.

The most significant finding from interviews with nearly 10,000 voters was the extent to which blue-collar workers in labor unions responded to the barrage of leaflets, telephone appeals and personal overtures from their leaders to support a Democrat who won the nomination of his party as the opponent of its leaders.

Among working-class voters who do not belong to unions, a slight majority was found to be voting in favor of Mr. Ford. But unionized blue-collar voters and their families voted overwhelmingly for Mr. Carter.

There were other symptoms of a classic contest along party and ideological lines. Three-quarters of those who described themselves as conservatives said they had voted for Mr. Ford, and about the same percentage of those who said they were liberals reported that they had cast ballots for Mr. Carter.

With more than twice as many Americans identifying themselves as Democrats as those willing, after Watergate, to classify themselves as Republicans, Mr. Ford's prospects depended heavily on winning a big majority of independent and a sizable portion of the traditional Democratic vote.

But the survey indicated that Mr. Carter was winning nearly as many independent votes as Mr. Ford and that the partisan instincts of the balance of the electorate were re-emerging, as in the classic partisan confrontations in national politics during the early 1960s.

Old Coalition

The South, which toyed with Republicanism in the last two presidential elections and was diverted by the candidacy of Gov. George Wallace of Alabama when he ran eight years ago as an independent, appeared to be reverting to Democratic voting patterns.

Roman Catholics, a staple of the old Democratic coalition, voted Democratic, although not in the overwhelming ratio of John Kennedy's 1960 victory. Similarly, Protestants voted mostly for the Republican incumbent, but again by a margin slender enough to suggest some dividends to Mr. Carter from his emphasis on his Baptist faith.

Voter turnout appeared to be sizable among black and Hispanic-Americans, a factor crucial to Mr. Carter's prospects. At least 80 of every 100 black and Hispanic-American voters said they had been for the Democrat. Mr. Ford, meanwhile, was deriving the support of a narrow majority of white voters.

It was not possible to determine how many moderate and low-income Americans had voted, although the magnitude of the voting electorate, which officials said was beyond expectations in state after state, suggested that those with modest means turned out in plenitude, and in Mr. Carter's behalf.

By roughly the same two-thirds proportion, individuals with incomes of $8,000 or less said they had accepted Mr. Carter's pledge to turn government's attention to their needs, and those with incomes of $20,000 and more responded to Mr. Ford's promise to reduce the burden of federal taxation on those he defined as middle class.

The electorate's fluidity, forecast in surveys by The New York Times and CBS News, was confirmed in the Election Day findings. Among those who said they made up their minds how to vote only in the closing days of the contest, a slender majority chose Mr. Carter.

The Fine Gael left the fi clear for Dr. Patrick Hill presidential choice of the oppo tion Fianna Fail. Dr. Hill is currently the commissioner social affairs at the Europe Economic Community headqu ters in Brussels.

Labor party sources said it w almost certain the party wou not put up a candidate for t election, caused by the resignati of president Cearbhal O Dalai after he was called a "thunderb disgrace" by Defense Minist Patrick Donegan. Mr. O Dalai had referred Ireland's Emergen Powers Bill to the Supreme Co to test its constitutionality. T court found the bill constitution and it is now law.

FOCUS ON ENERGY

December 6, 1976
a special report by the
International Herald Tribune

The 1973 oil embargo brought about a spectacular shift in the energy plans of the Western world and has made a major impact on the economies of Europe and of the United States.

In its first in-depth study on energy, the International Herald Tribune will report on energy financing, the different sources of energy, and how the various Western governments are trying to tackle energy-related problems.

In addition to regular distribution with the newspaper, Focus on Energy will be sent by the International Herald Tribune to 1,800 leading industrialists and bankers throughout the world.

...ong-Persecuted Spain Reds ...autiously Coming Into Open

By James M. Markham

MADRID, Nov. 3 (NYT).—...utiously, after decades of clan...ine operation and relentless ...ial persecution, the Com...nist party of Spain is coming ... in the open.

...year after the death of ...eralissimo Francisco Franco, ...o stigmatized them as the root ...ll evil, Spanish Communists ...ear at news conferences, meet ... Christian Democrats, orga... strikes, publish their views ... the nation's press and have ...ices in central Madrid.

"We are in a situation where ...y day, slowly, the people are ...oning a degree of liberty," ...mented Simon Sanches Mon..., 61, a one-time baker who is the ranking party leader inside Spain.

"The police are very near," said Mr. Sanches Montero, visited at the party's thinly disguised offices on a street named Virgin of the Dangers. "They know we're here. A year ago, this would have been inconceivable. When Franco died, I was in jail."

Limited Tolerance

Mr. Sanches Montero, a civil war veteran who spent 18 years in Spanish jails, acknowledges that the government's tolerance of the Communist party of Spain is "very limited."

"Even so, the party throughout the country is coming to the surface," he said. "We want to give the lie to those who say that the Communist party prefers illegality because it can work better in the shadows."

Communist public meetings and rallies have systematically been banned, except for a handful in Barcelona. Prominent Communists are periodically detained and released—though none are believed to be imprisoned today. And the party's two most famous leaders, Santiago Carrillo, 60, its Paris-based general-secretary, and 80-year-old Dolores Ibarruri, La Pasionaria of civil war fame, have been denied passports to return to Spain.

Two weeks ago, the wife of Mr. Carrillo, one of their three sons and a large black dog drove into Spain from exile in France to set up home again in Madrid. "We have come definitively," said Mrs. Carrillo, who said she had brought most of her husband's clothes "because we assume he will be coming soon."

Mr. Carrillo has reportedly made a number of clandestine visits to Spain. "He was here in the summer," said Mr. Sanches Montero. During an illegal trip, the Communist chief is said to have been driven around in a car with Felipe Gonzalez, leader of the main Socialist party, to discuss matters of mutual interest.

Spring Election

To gain the military's support for his political reform program, Premier Adolfo Suarez has reportedly promised that his government will not legalize the Communists before the parliamentary elections scheduled for the spring.

But there have been periodic reports that the government may permit Communists to run as individuals, without declaring their party allegiance.

"No," said Mr. Sanches Montero firmly. "The party does not want to go to the elections under shameful conditions."

To get into Spain's new democratic "club," the Communists seem to be counting on their allies in the left-of-center organization called Democratic Coordination to force Mr. Suarez's hand and change the rules.

But some members of Democratic Coordination, far from forcing the government's hand, show signs of accepting its set of rules. Joaquin Ruiz Gimenez, an influential leftist Christian Democrat, has begun to detach his group to gird for the elections.

The problem for the Communists is that their left-of-center allies of today are also tomorrow's electoral competitors. And though Democratic Coordination ritually calls for the legalization of "all" parties, there is some suspicion that some of its members might not mind getting an electoral head start on the Communists, widely agreed to be the best organized of the opposition groups.

...U.S., Mexico ...eek a Trade ...f Prisoners

By Alan Riding

MEXICO CITY, Nov. 3 (NYT).—Mexico and the United States are making rapid progress toward a prisoner-exchange agreement under which Americans confined in this country could serve out their terms in jails in the United States.

The agreement may be initialed within a month, before being sent for ratification to the Congresses in Washington and Mexico City. A similar pact is being negotiated between the United States and Canada.

The treaty was proposed by Mexico last June, partly with the aim of defusing the controversial issue of reported mistreatment of American prisoners in Mexico. More than 90 per cent of the 600 U.S. citizens in Mexican detention are facing narcotics charges or serving sentences for narcotics offenses.

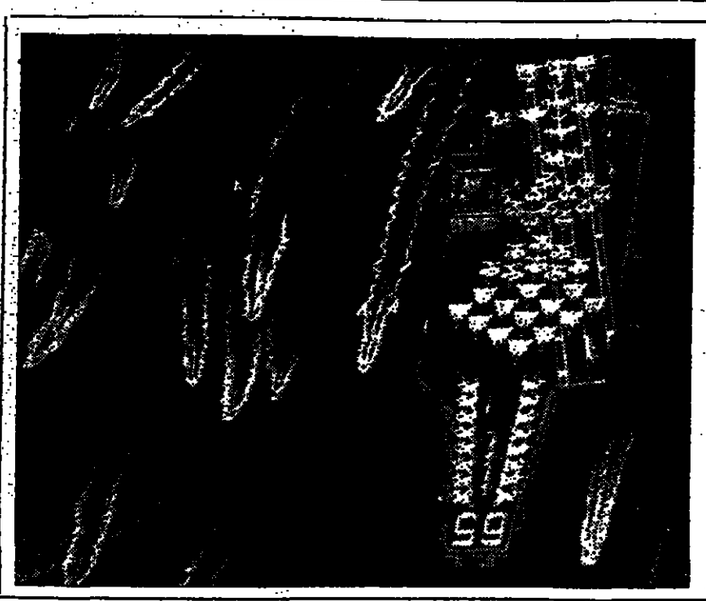
Hurdling Obstacles

Diplomatic sources said that while progress was possible in the talks because each side was politically committed to reaching an early agreement, perhaps before President Luis Echeverria leaves office Dec. 1. The negotiators are working hard to get around the legal obstacles before that date.

Perhaps the greatest problem is the possibility that, once repatriated, American prisoners would demand new trials or obtain writs of habeas corpus on the ground that they were convicted on the basis of confessions extracted through torture, or simply had been unfairly found guilty. Prisoners might therefore be freed soon after they returned to the United States.

But during the negotiations, Washington officials agreed to arrest and return to Mexican jurisdiction any prisoner released prematurely by any U.S. court. Such a prisoner would then serve in Mexico the rest of his original term.

Once an American is placed in a federal prison he or she would be subject to local parole rules and other jail regulations, but would be permitted to transfer to a jail in any Mexican city "credited" for work and good behavior that could mean a reduction of sentence.



Practical Application

While the treaty would apply equally to Americans in Mexican jails and to Mexicans in U.S. jails, in practice its almost exclusive objective is dealing with the problem of the Americans.

The thousands of Mexicans arrested for illegal immigration to the United States—a major, recurring problem—are specifically excluded from the treaty. Before any Mexican's release from a state jail in the United States, special agreements would have to be signed between Washington and the state.

Rhodesia Describes Big Strike Over Border as 'Preemptive'

MOUNT DARWIN, Rhodesia, Nov. 3 (Reuters).—Rhodesian government forces today said they had stalled an offensive by up to 1,700 African nationalist guerrillas by staging a preemptive strike into Mozambique Sunday.

They claimed to have destroyed several guerrilla bases and 50 tons of war materials.

A senior police official was giving the first details of what were officially called "hot pursuit" operations at the weekend across Rhodesia's northern border with Mozambique.

Assistant commissioner Mike Edden said: "I would like you to forget hot pursuit. I would like to think of it in terms of defending ourselves. It was simply a military operation designed to sort out people on our immediate border."

Breathing Time

He said Rhodesian intelligence units were satisfied that a big push into Rhodesia had been planned at this time of year involving up to 1,700 guerrillas.

The operation had given Rhodesia a breathing time of at least two months, the official added. "I am pretty sure we have set them back and we will not see much of the big push before Christmas," he added in a briefing at military headquarters here.

"We have destroyed the bases," Mr. Edden said. He commands the police special branch in the northeast area where African guerrillas began their war against white rule four years ago.

Mr. Edden gave no details about individual guerrilla camps or casualties, nor did he say how many bases were attacked.

He said that only Rhodesian infantrymen were involved, and he denied Mozambique reports that the government forces had used aircraft, tanks and cavalry. But he said the Mozambique figure of seven camps hit "was only slightly exaggerated."

Mozambique Troops

The official said the raids had been aimed at guerrillas of the Zimbabwe African National Union and as far as he knew there had been no casualties among Mozambique troops even though they guarded some of the camps.

Other forces had crossed the border in southeast Modesia to raid a camp at Chitanga. Mozambique forces near the Rhodesian border post of Vila Salazar had heard the firing an opened up with mortars and rockets. "But this time, patience was at an end," Mr. Edden said. "So we gave them a bloody stonk [hammering] back."

He later explained that the Rhodesian forces had been ordered not to aim at the Mozambique troops, but at the guerrilla camp behind them.

In a reference to the Geneva talks on Rhodesia's future, he said: "We had in fact held back in the interests of our colleagues in Geneva. But time was running out. We could have lost a great deal if we'd stayed in Rhodesia longer."

Rhodesia Town Shelled

SALISBURY, Rhodesia, Nov. 3 town of Umtali was shelled by four Mozambican 123 mm rockets at dusk today, security force headquarters disclosed here. There were no casualties.

The Rhodesians retaliated—reportedly with mortar fire on the Mozambican military posts around the border village of Machipanda.

Fighting Said Continuing

DAR ES SALAAM, Nov. 3 (UPI).—Heavy fighting between invading Rhodesian troops and Mozambique forces continued into the night on two fronts, the Mozambique Information Agency said today.

"Heavy fighting is reported in Tete Province and Gaza Province," respectively in the north and south of Mozambique, the agency said in a communiqué.

Smith Goes; No Date Set

(Continued from Page 1)

ence and to draw up a voters' list and hold elections.

The issue of a date of Rhodesian independence is elementary, since the crux of the dispute between the nationalists and Mr. Smith is the composition of the interim government leading to independence. Mr. Smith demands white control over two key Cabinet posts—defense and law and order—as well as dominance by whites in the transition government. The nationalists reject Mr. Smith's demands.

With both sides unable to agree even on a date of independence—and with the departure of Mr. Smith—the nationalist delegates here expressed uncertainty about the outcome of the conference and, like Mr. Smith, voiced some annoyance at the British role.

Colonial Power

The Africans say that Britain, as the colonial power in Rhodesia since the 1890s, bears responsibility for the territory, and that only the British government can guarantee a transfer of power and thwart any prospect of Mr. Smith undermining majority rule in the nation of 270,000 whites and 6 million blacks. The Africans seek a governor-general, or a similar administrative figure, with control over the Rhodesian armed forces during the interim period.

The British, who have been forced to organize the conference, refuse to accept an administrative role in Rhodesia, fearing it would entangle them in a southern African peace-keeping role, possibly even involving troops. The United States is convinced, according to diplomats, that Britain must undertake a forceful role in the transition to majority rule or face the collapse of the conference and an escalation of the guerrilla war.

Shortly before Mr. Smith's departure, he said he did not believe that the U.S. presidential election result would have any effect on the Geneva conference.

Sakharov Urges Shah Intervene for Russian

MOSCOW, Nov. 3 (Reuters).—Nobel Peace Prize winner Andrei Sakharov today handed a statement to the Iranian Embassy here urging the Shah to intervene with the Kremlin on behalf of a Soviet defector who he said could be tried for treason.

The defector, airplane pilot Valentin Zosimov, was returned to the Soviet Union by Iran at the end of last month, four weeks after he flew a small plane across the border and asked to go to the United States.

25 Die in Polish Wreck

WARSAW, Nov. 3 (Reuters).—At least 25 people were killed and injured early today when an express train ran into the rear of a stationary passenger train in fog near Czestochowa in central Poland, PAP, the Polish news agency, reported.

Gromyko, Fahmy Reported Meeting Secretly in Sofia

VIENNA, Nov. 3 (Reuters).—Soviet Foreign Minister Andrei Gromyko and Egyptian Foreign Minister Ismail Fahmy were reported meeting in strict secrecy in Bulgaria today for a major reappraisal of soured Soviet-Egyptian relations.

Egyptian officials said no information was available on the meeting, and Mr. Gromyko made no mention of it when he arrived in the Bulgarian capital from Moscow. He said he was in Sofia to talk with Bulgarian leaders.

The Egyptian Embassy said Mr. Fahmy expected to have several talks with Mr. Gromyko, although neither government has announced that the meeting is taking place.

Both sides seemed determined to avoid information leakages, and diplomats said the meeting might end tomorrow without any official statement.

The discusions are regarded as sensitive, because this is the first high-level encounter between the two governments since President Anwar Sadat last March denounced a Soviet-Egyptian friendship treaty signed in 1971. He accused the Kremlin of holding back vital military supplies.

Swiss Shrug Off Criticism of Haig, Kissinger Parley

GENEVA, Nov. 3 (NYT).—The Swiss government rejected today a suggestion that a meeting between U.S. Secretary of State Henry Kissinger and Gen. Alexander Haig, commander of the North Atlantic Treaty Forces, in Zurich in September had been incompatible with Swiss neutrality.

Gilbert Baechtold, a Socialist deputy, questioned whether the government had the right to authorize the meeting of a foreign troop commander with another foreign official on Swiss soil.

The government replied to the written parliamentary question by noting that the meeting had been a private interlude during Mr. Kissinger's official stay in Zurich for talks with South African Prime Minister John Vorster.

Because the Kissinger-Haig meeting was unofficial, the government said, there had been no need to authorize it.

Peruvian Official Hails Soviet Jet Offer

LIMA, Nov. 2 (UPI).—The foreign minister of Peru said yesterday that a Soviet offer to sell Peru 36 supersonic jet fighter-bombers suited the needs of Peru's air force and came with "extremely convenient terms of payment."

A Foreign Ministry spokesman later said that Foreign Minister Jose de la Puente had not officially confirmed that Peru would buy 36 Su-22 fighter-bombers from the Soviet Union, because such confirmation could only come from the Air Force Ministry.

Talks Held on Implementing Lebanon Peace Force Plan

BEIRUT, Nov. 3 (NYT).—Preparations are under way to implement a "security plan" for reestablishing order in Lebanon after a year and a half of civil strife.

President Elias Sarkis, who has endorsed the plan, put the final touches on it today at a meeting with Lt. Gen. Ali Al-Shayer, the Saudi military attaché who has been authorized by his government to help implement the Arab summit resolutions that are the basis of the plan.

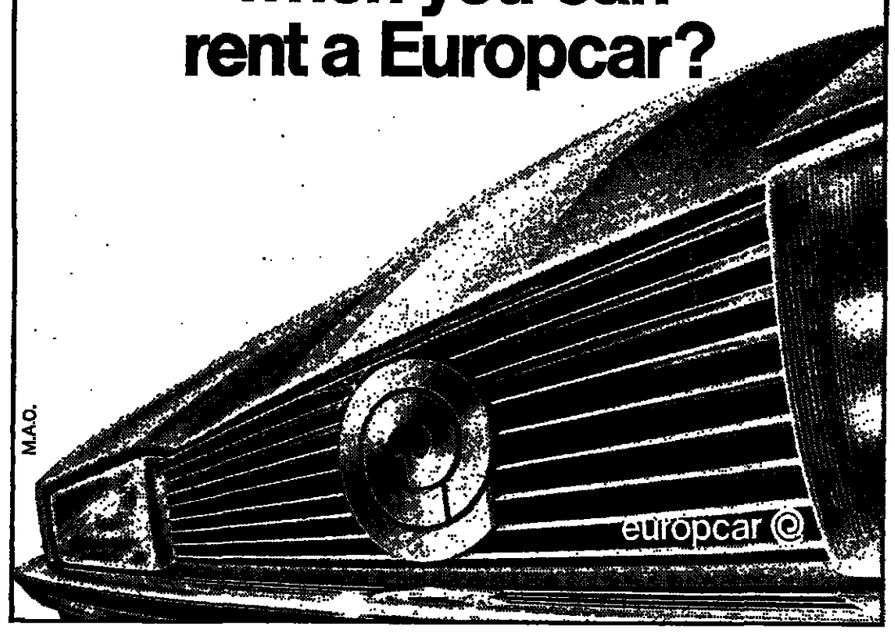
Saudi Arabia last month hosted an Arab six-nation summit conference that established a blueprint for peace in Lebanon. The plan was later endorsed by a full-scale meeting of Arab League representatives in Cairo.

A main resolution adopted by the summit concerned the establishment of a "deterrent Arab force" for Lebanon that, when fully formed, will have 30,000 troops and will be equipped with heavy weapons and armor.

Leftist-controlled Radio Beirut said that an advance party of Arab forces arrived in Lebanon today. It gave no details. A Syrian military team called on President Sarkis this afternoon to discuss what the radio described as implementation of the Arab peace plan.

The leftist daily Al Moharer said here that the Syrians will provide 24,000 of the 30,000 troops of the Arab force.

Syrian troops with tanks painted white—the color of the Arab peace-keeping force—were reported today to have advanced to the outskirts of the mountain town of Aley, about eight miles east of here on the main Beirut-Damascus highway.



The details of the security plan have not been officially disclosed. According to accounts in the press today, two regiments will be stationed in Moslem-held areas and two in Christian-controlled districts. The Arab peace force will reopen highways that have been closed to civilian traffic for several months, the reports said. The force is to begin this operation before the end of this week, newspapers said.

Mr. Sarkis was reported to have decided to keep the Arab force under his personal command and will have Lebanese military officers to assist him.

President Jimmy Carter

It was a fantastic campaign, combining many of the dramatic features of earlier electoral battles, plus elements new to U.S. constitutional developments; shrouded, toward the end, in an atmosphere of apparent public apathy that was shattered when the voters trooped to the polls. And, like most presidential elections, it leaves many questions aroused but unanswered during the flow of political rhetoric.

It was close, like 1960. It was long in being resolved (despite election machines and computers) like 1916 and 1948. And it even held, in the impounding of the voting apparatus of New York State, a faint echo in the Bicentennial Year of that Centennial "contested election," which had to be referred to an electoral commission.

All that recalled the past. But the fact that President Ford had won his office through appointment to the vice-presidency in the wake of the conviction of his predecessor for a felony by a president who in turn resigned under heavy fire for the Watergate offenses was a new, unhappy factor in the struggle; that Mr. Ford came so close to election is a tribute to his conduct in redeeming the presidential office, in coping with an acute recession and in dealing with a complex world

And President-elect Carter? His emergence from initial obscurity to the highest office in the land holds its own drama; his success in uniting a party that is often at odds with itself and, without proposing spectacular approaches to issues, bringing a man from the Old South to the White House constitute no small triumphs. Doubtless the frictions within the Republican party, inspired by its unreconstructed right wing, did him no harm. But the fight still went right down to the finish line, with no respite—and Jimmy Carter won.

What does his victory imply? He will have a Democratic Congress; what he proposes will have a welcoming legislative audience and, presumably, a cooperative one, instead of the party gap between the Oval Office and Capitol Hill that has characterized the last eight years. But the campaign brought out little in the way of specific programs from Mr. Carter. Whether he will be as cautious as that campaign seemed to indicate or as dynamic as Franklin D. Roosevelt, who campaigned in much the same way in 1932, remains to be seen. Even his supporters during the contest credited him with good intentions rather than records or particular promises of performance. No longer "Jimmy Who?" he remains "Jimmy What?"

Yet for all the tensions and doubts that continue after the election, the process itself was encouraging. Americans did argue, did vote in large numbers for their next president. When one looks to the parliamentary coup that fastened tighter chains on India on the election day of the United States, or the military coup that transferred power in Burundi the night before, even his opponents can welcome Jimmy Carter to the White House. A majority of the American people chose to send him there.

Advice for Juan Carlos

King Juan Carlos of Spain has been in France, reportedly seeking counsel from a long-time friend, President Valéry Giscard d'Estaing, and advancing his country's case for admission to the European Community. This state visit, symbolizing close ties between Paris and post-Franco Madrid, is all to the good; but meanwhile, the King was getting some unsolicited political advice back home possibly more valuable than any forthcoming from the Elysée.

Jose Maria Areilza, count of Motrico, foreign minister from the King's accession last November until the Cabinet reshuffle in July, warned the government that it cannot build viable democracy in Spain through political institutions left by Generalissimo Francisco Franco. In a newspaper article, Areilza urged the government to take the initiative for negotiations on a political reform blueprint with "all those groups and political parties which sincerely want democracy for Spain."

This is exactly the advice the King and the government of Premier Adolfo Suarez have been getting for months from a wide spectrum of parties—from moderate right to the Communists—which have come together under the Democratic Coordination label. But, this time it comes from an impeccable monarchist, a leader of what he calls "the civilized right," and a man who tirelessly and effectively advanced the vital cause of Spanish participation in the European Community while in office.

It is extremely difficult to lead a country back to democracy after 36 years of authoritarian rule. The King's devotion to the democratic goal seems beyond question and the Suarez government has taken some important steps. But genuine democracy cannot emerge from undemocratic institutions such as the Francoist Cortes or the National Movement, still Spain's only legal political organization.

To build democracy it is necessary to call on all the democratic forces ready to help. The sooner the King and Suarez begin the process, the sooner Spain will be able to put a hazardous transition period behind it and negotiate its essential links with a receptive Western Europe.

THE NEW YORK TIMES.

Green Monkey Fever

Nine years ago, in Marburg, West Germany, a group of 30 laboratory technicians employed in handling green monkeys from Uganda and Kenya fell ill; seven of them died. The hitherto unknown killer was thereupon named Marburg Disease, or, sometimes, green monkey fever. Epidemiologists began worrying even then about when it would make its next fatal appearance, and where it would claim its victims.

The answer has come this year, when over 335 people have died of a variant form of this disease in Zaire and the Sudan. The victims have included doctors and nurses who proved as vulnerable as their patients An international scientific research team in Brussels issued this warning last week: "The capacity of the virus for interhuman transmission is extremely serious. It poses the gravest danger due to a virus disease encountered in public-health care in more than 25 years."

So little is known about Marburg Disease that neither a preventive vaccine nor any curative drug is available. The threat it poses is a reminder that the problem of infectious diseases is still very real. Many people have thought that infectious diseases belong to history because of the great successes scored by antibiotics. But antibiotics help only for bacterial diseases; they are useless for viral diseases.

The highly developed pharmaceutical industry of the Western world has been strangely unsuccessful in developing effective medicines against viral diseases. Perhaps the Marburg threat can provide a badly needed incentive for much more intensive research.

THE NEW YORK TIMES.

International Opinion

Election of Carter

With the election of Jimmy Carter the United States has started an experiment. This also figures for the rest of the world. Sure enough everything will become less predictable and more interesting than under the presidency of Ford The rest—the quality of the policy-making and to what extent it will be a blessing for the Americans and the rest of the world—remains to be seen.

—From Het Parool (Amsterdam).

Britain and Rhodesia

Pressure on Britain to involve itself more deeply in the attempt to get a Rhodesian settlement is increasing. It will continue to do so. It comes mainly from the black African nationalist groups represented at the Geneva conference. It can also be assumed that Washington has been discreetly urging fuller British participation. Mr. Callaghan said that Mr. Crosland [foreign secretary] would go to Geneva "if necessary." All along, the government has resisted attempts to involve Britain. It only reluctantly agreed to convene the Geneva conference. Now the government seems to be edging towards accepting further, as yet unspecified, commitments . . .

It is true that Britain has great responsibility for Rhodesia. That responsibility must be discharged to the utmost of our abilities. Where the limit of those abilities lies is the question to which the government must now seriously address itself—something which it has so far made no noticeable effort to do. There must be a joint effort with our allies to head off another Angola and a further advance of Russian power.

—From the Daily Telegraph (London).

In the International Edition

Seventy-Five Years Ago

November 4, 1901.

WASHINGTON.—President Roosevelt has issued the following proclamation: "The season is nigh when, according to the time-honored custom of the people, the President appoints a day as an especial occasion for praise and thanksgiving to God. In spite of the recent death of our good President, no people on earth have such abundant cause for thanksgiving as we. I therefore designate Nov. 28 as a day of general thanksgiving."

Fifty Years Ago

November 4, 1926.

WASHINGTON.—Democratic leaders regard the results of yesterday's elections as a slap at the prestige of President Coolidge and his administration. Though returns are still incomplete, the Democrats appear to have gained seven seats held in the Senate by Republicans and also to have made lesser gains in the House of Representatives. Party leaders are already thinking of victory in the 1928 Presidential race, and Al Smith's name has been mentioned.

Moscow's 'Come Hither' to Peking

By Victor Zorza

WASHINGTON.—The Kremlin is using every argument it can find, from threats to blandishments, to make Peking seek an immediate reconciliation with the Soviet Union—which, it argues, is being obstructed by the United States. Some Soviet leaders seem to believe that, unless the opportunity provided by Mao's death is grasped promptly and firmly, it may not recur for a long time. The massive propaganda barrage which Moscow radio is now putting down over China, with promises of generous help and undying friendship, is presumably accompanied by more realistic approaches through secret diplomatic channels.

Western intelligence has no evidence of such direct approaches and therefore tends to doubt whether they are in fact taking place. Government officials who have asked intelligence analysts for their assessment of the situation have been told that even if such approaches were to be made by Moscow, they would be rejected by Peking. The analysts maintain that Peking's public rejection of some of the messages of condolence and greeting recently received from Moscow suggests that diplomatic feelers would be treated in the same way.

Propaganda

But propaganda trends sometimes provide a better indication of what is going on under the surface than secret information, or, as in this case, the lack of it. Soviet propaganda campaigns are closely coordinated with the Kremlin's diplomatic activity, and there are many examples from the past which show that a new line which first became apparent in broadcasts was accompanied by secret Soviet actions which became known only much later.

Soviet broadcasts to China have now replaced the polemics which filled the airwaves before Mao's death with recollections of past friendship and intimations of future cooperation. One broadcast said that the Soviet Union had trained 11,000 Chinese specialists during the 10 years preceding the Sino-Soviet split in 1960. Such cooperation, it urged, should be resumed "even today" so that it may benefit both nations. Another broadcast recalled the assistance given to China in the development of nuclear industry, and implied that more such aid could be forthcoming.

The broadcasts are made up of a number of layers, which have to be separated in order to get at the real message. At the political level, Moscow goes out of its way to refute the "imperialist" claim that the long-term interests of China and the Soviet Union are fundamentally opposed, and that therefore any real reconciliation is impossible. Indeed, it goes so far as to argue that China and the Soviet Union have identical "class" interests, that these Communist interests are "fundamental," and that the friendship and cooperation of the past could be re-established to bring them back to "the joint struggle against the common enemy."

Moscow makes no bones about it. It is looking forward to "the revival of the mighty anti-imperialist alliance of the Soviet Union, China and other socialist states"—a process which, it says, is being impeded by certain quarters in the United States.

Decode

To decode the address to which this message is directed it is necessary to delve back into the internal Chinese polemics which go back to the late 1950s, when some of China's military leaders were accused of working to preserve the Sino-Soviet alliance against Mao's express wishes. It is a charge that was again being made by the radicals against some of the Peking military at the height of the struggle which preceded Mao's death, though in more veiled form, by using historical analogies and by ostensibly attacking Lin Piao, the defense minister who tried to flee to the Soviet Union in 1971.

But the real target of the attack was the military leadership which was in command of the armed forces last year, when Teng Hsiao-ping was in charge in Peking. The same military leaders remain in command now, under the new party chairman, Hua Kuo-feng.

Some of the Chinese military have always been less hostile to the Soviet Union because they knew that China was risking a disastrous defeat in any fighting that might develop. Others, remembering Soviet military aid in the past, continued to regard Moscow as the only possible source of modern weapons for their armies.

That Moscow's message is addressed to them is shown also by an article placed in the Western press last month by Victor Louis, a Kremlin mouthpiece used for psychological warfare assignments by the KGB. Louis wrote that his Moscow sources "believe" that the Soviet Union could reach agreement with Chinese military leaders of the older generation. Many of them, he said, had been trained in the Soviet Union, and they knew what Soviet "military and economic aid" had done for China. "It is therefore believed in Moscow," he said, "that they still realize the need to find a common language with their Soviet neighbor."

Moscow's "come hither" message to Peking was accompanied by a threat. The older generation of Soviet leaders, it said, had put their faith in the Chinese military, whom they had known personally, "but the new generation of Soviet leaders is much less sentimental." For the past few years, it explained, while Moscow was waiting for Mao to die and for Peking to change its policy, the Soviet "elders," as Louis described them, were able to prevent "an irreversible decision" in the Kremlin. But, he added, it would be "incorrect" to wait for Hua, who was much younger. Those Soviet leaders who had adopted a wait-and-see attitude "will be unable to maintain it much longer." China's new policy, he said, ought to emerge "within the coming months." This, he concluded, could be "China's last chance" to show that those who had opposed Moscow's irreversible decision "were right."

One has to go back to the late 1960s to find similar Soviet threats against China, also planted through Victor Louis. At that time the threats were effective in reducing the level of Chinese hostility toward the Soviet Union, and the Kremlin might well think that they would be even more effective now in producing the results it wants.

Moved

Henry Kissinger has been moved by Soviet threats—of which the Louis article was, he said, "one relatively minor part"—to warn the Soviet Union publicly and more explicitly than ever before against attacking China. Moscow, however, chose to denounce Kissinger's warning as a "sordid" attempt to prevent the reconciliation which the Kremlin now believes is possible between China and the Soviet Union. He was trying to create the impression, Moscow radio said, that China was threatened by the Soviet Union, because he believed that they might normalise their relations.

If Kissinger really believes that—and his recent approval of computer sales to China, after opposing them for some time, suggests that he does—then he has come a long way in the past year. He used to argue that the traditional hostility of the two countries was so strong, and their national interests so opposed, that there was no need to worry about a possible reconciliation in the foreseeable future. He is not so sure now. Better late than never.

Examining Decline Of Radical Feminism

By Ellie Willis

NEW YORK — In the past decade, feminism has transformed the consciousness of millions of American women and made significant progress in such areas as equal employment opportunity, abortion rights, reform of discriminatory rape and domestic relations laws. Yet the movement has had little effect on the basic structure of economic and political power in the United States. Now it is struggling to stand its ground against an aggressive backlash that has the Equal Rights Amendment stalled four states short of ratification and politicians competing to appease the anti-abortion fanatics.

The women's movement is, as always, a loosely connected network of groups and activities. Its largest and most influential branch is the liberal National Organization of Women (NOW). Other moderate organizations include the National Women's Political Caucus, the Coalition of Labor Union Women, and Ms. magazine.

Since 1970 the movement's radical wing has dwindled in both numbers and impact, but there are still groups of radical feminists and a new tendency that calls itself "socialist feminist." The movement also includes a variety of consciousness-raising groups, women's medical and legal projects, feminist newspapers and presses, women's studies programs, organizations of feminist writers, artists and academics, and individual activists with no special affiliation.

Rise of Backlash

It is no accident that the rise of the backlash has coincided with the decline of radical feminism. While NOW's task forces, legislative campaigns and anti-discrimination suits have gained important benefits for women, it was the radicals' new ideas, dynamism and militant rage that gave the movement its original momentum. Without pressure from the left, moderates rarely take risks or break new ground. And it is only when they feel threatened by radicals' demands that legislators and businessmen make concessions to the moderates. When that threat is perceived as weak or absent, hard-won reforms are in danger of being reversed—witness the recently enacted law cutting off public funds for abortions—and even a super-respectable measure like the Equal Rights Amendment is in trouble.

Radical feminism has been, in part, a casualty of the same political and economic conditions that have hurt the black movement and the left generally. During the Nixon-Ford era, conspiracy trials, grand jury interrogations of radicals, and such incidents as the Kent State shootings and the mass arrests of demonstrators have had a chilling effect on dissidents. At the same time, economic policies that reduce public spending at the expense of women, minorities and the unemployed have exacerbated the economic slump. Beset by simultaneous unemployment and inflation, people are fighting just to stay even, to preserve some stability. Predictably, the more insecure the economic position of men becomes, the harder they resist female encroachment on their jobs and other privileges.

Besides adverse external conditions, the movement is suffering from a demoralising lack of leadership and direction that reflects its most serious internal problem: middle-class bias. Feminism has always had a broader appeal than the media stereotypes of rich, glamorous professionals and bra-burning karate choppers suggest. Most women—even those who do not identify with the movement itself—have been influenced by feminist ideas and every feminist has had conversations that begin "I'm not a women's libber, but . . ." then go on to declare their support for basic feminist goals.

The fact that so many women feel compelled to disclaim connection with "women's lib" is a significant indication of the gap between a predominantly middle-class movement and the mass of working-class women.

The early radical feminist call for an economic and sexual revolution. But as the feminist message began to catch on, it attracted many women who chose to ignore or downplay economic issues. Some argued that women were biologically superior to men, and that the purpose of feminism was to restore the matriarchy that supposedly existed in prehistoric times.

Others saw women's liberation as a way of improving their personal situation rather than changing the system. Denying the fundamental feminist insight that the oppression of women is a political problem, these women tended to see it as a personal psychological problem, for which feminism was a kind of therapy. A "liberated woman" was one who threw off her "cultural brainwashing" and refused to play traditional roles. They confused women's liberation—a political goal that could only be achieved by organizing to combat political power—with individual solutions like getting a job or a divorce, rejecting marriage and motherhood, or becoming a lesbian.

These attitudes reflect the real privilege of women who have had the education to compete for the relatively few good jobs, the money to pay for child care, the financial resources to leave their husbands without risking the consequence that poorer women might have to forego the luxury of experimenting with "alternate lifestyles" and indulging in female chauvinist attitudes.

Resentment

Most working-class women are struggling along with their underpaid or unemployed husbands to make ends meet and bring up their children decently, have a different perspective. While they are all for more equitable wages and economic equality, they do not define liberation as leaving their families or exchanging housewifery for low-paid factory or office jobs. They resent the "liberated woman's" snobbish assumption that they are unenlightened (i.e., stupid); they know their problem is not brainwashing but not having enough money, leisure or control over their lives.

It seems clear that if feminism is to recover from its current malaise it must return to its militant radical roots and focus on the economic conditions that are of overriding concern to the great majority of women. What is as yet a spontaneous and sporadic trend among small groups, increasing numbers of feminists are urging such a strategy. If their talk becomes action, a resurgent feminism may make the first assault on the apathy of the 1970s.

Ellie Willis, a staff writer for the New Yorker magazine, wrote this article for the Los Angeles Times.

Doomsday Economics

Re: the article by Peter Grose (IHT, Oct. 15) entitled "Doomsday Economics' Dealt Blow by UN Resources Study." The Leontief study contains nothing new for those aware of the present predicament of mankind. It has been generally accepted that the developed world, in collaboration with the developing countries, has the technical means to adequately feed, educate, house and clothe every man, woman and child on the planet.

A problem does not arise until we confront ourselves with the question: do we have the "will" to embark upon such an endeavor? This is a question that is especially pertinent for the "haves" (developed world), as compared to the "have-nots" (developing countries).

The study stated: "To ensure accelerated development, two general conditions are necessary: first, far-reaching internal changes of a social, political and international character in the developing countries; and second, significant changes in the world economic order." If one reads between the lines of the second condition, it implies that the populations of the developed world also instigate "far-reaching internal changes of a social, political and institutional character." Such changes are not the sole responsibility of the developing countries.

I am not optimistic that such changes will occur soon. As the study of history, and consequently, human nature has shown, the "haves" have rarely voluntarily relinquished their power and wealth. If, in the future, we are to avoid a confrontation between the "haves" and the "have-nots", (the proliferation of nuclear weapons having bestowed upon the aforementioned confrontation the dubious distinction of being the last confrontation we will have to endure as a species), the populations of the developed world must rid themselves of the attitude to "get the better of the other fellow," and be educated and convinced that it is for their own good that they embark upon this programme. This is the sole benefit of such reports as the Leontief study, to convince and educate.

The release of such a study does not mean that such a program has begun, or ever will begin. Classroom academicians do not determine foreign policy, politicians do. It is the responsibility of each individual to demand of his respective governmental leaders that such a program be embarked upon, and insist that they begin. Until such action takes place on the part of the populations of the developed world, I, for one, am forced to accept 'Doomsday Economics' as inevitable. It is not a technical problem, it is a problem of "will."

Unesco Dilemma

A word perhaps needs to be said about the problems of reconciling principles with effective statecraft.

The Unesco dilemma over the resolution to grant states the right to control the press should never have been able to occur if experienced statesmen had been in charge of the major Western delegations. When the critical vote on this resolution took place [in Paris last December], where was the United States and the other delegations of the free press lobby? They were not around, having walked out to protest an earlier resolution on Zionism.

How sweet the revenge of the Soviet Union which had learned the price to pay for walkouts during the Korean war. Its absence then enabled the UN to vote for a peace-keeping force in Korea.

Who says that history doesn't repeat itself? The free-press threatening resolution of Unesco wasn't introduced as a Trojan horse. The gates of Troy were wide open having nearly been ripped off their hinges by delegates fleeing a hostile attack.

Why cannot someone with an ounce of imagination find a better solution to sticking up for one's principles than the feeble walkout? Why not stick and fight?

ANDREW P. SUNDBERG.

Job for Kissinger?

As a recent graduate of Harvard who retains a good deal of affection for that institution, I should like to remind C. L. Sulzberger (IHT, Oct. 25) that post of president of Harvard University is not an elected office open to nomination in newspapers.

When I last checked, Harvard was still an educational institution, not a political one. Mr. Kissinger chose to leave Harvard education for a political career and, whatever Mr. Sulzberger might think of Mr. Kissinger's abilities in public office, neither that experience nor, I might add, his prior record as a teacher qualify him to be president of a major university.

In addition, Harvard already has a president, Derek Bok, who was discovered without the help of Mr. Sulzberger. Whatever doubts one might have about Mr. Bok's abilities, there is no reason that he should be put aside so that a fine university may be converted into a repository for unemployed cabinet officers.

Major Lisbon Crisis Seen As Farm Minister Resigns

By Marvine Howe

LISBON, Nov. 3 (NYT).—Portugal's left-wing Socialist minister of agriculture resigned today, touching what appeared to be a serious political crisis.

The resignation of the minister, Antonio Lopes Cardoso, raises the question of the future of the controversial land reform program, which is the linchpin of Portugal's two-and-a-half-year-old revolution.

The departure of Mr. Lopes Cardoso is seen as a victory for the right wing of the ruling Socialist party as well as the militant conservative Farmer's Confederation, who have been pressing for his dismissal since the beginning of the year.

Nevertheless, this shift to the right has already begun to provoke a strong reaction from the hundreds of thousands of the Communist-organized farm workers who have made it clear that they will resist any attempt to repeal the vast expropriations carried out so far under the agrarian reform.

Mr. Lopes Cardoso, 43, has been minister of agriculture and fishing since September of last year and had won the support of the Communists and other leftists for his determination to continue the land reform, although correcting illegal seizures and other excesses.

The resignation follows a three-day Socialist congress, where a serious split appeared between the party's right and left wings, despite strong efforts by the party's leader, Premier Mario Soares, to preserve party unity.

The minister of agriculture and his even more radical wife, Fernanda, did not openly join the left-wing labor dissidents at the congress but discreetly encouraged them, according to well-informed party sources.

Just before this morning's Cabinet meeting, Mr. Lopes Cardoso presented his letter of resignation to Mr. Soares. After discussing the matter with his ministers, the Premier accepted the resignation but gave no indication as to a possible successor.

First Reactions

The first reactions to the resignation came from the Communist-dominated rural workers unions from the Alentejo and Ribatejo Provinces, in central and southern Portugal, which are the land reform areas.

"We won't stand for this and we'll have to take action," the Evora farm workers union threatened, announcing that it would hold a meeting with the workers to decide what to do.

The farm workers union of Protalegre issued a statement saying: "Lopes Cardoso's resignation must have been done against his will and certainly does not favor the interests of the workers."

Meanwhile, conservative political forces openly welcomed the change as a confirmation of the rightward shift of the Socialist government, which has recently introduced severe reforms in labor, education and the economy.

Israel Condemns UN Criticism of Its Pretoria Ties

UNITED NATIONS, N.Y., Nov 3 (AP).—Israel has condemned United Nations report criticizing of Israeli business ties with South Africa as an act of "unashamed hypocrisy" by "Arab states who live in glass houses."

Israeli UN Ambassador Chaim Herzog said that if Israel were to be criticized for its ties to South Africa, "then let the same treatment be accorded to all South Africa's trading partners without exception."

Mr. Herzog named Iraq, Egypt, Saudi Arabia, Kuwait and the United Arab Emirates as some of the countries with which South Africa does business.

Mr. Herzog told the General Assembly that Israeli trade with the white minority government of Pretoria amounts to less than 1 per cent of South Africa's total world trade figure.

Recently

Mr. Herzog said that Israel did not wish to hide its relationship with South Africa. He said that the relationship was "based on the belief—shared by many other countries—that the process of dialogue . . . is the only way to bring about a settlement of conflicts."

Iraq's ambassador said that his country's nationalized oil industry shipped no oil to South Africa. The ambassador from Kuwait said that he intended to refute, rebut and debunk" Mr. Herzog's statement and Egypt's ambassador also rejected the charges, without being specific.

Police, Strikers, Clash Anew at Madrid Depot

MADRID, Nov. 3 (UPI).—Police and striking workers clashed again today on the seventh day of a bus strike.

The incidents occurred at the main bus depot when the police moved in to disperse an asembly of strikers. Four workers were arrested in the clashes that have become an almost daily occurrence at the depot.

City government officials said that some of the 7,000 bus-company employees have returned to work, but the strike leadership said the number was insignificant.

The labor sources said that a bargainning committee whose members belong to outlawed left-list labor groups met with Provincial Governor Juan Jose Roson.

Official recognition of the elected committee has become a key issue in the strike. The workers are also demanding that charges against seven of the strikers be dropped and that the company rehire 33 employees fider as alleged strike agitators.

Iraq Said to Recall Damascus Diplomat

NICOSIA, Nov. 3 (UPI).—Iraq has decided to withdraw the chief of its diplomatic mission in Damascus to protest the "Syrian position on the Lebanese issue and pan-Arab matters as a whole," Baghdad radio said today.

In a broadcast monitored in Nicosia, the Iraqi radio attacked Syria's intervention in Lebanon. Iraq briefly closed its border with Syria last night but later reopened the frontier.

Unesco Vote Favors Place For Israelis

Russian Effort Fails To Defeat Proposal

NAIROBI, Nov. 3 (Reuters).—The Soviet Union today failed in an attempt to block a proposal which should enable Israel to join Unesco's European regional group two years after its membership was denied.

The Soviet defeat occurred at a meeting of the political commission of Unesco—one of three commissions set up to arrange the organization's conference every two years.

At the last general conference in 1974, Israel's application for membership of the European group was turned down, prompting the United States to cut off its contributions to Unesco. It still owes the whole of its 1975-1976 contributions totalling about $38 million.

Plenary Vote

Today, the commission voted overwhelmingly in favor of an executive board proposal that every member state has the right and duty to take part in the organization's regional activities. The vote was 68 for, none against and 14 abstentions.

The proposal, which also allows states to apply for membership of the region of their choice, now goes to the plenary conference for a final vote. Israel is a member of Unesco, but not of one of its regional groups.

In today's debate, the Soviet Union asked why Israel should belong to the European group of which it was geographically not a part, and said it opposed all such moves in Israel's favor until the Jewish state complies with Unesco resolutions.

Israel has disregarded several Unesco resolutions including one to stop excavating Moslem archaeological remains in Jerusalem. This issue triggered off the 1974 row over Israel's European group membership.

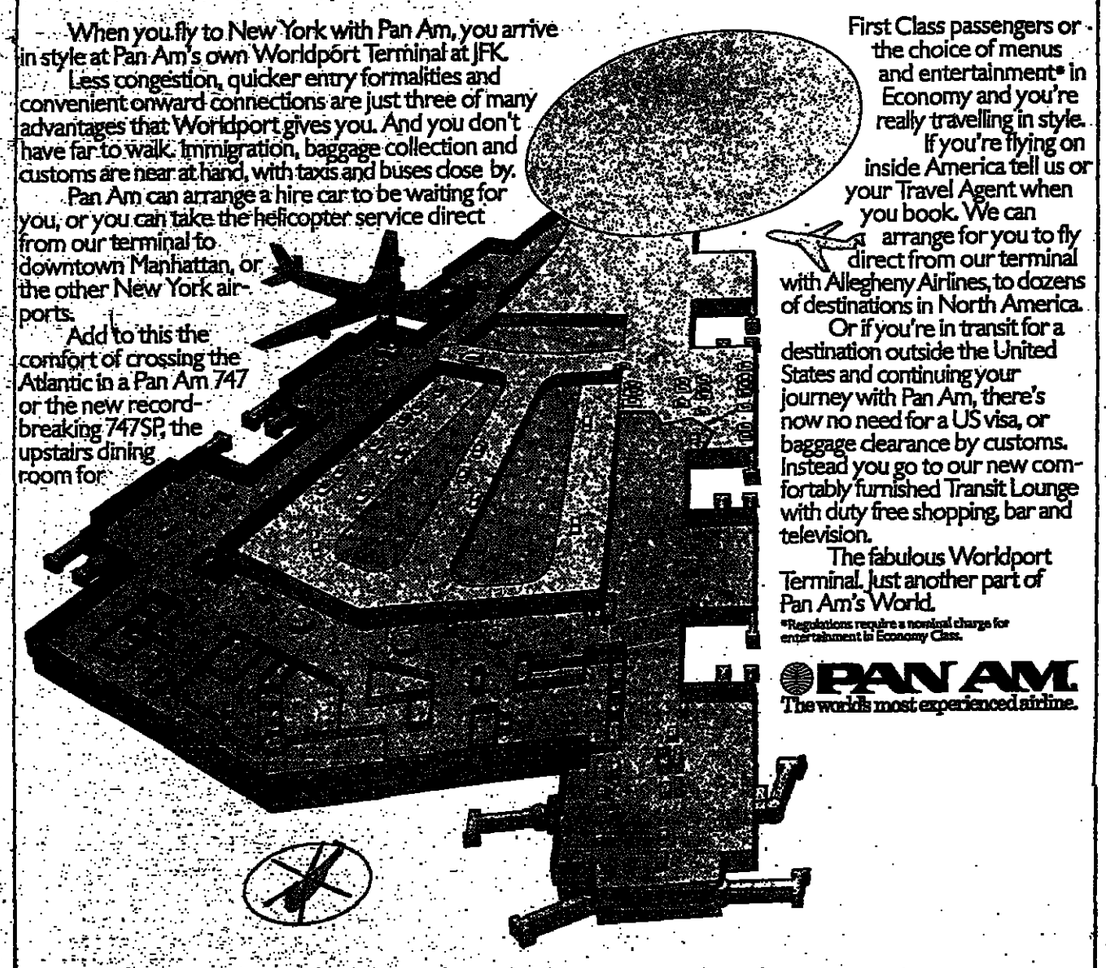
Japanese Star Find Is Confirmed in U.S.

TOKYO, Nov. 3 (Reuters).—The Smithsonian Astrophysical Observatory has officially confirmed a Japanese amateur astronomer's discovery of a new star, and named it "Nova Ophinchus 1976," the Tokyo Astronomical Observatory said.

The new star, with a brightness of the 8.8th magnitude, was discovered in September by Yoshiyuki Kuwano, a 45-year-old library employee in Hita, southern Japan. Mr. Kuwano had discovered three other stars since 1971, the observatory said.

It's never too soon to change to a Volvo. But any minute it may be too late.

If your car fails to cope with cold mornings, damp weather or steep hills, you can always decide to change it for something better. But if it fails to cope with an emergency there is little time for that kind of decision.



With a Volvo 242, 244 or 245 you will be well prepared for all everyday hardships, as well as emergencies. Apart from superb handling qualities you will have an advanced safety design to protect you. Triangle-split dual circuit brakes with bigger safety margins than required by law in any country. A long engine compartment that takes up collision energy.

A protective framework around the passengers, including separate bars in the doors against side impact. A steering system that yields under impact so that it does not constitute a risk in a collision. Three-point seat belts, front and rear. And the high-impact type of laminated windscreen which is elastic and has extraordinary strength – both qualities add to your protection.

It goes without saying that these safety qualities are built into your Volvo not because we believe you will take any unnecessary risks, but because we think you should have the best kind of safety margins that modern automobile technique can offer you.

Travel in style. Arrive in style.

When you fly to New York with Pan Am, you arrive in style at Pan Am's own Worldport Terminal at JFK.

Less congestion, quicker entry formalities and convenient onward connections are just three of many advantages that Worldport gives you. And you don't have far to walk. Immigration, baggage collection and customs are near at hand, with taxis and buses close by.

Pan Am can arrange a hire car to be waiting for you, or you can take the helicopter service direct from our terminal to downtown Manhattan, or the other New York airports.

Add to this the comfort of crossing the Atlantic in a Pan Am 747 or the new record-breaking 747SP, the upstairs dining room for First Class passengers or the choice of menus and entertainment* in Economy and you're really travelling in style.

If you're flying on inside America tell us or your Travel Agent when you book. We can arrange for you to fly direct from our terminal with Allegheny Airlines, to dozens of destinations in North America.

Or if you're in transit for a destination outside the United States and continuing your journey with Pan Am, there's now no need for a US visa, or baggage clearance by customs. Instead you go to our new comfortably furnished Transit Lounge with duty free shopping, bar and television.

The fabulous Worldport Terminal. Just another part of Pan Am's World.

*Regulations require a nominal charge for entertainment in Economy Class.

PAN AM.
The worlds most experienced airline.

A Bedouin in the Israeli Art World

By Jane M. Friedman

EILAT, Israel (IHT).—Some years ago, 45-year-old Salem Ahmed al-Hawath was one of the approximately 50,000 Arab Bedouins in the Sinai desert. With his two wives and two sons, he wandered from oasis to oasis as his forefathers had done for centuries, herded sheep and goats, caught fish from the Red Sea and remained untouched by the modern civilizations in nearby Cairo and Tel Aviv.

Today, Mr. Hawath, soft spoken and simple, still wears a soiled caftan and a wool cap. But he is on his way to becoming famous throughout Israel. He is perhaps the first sculptor to emerge from the Sinai desert in centuries. The Israelis discovered him and his chalkstone figures in the mountains of Sinai after the Six-Day War in 1967. Recently they brought him and *his work to Tel Aviv, triggering* widespread critical acclaim and financial success.

Although Mr. Hawath is back again in his makeshift desert hut one hour south of Eilat, his life has changed significantly. With money from his sculptures he bought a herd of camels. The Israelis have furnished him with more sophisticated carving tools and his tribe, which once ostracized him (the Moslem religion forbids the making of graven images) has welcomed him back. Some of the tribesmen even pose for him.

"I'm happy the Israelis like my things," said the modest Bedouin through an interpreter. He speaks only Arabic. He smiled, his darkened teeth showing, as he prepared a cup of tea over the fire inside his wood hut near the Red Sea.

Salem Ahmed al-Hawath began carving about 15 years ago. During a typical foray through the Sinai mountains, he came across the white chalkstone said to have formed the tablets Moses carried down from the mountain. "I saw the *stone*" said Mr. Hawath, "and my imagination took over. There were animals in them."

With black flint rock, Mr. Hawath began chiseling goats and other animals as well as eerie masks from the stone. Not only did his Chawat tribe ostracize him (they feared he would incur the wrath of Allah) but also he had the misfortune while in the desert to stumble across an undetonated bomb. It exploded, blowing off two fingers, *further convincing the tribe that* the sculpture were unlucky.

But the Bedouin persisted. Soon after the Six-Day War ended, an Israeli businessman named Ben Zion Spector, exploring the desert for future resort areas, discovered the artist. Mr. Spector, who speaks Arabic, became a friend of Mr. Hawath and eventually a patron. In April of this year, he convinced Mr. Hawath to show his work in Tel Aviv.

Thus began an odyssey and a meeting of two cultures which was surprising and humorous for Israeli and Bedouin alike.

"We had to get him a straw mat so he could sleep on the floor" recounted Itzak Tourel, the owner of a Tel Aviv gallery where his work was shown. Mr. Hawath apparently refused to sleep in the bed of the lavish seafront hotel room his patrons had booked for him. "He didn't like the city women either," continued Mr. Tourel, laughing, "they didn't smell of sheep."

During his one week in Tel Aviv, the artist did without women. But the *statues he did there*, inspired by a mindboggling trip to the Tel Aviv zoo, became erotic and gargoylish.

Jane M. Friedman.

Sculptor Salem Ahmed al-Hawath next to his makeshift Sinai Desert hut.

The discovery of Tel Aviv jarred the artist. "I saw new things during my trip to Tel Aviv" he explained, back again in his desert home. "When I came back, I had to go up to the mountains for a month. I almost went crazy." Mr. Hawath's first piece after his return home showed a man holding his fists to his ears, blocking out the noise.

But the trip yielded results, including widespread press coverage. Foreign Minister Yigal Allon bought one of Mr. Hawath's figures. And today the pieces sell for between $20 and $400. Recently, Mr. Hawath built a new shack closer to the desert rocks which he uses as an atelier and storage room for his carvings. There, aided by his 9-year-old son, he chips away at the stone as always, washing his work down with tea; which lends it a golden tone.

There has been significant development in the artist's style. Since returning to the desert, Mr. Hawath has sculpted a whole series of figurines based on the animals he discovered in the zoo. The gargoyle style has become more pronounced. Instead of the original abstract masks, Mr. Hawath has graduated to human faces—including women—and bodies in sphinxlike positions, reminiscent of the great ancient Egyptian styles.

The feeling is good on both Israeli and Bedouin sides. The Israelis feel they have discovered a talent. The Bedouin is happy to be appreciated.

"When I'm working," said Mr. Hawath, puffing on green tobacco in his hut, "only the stones and I exist."

"He is a true artist" said Gad Ben Zev, the son-in-law of Mr. Spector who accompanied this reporter to the desert hut, "he has no superficial culture. The inspiration comes wholly from within him."

Soviet Pair Retires From Ice Dancing

MOSCOW, Nov. 3 (UPI).—The world's leading ice-dancing pair, Lyudmilla Pakhomova and Alexander Gorshkov, announced their retirement today from competitive skating.

The married team had won almost every prize available. Gorshkov underwent surgery last year for a perforated lung, but the two returned successfully to competition.

Tass quoted Lyudmilla as saying they were quitting because of age. "The years are taking their toll—we are 30 now," she said.

Culture Society Names Italian

VENICE, Nov. 3 (UPI).—The assembly of the European Culture Society yesterday elected Italian mathematician Beniamino Segre as its new president.

Antony Babel, former rector of Geneva University, Switzerland, was elected honorary president. Planning expert Lewis Mumford, an American, is vice-president along with West German philosopher Gerhard Funke, Polish poet Jaroslaw Iwaskiewicz, Nobel Prize-winning French physicist Alfred Kastler, Italy's Stanislao Ceshi and Soviet writer Boris Polevoi.

Bernstein Brings Home Some Musical Truths

By David Stevens

PARIS, Nov. 3 (IHT).—The musical trade routes of the world are offering a rather garbled aspect so far this season. The Paris Opéra and the Orchestre de Paris have just returned from successfully peddling their wares in the United States (not always French wares, at that), the Vienna State Opera has just offered Berlioz's "The Trojans" as a sign of renewed life, while the Paris Opéra (where Berlioz still has trouble getting past the front door) has opened its otherwise vacant premises to Soviet ballet in the form of "Ivan the Terrible."

Nobody seems to be at home; everybody is in a holding pattern over someone else's airport or unloading goods from exotic places. In this peripatetic context, Leonard Bernstein—the most protean of musicians—appears as an element of stability and as a bearer of home musical truths in a world more interested in exporting them.

More or less repeating his royal progress of a year ago, Bernstein—newly outfitted with a bristly gray beard that gives him a patriarchal, not to say rabbinical, aspect—has just arrived from Vienna, where he completed a long-running Mahler cycle with the Vienna Philharmonic, to pursue what seems to be a Berlioz cycle with a rejuvenated Orchestre National de France.

The product of last year's visit, the Requiem, is now available in record stores, and he is now recording "Harold in Italy" and the "Symphonie Fantastique," which were on the program for two concerts at the Théâtre des Champs-Elysées. He was given a very French reception, which ranged from an excited concert audience that included the Prime Minister and numerous musical luminaries, to a magazine article that purported to canvass leading music critics from around the world for a rating of leading conductors, in which Bernstein finished well behind the leaders.

Straw votes aside, there are precious few conductors who can so completely identify themselves with the esthetic worlds of certain composers and at the same time occupy themselves with extracting total cooperation from such willful bodies of humanity as, say, a French orchestra. The miracle duly took place in the two ultra-subjective Berlioz works.

Leonard Bernstein *... in action*

The appeal of this particular "Harold in Italy" was almost schizophrenic, with Bernstein as the orchestra producing a hallucinatory, autobiographical framework in which the excellent viola soloist, Donald Machine, provided a *sober, mellow, clear* voiced contrast, disappearing into and soaring out of the orchestral texture in a way that admirably suited the composer's own scenario.

The "Symphonie Fantastique" was hardly less impressive, on the one hand making the most of Berlioz's dramatic contrasts, and on the other exploiting the orchestral contrasts in which the score abounds—even if at times it meant giving undue prominence to secondary themes and passages that often go for nothing in other performances.

Here the Orchestre National itself was a factor. Its woodwind in particular, played with extraordinary clarity and security, while the violins—propelled by the dynamic presence of the new concertmaster, Patrice Fontanarosa, who has emerged from the anonymity of the pit at the Paris Opéra—played with unaccustomed vitality and an almost overeager responsiveness to Bernstein's urgent direction.

The conductor's assimilation of the quite different inner world of Mahler, and his own by no means familiar role in Vienna's musical scene, was hardly less convincing a week or so ago as he led the Philharmonic in Mahler's more personal, relatively little-known Sixth Symphony at the Musikverein.

As if projecting a new sobriety that goes deeper than the new beard, Bernstein plunged into the opening *Allegro energico* with a brisk, hard-edged force that soon settled into an expansive, broad-paced, intensively expressive reading of the composer's confrontation with fate. Theatrical flamboyance was at a relative minimum and inner (dare one say Germanic?) passion was the keynote of a gripping performance. The Philharmonic themselves joined in the general enthusiasm.

Doctor's Wife—Glamour, Money Or Loneliness?

LOS ANGELES (NYT).—To many women, marrying a doctor means financial security and social prestige. To others, however, it means a short, unhappy marriage that ends in divorce.

"Divorce is becoming increasingly common among physicians," said Dr. Edward Stainbrook, psychiatrist and chairman of the department of human behavior at the University of Southern California Medical School. "A generation ago, the divorced doctor was the exception, now it is almost the rule."

"Although nobody has done a study documenting the trend, it appears that doctors and their wives no longer feel compelled to continue a marriage that they find unfulfilling simply because they think that the profession demands it," Dr. Stainbrook continued.

While no one, including the Census Bureau and medical societies, has collected statistics pointing toward a high divorce rate among doctors, physicians interviewed agreed that such was the case. One doctor said that every doctor in his department at a major hospital here was either divorced or in the process of getting divorced.

"Doctors tend to marry the first woman they date," said Dr. William Skilbeck, a clinical psychologist at the University of California at Los Angeles.

"By the time they reach medical school, they regret never having had a social life and try to make up for it by getting married in record time. They often marry women totally wrong for them because they don't know themselves very well."

Dr. William Nolen, a Litchfield, Minn., surgeon and author, believes that single women or their mothers often pursue eligible doctors because "they want a son-in-law who earns lots of money." (The average office-based physician earns $60,000 a year, according to a recent survey in Medical Economics.)

INTERNATIONAL EXECUTIVE OPPORTUNITIES

SENIOR PROJECT MANAGER
CAST METALS FACILITY
(Western Europe)

International consulting/architectural firm has opening for senior engineering professional to assume responsibility for managing all phases of planning, design, and construction supervision of major cast metals manufacturing facility project in Western Europe.

Candidate must have proven technical expertise and established reputation as a Senior Project Manager with background in design and implementation of large scale industrial facilities. Responsibilities include technical direction involving planning and designing building/building systems process equipment and ancillary facilities—including all aspects of engineering from project inception through final design, construction, equipment installation and start up... Administrative responsibilities include initiating and maintaining essential project review and control systems to assure effective budgetary, schedule and quality control... Ability to manage a large project team and to initiate and maintain essential reporting and communication systems within the firm and with the client organization required.

Personal facility for communicating effectively verbally and in writing for relating well with clients and other professional/administrative staff is necessary... High level of initiative and organizational ability required.

Minimum of 10 years experience in sophisticated engineering design and project management involving cast metals and/or related heavy industry. Overseas experience desirable... Engineering degree with professional registration required.

Send resumé with salary history, in confidence, to:

Director of Manpower Development
LESTER B. KNIGHT & ASSOCIATES
549 W. Randolph Street
Chicago, IL 60606
An Equal Opportunity Employer M/F.

DRILLING SUPERVISOR

DUTIES: Successful applicant will represent and direct operation on behalf of Delhi on oil and natural gas drilling rigs active in our expanding operations in the Far North East of South Australia.

QUALIFICATIONS: Applicants should have extensive practical experience in supervising drilling operations including control of mud properties, hydraulics programs, running and cementing casing, diamond coring, drill stem testing, control of drilling stock and preparing routine drilling records.

SALARY: Will be negotiated with successful applicant commensurate with qualifications and experience.

FACILITIES: All meals and single status accommodation in the field and air transportation between Adelaide and the field are supplied free of charge by the company.

APPLICATIONS: Please apply in writing with a resumé of employment history, job experience and relevant personal details to:

OPERATIONS MANAGER,
DELHI INTERNATIONAL OIL CORPORATION,
Box 2,364 GPO, Adelaide, South Australia 5001, Australia.

INTERNATIONAL EXECUTIVE OPPORTUNITIES

VACANCIES AVAILABLE IN:
Lebanon • Saudi Arabia • Emirates
A Group of Ind. Trading & Real Estate Companies has the following vacancies:

1. MANAGERS FOR TRADING Co's
Univ. graduates + wide exp. of min. 10 years in manag. of trading Co.

2. FACTORY MANAGERS
Univ. graduates + wide exp. of min. 5 years in factory management.

3. FINANCIAL MANAGER
Master in Business Adm. + higher specialization in accounting or in financial Manag. Min. 7 years exp. in financial affairs including 3 years in a leading post.

4. COMMERCIAL MANAGER
Master in Business Adm. + min. 5 years exp. in com. affairs including marketing, administration, promotion and public relations.

5. CIVIL ENGINEER
Bachelor in Civil Engineering + min 10 years exp. in construction.

6. INTERNAL AUDITOR
B.B.A. in accounting or an equivalent diploma with min. 5 years exp. in auditing.

7. MANAGEMENT AUDITOR
B.B.A. in Business Adm. or an equivalent diploma with min. 3 years exp. in drawing up Co's financial and adm. systems, and following up their implementation.

8. ECONOMICAL RESEARCHER
B.A. in economics + min. 5 years exp. in ec. studies.

9. LAWYER
B.A. in Law + min. 5 years exp. in the bureau of an appointed attorney. Conversant in com. and Co. affairs.

10. INDUSTRIAL ENGINEER
B.S. in Ind. or Electromechanical engineering + min. 5 years exp. in the production department of an ind. Co.

11. PURCHASE OFFICER
A female bachelor holding a B.B.A. or B.A. Economy + min. 2 years exp. in following up foreign purchases and planning company's material requirements.

12. EXECUTIVE SECRETARY
Baccalaureat (2nd part) or an equivalent diploma + diploma in exec. sec. + min. 5 years experience.

13. TRANSLATOR
Applicant should be a graduate of a trans. school or holder of an equivalent diploma. Exp. and other languages are an asset.

N.B. *Arabic & English are a must for all applicants, plus French for: Translator, Purchase officer, Lawyer, Economical Researcher, Commercial Manager.*

Call: Paris, Société SETEC, 346-12-35, ext. 4101.

THE INTERNATIONAL HERALD TRIBUNE
requires
two young but experienced
ADVERTISING SALES EXECUTIVES

—For its London office: an aggressive young man or woman preferably with experience in the financial and classified fields.

—For its Frankfurt office an equally dynamic young person with advertising sales experience. Must be totally fluent in German and willing to travel extensively within Germany.

For both these positions nationality is not a major consideration but EEC citizenship or valid work papers are essential. Salary commensurate with experience and market conditions. Excellent advancement prospects.

Box D-5,523, Herald Tribune, Paris.

American Based Manufacturer Seeks
GENERAL MANAGER

This position is responsible for Marketing, Administration, Sales and Manufacturing Management. Our European Headquarters are in Belgium, East Flanders.
Our products are marketed through both direct OEM sales and industrial distributors. We are a growing successful company. The right candidate can achieve his growth ambitions while helping us to achieve ours.
The Manager we seek will have a strong marketing background, proven ability to coordinate Sales, Administrative and Manufacturing functions plus ability to forecast and meet profit objectives. Should be fluent in English, Dutch and French. German an added advantage.
Salary commensurate with experience. Many fringe benefits.

Please submit resumé with complete compensation history in confidence to:
Box D-5,544, Herald Tribune, Paris.

MARKETING MANAGER
Base salary and substantial incentive compensation plan which provides an annual income of $30,000 to $60,000.
Requires extensive background in all of the following:
Engineering Systems Sales;
Technical Publication Sales;
Micro Publishing Sales;
Sales Administration.
Successful candidate will have bilingual capabilities specifically English and German and willingness to relocate to West Germany. Also the successful candidate will have the ability to conduct business discussion with Executive and Technical management of prospective customers. A background in computing and photo composition is needed.
Box D5,530, Herald, Paris.

Effectiveness is what you're looking for.
In a top executive.
In the advertising medium that will help you find him.
And effectiveness is what you'll get in the International Herald Tribune. Because it's read by senior management throughout Europe.
73% of our readers are executives, including 41% at a senior level.
33% serve on at least one board of directors.

EXECUTIVES AVAILABLE

BOARD VICE CHAIRMAN
American, 50, European doctorate in business, multilingual, top-flight multinat'l general management executive. Solid track record in multiproduct line/staff mktg., fin., organiz., admin., profit mgt. Excellent negotiator, motivator committed to results. Worldwide experience with high-level contacts in Western & Eastern world. Available due to resignation of chairman. Seeks challenge in top management of multinational.
Write: Box D-5,542, Herald Tribune, Paris.

U.S. NATIONAL
12 years international experience, 4 in Europe with emphasis in Eastern Europe and Middle East. Marketing, Public Relations and Finance background. Strong cultural and historical inclinations. Seeks challenging international opportunity. Resident in West Germany, free to travel and relocate as required.
Box 965, I.H.T., Gr. Eschenheimer Str. 43, Frankfurt/Germany.

After Anti-Inflation Moves

Wall St. Fears New Europe Slump

NEW YORK, Nov. 3 (AP-DJ).—Doubts about the strength of the U.S. economic recovery have kept investors guessing for months, but events abroad may assume a bigger role soon.

Slowing economic growth abroad has not escaped notice in the United States, of course, but Wall Street analysts have begun focusing on something more basic than a pause or lull. Britain, France and Italy have begun to take tough measures against inflation even as their business activity slows. These policies are increasingly seen in the United States as having serious, possibly risky, long-term implications.

"Deflationary policies in these countries mark a historic juncture for the postwar economy," says Francis Kelly, research director of Blyth Eastman Dillon & Co. He believes they are a full-fledged test of monetary theories and of the system of floating exchange rates adopted in recent years.

"We remain undecided about the outcome of this test," says Mr. Kelly, "but believe Britain, France and Italy run at least a 50-50 risk of a 'growth recession' early in 1977 as a result of the deflationary measures being taken." Growth recession is a term used to characterize a period when total output is neither rising nor falling materially.

Argus Research Corp. has been voicing similar concern about the economic policies being adopted abroad. Argus is basically bullish about the U.S. stock market, contending that investors have erred on the pessimistic side in assessing recent business trends.

"But the gloom here is mild compared to sentiment across the Atlantic, where most stock market indexes are at or near their 1976 lows," says Argus. "The European markets have been somewhat wiser, and justifiably sadder, in perceiving the severity of their underlying economic predicament.

"There may be a few exceptions to the general gloom—Germany and Switzerland come to mind—but the growth of most European economies during 1977 will be, at best, slightly worse than in 1976 and, at worst, nearly disastrous."

The crux of both analyses is the uncertain impact on the world's economy of deflationary policies being undertaken by several countries. These policies are aimed at reducing, rather than spurring, total domestic demand and at stabilizing currency exchange rates. Argus sees these policies being implemented in a way "that is sure to have a negative impact on trading partners."

Blyth Eastman Dillon's Mr. Kelly says recent deflationary moves abroad are not "just another chapter in the elusive search for international price and employment equilibrium, but, rather, the last struggle" of a monetarist approach to economic problems.

"Considering that these deflationary measures have been adopted in a climate of high unemployment and slowing economic growth, one must concede they are at least well-intentioned," he says. But he believes it still is questionable whether they can achieve intended results without a severe retrenchment in employment, or that the political climate abroad is strong enough to permit their implementation.

Mr Kelly sees little reason to expect that deflationary policies will succeed in strengthening exchange rates. "The inevitable failure of the cosmetic solution to go far enough in slowing money growth through the public sector," he says "sets the stage for succeeding policies. These will focus, in short, on imports."

Protectionist policies, which would curtail freedom of international trade, are "highly likely" to result, he says, because of political pressures in the affected countries. He believes the economic vigor of Japan and West Germany would be quietly sapped as a result.

"We would expect the Japanese and West German economies to direct exports into the still-expanding U.S. market, raising a question about the trade policy of our next administration," he says.

Technique Bypasses Underwriters

Exxon Plans 'Dutch Auction' in Bond Issue

By Vartanig G. Vartan

NEW YORK, Nov. 3 (NYT).—The Exxon Corp., which pays more than $500 million annually in interest on its substantial borrowings, is taking a page from a money-raising technique once popular at the Treasury Department, the country's biggest borrower.

In what it describes as an "experiment," the giant oil company has announced plans for a "Dutch auction" in a $54.9-million issue of pollution control revenue bonds.

Issuing the 30-year, tax-exempt bonds will be the Gulf Coast Waste Disposal Authority of Texas. The principal and interest requirements will be met by Exxon's payments to the authority.

Proceeds of this unusual sale will be used to provide air and water pollution control facilities at the company's refinery and chemical plants at Baytown, Tex., and its chemical plant in Houston.

In a Dutch auction, all bonds are awarded at a uniform price at the highest yield accepted once the full amount is spoken for.

From 1972 to 1974, the Treasury Department raised an estimated $10 billion in selling long-term bonds through this technique.

Since that time, the Treasury's debt sales—as in the case of the November refunding that takes place this week—have reverted to the more standard type of auction, whereby successful bidders pay various prices for a government issue.

The Dutch auction for Exxon's pollution-control bonds, with bids to be received in minimum amounts of $100,000 until Nov. 16, is being watched with more than passing interest.

It marks the first time that a major corporation has been associated with an auction of this type and the technique itself bypasses the traditional underwriting route. Usually, underwriters buy bonds from the issuing company and then reoffer them publicly after obtaining a fee from the company.

The big question posed by this tax-exempt issue—and only time will bring the answer—is whether the Dutch auction method can be applied to financing straight corporate debt.

If this proves to be the case, it could mean fewer underwriting dollars for the big Wall Street syndicates and a potential threat to brokerage house profits, already undercut severely by competitive rates in stock transactions at the institutional level.

Inflation Rise, Investment Cut Seen in Italy Austerity Plan

ROME, Nov. 3 (AP-DJ).—Italy's developing austerity plan will cause an acceleration of inflation next year and a decline in fixed investment for the third year in a row, Treasury Minister Gaetano Stammati said today.

It will also produce a small surplus in the balance of payments current account and lower the public sector deficit, but the state's overall indebtedness will continue to grow, he told the Senate Finance and Treasury Commission.

Mr. Stammati put the 1977 inflation rate at 20 per cent, compared with a rise in prices of almost 18 per cent in the year ended Sept. 30. A large part of this increase will have been caused by a round of price increases for government-produced goods and services, designed to put these loss-making state firms back in the black.

The costs of investment goods will rise 25 per cent, he said.

Combined with a 0.5-per-cent decline in the quantity of goods imported, these price rises are likely to cut private consumption by 1.5 per cent and reduce investment in new plant by 1 per cent, the third annual decline.

An 8-per-cent rise expected in the quantity of exports should yield a balance of payments surplus on the current account of 100 billion to 200 billion lire ($115 million to $230 million) Mr. Stammati said. This compared with a current account deficit of 1,573 billion lire in the first seven months this year, the last complete figure available.

Vietnam Sets Policy On Private Business

BANGKOK, Nov. 3 (AP-DJ).—Vietnam announced guidelines for private business in South Vietnam and said it would protect the legal interests of businessmen in areas where private enterprise is allowed, the Vietnam News Agency (VNA) said today.

The "overriding spirit" of the new policy will be joint management with the state monitoring and protecting the interests of both private shareholders and workers, VNA said.

The statement mentioned exploitation of natural resources, agriculture and transport as areas where investment was welcomed or allowed.

Carter Victory Hits N.Y. Stocks

NEW YORK, Nov. 3 (IHT).—Jimmy Carter's election victory over President Ford pushed stock prices broadly lower in active trading today.

Stock encountered heavy selling at the opening, and the Dow Jones industrials were showing nearly a 17-point loss.

The Dow index closed at 956.53, off 9.56.

Almost 1,189 stocks were down, compared with about 313 issues showing gains. Volume amounted to 19.35 million shares, compared with 18.4 million Monday.

Analysts said the first hour's "emotional" selling represented efforts by investors to close positions taken last week as political polls showed President Ford closing the gap on the challenger.

Larry Wachtel, of Bache Halsey Stuart Inc., commented that "the encouraging thing is that we didn't have a second wave down" after the opening retreat.

Mr. Wachtel said the market will likely go into a period of "watchful waiting" until Mr. Carter's economic policies become apparent.

Another analyst said the slack pace after the initial selling indicated many investors thought there was a chance there could be an improvement in the economy under Carter.

Oil issues were among the hardest hit. Analysts said that with Democrats retaining control of Congress and Mr. Carter moving into the White House, the climate for oil companies in Washington is bound to be less friendly.

Although they said fears of vertical breakup of the big oil firms is not likely, there are now "stronger odds" for horizontal divestiture.

Additionally, they noted the president has some flexibility concerning oil pricing policies and that Mr. Carter could be expected to be less generous to oil firms than Mr. Ford was.

Exxon lost 1 to 52, Gulf Oil 1 to 26 1/4, Mobil 1 to 59 1/4, Standard Oil of California 1 to 36 1/8, Texaco 1 to 26 5/8 and Skelly Oil 2 3/4 to 107 1/4.

Among some leading industrial stocks, Du Pont closed off 1 3/8 at 126 5/8, Dow Chemical was off 3/4 at 41 7/8 and U.S. Steel closed at 47, down 1/2.

Top U.K. Hotels To Change Hands

LONDON, Nov. 3 (AP-DJ).—Some of London's best known tourist hotels are to change hands as part of a £27.6-million deal announced today.

The Strand Palace, Regent Palace, Cumberland and Ariel hotels are among 35 hotels in Britain and Ireland acquired by Sir Charles Forte's Trust Houses Forte group from J. Lyons, a British food, catering and hotel group.

Trust Houses Forte is one of the world's largest hotel chains, with 750 establishments worldwide.

Market Closed

All stock exchanges and banks were closed Wednesday in Japan for a national holiday.

U.S. Agency Raises Number Of Big Banks on Problem List

By Robert D. Hershey Jr.

WASHINGTON, Nov. 3 (NYT).—Eight billion-dollar banks are now being carried on the so-called problem list of the Federal Deposit Insurance Corp., up from just two at the beginning of the year, the banking agency disclosed yesterday.

One of the eight, moreover, is considered a "serious problem" by the agency, which placed neither of the two big banks in this subcategory last winter.

FDIC chairman Robert Barnett declined comment on the reason for this increase, which occurred while the problem list as a whole climbed by only about 5 per cent.

He cautioned, however, that there is always a lag between the time a bank is recognized as experiencing some degree of financial difficulty and the time it goes on the problem list and he said this lag was usually longer for the large banking organizations whose examination data takes weeks to analyze.

Identities a Secret

Not surprisingly, Mr. Barnett refused to identify any of the eight nor would he give any hint as to whether there was any geographical concentration. As of June 30, there were 88 banks in the United States with deposits of more than $1 billion.

The FDIC's figures are the most comprehensive of any of the bank regulatory agencies since they cover all the nation's 14,700 federally insured banks, about 98 per cent of all banks. Of these, about 8,900 are directly supervised, as well as insured, by the FDIC.

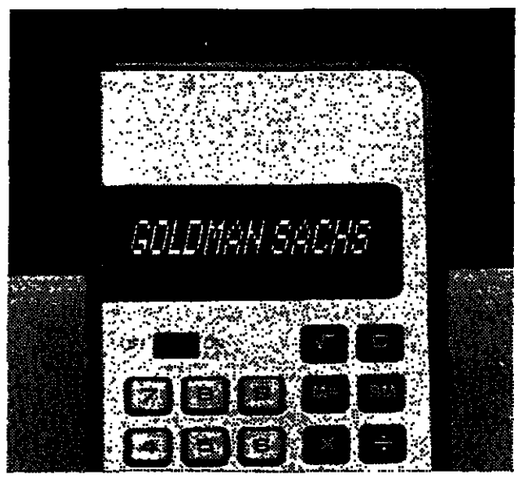
The problem lists of the banking regulators—the Controller of the Currency, the Federal Reserve System and the Federal Home Loan Bank Board as well as the FDIC—made headlines last winter when it was disclosed that Chase Manhattan Bank and First National City Bank, now Citibank, appeared on the controller's list and that 12 of the 50 biggest bank-holding companies had been put on a problem list by the staff of the Federal Reserve.

Real Estate Collapse

The swollen number of problem banks was attributed to the recession, which reached its low point in the spring of 1975. Loans to finance soured real estate ventures caused a large part of the banks' financial erosion.

But the economy has continued its uninterrupted expansion this year and the overall number of problem institutions, as calculated by the FDIC, has grown hardly at all.

The agency's list carried 359 names in late January, 365 in late March, 376 in September and 368 in early October. It now stands at 379.



It is somewhat surprising, therefore, that the number of big banks in at least mild difficulty has jumped so sharply.

Mr. Barnett seemed not to be alarmed about the situation, but he made two speeches to industry groups in September in which he noted that bank failures since 1970 affected many more depositors than previously and suggested the insurance system might need some revision.

"In just the last six years," he told the Kentucky Bankers' Association, "we have seen failures of some very large banks, including two with over $1 billion in deposits, two of $100 million to $500 million and five between $50 million and $100 million."

This trend, he suggested, called for some discussion of the establishment of 100-per-cent insurance protection for all depositors. Only the first $40,000 of deposits is now covered.

Client service makes us one of the world's leading financing and investment houses.

Let the facts speak for themselves:

"We were established in 1869 and provide investors, corporations and governments around the world with a full range of investment banking services.

Institutional Investor's survey ranks Goldman Sachs as investment banker to more major U.S. corporations than any other firm.

In 1975 we managed or arranged $16 billion of medium and long-term finance for industry and governments.

Last year the major institutions voted us top U.S. broker and best for overall service in the Financial World poll.

Our annual research budget is in excess of $3 million.

Goldman Sachs was a founder member of the Chicago Board Options Exchange and is one of the dominant firms in the options business.

We are the world's oldest and largest commercial paper dealer, with over $650 million currently outstanding for European and Far Eastern borrowers alone.

Since 1970 we have completed more than 100 merger, acquisition and divestiture transactions."

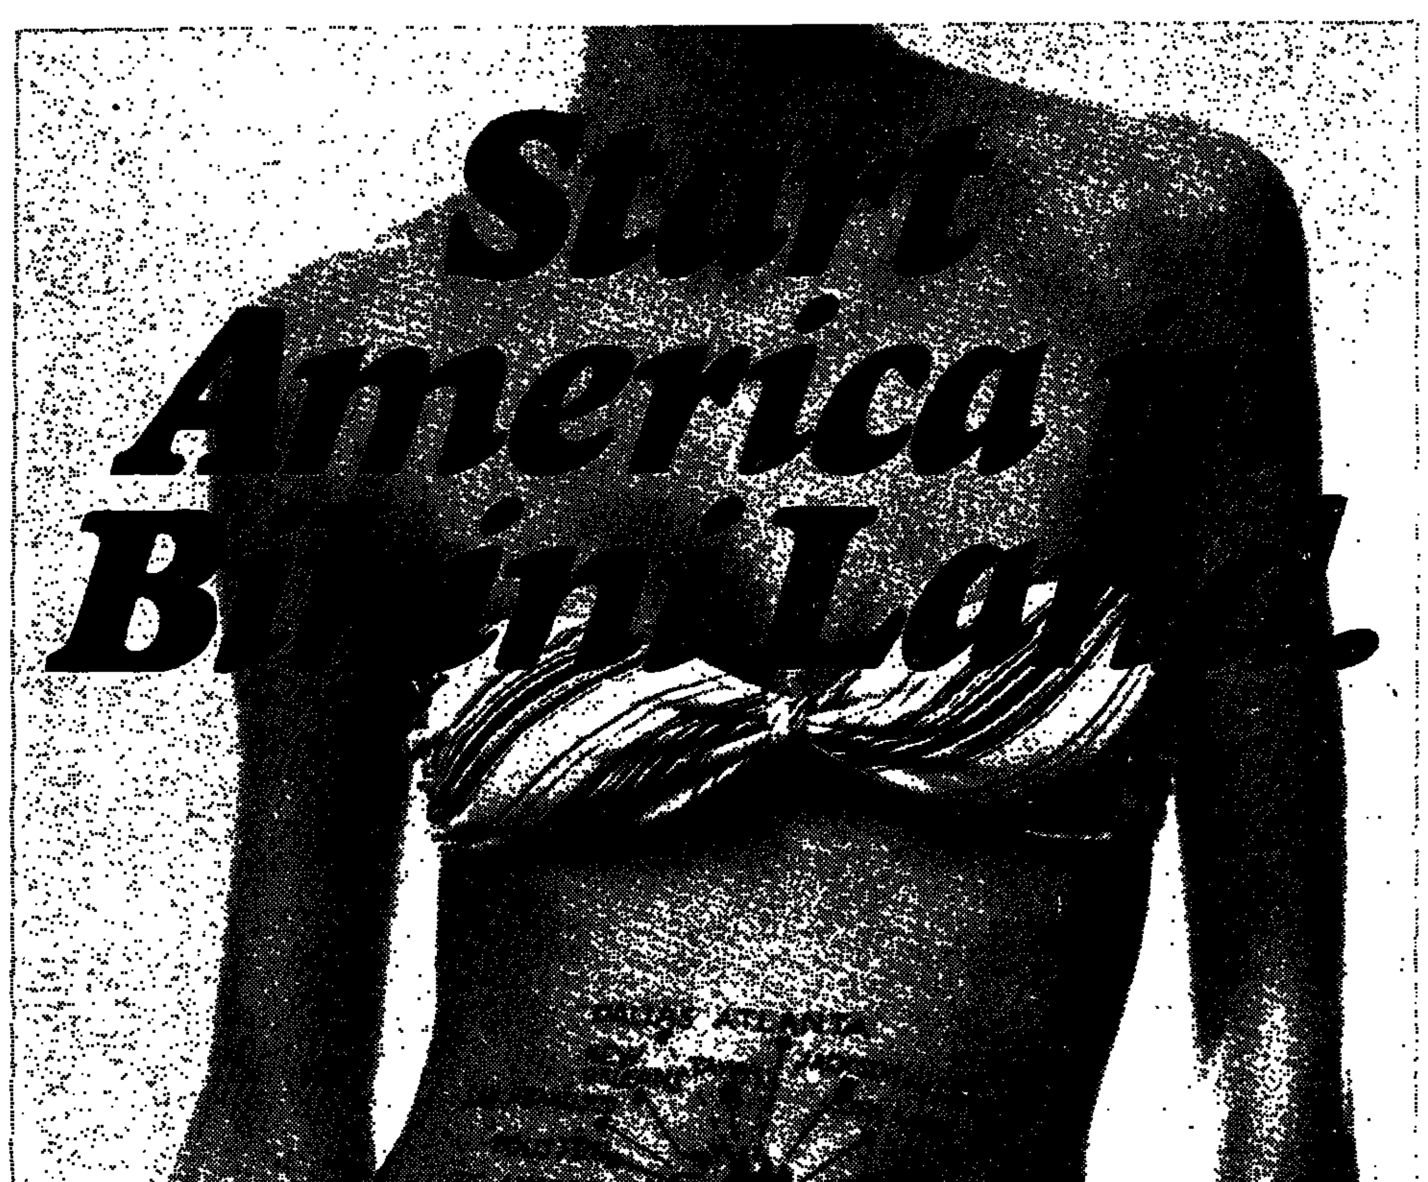
Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or paid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.



x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

It's what we call Miami, where it's summer all year long and where the bikini is the uniform of the suntanned, outdoorsy Miami girls. National Airlines flies you there nonstop from London. But that's not all. National also gives you the same airline service to Florida, the South and the West of the U.S.A. And convenient connecting service to just about anywhere else in the U.S.A., Central and South America and the Caribbean. When you fly National to Bikini Land, you do it without the congestion, the crowds, the cold winter winds of places like New York and Washington. You do it with great movies and great service, too.

Call your travel agent or National Airlines and say, "Take me, I'm yours" to Bikini Land.

National Airlines
"Take me, I'm yours."

Contact your travel agent or National Airlines 01-629 8272 81 Piccadilly, London W1V9HE
National Airlines Inc. is incorporated in the State of Florida, U.S.A.

"Ce qui différencie la Chemical Bank des autres grandes banques américaines internationales, ce ne sont pas les capitaux. C'est le service personnalisé."

Château de Mauvières, St-Forget, Yvelines, France

"The difference between Chemical Bank and the other large U.S. international banks isn't money. It's personal service."

More than money. In any language. CHEMICAL BANK

China Trade Gap Narrowed in 1975

GENEVA, Nov. 3 (Reuters).—China's trade deficit with developed countries fell slightly to $2.7 billion last year from $2.8 billion in 1974, according to figures published here by the General Agreement on Tariffs and Trade.

Chinese exports rose to $2.66 billion last year from $2.45 billion in 1974, while imports showed little change at $5.37 billion in 1975 against $5.27 billion in the previous year, GATT said in its annual review of international trade.

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or pid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

Where a split for stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

TULIPS AND CHIMNEYS

By E. E. Cummings. Edited, with an afterword by George J. Firmage. Introduction by Richard S. Kennedy. Liveright. 218 pp. $10 hard cover, $3.95 paperback.

Reviewed by Anatole Broyard

WHEN I was 15, I appeared early one day at Joseph Kling's bookshop on Eighth Street, in New York City, having saved up $7.50 to purchase an out-of-print edition I had seen there of E. E. Cummings's "Tulips and Chimneys." An awe-inspiring figure in his eyeshade and thick glasses, the generally surly Mr. Kling seemed surprisingly touched by my eagerness to have that volume and, without any suggestion from me, spontaneously reduced the price to $6.50. All the world loves a lover.

While I no longer feel this ardent love for Cummings's poetry, it would be a cold-hearted critic who would deny him to 15-year-olds. He represents more perfectly than anyone else the adolescence of American literature—even of American life. His sentimentality, his revolutionary posture and his mushy toughness are right out of the cookie jar of American culture.

"The age demanded an image," Ezra Pound wrote, "of its accelerated grimace." The 1922 manuscript of E. E. Cummings's "Tulips and Chimneys," now published in its entirety for the first time, is a perverted poetic declaration of independence that was virtually willed into being by the emotional and intellectual crosscurrents of its time. The present volume is not the book I bought from Mr. Kling: That was a mere selection of 66 poems taken from the 152 in the original version. For some readers, this new edition of "Tulips and Chimneys" will be comparable to the recent publication of the original manuscript of "The Wasteland" by T. S. Eliot.

While his poetry undeniably declined later in his life, Cummings's reputation has continued to increase. He is the sort of poet who, when he is quoted in romantic novels, enables kindred spirits to recognize one another. To have E. E. Cummings in common is to enjoy walking in the rain, buying balloons in the Central Park Zoo, preferring social phenomena in their diminutive forms, pursuing whimsy with a vengeance.

Far from condescending to Cummings enthusiasts, I still remember thrilling to such lines as "Thy fingers make early flowers of all things"; "Thy body to me is April/in whose armpits is the approach of spring"; "The streets turn young with rain"; "Night argues with certain houses"; "She being Brand-new"; "My girl's tall with hard long eyes" and "The Cambridge ladies who live in furnished souls."

Even at 15, however, I could not reconcile myself to "Thy fingers are the betrayal/Of bells/Comprehended, through/Ladies skillfully/Dead prevalence"; "The well-fed Immaculate roar"; or "Being/Is/Best merely/Gonorrhea." How could I ever justify in my mind the manner in which Cummings dismantled his poems on the page. I supposed he felt that if the reader had to work hard to get at the poem, he would take it more seriously. I unsuccessfully tried to put the thought that the typographical antics were a device to make them a longer, because they would otherwise have failed to fill the page.

To turn against Cummings as ungrateful as growing up, I feel I owe him a sentimental debt and I can rationalize the unkind things I am going to say about him only by acknowledging that they will not diminish his reputation in the least. It is my conviction that, in attempting to break up what he considered the rigidity and timidity of conventional language, Cummings helped to create something infinitely worse: the bland, formless argot that has made articulated Americans that is, few of them can no longer speak to each other at all.

What Cummings does in "Tulips and Chimneys" is create an illusion of precision using imprecisely words that carry a connotation of exactness. When he writes "the sharp fingers of April," or "the faultless eyes," when he uses words like absolute, utter, complete, final, skillful, deliberate, crisp, he is merely invoking the mood of definition instead of finding the definitive word or image. And this mood-making of his has been furiously taken up and championed because the United States and the Americans tend to regard loosening as a liberation.

Diction and grammar are seen as censors, impediments to the marriage of true minds and freedom to mangle English has become a civil right. Hopeful basically, personally, speaking only for ourselves, we move toward onomatopoeia. The crispiness of our speech is the result of our sincerity, our authenticity. Conciseness is glib; precision is hostile, undemocratically negating all other possibilities. To speak one's mind unequivocally is "judgmental." Language has been paroled from the house of correction.

I like to believe that Cummings would be aghast at the unforeseen "implementation" of his influence, this "finalizing" of his experiments, this "restructuring" of language. If words for him were primarily "mud-luscious" and "puddle-wonderful," he still saw them as playmates rather than the oppressors of his ego.

BRIDGE — By Alan Truscott

A player in a sensible contract who suddenly finds himself faced by an appalling trump split is often in a state of shock, and does not make the most of his opportunities. The first step should be to search for a line of play that may bring home the contract. The second step should be to look for a better one.

Several declarers achieved the first step on the diagramed deal from a recent duplicate game but only one went on to step two. North opened with a weak two-bid in hearts, and South bid four spades directly, judging that a heart was very unlikely to be better than spades. As it turned out, four hearts was easier to make than four spades, but this could not be foreseen.

At nearly every table the four-spade contract was reached and West led the singleton club nine. South captured East's queen with the ace and played the spade ace. The appearance of the king from East was a mixed blessing. It appeared that the defense was due to collect one club trick and three trump tricks.

The obvious play was to finesse the heart queen, for if this succeeded the club jack could be discarded on the heart ace. Most declarers settled for this course of action and quickly went down two when East produced the heart king, cashed the club king and continued clubs.

Only one declarer thought more deeply and came up with the winning line of play. At trick three, he led to the heart ace and ruffed a heart, then he entered dummy with the diamond king and ruffed another heart. This had the effect of bringing his trumps down to the same length as West, and after cashing the A-Q of diamonds the position was:

NORTH
♠ —
♡ Q 10 8
◇ —
♣ 10 5

WEST
♠ J 10 8 7
♡ —
◇ J
♣ —

EAST
♠ —
♡ —
◇ —
♣ K 9

SOUTH
♠ Q 9 6 5
♡ —
◇ —
♣ J

The club jack was led. West threw his diamond. East won with the king, returned a club. Now South was able to avoid one of his potential trump losers. He ruffed low, West overruffed and led a spade ten. This was allowed to win, and the Q-9 of spades scored the last two tricks in closed hand.

This line of play was not certainty, but it was much better than the simple heart finesse. It was sure to succeed if West held three or four cards in the red suit, not unlikely since the club nine appeared to be a singleton lead.

There was an extra chance of bringing down the heart king doubleton, in which case the club jack could be discarded on the heart queen. Furthermore, the winning play did not risk a two-trick defeat, a valid consideration especially in a duplicate game.

NORTH (D)
♠ —
♡ A Q 10 8 7 2
◇ K 10 5
♣ 10 5 4 2

WEST
♠ J 10 3 7 4
♡ J 9 4
◇ J 9 8 3
♣ 9

EAST
♠ K
♡ K 5 3
◇ 7 6 2
♣ K Q 8 7 6 3

SOUTH
♠ A Q 9 8 5 2
♡ 6
◇ A Q 4
♣ A J

Both sides were vulnerable. The bidding:

North	East	South	West
2 ♡	Pass	4 ♠	Pass
Pass	Pass		

West led the club nine.

Padres' Jones Gets Cy Young Award

By Joseph Durso

W YORK, Nov. 3 (NYT)— Jones of the San Diego outpolled Jerry Koosman e New York Mets yesterday on the Cy Young Award as ue's best pitcher in the Na- League.

Jones, a 26-year-old left- r, it was a case of poetic in a career of careening and lows. Two years ago, 22 games, then came back 20 last year, but lost the ung voting to Tom Seaver. he won 18 of 19 games by mmer this year before a ordeal that included an bbie crash and an opera- on his arm.

en he came out of surgery weeks ago, he had 22 vic- and 14 defeats with a fifth- team, plus harrowing doubts his future in baseball. But considerable balm for his es when he captured the premiere prize for a pitch- only that, he reported in phone interview from Cali- but "I threw batting ice Sunday to some kids in ball here and felt no pain." es thereby became the first er of the San Diego club to any post-season award, and es to beat seven other pitch- who got votes from a panel of baseball writers, two from city in the league. He re- ed 15 votes for first place, six cond and three for third, was the only pitcher named n 24 ballots. He finished with al of 96 points, based on a hting of 5-3-1 for the three s on the ballot.

Comeback Artist

xt came Koosman, a come- artist himself, who had clos- he season fast while Jones closing it slowly: 21 victories 10 defeats, including a 12- rush during the second

But the 33-year-old left- er for the Mets was far up the track in the poll, with seven votes for first place, 10 for second, 4 1/2 for third and a total of 69 1/2 points.

The only other pitchers who got first-place votes were Don Sutton of the Los Angeles Dodgers, who finished third, and Jon Matlack of the Mets, who was sixth. They got one apiece, while the rest of the candidates came home like this: Steve Carlton of the Philadelphia Phillies, fourth; Rawly Eastwick, relief ace of the world champion Cincinnati Reds, fifth; James Rodney Richard of the Houston Astros, seventh; and Seaver eighth with one vote for third place.

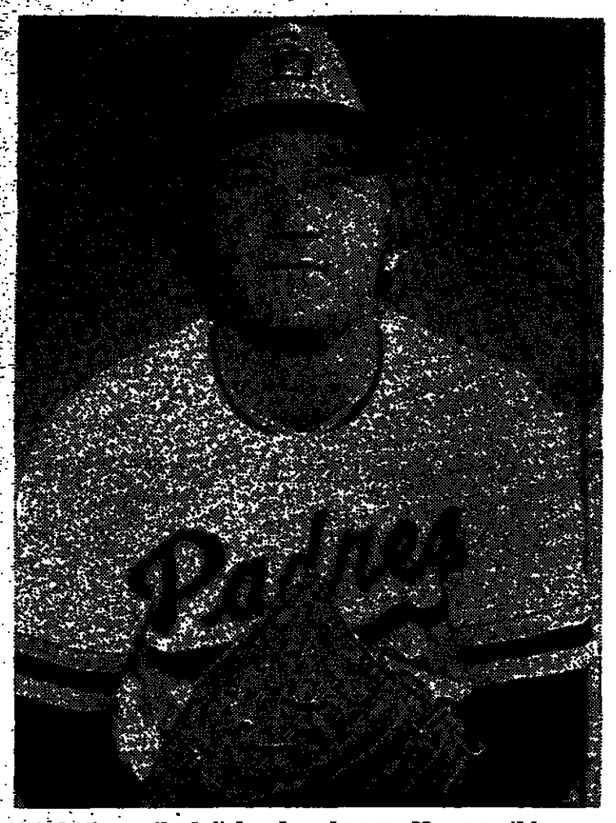
Next week, somebody will be named the best pitcher in the American League, probably Jim Palmer of the Baltimore Orioles. And after that, at fixed intervals, the writers will disclose who was the most valuable player and the rookie of the year in each league.

Disappointed Last Year

"It's a boyhood dream," said Jones, whose boyhood started half a century after the glory years of the late, great pitcher Cy Young "You feel you're only going to come close to the award once in your life, so I was disappointed not to get it last year Not bitter, just disappointed So it's a great satisfaction to come back the following year and win it— the way Tom Seaver came back last year.

"Things got rough after my auto accident with two months of the season still to go. I was driving fast and cut myself up. But that's not what hurt my arm. They thought I'd torn the bicep tendon by throwing too much to the point of fatigue. So when the season ended they operated to take a look. It was a big scare, it looked like my career might end. But they found out it was just nerve fatigue, so they just stitched me up and told me to go home and rest."

Jones went home and rested while other players grappled for the $25,000 or more apiece in World Series prize money. Then, last Sunday, he checked on his career on the sandlot of a baseball school.



"No pain," he reported. "I'm even playing golf now. They say throwing the slider hurt my arm and, if the tendon had been torn, goodbye slider. The real problem, though, wasn't the 315 innings I pitched or the 25 complete games. I don't walk many guys and don't throw that many pitches in a game. It was throwing 25 or 30 minutes between starts that hurt. I'd throw more between starts than in a game. But no more."

Ultimate Award

In Morris, Minn., where he has been "fixing up the house" for three weeks, Koosman reflected on the voting and granted that he was "a little disappointed."

"It's the ultimate award for a pitcher," he said. "Guys don't talk about it during the season, but it was certainly on my mind. In fact, I was pushing hard the last month to win it. I just wish I could have had my first three starts of the season instead of sitting in the bullpen then. I usually pitch good in cold weather at the beginning of a season."

He was sitting in the bullpen because the Mets were experimenting with him as a relief pitcher. After that, though, he became the most consistent pitcher on the staff, won 20 games for the first time and redeemed a career that many people saw as finished five years earlier.

Randy Jones, the left-hander who won 22 games this year.

Any Time Girl Wins In Oak Leaf Stakes

ARCADIA, Calif. Nov. 3 (UPI). —Any Time Girl, an overlooked filly from the State of Washington, raced to a surprise victory in the eighth running of the $121,800 Oak Leaf Stakes at Santa Anita.

Leading all the way, Any Time Girl barely nosed out Lady T.V. at the wire as she swung wide in the stretch and finished almost at the outside railing. Glenaris was third; the heavily-favored Teleferner finished fourth in the field of eight.

Proell Decides to Return To World Cup Competition

SALZBURG, Nov. 3 (AP).— Austrian Annemarie Proell-Moser, who won five World Cups in Alpine skiing and retired last year, announced today that she would try a comeback with the Austrian national team.

Proell, who retired as the most successful woman skier with 41 World Cup victories, said, "I want to race again," confirming rumors. Asked why she stepped down following a parallel slalom race she entered at Val Gardena, Italy, in March of last year, the 23-year-old skier said:

"After nine years of competitive skiing, I was simply listless and no longer enjoyed racing, and it is practically senseless to go on skiing if you don't like it any more."

She and her ski sponsor, manufacturer Alois Rohrmoser, said that her chances of being readmitted to the Austrian national team and of obtaining a license from the International Ski Federation were good.

She said she was aware that she accepted an advertising commitment, but that was well after she officially ended her career, adding that she would faithfully abide by the rules of the international federation when she returns to the skiing circuit.

Proell, who operates a café that she and her husband, Herbert Moser, opened at Kleinarl, said she took a fancy to skiing again when she helped her youngest sister, Conny, who was admitted to the pool of athletes of the Austrian Skiing Federation early this year.

Goals Are Set

She said that she was bent on winning again.

"My immediate aim is to have reached the world top by next January. My long range goal is the World Skiing Championships at Garmisch [West Germany] in 1978.

"I know it will be a hard job, but I will try to make good lost ground by intensive trainmg."

Officials of the Austrian skiing community said they saw no problem for Proell's comeback.

Her participation in World Cup races was expected to boost the morale and chances of the Austrian women's team, which had a disappointing performance after Proell retired shortly before the Winter Olympic Games at Insbruck.

On 4th NHL Team

Penguins Goalie Is Nailing Down His New Job

PITTSBURGH, Nov. 3 (UPI). —Dunc Wilson says that some people call him a "flake" but he doesn't mind as long as the Pittsburgh Penguins keep winning.

Wilson, who has taken over as the Penguins' No. 1 goalie since coming here in a trade with the New York Rangers, did his thing last night and Pittsburgh picked up a 7-1 victory over the Los Angeles Kings.

Wilson, who played for Vancouver, Toronto and the Rangers before finding a home in Pittsburgh, said, "All I needed was someone to give me confidence and tell me the job was mine to do and I knew I could do it.

"They considered me a flake. But I asked myself, 'what is a flake?' I do enjoy life and I don't think hockey's the only thing in life. I guess if that makes me a flake, I'm one."

Wilson got a new lease on life when Pittsburgh's No. 1 goalie, Denis Herron, broke his arm in the opening game against Vancouver. Wilson was purchased as a backup for Gordon Laxton but was made the first string goalie when Laxton ran into defensive problems.

Wilson, who stopped 36 shots, said, "It would have been nice to have a shutout but, the way things are going for us, the win was much more important."

The Kings are in second place in the Norris Division of the National Hockey League and the Penguins are in third place.

Rick Kehoe and Syl Apps scored two goals each to lead the Penguin attack. Penguin center Pierre Larouche scored just 15 seconds into the game and the Pens never trailed en route to breaking a six-game losing streak.

The Penguins scored four power-play goals as the Kings waged a verbal battle with referee Alf Lejeune, who saddled them with two delay-of-game penalties and one unsportsmanlike-conduct penalty.

The Penguins led 5-0 before the Kings' Don Kozak scored on a rebound against Wilson. Then the Penguins scored two more power-play goals within 10 seconds to break the game wide open. The last two goals were by Penguin defenseman Dennis Owchar and former King Mike Corrigan.

Islanders 5, Rockies 1

At Denver, Clark Gillies scored two goals in the final period and it was his defense which Colorado coach Johnny Wilson blamed for the Islanders' 5-1 victory over the Rockies.

"We've got to get more goals," Wilson said. "We were playing against a well-oiled machine out there and there was just too much strain on our defensive game."

Gillies's third-period goals, which came on rebound shots from close range, were his fourth and fifth of the season.

The Rockies, the lowest scoring team in the NHL with 32 goals in 13 games, drew first blood. But the lead was short-lived as Jude Drouin tied the game three minutes later at 14:31.

"What we need to do is get a two or three-goal lead and work on our offensive game," Wilson said. "But we've had just three goals in the last nine periods of hockey."

Orr's Knee Damaged

NEW YORK, Nov. 3 (NYT).— Bobby Orr, the $3-million defenseman of the Chicago Black Hawks, is playing on a left knee that has degenerated and will worsen as long as he continues in hockey. That was the diagnosis of Dr. John Palmer of Toronto General Hospital, who performed an arthroscopy yesterday by inserting a lighted instrument into the knee joint.

"The joint is permanently damaged," he said. "The knee now has only a certain number of miles life in it, and it's up to him to decide how he's going to use those miles."

Orr will be discharged from the hospital today, but he has been ordered to rest his knee for at least two weeks. Then another examination will be made. The 28-year-old Orr has had surgery on the knee five times during his NHL career. Because of the severe damage, Palmer acknowledged that Orr's knee might become permanently stiff.

Tuesday's Games

New York Islanders 5, Colorado 1 (Gillies 2, Drouin, Bourne, Nystrom; Hudson).

Pittsburgh 7, Los Angeles 1 (Apps 2, Kehoe 2, Corrigan, Owchar, Larouche; Kozak).

WHA Results

Tuesday's Games

Calgary 4, Minnesota 3 (Trebenche, Santos, Powis, Chipperfield; Keon, Deadmarsh, Ward).

Houston 3, Winnipeg 1 (Popiel, Lund, Preston; Lindh).

San Diego 4, Birmingham 3 (French, Rivers, Dobek, Venerucci; Kirk, Simpson, Napier).

Phoenix 5, Quebec 3 (Liddington 2, Mononen, Gray, Cormier; Boudrais, P. Bordeleau, S. Bernier).

NBA Trail Blazers Triumph Despite Some Carelessness

PORTLAND, Ore., Nov. 3 (UPI). —Portland coach Jack Ramsay said that the Trail Blazers' 80-point first half was super, but his team became careless in the second half. Not so careless, however, that Atlanta was able to overcome the edge. The Blazers banged out an easy 139-116 NBA victory last night.

"Our first half was excellent. It was super," Ramsay said. "But in the second half we lapsed in two periods of carelessness, but we're still young and learning."

"Everybody contributed, and we hustled most of the night," was the way Ramsay described his Blazers, who are off to their best start in history at 4-1. They lead the Pacific Division by a game over Golden State.

Seven Blazers scored in double figures, led by Bill Walton and Maurice Lucas. Walton scored 22 points and grabbed as many rebounds while Lucas added 17 points and pulled down an equal number of rebounds. Bob Gross added 20 points.

Warriors 111, Pistons 98

At Oakland, veterans Phil Smith and Rick Barry erupted for 17 points each as Golden State outscored Detroit, 22-9, down the stretch for a 111-98 victory.

The two teams were tied at 89-all before Barry and Smith staged their heroics to pull it out.

Jazz 115, Celtics 97

At New Orleans, guard Pete Maravich exploded for 26 of his game-high 43 points in the second half to pace the Jazz to a 115-97 victory over Boston.

Maravich, whose 43 points were 13 above his league-leading average, hit 17 points in the first half to help the Jazz take a 48-45 lead.

Bucks 125, Sonics 113

At Milwaukee, Bob Dandridge scored 37 points and Brian Winters 30 to lead the Bucks to their second straight victory after five losses, 125-113, over Seattle.

The Bucks out-rebounded Seattle, 35-17, in the first half as they moved to a 62-49 halftime lead and they led by as many as 20 midway through the third quarter.

New York Horse Show

NEW YORK, Nov. 3 (UPI).— Ian Miller of Canada won the Cavcote Challenge Trophy yesterday in the opening event of the international jumping at the New York National Horse Show.

After Beating NFL Oilers

olts' Admiration Society Growing

By William N. Wallace

W YORK, Nov. 3 (NYT).— Phillips, who wears cowboy s and coaches the Houston s, has joined the group that rapidly becoming a crowd, ing those who admire the more Colts. After the Bal- re team demolished the s, 38-14, on Monday night its seventh victory in eight s, Phillips described the as "by far the best team played. They're aggressive, have great team spirit and arrive [at the quarterback] ad humor."

e Colts' leading assets—its rushes—sacked the Houston terbacks, Dan Pastorini and Hadl, six times.

e defense also stripped Ron man, the Oiler running of the ball for a fumble then forced him to pass y on a half-back option

The pass was intercepted, from these two turnovers Colt offense quickly scored to lead, 14-0.

er that, the Oilers gave up, ding to the Colts, as Balti- 's Lydell Mitchell ran for yards and caught seven s for 46 more. Bert Jones, American Conference's lead- passer, completed 19 of 27 pts for 197 yards. Jones "It's easy when your of- ve line gives you all day your running backs are stent."

Still in Contention

uston's third straight loss the Oilers two games behind mati and tied with land and Pittsburgh in the s Central Division. But Oilers are still in contention he playoffs thanks to the nal Football League's wild- qualification policy.

ces for first place in five of six NFL divisions are not the Colts and Bengals have ame leads and Oakland in the AFC, while Dallas is 1 by one, with an easy ule ahead, and the Vikings lead by 2 1/2 in the National Conference. The exception is the National West, where the Rams are half a game up on the 49ers.

But the battles for the wild-card team designations—the divisional second-place club in each conference with the best record —are wide open.

In the AFC, the Patriots, Dolphins, Steelers and Oilers remain logical contenders aiming at final 10-4 or 9-5 won-lost records. In the NFC, those with the best chances are the Cardinals, if they cannot catch the Cowboys, or the 49ers, if they cannot catch the Rams.

More about the Colts. Controlling the ball is often cited as the key to success in the NFL and the Colts prove it. They lead the league in the most offensive plays per game, 71, and also in limiting the opposition to the fewest, 60. It is rare for a team to lead in both these categories.

Positive Numbers

Although he caught only three passes for 38 yards against Houston, Roger Carr presents a lot of positive numbers for Baltimore. This wide receiver has caught 21 passes, six for touchdowns, which does not place him among league leaders, but his average yards gained per pass reception does. It is 29.7 yards, a phenomenal figure.

The last NFL receiver to average 30 yards per catch was Bucky Pope, the rookie from Catawba College who had one fabulous year with the Los Angeles Rams in 1964.

Carr's athletic history is remarkable. The high school at Cotton Valley, La., where he still lives, had no track team. But in his senior year Carr entered the state championship meet and won the long jump.

That earned him a track scholarship to Louisiana Tech. He asked for a football tryout and, as a freshman punter, made the team that had Terry Bradshaw as its senior quarterback. Carr was a small-college All-America selection in 1972 and 1973 and a Baltimore first-round draft choice in 1974.

The unsophisticated Carr, whose helmet hides enormous ears, has been compared to Raymond Berry, the Baltimore receiver now in the Hall of Fame. Said Carr, "Even being mentioned in the same breath with Berry means a lot to me. I met him last summer. When he spoke to me it was one of the thrills of my life."

Horse From the Inscrutable East

Fujino Pahshia Joins Washington International Field

By Red Smith

NEW YORK, Nov. 3.—When the field for the Washington, D.C., International has loosened up and cooled out Saturday morning, a Japanese tourist named Fujino Pahshia will be led into a van outside the barn they call International Village for a sightseeing trip through the streets and surroundings of Laurel, Md., a town of about 8,500 on the Patuxent River. He will then return to Laurel Race Course and loaf in his stall until he and nine other horses are saddled to run 1 1/2 miles on grass in the 25th International.

Getting bumped around in a truck may not strike everybody as the ideal way of sharpening an animal for a shot at $100,000, especially an animal that has already traveled 8,000 to reach the track, but Fujino Pahshia is from the inscrutable East. His trainer, however, is a fairly scrutable guy. Scrutinize him and you see a slight, tweedy man of 53 who looks like, and is, a former jockey.

"I want the horse to see where he is,' Hiroshi Shibata explains. "I want him to see for himself that he is not in Tokyo or Kyoto or Chukyo, where he is used to racing."

Up to now, Japanese delegations to Laurel have been distinguished for impeccable manners, good sportsmanship and leisurely runners. "It seems the Japanese horses have always been first to arrive here and the last to finish," Shibata says. "This year we came to win."

Many Guests

Laurel pays expenses for its guests, and Shibata has brought a barnful—Kennichi Ishida, the groom who rubs the horse; Shigemi Yamahata, the exercise boy who gallops him; Yotonkasu Furukawa, the veterinarian who attends him; Hideharu Miyaki, the blacksmith who shoes him, and Shonichi Ohsaki, the jockey who rides him. In addition, the trainer is accompanied by his daughters, Masayo, 22, and Nobuyo, 20, both students at St. Paul's College in Tokyo.

Fujino Passhia is a 6-year-old son of the Epsom Derby winner, Parthia Shibata, who was looking for a prospect for the Japanese Derby, bought him for Shigeji Sanada and Kinji Takabashi, Tokyo businessmen, paying $27,000. The horse has won about $800,000 and although he didn't get the Derby he did take the Emperor's Cup last year. His three victories were in the Diamond Stakes, the grade 1 Takarazuka Kinen and the Takamatsunomiya Hai.

The trainer's father, Kanja Shibata, rode races for 35 years and then took up training. His son's riding career ended abruptly when a horse fell on him, crushing his leg. He was in a hospital a year and still walks with a limp. "That's when I became a trainer," he says.

Because of his limp, he was not in the army during World War II. "If I had not hurt my leg," he says. "I probably would have been killed."

Firm Footing

Shibata trained the 1969 Japanese Derby winner, Dai Symbol. Ishida rubbed the horse and Ohsaki rode him. The team has been at Laurel since Sept. 22, which means Fujino Pahshia has had six weeks to get accustomed to Laurel's firm footing and sharp turns. Although the horse has not raced since June 27, Shibata says he has been "training forwardly."

Asked whether he had taken any unusual measures with the horse for this race, he said: "I have done a few things with him to make sure he does well." He smiled an inscrutable smile.

The rest of the field is about as international as the Jet Set can get. They lineup thus:

Representing France—Youth, Maryland-bred winner of the Prix du Jockey Club (French Derby) and the Canadian International Championship, owned by American Nelson Bunker Hunt and ridden by Sandy Hawley, a Canadian; Jacques Wertheimer's Arc de Triomphe winner, the Kentucky-bred Ivanjica; On My Way, owned, trained and ridden by Frenchmen but bred in Virginia.

From England comes Rose Bowl, winner of the Queen Elizabeth II Stakes, bred in Kentucky and owned by American Jane Engelhard.

Norwegian Entry

Norway is in the race for the first time with the English-bred Noble Dancer, winner of the Oslo Cup, who will be ridden by Briton Lester Piggott.

The United States has two representatives, Ogden Phipps's Effervescing, recent winner of the Man O' War Stakes, and Elmendorf's Improviser, who won the Pan American Handicap at Gulfstream. From Germany comes Windwurf, whose jockey sounds Polish. His name is Jerzey Jednasewski—Jersey Jones for short.

Finally there is a Brazilian representative named Jamus II, bred in Argentina by an English stallion, owned by a Brazilian and trained by an Argentine who speaks Portuguese. The owner's name is Antonio Joaquim Peixoto de Castro Palharrios. If his horse should win, he would receive the trophy from the dainty hands of the former Mrs. Nicky Hilton, the former Mrs. Michael Wilding, the former Mrs. Eddie Fisher, the former Mrs. Mike Todd, the former Mrs. Richard Burton twice and the future Mrs. John Warner.

Etienne Goes Quarterfinals Europe Cup

DHOVEN, the Netherlands, 3 (Reuters).—St. Etienne ed the standard of France the last eight of the Euro- Soccer Cup again tonight duplicate of their progress year.

y met the Dutch cham- PSV Eindhoven, again, tak- a one-goal lead in France surviving a goalless draw in nd.

ern Munich, holders since took a further step toward fourth successive triumph eating the Czechoslovaks of Ostrava, 5-0. They started own from the away leg but al by Gerd Mueller soon it level and he scored again ern piled on three second- goals.

ther West German can- e, Borussia Moenchengladach also survived in a scoreless dvancing on the 2-1 lead it taken in Italy over Turin.

Salonika, Greece, Dynamo easily advanced by defeat- Salonika, 2-0, compiling an gate of 6-0.

College Poll

The United Press International Board of Coaches' top 20 college football teams, with first-place votes in parentheses, follow:

1.	Michigan (40) (8-0)	418
2.	Pittsburgh (1) (8-0)	384
3.	UCLA (1) (7-0-1)	339
4.	S. Cal. (6-1)	242
5.	Texas Tech (6-0)	219
6.	Maryland (8-0)	174
7.	Ohio State (6-1-1)	133
8.	Georgia (7-1)	130
9.	Nebraska (8-1-1)	117

Art Buchwald

A Courageous Act

WASHINGTON—I had a very tough time on Election Day. The doorbell rang at seven o'clock in the morning and my neighbor Legendman was at the door.

"I have to vote today," he said, "and I'm scared."

"Everyone is frightened on Election Day," I assured him. "I wouldn't worry about it."

Buchwald

"I can't pull the lever for either guy," he said. "I just can't."

"Sure you can," I said soothingly. "I know it sounds impossible, but when you get inside the voting booth I'm certain you'll find the strength to do it.

"Would you go with me?" he begged. "It would be a big help if I had somebody with me."

"Well, I hadn't planned to vote until later in the day. But if it means that much to you I will."

My wife gave Legendman a cup of coffee while I got dressed.

I found him sitting in the kitchen holding his head in his hands. "I never felt this way before," he confessed. "I used to look forward to Election Day. I had no trouble voting in past ones. Why do I have this terrible feeling in my stomach?"

"It happens to all of us sooner or later," I told him. "I'm sure all over the country people feel the way you do. But Americans have to vote. It's a privilege as well as a duty."

* * *

"But if I pull the lever for Ford we'll have four more years of the same thing. If I pull the lever for Carter nobody knows what we'll get."

"Vote your conscience," I told him.

"If I voted my conscience," he said, "I wouldn't vote I think I'll go get a swine flu shot instead."

I stopped him at the door. "Let's go, Legendman," I said, grabbing his arm. "All you have to fear is fear itself." I bundled him into the car.

He was still distraught. "I can't pull the lever. I know I'll freeze. The TV commentators say every vote counts. I don't want my vote to count."

"This is like war, Legendman," I told him. "You think you can't pull the lever. But when it boils right down to it, it's either you or them. Think of John Wayne. He would go right into that voting booth and pull the lever without thinking twice."

"I'm not John Wayne. I'm just a frightened American voter who never thought he'd have to make a choice between Jerry Ford and *Jimmy Carter*."

We arrived at the public school and I noticed several drivers pulling people out of their cars. They were all screaming. "I can't do it! I can't do it!"

I helped Legendman out. He was shaking and perspiring. "Look, I'll come back later," he said.

"You have to do it now," I said firmly. "The sooner you get it over with, the less agony will be involved."

We showed our registration cards to the lady at the table. "Booth Three," she said to Legendman.

* * *

He tried to make a break for it and I tackled him.

I decided to be tough. "All right," I said, "I'm tired of mollycoddling you. You're going into Booth Three and you're not coming out until you pull the lever for the man you want to be the next president of the United States." I pushed him toward the booth. He opened the curtain and peeked in.

I watched him sternly.

"Inside," I ordered, "and pull the curtain."

I watched his feet under the curtain. He kept turning around. Finally, I heard a cry like a wounded animal and a click, and Legendman dashed out of the booth.

"I did it," he said. "I pulled the lever for the candidate of my choice."

"Good man," I said, pounding him on the back. "It wasn't so bad, was it?"

He looked at me with tears in his eyes. "I only hope God will forgive me."

Jack Hereford on his way up Kelso Dune in the Mojave Desert.

Exploring the Singing Dunes

By Charles Hillinger

DEVILS PLAYGROUND, Calif.—Jack Hereford made his way up the ridge of the giant dune, sinking deep into the sand with every step.

He was climbing the dune to hear it boom and sing.

These eerie sounds are emitted by a few high dunes in deserts. Nobody knows why.

Shape is clearly a factor. The dunes that produce the phenomenon are constantly blown on one side by winds that pile the sand higher and higher, causing the slope on the opposite or protected side to become quite steep and creating what is called a "slip face."

The higher the dune, the louder the booms and other strange sounds.

But, as British physicist Ralph Bagnold has written: "There is yet no real explanation of the mechanism by which the sounds are produced."

Here in the Mojave Desert, 60 miles southeast of Baker, the 70-year-old Hereford was making his way up the 700-foot-high Kelso Dune. He has been studying dunes for 12 years.

It took the prospector-mining engineer two hours to reach the top, at the southeast end of a 25-mile sweep of sand piles called Devils Playgrounds.

Reaching the 32-degree slip face, Hereford fell to his knees and began triggering slides.

"The steepness of the slip face must be 32 degrees or awfully close to it for the phenomenon to work," he said.

Low booms echoed as a section of sand slid down. They sounded like the umpah of a tuba. Other sounds rising from beneath the surface of the dune were vaguely like the barking of seals.

"Marco Polo described a booming dune in his journal," said Hereford. Members of Charles Darwin's party heard the phenomenon in the desert on the west coast of Chile in 1835.

"Lord Curzon of Kedleston collected age-old myths from the Middle East about singing dunes."

Hereford heard the booming for the first time when he climbed Kelso Dune, prospecting for magnatite, 12 years ago.

"Union Pacific Railroad tracks lie to the north of the dune. I thought it was a train going by. But there was no train," he said.

Physicist Bagnold tells in a book of hearing the phenomenon in Egypt, 300 miles from the nearest habitation. He describes "a vibrant booming so loud I had to shout to be heard by my companion. Soon other sources joined their music to the first" with so close a note that a slow beat was clearly recognized.

"This weird chorus went on for more than five minutes continuously before silence returned and the ground ceased to tremble."

Bagnold has theorized that the booming and singing could be a piezoelectric effect —the generation of electricity in the quartz crystals of sand due to mechanical stress.

Hereford has spent the greater part of his life living in and studying the marvels of the desert.

"I have learned how sand moves, how high it flies—usually 10 to 14 inches off the ground, never more than 30 inches high in the biggest blows.

"There is no end to the mysteries out here," he mused, surveying the ripples on a shoulder of sand.

"Ripples start forming with winds of 10 to 13 mph; when the winds go beyond 50 mph, ripples no longer form."

PEOPLE: *Czech Playwright Says He Is Harassed by Regime*

Czech playwright Pavel Kohout has turned to the Western press for help. He was denied a visa to go to the United States to see his play "Poor Murderer," which opened on Broadway Oct. 20. "I have exploited all internal possibilities," he told a reporter from the Austrian radio, who interviewed him in Prague. Kohout, who backed the Dubcek regime in 1968, says he has been harassed by authorities for seven years and that the situation "is getting increasingly dangerous because its causes are (hidden) behind a smoke screen as time goes on. If the prosecutor's office has evidence that in 1968 I violated Czechoslovak laws, this should be made public."

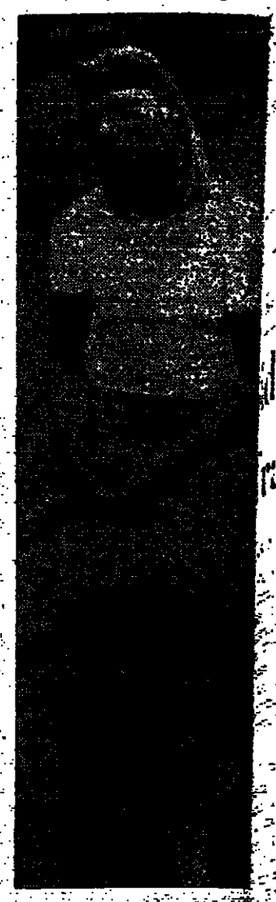
* * *

Anthony Boyle, an 18-year-old supermarket worker, has won $813,000 in a soccer pool. Boyle, from Dundee, Scotland, says he will share the money with his widowed mother. He also plans to buy himself a new set of golf clubs.

* * *

Nobel prize-winning economist Milton Friedman, 65, is leaving the University of Chicago where he has taught for the past 28 years. He will become a research fellow at the Hoover Institution of Stanford (Calif.) University as of Dec. 1.

* * *



Dolly Parton, top female vocalist of the year according to the Country Music Association, has been ordered by doctors to quit singing until the end of the year. Miss Parton, 30, will miss about 25 concerts because of her throat condition.

* * *

Patrick Quesnel, 27, of Vaughn, Wash., has apparently just become the first man to row from the Pacific Coast of the United States to Hawaii. It took him 111 days to make the 2,000-mile crossing in a 23-foot Grand Banks dory. It was his fifth attempt—and his first solo.

* * *

In testimony before the education committee of the Israeli parliament, Abraham Eitan, director of the department of antiquities, said that the government had repossessed some archaeological relics from Moshe Dayan, former defense minister. Gen. Dayan is said to own one of the largest collections of archaeological relics in Israel and

Patrick Quesnel

... a long

he has been criticized several times in Israeli publications for allegedly acquiring some illegally.

* * *

Singer Della Reese is suing for $100,000 from her former business manager, Lee Magid. The suit filed in Los Angeles says Reese says that Magid, her manager from the mid-'50s until this year, took a larger percentage than he was entitled to. She has accused him of fraud, as well as of illegal possession of two of her master recordings.

50 Policy Papers Already Prepared

...esident-Elect Moves Swiftly ...n Transition to White House

By Hedrick Smith

...YORK, Nov. 4 (NYT). — ...Elect Jimmy Carter ... extended broader ... administration on his ... to the White House ... made ambitious ... to take charge of ... government more ... any previous modern ...

... hours of his narrow ... received transition ... from aides advocating ... up at once a 100-... transition group in ...ton and outlining how ... reform the size and func... *of the White House staff*, ...e should approach the task ...ding his major cabinet ap...ents, where he can alter ...ent Ford's budgets for ... years 1977 and 1978 to put ...

...ailed Blueprint Studied

In a pre-election interview with Time magazine, Mr. Carter also said he would be working with business and labor leaders "to establish a framework for voluntary wage and price restraints" to try to check inflation.

In a separate interview with The New York Times, Mr. Carter said he intended to be "an activist" president in many fields in the tradition of Franklin Roosevelt, John Kennedy or Harry Truman.

But he also insisted that in deliberate contrast to the style of former President Richard Nixon, he would appoint "strong individuals" as cabinet secretaries and would expect them to take full charge of the major departments of government rather than having the White House seek to manage the department heads through a powerful presidential chief of staff.

Even before the voting returns were in, Mr. Carter said that aides had given him a working list of potential appointees to the 75 major jobs in his administration that he will fill personally. But his aides said that no choices have been made and that no preliminary security checks have been undertaken for fear that such action would have appeared presumptuous to voters, if word had surfaced before the election.

Long-Time Associates

It is taken for granted in Carter headquarters in Atlanta that the most sensitive White House jobs will be filled by the former Georgia governor's long-time associates, like Hamilton Jordan, his campaign director, and Jody Powell, his campaign press secretary.

Both Mr. Jordan and other aides like Jack Watson, the 37-year-old Atlanta attorney who has headed the Carter transition task force for four months, have emphasized Mr. Carter's determination to bring fresh faces into the new administration. But Carter aides also acknowledge now—contrary to previous assertions—that the working lists of potential candidates for high posts also include former senior officials from previous Democratic administrations.

To illustrate the range of individuals under consideration, Carter aides have mentioned such potential newcomers to the federal establishment as Leonard Woodcock, president of the United Auto Workers union; Griffin Bell, who recently retired after 15 years as a judge on the U.S. Fifth Circuit Court of Appeals and who is now an Atlanta law partner of Charles Kirbo, one of Mr. Carter's closest advisers; Lawrence Klein, an economist at the University of Pennsylvania, or former New York Mayor John Lindsay.

Also mentioned are people with experience in the administration of President Lyndon Johnson, including Cyrus Vance, former

...rter and Mondale Confer ...a Forming Administration

By David S. Broder

...SHINGTON, Nov. 4 (WP). ...sident-elect Jimmy Carter, ...g pledged himself to "unifi... of our country," began today on the formation of ...rter administration.

... met today with Vice-Pres...elect Walter Mondale at ...arter home in Plains, Ga., ... receiving a detailed blue... for taking over the federal ...nment.

... Carter will hold a televised conference tonight with Mondale at which his plans ... smooth power transfer and ...ision of a Carter presidency ... expected to be discussed. ... Carter's 272 electoral votes ... two more than the mini... required for victory—in... today as Ohio officially ... into the Democratic camp ... its 25 electoral votes.

Final Total of 297

... Ford apparently picked up ... more electoral votes in Ore... giving him a complete sweep ...e Mountain and West Coast ... But Mr. Carter had won ... South and the populous ... of the Northeast, giving ... final electoral vote margin ... to Mr. Ford's 241.

... went for Mr. Carter this ...ing with the local secretary ...ate reporting a vote margin ...300 votes. About 750 ab... ballots remain uncounted, ...y in the Cleveland area.

... Oregon, unofficial figures ...ed Mr. Ford leading Mr. ... by 1,911 votes with about ... absentee ballots to be count... The final count may not be ...leted until tomorrow.

... Carter carried 23 states ... the District of Columbia. ... Ford carried 27 states.

...terday afternoon, the 52-... old former Georgia governor ... reporters to his Plains ...aign headquarters at the ...town's railroad station, to read a message praising President Ford and thanking him for a "characteristically graceful statement."

'Wholehearted Support'

Mr. Ford, in a personal telephone call and a telegram, had pledged to Mr. Carter his "wholehearted support" and the complete cooperation of himself and his administration during the transition.

In his statement, Mr. Carter said he was "particularly grateful" for the President's offer of help during the power transfer period before the Carter inauguration. "In fact, Mr. Carter said their respective staffs were already making arrangements for a smooth transition.

"One of the first tasks facing any new president is the unification of our country after a close and hard-fought election," Mr.

Alaska to Shift Capital Close To Anchorage

ANCHORAGE, Alaska, Nov. 4 (AP).—Voters in Alaska have decided to move their state capital from Juneau to an area forested with birch and spruce within easy driving distance of Anchorage.

The voters gave Willow South more votes Tuesday than Larson Lake and Mount Yenlo, the other two proposed sites combined. The capital must be moved by 1980, according to the terms of the initiative.

United Press International.

GENEVA CONFERENCE—Rhodesian nationalist leader Robert Mugabe talking to press after rejecting the British proposal for African majority rule in 16 months.

Britain Proposes Rhodesian Date, But Blacks Balk

By Bernard Weinraub

GENEVA, Nov. 4 (NYT).—Britain proposed today that Rhodesia become legally independent on March 1, 1978, but black nationalists demanded an earlier date.

The proposal was made by Ivor Richard, Britain's ambassador to the UN and chairman of the conference here on Rhodesia's constitutional future. The suggestion—an attempt to produce some momentum at the week-old conference—brought a bluntly negative response from four nationalist leaders, who demand that within one year Rhodesia be granted official independence from Britain.

"It's got to be 12 months or we go," said Robert Mugabe, the leader of guerrillas based outside Rhodesia. He spoke to newsmen tonight outside the Palais des Nations, the site of the conference and the Geneva headquarters of the United Nations.

Bishop Abel Muzorewa, the American-educated leader of a faction of Rhodesia's African National Council, called Mr. Richard's proposal "terrible" as he left the conference hall and entered his limousine.

Kissinger Role

Another nationalist leader, Joshua Nkomo, who has an alliance with Mr. Mugabe, laughed derisively when asked what he thought of March 1, 1978, as an independence date.

And the Rev. Ndabaningi Sithole, a onetime powerful nationalist figure with few allies now, said: "We don't like it, it is too far away."

"One can perhaps be a little more optimistic than a few days ago," Rhodesian Foreign Minister Pieter van der Byl told newsmen.

The date of independence for Rhodesia under black majority rule remains only a starting point—and the least controversial issue—in the negotiations that appear to be floundering. The central issue, which has not yet been discussed, is the structure of an interim biracial government during the transition to independence and black rule.

The nationalists insist on black African control of the interim government, whose main tasks would be to shape a new constitution and hold elections. The white Rhodesians, under Prime Minister Ian Smith, who left Geneva late yesterday for Salisbury, demand dominance of the handover process.

At this point, the issue of the date of independence is more symbolic than significant. If a date were fixed, however, it would give the conference a momentum that has been lacking in the week of formal negotiations and in the preceding week's preliminary talks.

If the delegates fail to agree on a date for independence, the prospects are gloomy for substantive success at the meeting. The Geneva conference was arranged by the British after Mr. Smith accepted a plan, drawn up by Secretary of State Henry Kissinger, calling for the creation of a biracial temporary government and a transition to majority rule within two years.

Mr. Richard told newsmen this evening: "It was agreed that the date for independence should depend on an assessment of the time it took to complete the nec-

(Continued on Page 2, Col. 1)

Pound Rises On Rumors of Budget Cuts

LONDON, Nov. 4 (IHT).—Rumors that the British government is preparing an austerity budget, including cuts in government spending, boosted the value of the pound today by nearly 2 cents to a closing price of $1.6260.

The pound had risen to $1.6420, but fell back when Prime Minister James Callaghan refused to confirm the rumors about the budget. Story on Page 9.

Kept Secret Before Election

U.S., Russia Sign Two Accords On Implementing Arms Pacts

By Bernard Gwertzman

WASHINGTON, Nov. 4 (NYT).—The United States and the Soviet Union have signed two modest arms control agreements in Geneva in recent weeks. They were not announced because the Ford administration wanted to avoid a possible controversy on the eve of the election.

The two accords, according to officials, deal with ways of implementing two earlier agreements. An outline was given to The New York Times by State Department officials upon inquiry, but details will be kept secret in accordance with an arrangement with Moscow although congressional committees will be briefed confidentially.

According to the officials, one agreement specifies how both sides should go about modernizing or replacing the one anti-ballistic missile system allowed under previous accords. The second agreement, signed on Sept. 30, provides a code to be used for rapid communication over the hot line between Moscow and Washington in case of an accident that may increase the risk of a nuclear war.

Agreement of 1971

Under an agreement signed in 1971, each side is supposed to inform the other promptly of any accidents, such as a misfired missile or a suspicious nuclear explosion, that might lead the other to order its forces into action. The latest accord provides a way of using as few words as possible to communicate the facts about such an accident.

The two agreements were signed by Sydney Graybeal and Georgi Ustinov, co-chairmen of the Standing Consultative Commission, which meets regularly about practical problems of interpreting and carrying out accords.

The commission met in Geneva from Sept. 27 to last Friday, in the ninth session since its formation in 1972.

U.S. officials said a brief news release was issued by the United States in Geneva on Saturday but no effort was made to alert newsmen. No news release or announcement was issued in Washington.

The accords were learned of Tuesday night through a translation of a Tass dispatch from Geneva.

When asked about the failure to announce the accords, State Department officials said there had been concern that some newsmen might "sensationalize" reports of the agreements and President Ford could be accused of making some new "secret" deal—a charge often made against this administration by its conservative critics.

Since Jimmy Carter had made Secretary of State Henry Kissinger's style of diplomacy a campaign issue, some officials were also concerned about giving the Democratic candidate additional ammunition.

Officials in the Arms Control and Disarmament Agency said the accords were useful but not critical and showed that, despite continuing political strains with Moscow, the two sides were able to agree on further steps in the arms control field.

East German Goes West in U.S. Uniform

BERLIN, Nov. 4 (Reuters).—An East German citizen has escaped to West Berlin through the international "Checkpoint Charlie" crossing point disguised in a U.S. military uniform, Western Allied sources here said.

A U.S. military mission spokesman in West Berlin refused to confirm or deny the report, saying that it was U.S. policy not to comment on escapes from East Germany.

A West Berlin newspaper said that the escape took place Oct. 23. East German guards do not check Western military personnel in uniform passing between the Western and Eastern sectors of the divided city.

Opposition to Curbs by State Grows Among East Germans

By Craig R. Whitney

BERLIN, Nov. 4 (NYT).—A new and defiant spirit of independence is beginning to spread among the 17 million persons of East Germany, and the Communist rulers say they do not know what to do about it.

From a score of talks with party members, students and ordinary citizens in East Berlin and Dresden, it seems clear that many East Germans are no longer willing to accept with passivity the restrictive decrees that have shaped their lives and sealed them off from the West for 30 years since the end of World War II.

Tens of thousands, perhaps more than 100,000, have applied for permission to move to West Germany, mostly in the last 15 months. Scores of others, in petitions to the United Nations, have accused the government of disregard for elementary human rights. And East German writers are daring to dissent in books and magazine articles published in West Germany—and are getting away with it.

East-West détente and the weakening of Soviet control over the other Communist parties in Eastern and Western Europe appear to have started the chain of events.

"There is no question that détente has brought this phenomenon about," said an East German party member with connections to the leadership. "It is not yet an acute problem," he said, "but if it goes on, there is an unresolved conflict within the party about how to deal with it."

Unrest in Poland led to anti-government demonstrations last summer after the government tried to raise consumer prices. That kind of rebellion seems unlikely in East Germany, where the standard of living is the highest in Eastern Europe and the government has pledged to raise salaries and keep consumer prices steady for the next four years.

Western diplomats and informed East Germans trace the new stirrings to the Helsinki accord on European Security, signed in July of last year. The signing was attended by President Ford, Soviet party leader Leonid Brezhnev and 33 other representatives of the countries of Europe and North America.

"The ferment started about a year ago," a party member said, "after the Helsinki documents were published."

The accord included what, in the West, seemed like empty pledges on human rights and freedoms, including promises to make it easier to reunite families divided by the ideological borders.

But East Germans with rela-

7 in Russia Are Given Death for War Crimes

MOSCOW, Nov. 4 (UPI).—A Soviet military court in Orel, 200 miles south of Moscow, has sentenced seven men to death for war crimes committed more than 30 years ago, the Soviet press said today.

The seven were found guilty of the murder of 1,100 people during the Nazi occupation.

Worst Battle Since Truce Hits Beirut

BEIRUT, Nov. 4 (UPI).—Moslem leftists and Christian rightists today battled with tanks, rockets, mortars and machine guns in Beirut on the 15th day of the latest of more than 50 cease-fires.

The fighting took place as Lebanon awaited the imminent arrival of a proposed 3,000-man peace-keeping force.

It was the worst fighting in the capital since the cease-fire went *into effect Oct. 21, starting last night* and lasting until midday today when it died to sniping and sporadic rocket and machine-gun exchanges.

Hospital spokesmen said that 41 persons were killed and at least 65 wounded during the fighting.

A Sudanese officer of the Arab peace-keeping force was killed by a sniper during the fighting. He was the first Sudanese and the third peace-keeping soldier to lose his life in Lebanon, according to a source at the force's headquarters.

At a point in the exchange, the parliament building on the line dividing the city was attacked with incendiary bombs, setting a fire in a section of the building.

Random Shelling

Leftist and rightist radios accused each other of starting the battle, which also involved the traditional random shelling of residential areas.

The heaviest battles were reported in the commercial district, the museum area and the southern suburbs.

In another development, rightist army units moved into positions controlling the access routes to east Beirut after clashes in the area yesterday between rival rightist groups, according to rightist sources.

About 1,000 troops with tanks and jeep-mounted machine guns moved into the Dora, Sin el-Fil and Jdaideh areas, the sources said, to "restore order."

A skirmish between Phalangist and National Liberal party militiamen in the rightist sector reportedly led to the death of one man from each group.

Arrival Delayed

Meanwhile, snags over how the 30,000-man peace-keeping force will be composed and deployed delayed its arrival until at least tomorrow, according to Arab League special envoy Hassan Sabry al-Kholy.

President Elias Sarkis, who will have overall command of the peace force, announced the appointment of nonaligned Lebanese Moslem Col. Ahmed al Hajj as military commander for the troops. Mr. Sarkis is a Maronite Christian.

"It's been agreed that no more than 6,000 men from Arab countries other than Syria can be raised for the 30,000-man Arab peace-keeping force," said a spokesman for the 2,300 peace-keeping troops already in Lebanon. "So the remainder is expected to be provided by Syria."

The spokesman added, "One of the factors that delayed the deployment of the troops has been [leftist leader Kamal] Jumblat's rejection of Syrian forces entering his Chouf constituency [south of Beirut].

S. Foreign Policy: No Major Shift Likely

By Don Oberdorfer

...SHINGTON, Nov. 4 (WP). ...retary of State Henry Kis..., the architect of U.S. for... policy during the last eight ... will be leaving the govern... but the same global prob... remain for the administra... of President-elect Jimmy ...

...re will be many unfamiliar ...als, yet to be selected, to ... with the problems at the ...el of foreign policy man... ent. There are also sure to ...me well-known officials—in...g former assistants and ad... to Mr. Kissinger. And there ... be the same bureaucracy, ...ting under career Foreign ...ce tenure, conducting the ...o-day business of the United ...s around the world.

...ere is no indication of any ...al departure from the major ...alliances and adversary rela...hips. But there is every ...ation of a forthcoming ...ge in emphasis and tactics ...ll as personnel, raising many ...ions about the evolution of ...n policy during the Carter ...nistration.

Kissinger scheduled and abruptly canceled a meeting reporters yesterday after... amid signs of his own un...inty concerning the foreign ...y transition. A State De...ment source said Mr. Kissin... decided it was inappropriate ...im to comment until there ...een contact between the in...ng and outgoing administra...

...ile Mr. Carter has no au...thority over foreign affairs before the Jan. 20 inauguration, Mr. Kissinger and President Ford will find it difficult to carry out U.S. policy effectively as lame-duck officials without the President-elect's acquiescence. Mr. Carter's attitude in the weeks before Inauguration Day is likely to be important to continuing negotiations involving the Middle East, Africa, the Soviet Union, the Panama Canal and Vietnam.

Mr. Carter discussed foreign policy in the course of his campaign, and some of his statements were contradictory while others seemed strongly oriented to domestic concerns and domestic voting blocs. While Mr. Carter rarely challenged fundamental U.S. relations abroad, his criticism of Mr. Kissinger and his lack of experience in this field have created greater than usual uncertainty about a president-elect.

One of Mr. Carter's early and serious problems is likely to be relations with the Arab nations, which are apprehensive because of his tough campaign attacks on the Arab boycott of Israel and his call for an "economic declaration of war" in case of another oil embargo. An election eve editorial in Amman's Jordan Times, reflecting a typical Arab view, complained that Mr. Carter "has done everything to court Israel except change his name to Yitzhak the Magnificent."

The Organization of Petroleum Exporting Countries will meet Dec. 15 in the gulf state of Qatar. OPEC is expected to decide on an oil-price increase that will have a major impact on the U.S. and world economy.

Mr. Carter's signals to Saudi Arabia and other Arab countries in forthcoming weeks could have an important impact on the OPEC price decision. Such signals may also give clues to Mr. Car-

Laborite Majority Facing a Threat In 3 By-Elections

LONDON, Nov. 4 (UPI).—Britons voted today in three parliamentary by-elections that the Labor government feared could wipe out its Commons majority.

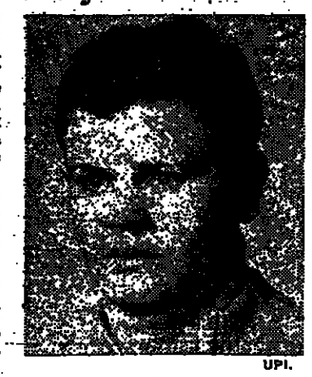
The voting was in Newcastle, Walsall and Workington, three industrial cities assured for decades of being "safe" Labor party territory.

But last-minute opinion polls indicated that regular Labor voters, angered by inflation and high unemployment, might stay away in sufficient numbers to hand over at least two—Walsall and Workington—to the Conservative opposition.

Prime Minister James Callaghan's Labor government currently has an overall majority of just two in Parliament—315 seats against the combined opposition's 313.

Loss of two by-elections would make it a tie and of all three would put the government theoretically in a minority.

Polish Youth Hijacks Jet With Weapons Made of Bread



From Wire Dispatches

VIENNA, Nov. 4.—A young Pole, defying deportation from Denmark to his homeland, today wielded a dummy hand grenade and a pistol made of bread and colored with shoe polish to hijack a passenger plane, forcing the pilot to land in Vienna, police said.

Police identified the man as Andrzej Jaroslaw Karasinski, 20, who has a criminal record in Denmark. He was being extradited after serving his last prison term.

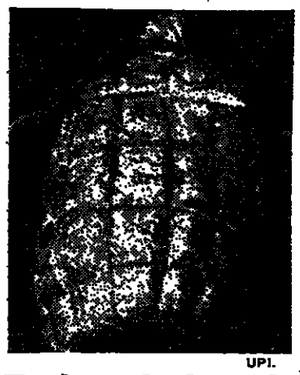
Police detachments ringed the Soviet-built Tu-134 jet plane of the Polish airline, LOT, as it landed at Vienna's Schwechat Airport this afternoon. But the hijacker surrendered immediately after landing and was taken into custody.

The plane was on a scheduled flight from Copenhagen to Warsaw when Karasinski threatened the pilot with the artificial weapons he had apparently made in prison.

UPI.

The Polish hijacker, from his identity photo.

While it was obvious that he had no problem clearing metal-detecting devices with his false weapons, officials in Vienna said that they were still looking for an explanation why escorting police officials found nothing suspicious on the detainee in a final check.



Karasinski was held for questioning, while crew and passengers were asked by authorities to furnish information about what happened on board.

Police refused to say whether and when the young Pole would be extradited.

In Copenhagen, police said that Karasinski had been put aboard the plane by police officers.

He had been granted political asylum in Denmark two years ago, but soon after was found guilty of a number of minor crimes involving theft, fraud and traffic offenses, police said.

Last month, he was sentenced to four months' jail for theft, but the Interior Ministry decided to deport him.

Andorrans, Too Crowded, Rule Out Immigrants

ANDORRA LA VELLA, Andorra, Nov. 4 (AP).—With the population rising past 36,500 and the police force up to 37, the conservative farmers of Andorra's six valleys have had enough. They have banned immigration.

The ban will not stem the French and Spanish bargain-hunters, who on weekends turn Andorra's 60 miles of roads into one of Europe's cheapest shopping areas for low-duty cameras, liquor, cheese and tape recorders.

Nor will it deter thousands of skiers who fill the chalets nestling high in Pyrenees passes once inhabited only by mountain goats.

But the ban announced a few weeks ago has caused tremors among resident foreigners, who fear further moves to dent Andorra's status as a refuge from taxes, extradition and currency controls.

Foreign Population

Foreigners outnumber the 8,000 native Andorrans by more than 2 to 1. About 15,500 are Spanish and 3,000 are French.

Immigration ha pushed up the population from 8,000 only 15 years ago, and Andorrans see the foreigners as a threat to the well-being of this 190-square-mile principality.

"Most of them have a past. They are running from someone—either their wives or the fraud squad," a book salesman said. "The people you rub shoulders with in this country —well, I can't say more."

His comments may be unfair to many foreigners, including the moderately well-to-do, who find that their retirement incomes stretch farther in Andorra.

No Taxes

There are no income taxes, hardly any property taxes and mail within the country is free. Ninety per cent of Andorra's budget of $6.5 million this year was financed by taxes on gasoline and consumer goods—paid mostly by a million tourists.

"I was tired of living on a Mediterranean island—you had to take a bloody boat every time you went anywhere," an Englishwoman said. "Now I've been here eight years. I'm a bit tired of Andorra but my husband likes the climate."

"I get arthritis in Perpignan and gout in Andorra," said an elderly resident who spends part of the year in France. "But what can I do? This place has the cheapest whiskey in the world—two or three dollars a bottle."

According to tradition, Charlemagne gratefully gave self-rule to Andorrans who had helped him fight the Moors. A complex series of medieval land transfers and marriages placed the territory under joint French-Spanish protection, and Andorrans have preserved their independence for 700 years by balancing French and Spanish power.

Medieval Tributes

French President Valéry Giscard d'Estaing and the Spanish Catholic bishop of Urgel currently share rights to medieval tributes of chickens and sheep, while their representatives jointly rule Andorra along with a 24-member council elected by Andorrans.

There is some talk of revising the tangle of law and custom that blurs lines of authority and leads to friction between Andorrans and their bigger neighbors. But Andorrans are slow to change—women got the vote only six years ago.

For centuries, Andorra was known mostly to stamp collectors and smugglers. Natives still boast that they can slip a case of duty-free jewelry across the border on mountain trails anytime they want to, but authorities say smuggling has lessened with prosperity.

The tourist trade is so good that a tavern owner along the main street in Andorra La Vella, the capital with a population of 9,000, can pay $4,500 a month in rent and still make a profit.

"Our worry is that foreigners will destroy our way of life. But Andorra is still a cosy place and probably always will be," a grocery owner said.

Portuguese Fear Dictatorship May Be Solution to Problem

By Marvine Howe

LISBON, Nov. 4 (NYT).—The revolutionary fervor that shook Portugal two and a half years ago is gone. Gone are the red carnations, the chants and marches and the general mood of liberated irresponsibility that accompanied the toppling of the rightist dictatorship.

Now the mood of the country appears to be one of frustration and complaint and most conversations with leftists, rightists or those in between seem to end with the view that the only solution may be another dictatorship.

Portugal's military leaders have kept their promise to turn power over to civilians, but they remain very present in the background. Prominent among them is the tough, conservative commander of the Northern Military Region, Brig. Gen. Antonio Pires Veloso, who is increasingly seen as a kind of parallel power.

With government and opposition leaders, key military officers and foreign diplomats visiting the hospital in Oporto where he is recovering from a serious helicopter accident, most of Portugal's leading newspapers have devoted long analyses to what they call his "phenomenon." Some allege that he is plotting a kind of rightist take-over, others picture him as a leader in reserve should the present constitutional minority government of Premier Mario Soares fail.

Six Governments

Since the Portuguese revolution of April 25, 1974, there have been six provisional governments, three unsuccessful coup attempts, widespread strikes and street demonstrations. Portugal now has its first democratically elected president, a constitutional government, a freely elected parliament and a new constitution and municipal elections are set for Dec. 12.

The new President, 41-year-old Gen. Antonio Ramalho Eanes, and the 51-year-old Premier, whose Socialist party won a plurality in the parliamentary elections, have pledged to restore confidence in the country and revive the paralyzed economy.

But they are faced with serious constraints: A powerful, demanding labor movement dominated by the Communists and far-leftists, an increasingly assertive right represented by the Portuguese Farmers' Confederation, a watchful military that still holds some political ambitions and a minority government with strong parliamentary opposition on the left and right, as well as internal di

"The revolution's ob were the three Ds: Dem decolonization and develo Mr. Soares said recently in terview reviewing his ment's aims. "Two Ds al and now we must concent development."

But many wonder whet goal can be achieved with upheavals and the return authoritarian regime.

"I'm ashamed to be a guese because what we ne dictator," a civil servant glumly as he read press of bickering within the party.

Many of the men of t olution have disappeare view. But they apparent merely been relegated wings and many have ho comeback.

Among them are forme ident Antonio de Spinola, his former aides Maj Sanches Osorio, another president, Gen. Franci Costa Gomes and his former premier, Gen. Goncalves. There are al pro-Communist officers i ed in the abortive leftist of last Nov. 25. The prominent figure linked Nov. 25 revolt was Gen Saraiva de Carvalho, w stripped of his post as c military security, reduced rank of major, arrested a prisoner for a month and

Clean Slate

When Mr. Soares took as Premier last July, he s ed that the slate be wipe that "a sponge be passe the various leftist and post-revolutionary coup a and this is what seems happening. Prisoners ha released "pending trial" a trials never come.

Of the 2,000 members former dictatorship's police who were arrested the revolution, only 19 re prison. The others have freed awaiting trial.

Mr. Soares emphasizes ever he can that Portugal cipal problems are econo other considerations an ondary. The Socialist said the "capitalist state tugal" was destroyed by Goncalves and his Com and extreme-left partisan

"The Socialism they s he went on, "was not vial some sectors will have to to private enterprise. W Socialism, but a West En type of Socialism."

Two and a half years o unrest coupled with politi certainty have resulted in in investments, the drying the country's main source eign exchange—remittance emigrants and tourism soaring imports.

The government's acti halt the slide in the ec moderate as they have have stirred angry protest left and right and disap criticism from the general in the center.

Restoring Capitalism

The Communist and ex leftist parties have accus government of "restoring c ism at the expense of the ers," while the militant A Portuguese Farmers' Con tion has demanded an e land expropriations and th pension of the agrarian r law.

In the Assembly of th public, the conservative tian Democrats and the Democrats, formerly kno the Popular Democrats, ha tacked the agrarian reform gram and accused the so government of timidity an capacity in tackling the economic problems.

China Said To Plan Trial For 4 Leftists

PEKING, Nov. 4 (Reuters).—China plans a state trial of Mao Tse-tung's widow, Chiang Ching, and other members of the "gang of four" accused of plotting to seize power in Peking, Chinese officials told a visiting delegation here today.

An informed source said the officials, speaking to a visiting Finnish delegation, also confirmed that the "gang of four" was under house arrest.

The Chinese did not reveal whether the trial would be public or private. A public trial of purged leaders would be unprecedented in the 27 years of Communist China's existence.

The four radicals—Miss Chiang; Wang Hung-wen, the second-ranking member of the party; Chang Chun-chiao, the senior deputy premier, and Yao Wen-yuan, the party's chief propagandist—are believed to have been under arrest since Oct. 7 and have been expelled from the Communist party.

'Illicit Relations'

The source said the Finnish delegation was told that a commission investigating the radicals' activities was trying to determine whether they had engaged in "illicit relations" with the Soviet Union.

Tan Chen-lin, vice-chairman of China's parliament, the National People's Congress, was quoted as telling the Finns that so far there was "no knowledge" as to whether the former Politburo members had any relations with the Soviet Union.

The investigating commission is headed by Defense Minister Yeh Chien-ying, the source said.

The source reported Mr. Tan as saying that if the radicals' plot to usurp power had succeeded, they would have adopted a "chauvinistic, big-power foreign policy."

China asserts that it now treats big and small nations equally.

The Finnish delegation is led by Kaarlo Pitsinki, governor of Uusimaa Province.

The Chinese news agency reported yesterday that there had been rallies by the military denouncing the "towering crimes" of the four radicals.

One of the crimes was the "sabotage of the building of the army and militia, with the vicious aim of attempting to usurp party and state power," the agency said.

ELEGANCE AND BEAUTY—A sea gull joins other birds on Frankfurt bridge.

Britain Proposes a Rhodesian Date

(Continued from Page 1)

essary constitutional and legal processes. The [white Rhodesian side] took the view that the time would take slightly less than two years. The nationalist delegations took the view that it could be completed in 12 months. The suggestion that I made was that 15 months would be a reasonable time. In these circumstances it has unfortunately not been possible to fix a date and we're meeting again tomorrow morning."

Smith View of Stalemate

SALISBURY, Rhodesia, Nov. 4 (Reuters).—Prime Minister Smith returned here today and said that Mr. Richard should take a firmer grip on the Geneva proceedings, but he added: "I suppose in fairness to the chairman he has got a few problems with some of the black delegates."

Border Attack Reported

MAPUTO, Mozambique, Nov. 4 (Reuters).—This country's news agency said today that Rhodesian troops attacked the border post of Machipanda in Mozambique with mortars and artillery last evening and suffered heavy casualties.

Africa Talks Set

DAR ES SALAAM, Nov. 4 (UPI).—The Presidents of Tanzania, Zambia, Angola and Mozambique will meet Saturday to discuss developments at the Geneva talks and recent Rhodesian raids into Mozambique.

Opposition to Curbs by State Grows Among East Germans

(Continued from Page 1)

tives in West Germany seized on the documents. The government, they thought, formally acknowledged their right to move to the West after years of rejection, and they have been claiming that right, loudly.

"Just in my own small circle of acquaintances," a party member said, "I know at least half a dozen people who have told me, 'I've got an application going'—the code phrase for permission to move to the West. All kinds of people seem to be doing it—a taxi driver, a construction worker, and young university students have all told me they plan to go."

About 50 to 60 persons a day go to the West German mission on the Friedrichstrasse, mostly to apply for exit permits—twice as many visitors as a year ago. And about 15,000 East Germans will be given official permission this year to settle in the West. About 5,000 others manage to cross the border illegally.

Not all of them leave for political reasons. A taxi driver said he wanted to earn more money. The average monthly wage in East Germany is $400, less than half what the West Germans earn. Others apply simply because they are tired of East Germany's travel restrictions or are curious about life in the West.

The State Security Ministry, according to an official, has been urging Erich Honecker, the party leader, to "take the club out of the sheath" and increase the penalties on people who say they want to go.

"The problem," said the official, "is that it's perfectly legal to submit an application. We really don't know what to do about it. It's clear that the methods they use in the Soviet Union wouldn't be appropriate here, but everything depends on how far things develop."

Petitioners Arrested

Some petitioners have been arrested. A doctor in the Saxon town of Riesa, Karl-Heinz Nitschke, is expected to be tried shortly on charges of "slandering the state" in a petition to the United Nations. The document charged East Germany with suppressing the elementary human right to move across state borders at will.

The ferment extends to party members. At a conference of European Communist parties here in June, East Germans listened in astonishment to speeches by West Europeans that challenged Moscow's preeminence in the Communist world.

The Italian party leader, Enrico Berlinguer, said in the presence of Soviet leader Leonid Brezhnev, that "there is not and cannot be a leading party or leading state," and Santiago Carrillo of Spain said, "There is no doubt that Communists have no center of leadership today and are not bound by any international discipline." The speeches were printed in the East German press.

Asked about their reaction to the Berlinguer speech, a group of university students in Dresden who had been selected to meet with a Western reporter reacted defensively.

"We're not afraid of such remarks," one of them said. "What was important for us was what Comrade Breshnev said, that, despite differences of opinion, the Communist parties of Europe are united and determined under the guidance of the Soviet Union."

More Democracy

An older party member in East Berlin said: "The conference may not have provoked discussions in all walks of life, but it certainly did in the party—people are asking again about the necessity to introduce more democracy here."

One reaction to the dissent is a strikingly liberal attitude by the authorities, which may reflect more indecision than intention.

Reiner Kunze, a 43-year-old writer, recently took a deep breath and allowed a West German publisher, Fischer of Frankfurt, to issue a short volume ironically called "The Wonderful Years." According to his friends, he fully expected to be arrested after the book came out, this fall.

It is a collection of vignettes from ordinary East German life, some literal, some poetic, none invented and all bitter.

What has happened to Mr. Kunze? "Not a damn thing," said a writer friend, "except he has been kicked out of the local writers' union."

Stoph Names Council

BERLIN, Nov. 4 (Reuters).—East German Premier Willi Stoph yesterday named a 42-man Council of Ministers, adding three new members and dropping one member of the previous 40-man Cabinet.

The major change was the naming of Werner Krolikovski to replace fellow party politburo member Guenter Mittag as one of the first deputy premiers.

Mr. Mittag was dropped from the Cabinet to take Mr. Krolikovski's former post of secretary of the party's Central Committee.

Observers said it was likely that Mr. Krolikovski, 48, was being prepared for eventual promotion to the premiership. Mr. Stoph, 62, who is in bad health, was replaced as head of state last week by party chief Erich Honecker.

Gulf Oil Denies It Paid S. Korean A Million a Month

WASHINGTON, Nov. 4 (NYT).—The Gulf Oil Corp. has disputed a claim by South Korean businessman Tongsun Park that he received $1 million a month from his business relationships with the oil company.

The Gulf statement has confronted federal investigators—who are looking into charges that Mr. Park attempted to influence the U.S. government on behalf of South Korea—with a major discrepancy on the question of where Mr. Park received his money.

According to sources familiar with the investigation, Mr. Park told investigators from both the Department of Agriculture and Department of Justice that he received $1 million a month as a result of unspecified business relationships with Gulf.

In a statement issued at its Pittsburgh and Washington offices, Gulf said it had "never had any financial relationship with Tongsun Park," adding, "The extensive investigation conducted by the McCloy committee into Gulf's political contributions did not reveal any financial or political connection between Gulf and Tongsun Park."

Federal officials said privately that Mr. Park might have "created" the idea he received earnings from Gulf to disguise the real sources of his funds.

Egypt and Russia Urge Resumption Of Geneva Talks

CAIRO, Nov. 4 (AP).—An urgent resumption of the Geneva conference on the Middle East was proposed today by Egypt and the Soviet Union. The two countries indicated that they were making progress in improving bilateral relations.

Relations between Cairo and Moscow have been strained since Egypt last March canceled a Soviet-Egyptian treaty to protest against a Russian cutoff of spare parts for Egypt's largely Soviet-equipped armed forces.

The call for speedy reopening of the Geneva conference—whose first and only session was held in December, 1973—was included in a joint communiqué issued after talks between Egyptian Foreign Minister Ismail Fahmy and Soviet Foreign Minister Andrei Gromyko.

The talks, the first in 19 months between the two officials, were held yesterday and today in Sofia. The text of the communiqué was distributed by Egypt's Middle East News Agency.

Iran Shifts Cabinet, Replacing Amouzegar

TEHRAN, Nov. 4 (UPI).—Premier Amir Abbas Hoveyda reshuffled and replaced some of his Cabinet members today. He picked a new minister of interior to replace Jamshid Amouzegar, internationally known for representing Iran at meetings of the Organization of Petroleum Exporting Countries.

The new interior minister is Amir Qassem Moini, formerly minister of labor. The announcement did not indicate whether he would also take over the OPEC duties of Mr. Amouzegar, who left the government earlier to become secretary-general of the nation's only party.

Japanese Diet Boosts Rail, Phone Charges

TOKYO, Nov. 4 (AP).—The Diet approved today an average 50.3-per-cent fare increase for the National Railway and a 50-per-cent boost in telephone and telegraph charges. It then ended a special session.

Cementing Relations

Russia and Angola Sign Two Major Treaties

By Caryle Murphy

WASHINGTON, Nov. 4 (WP).—The Soviet Union has cemented its ties with the leftist government of Angola in the last month through the signing of two major treaties that are unusual in Soviet relations with black Africa.

It is the first time that standard treaties—a friendship and cooperation agreement and a party-to-party agreement—have been signed with a sub-Saharan African government.

The moves come at a time when the Soviet Union is increasingly criticizing the United States for its efforts to work out a Rhodesian settlement. Angola is one of the five "front-line" southern states seeking to bring about majority rule in Rhodesia.

The friendship treaty includes military agreements "which are being concluded in the interests of strengthening the parties' defense capabilities." State Department sources say that it is too early to determine the extent of Soviet-Angolan military cooperation.

The Russians have apparently taken up Angolan President Agostinho Neto on his reported insistence that Soviet aid to this country be paid for, not accepted as a gift.

Period of 10 Years

On Oct. 14, a Tass commentary on a technical and economic protocol signed recently in Moscow said that the Angolans will repay part of the Soviet aid "by deliveries of various goods or freely convertible currency over a period of 10 years."

This is the first time that the terms for Angolan repayment of Soviet technical aid have been made public. Mr. Neto announced to Angolans recently that they could no longer expect their allies to give them things, but that they would have to pay for what they received, according to an Angolan newspaper account.

The friendship treaty, also calling for cooperation in industry, farming, fishing and trade, is similar to treaties that the Soviet Union has signed with Somalia, India, Iraq and Egypt. Egypt abruptly canceled its 15-year friendship treaty in 1972.

Foreign Bases

Mr. Neto did not specifically say that Angola will not allow foreign military bases on its territory, as he had done on several previous occasions.

The Angolan leader was helped to gain power in the former Portuguese colony last year when Moscow sent military equipment to Angola for Cuban troops aiding Mr. Neto's army fight South African soldiers backing a rival Angolan group in the civil war.

The second accord signed in Moscow was a party-to-party cooperation agreement, despite the fact that Mr. Neto's Popular Movement for the Liberation of Angola (MPLA) is not officially even a political party.

The MPLA was formed in 1956 as a front for all forces fighting Portuguese colonial rule in Angola. Until shortly after independence last Nov. 11, its leaders said that the movement could accommodate a broad spectrum of left-of-center political beliefs.

Early this spring, however, the MPLA's leaders began to speak publicly of the need to transform the movement into a political party and to imply a stricter control over who could be a member.

Fighting in the South

JOHANNESBURG, Nov. 4 (AP).—Fighting was continuing today in southern Angola, with joint Cuban-MPLA forces attacking pro-Western UNITA faction guerrillas, refugees arriving in South-West Africa reported.

South-West African insurgents, who have bases in Angola, were reported aiding the Cuban-MPLA troops. Cuba has an estimated 12,000 troops in Angola.

Yugoslavs Shun Attack by Hoxha On Tito Regime

BELGRADE, Nov. 4 (NYT).—A Yugoslav government spokesman declined today to reply to an attack distributed here by the Albanian Embassy against the government of President Tito.

The Albanian diatribe against Yugoslav leaders was part of a speech delivered Tuesday in Tirana by Enver Hoxha, first secretary of the Albanian Labor (Communist) party, which is currently holding its seventh congress.

The full text of Mr. Hoxha's remarks was distributed in several languages by the Albanian Embassy in Belgrade.

While Albanian Communist leaders have long been sharply critical of this country, the language in Tuesday's speech was the harshest seen here in years.

"Yugoslav revisionism remains a favorite weapon in the hands of the international imperialist bourgeoisie in the struggle against socialism and the liberation movements," the Albanian leader was quoted as saying.

Bus Drivers End 1-Week Madrid Strike

MADRID, Nov. 4 (Reuters).—City bus drivers today ended a week-old strike but bitterness over the imprisonment of three of their leaders threatened to wreck imminent wage negotiations.

A few dozen soldiers were still driving public buses today as some workers failed to turn up for the morning shift.

Some drivers complained that they had been forced back to work at gunpoint by police. The civil governor's office said that 15 strikers were arrested for trying to keep others from returning to work.

Mayor Juan de Arespacochaga told newsmen that the drivers' decision to resume work had opened the way to talks on their demands for more pay and fringe benefits.

But he said that he had no jurisdiction over the cases of three strike leaders arrested last week when the dispute began. Workers had originally said they would not go back until their leaders were freed.

The three, together with four men released earlier this week on bail, face up to six years in prison on charges of sedition for inciting the stoppage.

Clashes, Traffic Chaos

The strike provoked clashes between workers and riot police and stranded thousands of commuters. Many other commuters caused traffic chaos by using their cars to get to work.

Opposition sources today reported a tacit agreement with the government to refrain from doing anything that would provoke the extreme right into blocking political reform proposals in the Cortes (parliament).

The proposals, to set up a two-house parliament by universal suffrage next year, will be debated in the Cortes this month.

The sources said the government had convinced opposition politicians that it was in their own interest not to create difficulties for the passage of the reforms.

"There is no formal agreement but we feel it is common sense not to rock the boat at this stage," one opposition politician said.

Lisbon, After Aide Resigns, Vows to Pursue Land Refo

LISBON, Nov. 4 (NYT).—Portugal's Socialist government pledged today to pursue the controversial agrarian reform program despite the resignation of the program's chief defender, the minister of agriculture.

The resignation yesterday of the left-wing Socialist Cabinet minister, Antonio Lopes Cardoso, consecrated the split in the party, which became public during its three-day national congress that ended Monday.

The outgoing minister announced that he would remain in the Socialist party and resume his mandate as a deputy in the National Assembly to "fight for democracy and socialism."

In his letter of resignation, made public today, Mr. Lopes Cardoso, 43, accused Premier Mario Soares's government of deviating from the Socialist party program. He also attacked the party congress for spending its time on "acts of courtesy" and avoiding debate on important issues such as agrarian reform.

Trip Is Canceled

As a result of the political crisis resulting from Mr. Lopes Cardoso's resignation, Premier Soares canceled a trip today to the Netherlands, where he was to have attended a meeting of the Socialist International.

Sources close to the government said tonight that Minister of Commerce and Tourism Antonio Barreto, 34, would probably be named the new minister of culture. It was not certain, however, whether he would retain commerce and tourism part the sources said.

The secretaries of state agrarian reform and agrarian velopment expressed their darity with Mr. Lope Ca and also resigned. It was rep that other Cabinet changes w follow.

Nevertheless, a governm spokesman emphasized that land reforms would be confi as planned.

Victory for the Right

Mr. Lopes Cardoso's depar was welcomed by the rig Farmers Confederation, w had demanded his dismissal months. The Communist and left press hailed the affair a tory for the right.

Even Antonio Reis, a mem of the Socialists' National C mittee, warned that Mr. Lo Cardoso's resignation could bl about a radicalization of p tions in the party and on the tional level.

He predicted that the Comm nist party would gain votes fr the Socialists in the agrarian form area, which covers much central and southern Portugal, the same time, rightist for would step up their attacks the agrarian reform program's try to halt further land exp priations, he said.

...er Contradictory Promises

...conomic Policies of Carter ...re Still Not Clearly Defined

By Peter Milius

...ASHINGTON, Nov. 4 (WP). ...art of the time on his way to ...ming the presidency Jimmy ...ter sounded like a traditional ...ocrat on economic issues, ... of the time like a con...vative Republican. The result ... a degree of uncertainty about ...ich way he will go.

...n the one hand, Mr. Carter ... said that his "first priority" ... President will be to pump up ... U.S. economy and drive ...n unemployment, now 7.8 per ...t.

...For the near term, economic ...icy should be expansionary," ...told the Democratic Platform ...mmittee in June. He is also ... record as favoring major new ...eral spending programs in...al health insurance, welfare ...orm and counter-cyclical or ...recession aid to cities.

...et Mr. Carter also said dur... his campaign that he would ...lance the federal budget by ...cal 1981, would defer new ...ending programs if that was ... only way to achieve a balanc... budget and would try to keep ...eral spending at about 21 per ...t of gross national product, ...ich is about where it is now. ... would not let the federal gov...ment grow relative to the ...onomy as a whole, he said.

Keeping the Promises

Mr. Carter can keep all these ...mingly contradictory promises ...ly if the economy recovers and ...ows much faster than it has ...ently. His advisers have told ...m that this "growth dividend" ...uld be as high as $60 billion ... 1981, meaning he could in...ease spending that much over ...esently projected levels, or cut ...xes, and still have a balanced ...dget.

His advisers say there is little ...mediate risk of renewed in...ation because demand for goods ...d labor still is low. As to the ...mewhat longer run, Mr. Carter ...as endorsed the idea of standby ...age and price controls, but ...ided, "My guess is that I would ...ver use them."

...A number of leading Demo...atic economists have suggested ...other approach, a pact with ...bor, under which the govern...ment would cut taxes and labor would reduce its wage demands.

He faces two other major prob...lems. The U.S. economy's growth ...rate declined in the second and ...third quarters of this year and ...the government's preliminary re...port on fourth quarter gross na...tional product and growth will ...probably come out the same week ...Mr. Carter is sworn in, telling ...him whether the GNP has re...vived or whether the economy ...needs new stimulus.

Second, Mr. Carter will have ...to tell Congress rather quickly ...on assuming office how he would ...like to change the federal budget ...that President Ford will already ...have drawn up for fiscal 1978, ...this year beginning next Oct. 1.

Question of Stimulus

Mr. Carter's response will prob...ably be to propose some increased ...stimulus for the economy. His ...chief economic adviser, Lawrence ...Klein, has said that the econ...omy should have $10 billion to ...$15 billion in additional stimulus ...over the next year.

It is not yet clear whether ...Mr. Carter would call for stimulus ...in the form of a spending in...crease or a tax reduction.

The problem is too far off to ...have been much discussed, much ...less decided.

That is even more true of the ...related questions: If he calls for ...a spending increase, spending ...for what? If taxes are to be ...reduced, should the reduction be ...in the form of a one-shot re...bate, as was done last year, or ...should it be a "permanent" tax ...cut?

Some Carter aides have said ...that a one-shot tax reduction ...might be best, so as not to com...mit the new administration and ...use up any of that hoped-for ...$60-billion "dividend."

Mr. Carter also said during the ...campaign that he will send Con...gress a comprehensive tax-re...form proposal. But he added, ..."I would not make any sub...stantive changes in our tax law, ...or propose any as President, until ...at least a full year of very care...ful analysis." So tax reform ap...parently will not be an issue ...right away.

United Press International.

TOO MUCH CELEBRATING—President-elect Jimmy Carter carrying daughter Amy as he arrives in Plains, Ga. She fell asleep on plane after victory celebration in Atlanta.

Carter and Mondale Confer on Administration

(Continued from Page 1)

Carter said. "President Ford's characteristically gracious statement today will make that job easier for me.

'Common Devotion'

"I look forward to working with President Ford and others like him who, even though divided by party, are united by common devotion to this country and the well-being of our people."

President Ford, after receiving another treatment for a hoarse throat, worked in the Oval Office today. He met Secretary of State Henry Kissinger and UN Ambassador William Scranton.

The elaborate blueprint for taking over the federal government that Mr. Carter received today included a recommendation that Mr. Carter personally set up shop in Washington in about two weeks.

Although the preparations for a possible change of administration have been under way since July, it was only yesterday morning that it was certain to happen. That came when the votes of Hawaii and Mississippi sealed the victory of the Democratic nominee.

The verdict would not have been so close—or so long delayed—had it not been for the independent candidacy of Eugene McCarthy, which apparently cost Mr. Carter 5 states with 51 electoral votes.

If ever there was an election in which each vote counted, it was this one.

If . . .

A switch of about 7,400 votes in Hawaii and Ohio from Mr. Carter to Mr. Ford would have given Mr. Ford a 270-to-268-vote Electoral College victory.

The Washington Post's special correspondent in Mississippi reported that Mr. Carter won his 12,000-vote margin there by assembling "the same coalition of blacks and rural whites that elected Cliff Finc governor last year" in an equally close race over Republican Gil Carmichael.

"Virtually every predominantly black county gave Carter substantial, often 2-to-1 majorities," he said. "The increased black voter turnout and its high propensity for Carter was a major boost, but equally significant were the rural north Mississippi counties—all of them—which went to Carter, sometimes by surprisingly large margins."

Many analysts, including Ford pollster Robert Teeter, pinpointed Wisconsin as the crucial and unexpected state that irrevocably tipped the election from Mr. Ford to Mr. Carter.

Sen. Mondale, who campaigned repeatedly in the state, was viewed as a crucial factor in the Wisconsin victory.

Voter Turnout Increased in Only 14 States

by Stephen Isaacs

WASHINGTON, Nov. 4 (WP). —Reports that voting across the nation on Tuesday was heavy—perhaps even a record—were in error, statistics now show.

Washington Post projections of the vote show that the steady decline of U.S. citizens' participation in their presidential elections continued on Tuesday.

Those projections indicate that about 53.3 per cent of those eligible voted for a presidential candidate this year, down from 55.4 per cent in 1972. The turnout in 1972 was itself a cause for alarm to some observers.

Analysis of Tuesday's vote shows that turnout increased in only 14 of the 50 states, and that 10 of those 14 were in Democratic nominee Jimmy Carter's home region, the South.

Elections expert Richard Scammon suggested that the higher turnout in the South was based almost entirely on the region's pride in having a presidential nominee and not, say, on a heavy vote by blacks, as some observers have said.

Mr. Scammon pointed out that a "traditional liberal," like Mr. Carter's vice-presidential running mate, Sen. Walter Mondale of Minnesota, would surely have lost the South, as did Sen. George McGovern in 1972 or Sen. Hubert Humphrey in 1968.

Returns show that the Carter-Mondale ticket won 155 electoral votes from states in the old Confederacy and in those bordering the South—Missouri, West Virginia, Kentucky and Maryland.

The trend of the last two decades shows a precipitous decline in voting in large industrial states of the Midwest and Northeast and a corresponding increase in voting in Southern states.

One can see the pattern in a state like Mr. Carter's own Georgia, which had a turnout of 30.3 per cent of the adult voting-age population in 1960 and a turnout of 43 per cent on Tuesday, and in South Carolina, where 40.8 per cent of the voting-age population cast ballots on Tuesday, compared with 30.5 per cent 16 years ago.

U.S. Foreign Policy Expected To Change Little in Substance

(Continued from Page 1)

ter's longer-term policies toward the Arab world.

Another pressing matter—which may, in turn, be affected by the OPEC price rise—involves new loans to shore up the sagging British economy.

High-level U.S. discussions of the matter were put off until after the election, and there is some prospect that loan arrangements can be made by the International Monetary Fund without requiring a major U.S. policy decision before Jan. 20. The crucial question is what economic policies are to be required of Britain in order to qualify for the loan.

In another area, Mr. Carter's willingness to signal his support could affect the future of the international diplomatic drive, in which Mr. Kissinger took a prominent role, to negotiate a peaceful transition to black majority rule in Rhodesia and South-West Africa (Namibia). Mr. Carter expressed general approval of the negotiating efforts during his campaign, but made no commitment to specific economic or other arrangements that have been part of Mr. Kissinger's diplomacy.

Majority Rule

In an interview with the Johannesburg Financial Mail, granted some time ago for publication following the election, Mr. Carter was quoted as saying that "I think you will see an increase in our diplomatic commitment" to black majority rule with protection for minority rights in southern Africa.

Mr. Carter's campaign statements suggest he might take a different approach to the Strategic Arms Limitations Talks, seeking to negotiate reductions in the nuclear strength of the superpowers rather than the ceilings on nuclear strength presently envisioned. Mr. Carter's ideas and the unwillingness of the Soviet Union to strike bargains with the outgoing Ford administration are likely to halt further progress toward a new SALT agreement, which has been recently described by Mr. Kissinger as "85 to 90 per cent concluded."

Mr. Carter has also said he will seek a comprehensive nuclear test ban agreement with the Soviet Union and has criticized the recently completed partial test ban treaties that are still pending before the Senate. This suggests he may downgrade or bypass those accords in pursuit of a broader agreement.

Carter Moves Swiftly on the Transition to the White House

(Continued from Page 1)

...eputy secretary of defense; Bill ...oyers, former White House aide ...d press secretary, or Charles ...hultz, former director of the ...reau of the Budget, as well as ...obert Roosa, former under ...ecretary of the Treasury in the ...ennedy administration.

Mr. Watson also emphasized ...hat Mr. Carter would keep his ...ampaign commitments to name ...omen and minority group lead...rs to important positions in his ...dministration.

'Breadth and Range'

"Because of the nature of the ...ampaign he ran, Jimmy has a ...ery keen sense of the breadth and ...ange of talented people across ...he country," Mr. Watson said ...n an interview in his law office. ...He will be looking to universities ...nd other institutions in the Mid...est, the West, the South. That ...doesn't mean that he has an ...nti-Harvard, anti-Columbia, ...nti-Yale bias. But he does not ...ave the converse bias that all ...he talent is there, that if you ...on't come from the Eastern Seaboard, you haven't proved yourself."

Although all of Mr. Carter's closest associates agree that his characteristic temptation would be to plunge immediately into the process of selecting the most important figures in his administration, several aides are urging him to take a week or 10 days off to relax and read over the transition studies prepared for him.

"He doesn't know how tight he is," commented Mr. Kirbo, a craggy, soft-spoken personal friend who not only helped direct Mr. Carter's successful campaign for governor in 1970 but was also a principal adviser in his selection of Sen. Walter Mondale as a running mate this year.

Even with a short vacation, Mr. Carter would be well ahead of the transition timetables of other recent presidents-elect because he decided, in July to allocate $150,000 of his campaign funds to set up long-range planning for transition.

President Kennedy quickly made two major appointments after his election in 1960, but took until mid-December to complete his cabinet appointments even though he had the advantage of a transition study prepared for him by Clark Clifford, a former aide to President Truman.

But the 22-pege transition memorandum handed to Kennedy by Mr. Clifford two days after the election was a modest effort compared with the extensive studies and options papers prepared for Mr. Carter by his transition group.

Mr. Watson, the head of the transition study group, had prepared for Mr. Carter:

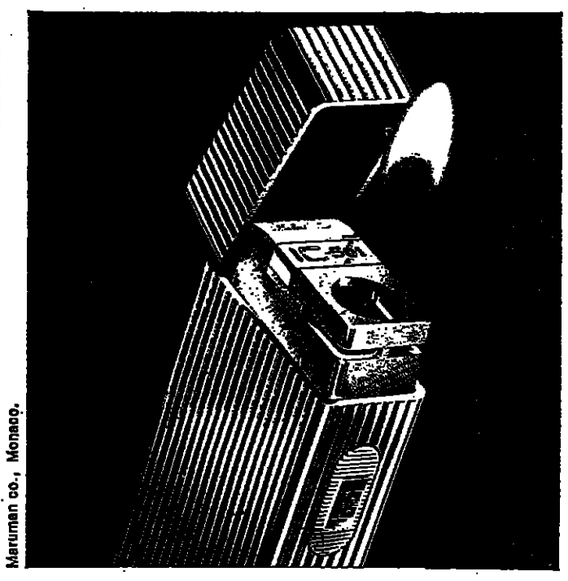
- A 25-page agenda for the transition period.
- A 45-page personal memo, "Some Thoughts on Organizing the Executive Office of the President," analyzing the function and possible reform of the senior White House staff, Office of Manpower and Budget, Council of Economic Advisers and the Office of National Security Affairs.
- A 50-to-60-page document analyzing the relationships among cabinet officials and heads of such other major agencies as the Central Intelligence Agency and the Federal Energy Administration, and recommending ways of appointing senior officials in "teams" so that the office-holders would work well together.
- An 80-page analysis of the budgets being prepared and submitted for fiscal years 1977 and 1978 by President Ford "to give us a head start," Mr. Watson explained, toward having Mr. Carter submit some budget modifications of his own soon after taking office.
- A briefing book of several hundred pages containing options papers on such major foreign affairs and defense policy issues as how to handle strategic arms negotiations with the Soviet Union, whether to proceed with production of the B-1 strategic bomber and how to achieve savings in the defense budget through greater efficiency. There are more than 50 major options papers on domestic policy issues.
- Another major study on how Mr. Carter might begin to initiate his program for reorganizing the federal government.
- A looseleaf notebook examining the operation of each of the 11 cabinet-level departments to enable the leaders of the new administration "to hit the ground running" once they are chosen by Mr. Carter.

Ford to Receive $189,500 Yearly In Pensions and Office Expenses

WASHINGTON, Nov. 4 (UPI). —President Ford will leave the White House on Jan. 20 with an annual government pension of $93,500 annd $96,000 a year more for staff and office expenses.

He will have round-the-clock Secret Service protection for the rest of his life.

The President will receive $63,000 annually as a former chief executive and about $30,500 from other government service. The second figure is compiled on the basis of his 24 years as a congressman and two years of service in the Navy.



As a former President, Mr. Ford will be given furnished, equipped office space in a federal building, probably in the Washington area, since he is expected to move back to his home in nearby Alexandria, Va.

He will have franking privileges. Salaries for his staff will be paid from the expenses. By law, he can can pay up to $44,600 to one staff member.

Trial Balloons by Carter Adviser, France's Marchais

Dialogue Between U.S. and European Communists Is Hinted

By James Goldsborough

PARIS, Nov. 4 (IHT). — Two trial balloons sent up today could signal the start of formal contacts between U.S. officials and West European Communists once the Carter administration is in office.

Zbigniew Brzezinski, one of President-elect Jimmy Carter's principal foreign-policy advisers, told a French newspaper that, although the new administration will not favor the participation of Communists in West European governments, "it has been perfectly ridiculous to agree to talk to [Soviet party leader Leonid] Brezhnev and refuse any contact with [Italian party leader Enrico] Berlinguer."

Mr. Brzezinski told the New York correspondent of Le Quotidien de Paris that putting Communists in West European governments would at least have the virtue of "linking them to the democratic system, separating them from their Stalinist and Leninist roots." The interview was given last week and published today.

Asked today about Mr. Brzezinski's comments, French Communist party leader Georges Marchais launched the other trial balloon, saying that he would favor official contacts with U.S. officials. "I am for a dialogue with everybody," he said on French radio.

Mr. Marchais used the occasion to attack stringent U.S. visa regulations. "Before I could meet anyone in the new administration, I would have to have a visa," he said. "For the time being, the United States, the nation of liberty, prohibits me—and all other French Communists—from going there."

Mr. Marchais said there was reason to hope that the new administration would follow "a more realistic line." He said that if he were an American he would have voted for Mr. Carter.

The U.S. policy of limiting official contacts with European Communists has long been under attack by U.S. and European liberals. It has become one of the chief complaints that the Communist nations of Eastern Europe say they will raise during the Belgrade meeting next summer on the implementation of the Helsinki security agreement.

Italian Case

Several critical voices were raised just a year ago when the State Department turned down a visa for Sergio Segre, a high-ranking member of the Italian Communist party. Mr. Segre had been invited to address a meeting of the Council on Foreign Relations in New York, of which Mr. Brzezinski is a member. Mr. Segre later was allowed to visit the United States as a member of an Italian parliamentary delegation.

The State Department has used two arguments for justifying present policy—that official U.S. receptions would help the Communists, which was not desirable, and that the present non-Communist governments do not want the Communists to be received in Washington. Against this, critics have argued that it is foolish to deny contact with parties that may one day share in power.

Mr. Marchais's remarks today represented something of an exaggeration. Washington's policy has been to turn down Communists who seek to go to the United States for political activity, but to permit them to visit for various kinds of professional contacts. Visits for UN business must also be approved.

One of the administration's staunchest supporters in present policy has been the AFL-CIO and its president, George Meany. The largest U.S. labor organization has opposed the granting of visas for labor delegations from any Communist-dominated unions.

Keystone.

Georges Marchais

China Reports Carter Win With No Comment

By Fox Butterfield

HONG KONG, Nov. 4 (NYT). —In its first official reaction to the U.S. presidential election, China today reported without comment the victory of Jimmy Carter.

In a three-paragraph dispatch, the Chinese news agency said that "James Carter, former governor of Georgia, was elected President at the quadrennial U.S. presidential elections." The report, however, was not published in this morning's edition of the party newspaper, Jenmin Jih Pao.

The use of the formal name "James" for Mr. Carter suggested the unfamiliarity Peking feels about the Democratic winner. For the last few months, Chinese officials have been asking U.S. diplomats and friends about Mr. Carter's background and probable future policies.

Peking had not expressed any preference for either Mr. Carter or President Ford. Today's report by the news agency asserted that both the Republicans and Democrats are "bourgeois parties."

No Differences

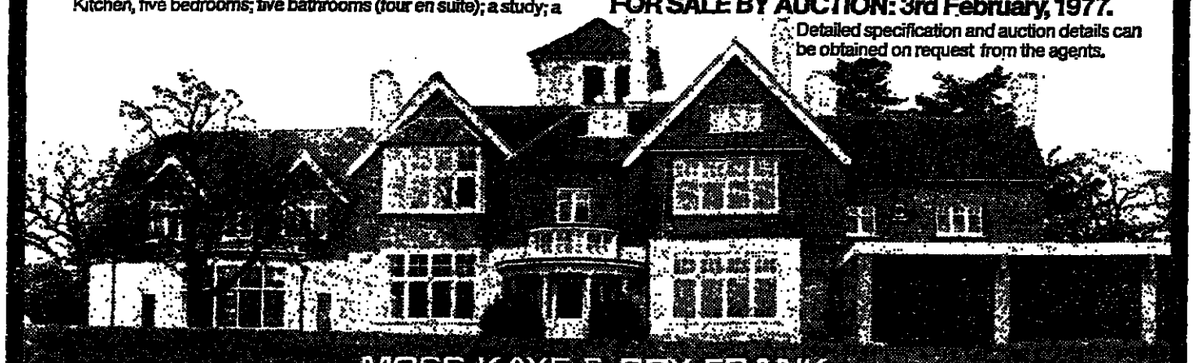
A commentary in this evening's edition of the Hong Kong Communist paper, Hsin Wan Pao, said that "there are no real differences in foreign policy between President Ford and Mr. Carter," and it suggested that with Mr. Carter's triumph, "there will be no drastic changes in U.S. foreign policy."

But some Chinese have privately expressed concern over Mr. Carter's few statements on U.S.-Chinese policy. They appeared to be particularly upset by his comment in the televised presidential debate on foreign policy when Mr. Carter said he favored normalization of relations between Washington and Peking but added, "I would never let that friendship with the People's Republic of China stand in the way of the preservation of the independence and freedom of the people on Taiwan."

It is Peking's position that Taiwan is an integral part of China and that the United States recognized this in the Shanghai communiqué, signed by former President Richard Nixon in 197 The use of the word independen for Taiwan is anathema to Peki officials.

The Chinese are also believe to have been disturbed by M Carter's calls for cuts in defen spending. Given China's dee rooted hostility toward, and su picion of, the Soviet Unio Chinese leaders have been urgi the United States and Weste Europe to increase their defen readiness against Moscow.

But at the same time, t Chinese are believed to be gl that Henry Kissinger's term secretary of state is coming an end. During the last fe years, with the slow progre toward normalization of relatio and Mr. Kissinger's pursuit détente with the Soviet Unio Peking has become increasing disenchanted with Mr. Kissing



INTERNATIONAL REAL ESTATE

THE CHANTRY

Barnet Lane, Elstree, Herts.

A magnificent residential estate in the heart of the green belt and yet only thirty minutes from the West End of London. The Chantry includes a Main House, a Coach House, and a Cottage all set in over four acres of landscaped grounds and gardens. It provides complete seclusion and yet it is within easy reach of all facilities.

From Other Civilizations

NASA to Seek Outer-Space Signals

By Walter Sullivan

NEW YORK, Nov. 4 (NYT).—A most ambitious effort so far to detect radio emissions from distant civilizations is being mused by two laboratories of National Aeronautics and ace Administration.

While many lines of attack, rt-range and long-range, will explored, the project's initial is to build an analyzer that simultaneously look at a star ind its planets, if it has any—ough a million radio-frequen-peepholes.

The device, which should also es a variety of other applica-ns in radio astronomy and ip-space communications, is ex-ted to cost $1 million.

It will be used with various dio telescopes to learn if any dlizations on the planets of tant stars are trying to com-municate with other technological societies at the "waterhole," a part of the radio spectrum considered a logical rendezvous for intelligent creatures trying to make contact for the first time.

The Frequencies

The frequencies of the waterhole lie between those emitted by hydrogen atoms adrift in space (1,420 megahertz or 1,420 million cycles) and those from hydroxil, whose molecules—formed of one oxygen and one hydrogen atom—are emitted at 1662 megahertz. Since hydrogen and hydroxyl combine to form water, this region of the spectrum is called the waterhole.

As stated in a recent analysis of the problem for NASA, it is reasonable to suppose "that different galactic species might meet there just as different terrestrial species have always met at certain more mundane waterholes."

It is assumed that any civilization transmitting within the waterhole region will do so in a very narrow radio-frequency band, which would make the signal detectable only if the receiver was tuned close to the proper frequency. It is for this reason that the device, a multi-channel spectral analyzer, will scan simultaneously a million different frequency bands within the waterhole.

The project is known as SETI (for search for extraterrestrial intelligence.)

Although a number of observatories will take part in the effort—some are doing so now—coordination will be done by the two NASA laboratories in California. One is the Ames Research Center in Mountain View, which will have primary responsibility for program management.

Big Antennas

The other is the Jet Propulsion Laboratory in Pasadena, operated for NASA by the California Institute of Technology. The big antennas of its globe-encirtling network for deep-space communications will be used, as well as other very large antennas, and the laboratory will provide various components for the multi-channel system.

Notable among these will be a data processor to handle the 6 million channels. Its development by Alvin Despain of the University of California, Berkeley, will take close to two years.

The Ames center will focus on automated pattern recognition methods to minimize human involvement in the scanning of millions, and later billions, of radio channels from thousands, perhaps millions, of stars.

The automated method will promote more effective ways to detect planets in orbit around stars. The evidence so far has been based on photography of comparatively nearby stars over decades to see if their movement against a backdrop of distant objects is irregular. Such irregular motion would be caused by the gravity of an unseen planet.

New Methods

The search has involved microscopic measurements of the photographs. But star images are always blurred by atmospheric and optical effects, and it is hoped that new position-determining methods can produce more persuasive evidence.

One way would be to detect slight changes in wavelengths of light from the star, due to its irregular motion. For the longer term it may be possible with space telescopes to cut out the light of the star itself and bring its planets into view.

The Jet Propulsion Laboratory, in addition to its work on the multi-channel system, will concentrate on scanning the sky with antenna systems based both on the earth and in space. It is widely believed that antennas in space will prove the most effective and, for large-scale searches, the least costly approach, particularly when the space shuttle makes possible more ambitious projects in earth orbit.

Briton, Fearing Invasion of Earth, Asks Ban on Signals to Space

NEW YORK, Nov. 4 (NYT).—Sir Martin Ryle, Nobel laureate in physics and Britain's Astronomer Royal, is trying to persuade the world's radio astronomers to refrain from informing possible civilizations in space of the existence of intelligent life on this planet, lest the earth be invaded by hostile beings.

He has addressed an appeal to the International Astronomical Union, urging that no attempts to communicate with other civilizations be undertaken, at least until there is international agreement on such a step.

Radio astronomers here know of no serious attempts to send signals to other worlds to date. However, they point out that normal transmissions from the earth, dating from the development of high-powered radars and other transmitters, have by now reached out at least 20 light years in all directions.

Sir Martin's concern, as expressed in his appeal, is that another civilization might see the earth as a tempting place for colonization or for extraction of mineral resources.

His suggestions run counter to the widely held view that travel across the vast distances separating stars and their planetary systems would probably take centuries in each direction.

Proponents of the search for signals from other worlds contend that information from them could help mankind overcome this planet's problems of survival.

Gustave Levy, 66, Dies; Partner at Goldman, Sachs

NEW YORK, Nov. 4 (AP).—Gustave L. Levy, 66, former chairman of the New York Stock Exchange and senior partner of the investment firm of Goldman, Sachs & Co., died last night at Mount Sinai Hospital. He suffered a stroke Oct. 25.

Mr. Levy had been a member of Goldman, Sachs since 1932. He became a partner in 1945 and senior partner in 1969. The company has assets of $1.2 billion.

Mr. Levy served as chairman of the Board of Governors of the New York Stock Exchange from 1967 to 1969. He was also a member of the American Stock Exchange.

Gustave L. Levy

Dean Dixon

FRANKFURT, Nov. 4 (AP).—New York City-born conductor Dean Dixon, 61, died at his home in Zurich today, the Frankfurt-based Hesse radio station reported.

Mr. Dixon, who left the United States in 1949, conducted the Frankfurt Radio Symphony Orchestra for 14 years.

Karel Polacek

PRAGUE, Nov. 4 (AP).—Karel Polacek, 63, Czechoslovak trade union chief in 1968-69, has died in Pilsen, a West Bohemian regional paper reported. He had also been minister of engineering.

Six Politicians Held As Reds in Malaysia

KUALA LUMPUR, Malaysia, Nov. 4 (AP).—Six prominent politicians have been arrested under the Internal Security Act for involvement in Communist activities, a police statement said last night.

Those arrested include two former deputy ministers who resigned Tuesday and an opposition member of Parliament, the statement said. Under the act, they can be held without trial indefinitely.

U.S., at UN, Warns S. Africa to Alter Its Race Policies

UNITED NATIONS, N.Y., Nov. 4 (AP).—The United States said yesterday that, unless South Africa changes its race policies soon, violence "inevitably will destroy a rich and productive country."

U.S. delegate Stephen Hess, a public member of the U.S. delegation, was among the final speakers in a group that began Oct. 26 and has featured almost 100 UN delegates condemning South Africa's apartheid policies.

Mr. Hess, a political scientist from the Brookings Institution, departed from his prepared text to voice concern over the belligerent tone in many speeches in the debate.

"My personal prayer is that we may somehow seek justice in South Africa without in turn losing our sense of humanity or our capacity to love," Mr. Hess said.

"If the whites of South Africa persist in their policies and refuse to accept today's realities, the anger of the blacks will mount," Simeon Ake of the Ivory Coast told the General Assembly.

U.S. Navy Hires German Salvage Ship to Lift F-14

LONDON, Nov. 4 (NYT).—The U.S. Navy announced here yesterday that it has chartered a West German salvage ship to raise the F-14 Tomcat fighter-bomber that sank in 1,800 feet of water off the Scottish coast during NATO maneuvers last month.

The plane fell off the carrier John F. Kennedy, taking with it a highly secret Phoenix missile. The missile was recovered last weekend by a nuclear-powered miniature submarine.

Heavy seas prevented the sub's retrieving the plane, although it lifted it to within 100 feet of the surface.

Yesterday, British reporters were taken to the U.S. Navy's Polaris base in Holy Loch, Argyle. They saw the air-to-air missile, worth half a million dollars—a white tube about 13 feet long with its glass-fiber nose cap crush by the recovery operation. It will be taken back to the United States.

U.S. officers at Holy Loch dismissed reports that the Russians had been trying to find the missile and Tomcat first.

The missile was found about 500 yards from the plane, which was three miles from the spot where it fell into the sea. The mishap occurred about 70 miles west of the Orkney Islands.

S. Africa Hospital Treating Khama

JOHANNESBURG, Nov. 4 (Reuters).—President Sir Seretse Khama of Botswana was today in Johannesburg for treatment by a specialist after a team of South African surgeons implanted a pacemaker in his heart in an emergency operation in Gaberone yesterday.

A spokesman for the Johannesburg General Hospital said Sir Seretse, 55, was in satisfactory condition.

A team of heart surgeons from Johannesburg, led by Dr. Israel Obel, flew to Gaberone and the pacemaker operation was performed within a few hours of their arrival.

AP.

James Keogh

Keogh Tells Ford He Has Resigned As USIA Director

WASHINGTON, Nov. 4 (AP).—James Keogh resigned yesterday as director of the U.S. Information Agency, effective Nov. 30, agency sources reported.

Mr. Keogh submitted a letter of resignation to President Ford yesterday. No formal announcement was made immediately.

Mr. Keogh, 60, was named to head the USIA, which publicizes U.S. government policy abroad, in December, 1972. He served as chief speechwriter and researcher for Richard Nixon's 1968 presidential election campaign and held the same position on Mr. Nixon's White House staff the following year. He is a former executive editor of Time magazine.

During his tenure as USIA director, Mr. Keogh has fought a study group's proposal that the Voice of America be divorced from his agency so as to make the overseas radio service more independent and less subject to government control of its news content.

Two Jews Facing 5 Years' Jail Over Moscow Protests

MOSCOW, Nov. 4 (NYT).—Two Jewish activists arrested during recent protests in Moscow have been charged under a criminal statute that carries penalties of one to five years in prison, a group of dissidents announced yesterday.

The two, Boris Chernobylsky, a radio-electronic engineer, and Iosif Ass, a physician, had both applied to emigrate to Israel, had been refused and were among a group that conducted sit-ins at government offices last month. Twenty-two members of the group are now serving 15-day jail sentences.

Mr. Chernobylsky and Dr. Ass were accused by the Moscow prosecutor's office of "malicious hooliganism," a violation of Article 206 of the Criminal Code of the Russian Republic. Their wives, Yelena Chernobylsky and Mikaela Ass-Krasnovskaya, said that the prosecutor's office had informed them of the charges, but had given no specifics. As a rule, dissidents who are charged here are convicted and sentenced; courts do not generally find them innocent.

Spokesmen for a group of prominent Jewish activists, formed into a defense committee for the two men, speculated that the arrests were, as Mark Azbel, a physicist, put it, "a demonstration of firmness" to discourage further protests.

A Prague Rebel Disputes Paper on Jailed Dissident

PRAGUE, Nov. 4 (Reuters).—A dissident Czechoslovak politician today attacked the Communist party daily Rude Pravo for its criticism of the French Communist party's support for a jailed Czechoslovak dissident.

The newspaper had denounced Pierre Juquin, a member of the French party's Central Committee, for attending a human rights meeting in Paris last month that called for the liberation of political prisoners, including Czechoslovak dissident Jiri Mueller. Mr. Mueller was jailed for 5 1/2 years in 1972 for circulating anti-Socialist literature.

Zdenek Mlynar, a former party secretary, said in an open letter to Rude Pravo, also circulated to foreign correspondents, that the Rude Pravo article "exceeded the current standards of misinformation which have become practice in recent years."

Rude Pravo wrote Oct. 26 that "neither Mueller nor anyone else was or is punished for his political opinions." Mr. Mlynar, quoting the verdict of Mr. Mueller's trial, said he was found guilty only of subversion for "circulating anti-Socialist books and magazines" and "organizing the dissemination of leaflets."

Driver Finds Where There's Smoke...

LA CORUNA, Spain, Nov. 4 (Reuters).—A taxi driver here asked four women he had picked up to stop smoking in his cab.

They refused. So he refused to shut a window or turn on the car heater. That was when things got unpleasant. Police say they detained the four women for cutting the driver's suit, raincoat and safety belt with a pair of scissors.

Enforcing State of Emergency

Pakistan Limits Independence of Courts

By Sharon Rosenhause

ISLAMABAD, Pakistan, Nov. 4—This country still calls itself a parliamentary democracy, but a basic foundation has been eroded by severe restrictions on the independence and authority of its judiciary.

A constitutional amendment passed and signed into law in September prohibits any court challenge to laws or rules implementing Pakistan's five-year-old national state of emergency. It restricts the courts' jurisdiction to guarantee civil liberties in political cases, permits judges to be transferred without their consent and abolishes the life terms of chief justices.

Political opponents of Prime Minister Zulfikar Ali Bhutto, lawyers and diplomats in this capital city view the measure as an attempt by the executive branch of government to rein in a judiciary that had resisted efforts to curb its power and independence.

Mr. Bhutto, whose Pakistan People's party dominates political life here in an authoritarian style frequently compared to Prime Minister Indira Ghandi's rule in neighboring India, now has virtually unlimited executive power to jail and silence dissidents without judicial interference.

In a strongly worded resolution condemning the new amendment, the Karachi Bar Association said: "The Constitution is being turned into an instrument for perpetuation of a party. Even if such is not the intention, such conclusions are inescapable in the public mind."

Pakistan is being governed under a state of emergency dating from its 1971 civil war, in which India interceded militarily to bring about the establishment of Bangladesh from what was then East Pakistan.

Under the emergency rule, the government can jail persons who allegedly threaten the nation's "security" or "integrity." It is estimated that there are several hundreds or thousands of political prisoners here.

The similarities between Pakistan and India are strong although Mr. Bhutto bristles at the comparison. He says that Pakistan is proceeding from a non-constitutional to a constitutional government, while other countries are moving in the opposite direction. He does not specify any other nation, but the allusion to India is unmistakable.

India is also under a national state of emergency. Since its imposition 16 months ago, Mrs. Gandhi has systematically restricted the authority of the judiciary.

The Pakistan amendment, Mr. Bhutto explained in a recent interview at his official residence in Rawalpindi, was enacted largely for procedural or administrative reasons.

Limited Cases

He conceded that the measure does limit the courts' authority, but "only in limited cases," which the Prime Minister further describes as "extraordinary cases like bomb blasts, sabotage."

In the last two years, the government has cracked down on its political opposition. The courts responded by enforcing constitutional guarantees. Mr. Bhutto then cracked down on the courts.

The fourth constitutional amendment, enacted in November of last year, prohibited the Pakistani high courts—the equivalent of a combined federal district and appeals bench in the U.S. judicial system—from granting bail to persons kept under preventive detention.

Still, the high courts persisted in issuing orders in the so-called "national security and integrity" cases. In the parliamentary debate on the Fifth Amendment—the one enacted last month that bars challenges to emergency rules—Mr. Bhutto spoke of the judiciary's "transgressions" into executive functions.

The opposition walked out of Parliament as did its counterpart in India when the nation's constitutional amendment was introduced.

In the interview, Mr. Bhutto elaborated on his complaint that the courts were becoming a parallel of the executive by "misinterpreting or misapplication of laws."

He said that persons accused under the emergency laws or rules were going to judges' homes in the early morning hours. And the judges, Mr. Bhutto said, were granting bail without even hearing the government's side.

"If you abuse interim orders like that, in that fashion, then why not lift the emergency? Why not lift the defense-of-Pakistan rules? Why not allow subversion? Why not allow further dismemberment? Why not allow foreign intrigue?" he asked.

In the parliamentary debate, Mr. Bhutto said that the executive had two choices:

- It could suspend all civil liberties, which the government had restored despite the emergency—an important point of contrast with India, where fundamental rights remain suspended.
- It could forbid interim court orders in special cases.

He chose the latter course.

Mr. Bhutto is often accused of political overkill. Some diplomats here use that description to explain his handling of the courts. The consensus in the capital is that the political opposition is essentially impotent.

"The Fifth Amendment is not aimed at political criminals, but at the judiciary," a constitutional lawyer said.

A fear repeatedly expressed here is that the Pakistani judiciary, regarded by many as the most significant legacy of British rule, will never recover.

EEC Recouping Millions in Frauds

BRUSSELS, Nov. 4 (Reuters).—Frauds perpetrated by farmers and traders against the European Economic Community's Agriculture Fund involved about $2.5 million last year but virtually all the money has been or is being recovered, the EEC Commission said today.

In its annual report on the farm fund, which accounts for the biggest share of the EEC budget, spending $5.2 million last year, the commission says that it tracked down 139 cases of fraud in 1975. The largest number of cases—67 frauds—involved cereals and the next biggest incidence was in beef (22 cases).

More than $600,000 has been repaid and $1.85 million more is being recovered, the commission said. It added that in the last five years, frauds against the fund have totaled about $18 million, but most has been recovered.

President-Elect Carter

From The Washington Post

President Ford's statement conceding the presidential election to Jimmy Carter was poignant and graceful, distinctively so as these difficult statements go. It was also reflective of precisely those qualities and habits of mind that won him nearly half the popular vote. Disappointed as he was at the result, Mr. Ford somehow still managed to convey that there are finally things more important to him than politics and seeking after power—the closeness of family relationships high among them. This struck us, in watching Mr. Ford concede the election, not just as a prospective consolation for a man who had suffered a defeat, but rather as a projection of the values which have had so much to do with Mr. Ford's political appeal throughout his brief administration.

For this reason Mr. Ford did not need continually to ask people to trust him. By and large they *did* trust him. They did not see a vast difference between the public man and the private man. Conveying this trustworthiness has been Mr. Ford's principal contribution to the public welfare since he has been in office. When you recall the circumstances under which he came to the presidency and the political turmoil of the time, the magnitude of his contribution becomes plain.

But a majority of the voters wanted more than this, especially once they had the luxury of the reassurance and return to normality that Mr. Ford had provided. And so it is one of the ironies of the campaign that the President was an inadvertent architect of his own political doom: People came to take for granted the atmosphere he created, even while they became restless for change. And it was in the space created by this particular irony that Jimmy Carter found his opening.

Mr. Carter professed to be far more than "merely" trustworthy. He professed to be, as well, far better attuned to the social and economic imperatives that loomed ever larger in the public's consciousness as the shockwaves of Watergate and the Vietnam war and all their attendant civil strife receded. It is to Mr. Carter's credit that over a 22-month period he managed to discern the genuine anxieties and frustrations of large numbers of Americans and to identify with both their bewilderment and their abiding belief that government can be fair in method and human in scale and effective in performing its large national and international tasks. His success in gaining his party's nomination and in going on to win the general election represented a tour de force. It was audacious in conception, disciplined and determined in execution—in short, an exercise which revealed possibilities with the political process that few had even imagined were there.

Mr. Carter's slim margin of victory takes nothing away from his achievement. But it does drastically diminish the unfettered "mandate" he openly sought. From all accounts he intended to assume the presidency blessedly and uniquely free of encumbering obligations to other members of his party and even to those groups and individuals who had gone out of their way to help him get elected. In fact the election results place him deeply in debt to organized labor, to big city bosses, to party workers, to certain elements of the traditional Democratic coalition. And the paradox is that by seeking to win in this "loner" fashion he managed to convey something disturbing to voters that ultimately cost him votes and the very freedom of action he had wished to acquire.

* * *

In particular, Mr. Carter now needs Congress more than Congress needs him. That is being a little blunt and stark about it, but the basic relationship will run that way. A striking feature of this election, after all, was that the Democrats did better than had been expected in reinforcing their control of both houses of Congress, even as he was barely squeaking into office. The projects Mr. Carter has identified as his priority business, such as tax reform and thoroughgoing reorganization of the federal government, by their very nature touch deeply held congressional convictions and interests. He will not be able to make them party business unless he has first made himself plausible as a party man. We are recommending nothing sleazy or narrowly partisan by this. We are merely noting that Mr. Carter will be unable to succeed at all unless he makes his congressional party his partner in working out his program.

This should not be so much a chore as an opportunity, even a blessing, for Mr. Carter. People voted for Mr. Carter because they wanted a change. He has been elected with a very modest majority of the vote but with extraordinary advantages. One is the widespread feeling that the nation has reached the end of one era and is embarking on another: Mr. Carter is in a very strong position to become the embodiment of the nation's new hopes. Another is that he does enjoy the possibility at least of being helped by like-minded party colleagues in Congress and in local offices around the country. He also has available (to his own great credit) the advice and services of Walter Mondale as his vice-president, who begins with a large understanding of the workings of Congress and a great deal of goodwill and respect. So Mr. Carter has the potential for great success. We wish him well.

From The New York Times

The Carter victory signifies more than the return of a Democrat to the White House. The view from the Oval Office today differs sharply from the view that Lyndon Johnson, its last Democratic occupant, enjoyed in 1968. The challenge of the presidency has been stripped of the simplistic grandeur with which John F. Kennedy endowed it for one shining but ultimately deceptive moment.

The United States today is wiser, but not necessarily sadder, than it was when President Kennedy asked that "the word go forth . . . that the torch has been passed to a new generation of Americans." The people no longer thrill unquestioningly to any blanket pledge to "pay any price . . . to assure the survival and success of liberty."

The foreign ordeal of Vietnam has made Americans more skeptical of cosmic promises: the domestic shame of Watergate has made them more skeptical of their leaders. This may well be why Carter's muted oratory may have proved an asset. The search today is for a leadership that calls not for heroic gestures or lone but haughty decisions, but for progressive policies that can be understood by the public.

* * *

Much has happened to prepare the ground for such policies. The public revulsion against the politics of deceit at home and abroad has given Carter a clear mandate to make the American people once again the confidants of their elected leaders. Dissatisfaction with President Ford's rule-by-veto method points to the need for a more rational relationship between the president and Congress, a relationship that ought to be more easily attainable between a Democratic president and a Congress with a Democratic majority.

Thanks to President Nixon's initiatives, détente has replaced the cold war and old myths have given way to a new realism in this country's relations with the People's Republic of China. The lessons so painfully learned in Southeast Asia have led to the greater wisdom of harnessing the U.S. role as a superpower to the task of peacemaker and mediator, in the Middle East and more recently in Africa.

* * *

Building on the priceless advantage of assuming office in the absence of war, Carter will begin his term with what may be the last best chance to reduce the threat of Armageddon, or even of lesser conflagrations, by bringing the arms race under control and halting the intolerable nuclear proliferation.

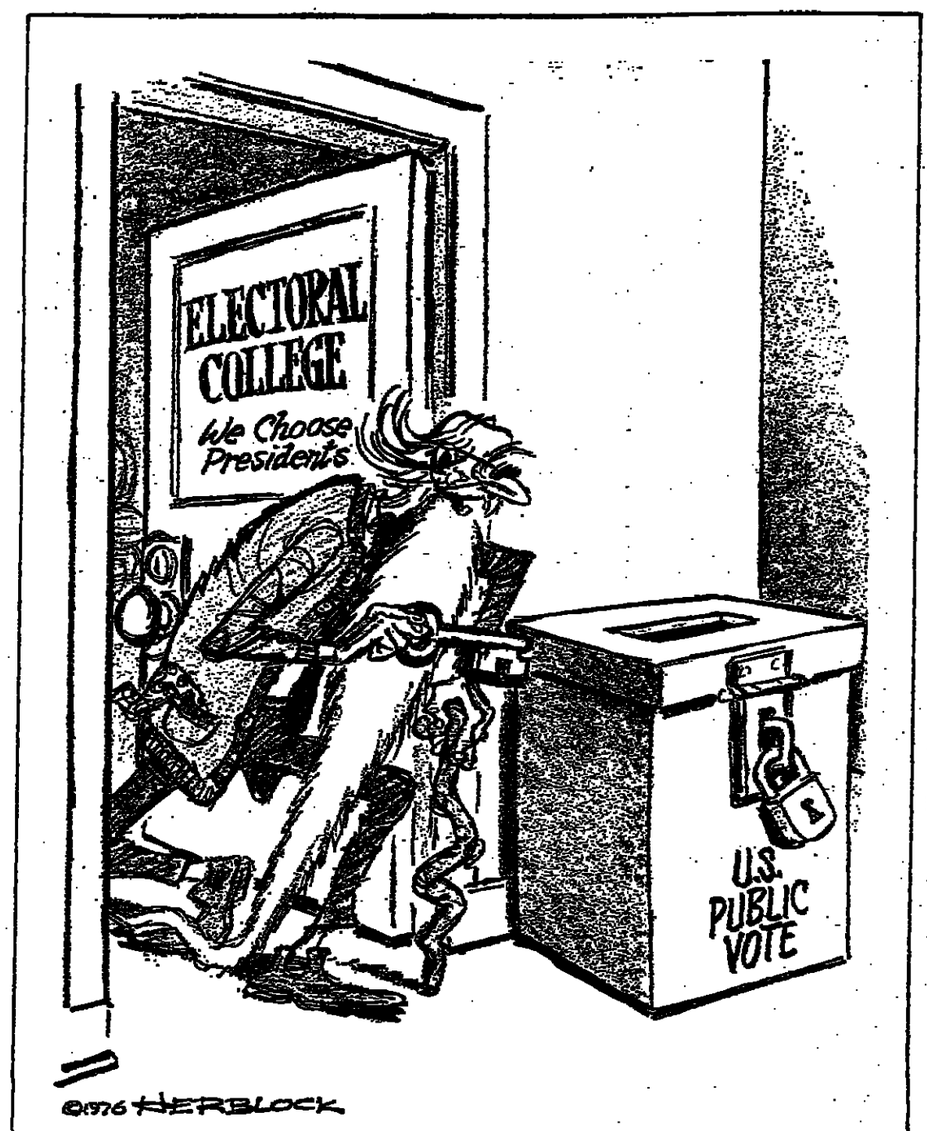
The most auspicious note in Carter's campaign was his emphasis on the indivisibility of U.S. credibility abroad and the creation of an economically sound and socially just society at home. Here, too, the ground has been prepared for new strategies of progress. Lyndon Johnson's bold civil rights policies cleared the road for victory of a candidate from Georgia, with the aid of a newly confident black electorate; Johnson's faith in governmental policies on behalf of the poor, though tragically undermined by the Vietnam adventure, nevertheless showed the way to a dynamic rather than a static federal role.

Carter can safely assume that the American people understand the need for an effective partnership between the private and the public sector in the creation of a well-educated, healthy, productive nation.

On the whole, the campaign that led to Carter's victory was conducted by the opponents with moderation and mutual respect. This should make it easier for Carter to make good on his promise to bind up the nation's wounds and to shore up the cause of freedom abroad by making democracy safe and strong in the United States.

In the International Edition

Seventy-Five Years Ago



November 5, 1901

NEW YORK.—The New York Herald, in an editorial today, said: "We must have a fleet proportionate to our influence as a peace-loving world Power and adequate to the protection of our interests at home and abroad. This first line of defense demands many accessories, such as public money, navy yards, dry docks, workshops, technical plants and schools. All this is needed it is true, but it is by far the cheapest insurance for our security."

Fifty Years Ago

November 5, 1926

CLEVELAND.—Annie Oakley, whose feats of marksmanship have probably stirred the imagination of small boys as much if not more than the imaginary exploits of William Tell, died yesterday at the age of 66 at the home of relatives in Greenville, Ohio. She gained fame for her accuracy with guns at an early age and toured for 17 years with Buffalo Bill Cody's Wild West Show. An era has passed.

'Now to Go Through the Suggestion Box.'

Why It Was So Close

By Joseph Kraft

WASHINGTON.—With most men about to become president, the great hope is that they will grow in the job. With Jimmy Carter, the hope has to be that he will shrink.

For Mr. Carter cherishes aspirations in tension with the true range of national choices. He practices a self-reliance at odds with effective management of any great enterprise. Which is why he blew a big lead against a weak opponent and emerged with only a narrow and highly regional victory at the polls on Tuesday.

Carter's special character as a political leader finds expression in two superficial phenomena. One, much noted, is the inclination to work with an extraordinarily small group of loyal aides. Carter achieved the takeover of the Democratic party with a mere handful of close associates. He ran his presidential campaign with the same tiny cohort, largely ignoring insistent pleas of other Democrats who panted to help.

Opposites

A second characteristic has been less noted and is harder to describe. Carter has a cast of mind that lacks what is called structure. He tends toward the marriage of opposites, toward the nonrecognition of what most people consider either/or choices.

Thus he favors stimulating the economy—but in the accents of fiscal conservatism. He wants new jobs in the private sector but castigates fat-cat companies. He talks about being tough on the Russians, but does not mention the one thing to be most tough about—the Soviet military buildup.

The charitable explanation for these characteristics—and the one I tend to believe—lies in Carter's singular aspirations. He will be the first truly Christian president we have had since Woodrow Wilson. He believes in the betterment of man and his institutions.

From this faith he derives enormous confidence in his own star. He can speak—as he did in the touching statement he made in Atlanta after his victory in the Electoral College was confirmed—of "my courage" and "my strength." He can believe, as his close friend, the Atlanta lawyer Charles Kirbo, told me not long ago, that "all problems are soluble." He can also feel that he can carry the country with a small group of aides, and that he is exempt—by some special grace—from the either/or choices that most men have to make.

But that charitable view of Carter is not accepted in the country at large. His political opponents find in him an itch for power and a strain of deceit which they liken to the qualities of Richard Nixon. Many of his supporters believe that Carter has been cagey, straddling issues and avoiding personal commitments for politic reasons.

The enormous strength of those skeptical views found expression in the election returns. Carter and his small band were not able to mesh effectively with the regulars of the Democratic party. Many voters believed that he was conning them on the issues and thus subordinated the truly important matter of economic performance to the lesser question of personal trust.

Mondale Vote

As a result, Carter blew one of the biggest leads in political history. He won a highly regional victory, carrying the solid South and only a few Northern states by tiny margins. The decisive edge was Wisconsin, where the vice-presidential candidate, Fritz Mondale from neighboring Minnesota, almost certainly counted more than Carter himself.

Probably not a single Democratic senator or congressman owes election to Carter. Nor can it be said that Carter beat a formidable opponent in Mr. Ford. On the contrary—especially given the evidence of enduring doubts about the Nixon pardon—Ford was a feeble candidate.

So the lesson of this election is not in doubt. If Carter wants to realize his most noble aspirations, if he wants to be a national not a regional leader, if he wants to do a better job of running the country than he did of running his campaign, then he will first have to position himself squarely on the issues—especially on the issue of stimulating the economy. He will then have to merge himself and his little band of aides with the vast army of people in the Democratic party who have a genuine talent for the public service. Indeed, how Carter mobilizes that army in the next few weeks will probably determine the whole character of his presidency.

Letters

Rhodesia Talks

In terms of pure logic, white Rhodesian claims to sovereignty are as valid as those of other governments where free elections are never held.

But beyond the moral sphinx menacing the Geneva conference and the territory itself, another equation appears to emerge: an opportunity for those concerned to exploit judiciously Ian Smith's well-known iron will and strength of character—admired even by some of his critics—to go forward together for the common benefit of all the people living in the area. An era of peace and prosperity may yet be in the offing for Southern Africa.

With 'Amazing Grace'

By Anthony Lewis

BOSTON.—When Jimmy Carter flew home from California on election eve, someone had installed a small electric organ in the chartered plane. During that last long campaign night two young men sat down together at the keyboard: Hugh Carter jr., a businessman cousin from Plains, Ga., and Ben Brown, leader of the Black Caucus in the Georgia legislature. People gathered around to sing—reporters, campaign staff and, after a while, the candidate. They sang "Amazing Grace" and "Oklahoma" and "The Battle Hymn of the Republic," old songs that everyone knew. They also sang "We Shall Overcome" and "Blowin' in the Wind," songs of the civil rights movement; and when they did, feelings ran deep.

Black and white together: that has been the special characteristic of the Carter campaign, and it turns out to be the single most interesting fact about the election results. Carter depended overwhelmingly, for his victory, on black votes in the North and black and white in the South. He carried every one of the 11 states of the old Confederacy except Virginia, and his vote in Northern black precincts ran as high as 90 per cent.

Historic Symbolism

There is always a danger of over-romanticizing such things, but the historic symbolism of this election is extremely powerful. The first Southerner elected president in more than a century, and he owes it to the civil rights movement. The historians who said long ago that the South itself would eventually have to heal the wounds of the Civil War are being confirmed in their view.

The other immediately visible symbolic point about this election is that it marks the end of the Nixon era in U.S. politics. Gerald Ford is far from Richard Nixon in his nature; his gracious reaction to defeat says enough about that. But he did keep on many of the Nixon men, and continue the Nixon policies. And his pardon of the fallen president made the association of the two men inescapable.

The Southern strategy that Nixon so shrewdly followed, planning to remake the political landscape, has been at the least deflected. Southern whites, instead of linking with the increasingly conservative Northern middle class, have rejoined the liberal coalition. The biggest loser on Tuesday, in terms of the future, may have been that spokesman of the reactionary South, John Connally.

Jimmy Carter's Victor... They Wanted a Chang...

By David S. Broder

WASHINGTON—In the end, Jerry Ford's closing drive fell just short, and Jimmy Carter squeaked through to the victory most people had awarded him back in July—or even April. The country was ready for a change, and decided—however closely—to opt for that change, despite its misgivings about Carter.

The Democrats renewed their strong grip on Congress, making an even swap of Senate seats with the Republicans and cementing into their House majority, probably on a long-term basis, the gains they had made in the Watergate election of 1974.

The majority party now bears full responsibility for the course of national affairs for the next four years—controlling both branches of the federal government, three-fourths of the states and virtually all the major cities.

A Relief

That fixing of responsibility is a relief to those who have known that, in Washington at least, it's been hard to talk realistically of a "government" for the past four years. In truth, there was no set of officials with sufficient combined leverage and shared aspirations to move effectively against the inertial forces of bureaucracy, special interest and public lethargy.

Carter has that opportunity, but only if he is skillful in his exercise of leadership. He won the election as closely as John Kennedy won his. The danger would be if he mistook the voters' message and tried to govern in the style of Lyndon Johnson after his landslide.

He is not likely to make that error if he consults the election returns. While Carter can honestly claim to have won the Democratic nomination on his own—with the brilliantly conceived, high-risk strategy he concocted with his young advisers in Atlanta—he coattailed his way to election on the strength of his party.

The same established politicians, Washington officials and interest groups that were the targets of his scorn during the primaries provided the push that carried him—barely—across the finish line.

Shortsighted

It would be as shortsighted for Carter to ignore their contribution as it would have been for them to try to deny him his due in Madison Square Garden last July.

But Carter, for all his sensitivity to the public mood, not demonstrate in the ge election campaign the capacit will need as President to org the diverse elements of Democratic party into an effe governing coalition.

He was slow in reaching for the help of those lea yet, it is as obvious as any can be that he can gover the next four years only by willing acquiescence. And spells a greater role for the the strategies of the C administration than they given in the Carter campai

As for the Republicans, grief can be tempered. G Ford clearly will be remem now for the signal contrib he made in his inherited offi restoring a sense of dec openness and human appe a badly sullied White E Even had he been elected, unlikely he could have perfo any greater service for country.

Despite the fact that Ri licans lost the one office has given their minority a sense of influence in na affairs; there is little reaso concern about the survival o GOP.

In many respects, the p from the responsibilities of ernment can be a healthy for the Republicans. They overdue for a change of se tions in their national leade Gerald Ford was the last o World War II veterans to r the top. He was also, in likelihood, the last man perso linked to Richard Nixon tha Republicans will nominate president.

New Leadership

The GOP now has an o tunity to seek new leade among its younger figures. T are many able men in Con who, freed from the respons of defending an administr with which they often disa may now speak their thoughts more freely.

There was an infusion of conservative voices to the S from the West, and there new progressive Republican ernors like Jim Thompso Illinois and Pete duPont Delaware, joining such vet holdovers as Bill Milliker Michigan, Bob Ray of Iowa Otis Bowen of Indiana.

The Republicans will rise —just as surely as the Sout last Tuesday.

...Expert I...

At the very end of this campaign, too, there was what looked like a little touch of Nixon tactics in the night. That was the curious episode of the Plains Baptist church.

Not a Baptist

A black man who is not a Baptist, who does not live in Plains and who had connections to the John Birch Society applied for membership in Carter's church just before the election. The deacons rejected him, and with suspicious instancy the black division of the President Ford Committee sent out critical telegrams. The origins of the episode may never be known, but it is good for the country's political peace that we are not left wondering whether a last-minute Nixonian trick affected the result.

Election night was drainingly uncertain. But in an important sense the closeness of the result may have been a blessing for the country and even for Carter. He could well be subject to that most dangerous political failing, hubris. We have had two landslides in this country lately, in 1964 and 1972, and we know too well how they may distort the winner's judgment. Carter will have a long time now to think about what it was that made his campaign run downhill, costing most of his lead. One hopes that Carter will follow the Churchill formula—"In victory, magnanimity"—and will look inside himself instead of blaming others. He has time to outgrow the brittleness, the short temper, the stridency that were evidently sensed by many voters.

Actually, the result was not quite so close as it seemed. Or, more accurately, the frequent pattern of close popular vote but easier Electoral College victory was broken this time by a torting factor.

Eugene McCarthy cost C the electoral votes of at three states, possibly four. Cr had a popular margin more 1 15 times the 120,000 by w John Kennedy edged out. Richa Nixon in 1960, but he had struggle to get near the Kenn electoral total of 303.

McCarthy's Role

It will be one of the spe blessings of the 1976 electio it marks the end of Eug McCarthy's presence in U.S. itics. He played a great rol 1968, but he has since becom spoiled child who yearns liter to be a spoiler. Again, in terms the country's political pe imagine the feelings of milli today if he had succeeded frustrating the popular will.

After the tension of the l night, there was a special w der in the simplicity of Ger Ford's concession. In this en mous country, with all its po and passion, political leaders can pass so gently. When M Ford read for her husba "Dear Jimmy . . . may God bl you," there was a deep poignan —as there was when Jim Carter, thinking he might lo sang "We Shall Overcome."

The International Herald Tribune welcomes letters from readers. Short letters have a better chance of being published. All letters are subject to condensation for space reasons. Anonymous letters will not be considered for publication. Writers may request that their letters be signed, only with initials, but preference will be given to those fully signed and bearing the writer's complete address.

She is greeted by ...al officials, who hope she ...nate enough money to ... economic prosperity. She ...on one condition. In ex- ...for her charity, she de- ...the murder of the man ...duced and abandoned her ... youth. The citizens are ...d by this barbaric re- ...But the seeds of greed ...een sown and, slowly, the ...d crime is rationalized ... community necessity. ...victim is hunted down and ...The world made me into ...bre," the sinister Lady ...ful proclaims. "Now I ...the world into a brothel." ...s 1950s, less than a decade ... World War II, the Dür- ...t fairy-tale-for-grownups ...stress on collective guilt ...battle-scarred background ...entified with the horrors ...t by Nazi domination in ...y and elsewhere. Today ...nge of its finger-pointing ...e broader, but, as revived ... Théâtre de la Ville, it ...ed theatrically.

During the last 15 years, the theater of the absurd has introduced a system of quicker communication. Contrasted to this rapid telegraphic code, the dramaturgy of "La Visite" takes on the air of a long letter delivered tardily by hand. The frightful, the ghastly are more effectively revealed in sudden flashes. The Dürrenmatt piece moves at the pace of a funeral procession, even a bit arthritically. All of its secrets and most of its surprises are out before it has reached the halfway mark, and afterward its attempts to sustain suspense become winded and repetitious.

Dürrenmatt has embroidered the public conscience struggle with several incidents executed with high skill. The exposition of the growing dread of the doomed man is strikingly handled. But the hold of the brooding tragedy is weakened by its sluggish development and overextension.

The role of the old lady is irresistible to any actress and one suspects that this is the cause of the revival. Edwige Feuillère plays it with strict command, glamorous presence and a consummate stylization of its grotesque black comedy. Her mastery of the silken nuance is so complete that one wishes she had a play of larger dimension in which to exercise her art.

Director Jean Mercure might have pruned the script and accelerated the pace. But, as an actor, he scores as the quarry of the millionairess. All the character acting—the company includes Michel de Ré, Paul Le Person and Jandeline—is blue-ribbon. The scenography of Radu and Miruna Boruzescu, representing the gingerbread Gothic town in eerie lighting—as though Kafka had rewritten "The Toymaker of Nuremberg"—is an ingenious asset, sounding the exact chord of the revenge melodrama's obbligato. The lavish production, however, fails to disguise the fact that time has staled the text.

* * *

"Il Campiello," directed by Giorgio Strehler and performed by the Milan Piccolo Teatro in Italian, is at the Odéon. Here is a happy instance of the right man in the right place, Strehler being to Goldoni what Paderewski was to Chopin: the perfect interpreter.

"This is one of those pieces which we should call popular or low," wrote Goldoni of this comedy composed in dialect and blank verse. "This 'Campiello,' which is the place of the scene, and is never changed, is surrounded by little houses, inhabited by the lower orders, where gaming, and dancing, and hubbub occur. Sometimes it is the resort of gaiety and sometimes of disputes. The whole was taken from the orders, but the truth of the picture was recognized by everyone; for I had accustomed my spectators to prefer simplicity to tinsel."

Strehler, like the dramatist, prefers the plain to the fancy and his presentation is mercifully free of any affectation. He has not sought to "refine" the robust comedy—rather he has sagaciously given it its head. Nor has he followed the death-dealing practice of staging it in chocolate-box tableaux to stress its quaintness and so transforming it into costume parade.

Instead he swings open the gates to 18th-century Venetian street life. There it is suddenly before us: the disputing housewives, the prankish boys, the pedlars crying their wares, the lottery spiels, the travelers mystified by the local language and love trying to find its way. With vigorous theatricality, the play discloses a magnificent portrait of a milieu vibrant with color, movement and shrewd observation and charged with a good-natured humor that is irresistible. The performance is the perfection of ensemble acting.

The grace notes, too, have their charm with the shifting of the season to wintertime for snowball battles. Micaela Esdra's Gasparina is throughout entrancing, but her last moment is her best when, with a wistful smile, she recites her farewell to Il Campiello, which some may think ugly and others beautiful, but which to her will always be lovely because beauty, say what you will, is what pleases. The evening at the Odéon is one of the season's most rewarding.

* * *

Tonight the Comédie-Française reopened the Salle Richelieu, closed since 1974 for restorations, with a preview of a new production of Alfred de Musset's "Lorenzaccio," directed by Franco Zeffirelli and starring Claude Rich and Geneviève Casile. The proceeds will go to the European Organization for Research on Treatment of Cancer. The "official" first night of the production takes place Tuesday.

Edwige Feuillère and Jean Martin in scene from Dürrenmatt play.

OPERA IN LONDON

'Bomarzo' Flops as Spine-Chiller

By Henry Pleasants

LONDON, Nov. 4 (IHT).—Alberto Ginastera's "Bomarzo" was thought to be a bit of a scandal when it was first produced by the Washington Opera Society in 1967 and subsequently by the City Center Opera in New York. At the Coliseum last night, where it was given its first English production by the New Opera Company in association with the English National Opera, it was found by audience and critics alike to be a bit of a bore.

Not that producer Anthony Besch, designer John Stoddart and choreographer Jack Carter haven't done their best, including an erotic ballet which, if it was as naked as it appeared to be from the dress circle, must have topped—or untopped, and unbottomed, too—the American productions by a considerable margin, and may have been calculated to give "Oh! Calcutta" and "Carte Blanche" a run for their money. That's part of the trouble. As an old axiom has it, when anything goes, nothing matters.

A more important part of the trouble is the dramaturgy. Ginastera's librettist, Manuel Mujica-Lainez, was inspired by the grotesque statuary in the 16th-century garden of Pier Francesco Orsini, Duke of Bomarzo, near Viterbo, to picture its creator, in 15 episodes, as a depraved hunchback seeking immortality by preserving in stone the symbols of a monstrous life.

What he has achieved, however, is a character more pitiful than monstrous, with the result that Ginastera's elaborate, complex, difficult and skillful score has the curious effect of seeming to flatter the dramatic substance. For all the preoccupation with astrology, necrophilia, necromancy, deformity, homicide, sexual impotence and deviation and for all the explicitness of Ginastera's orchestral wizardry and an enormously elaborate production, it's all about as horrific and spine-chilling as "Rebecca of Sunnybrook Farm." Imagine a Hitchcock period piece without Hitchcock—or, for that matter, without Bernard Herrmann who, in "Psycho," achieved more tension with strings alone than Ginastera with all his massive and varied apparatus.

An excellent, if not accident-free, performance was dominated by Graham Clark, of the Scottish National Opera, in the hideously exacting role of the Duke, and by the English National Opera Orchestra under the knowing guidance of the New Opera's musical director, Leon Lovett. "Bomarzo" will be repeated on Nov. 6, 11 and 18.

SHARPS & FLATS

Harry Belafonte, continuing his European tour, is in Zurich Nov. 5 at the Kongreshaus; in Amsterdam, Nov. 8 at the Carré Theater; the following night in Brussels at the Palais des Beaux-Arts and in Paris Nov. 11, 13 and 14 at the Théâtre des Champs-Elysées (two shows on Nov. 13).

* * *

Peter Frampton and Gary Wright will be in Brussels Nov. 6 at the Forest National at 8 p.m. and then in Paris Nov. 8 at the Pavillon de Paris, also at 8 p.m.

* * *

PARIS—Dr. Feelgood will be at the Pavillon de Paris Nov. 6 at 8 p.m. George Chakiris headlines the Salle Pleyel Nov 10, 11 and 12. Milt Buckner and Sam Woodyard are featured nightly at the Hotel Méridien.

* * *

MUNICH—The Dubliners will be at the Circus-Krone-Bau Nov. 6 at 8 p.m. The Carpenters come into the Deutsche Museum Nov. 10 at 8 p.m. Charles Aznavour is there the following evening.

* * *

The Golden Gate Quartet, touring West Germany, will be in Witten Nov. 5 at the Theatersaal; in Bielefeld-Sennestadt Nov. 6 at the Ehrenberg Gymnasium; in Hamburg Nov. 7 at the Musikhalle; in Bremerhaven Nov. 8 at the Stadttheater; in Bremen Nov. 9 at the Glocke and in Herne Nov. 10 at the Kulturzentrum.

* * *

AMSTERDAM—Juliet Prowse will be the featured attraction at the Carré Theater on Nov. 7.

* * *

British blues singer Beryl Bryden will be in Bonn Nov. 5 at the Bundes Pressball with the Hot Dogs; in Munich the following night at the Löwenbräukeller; in Zurich Nov. 8 at the Novapark Hotel with the Old Timers from Poland; in Basel Nov. 10 and 11 at the Atlantis with the Piccadilly Six and in Biel, Switzerland, Nov. 12 and 13 at the jazz festival with the Swiss Dixie Stompers.

* * *

LONDON—Rahsaan Roland Kirk is featured nightly at Ronnie Scott's.

* * *

COPENHAGEN—Vera Love will be appearing at the Music Hall Prater through the month of November.

* * *

This week's top single in the United States is "Rock'n Me" by Steve Miller and in Britain, "If You Leave Me Now" by Chicago.

Merovingian Tombs

STRASBOURG, Nov. 4 (UPI).—Archaeologists found a cemetery estimated to date from the late Merovingian period (mid-5th to 6th century) near here. Thirteen tombs have been discovered so far, including one of a woman covered with rich jewels.

Passionflowers and the Illiterate

Waverley Root

...STHING like two years ago, ...found myself in the office ...mond Jean-Marie Bory, ... of what is perhaps the ...famous food store in the ... Fauchon of Paris. The ...idea struck him of having ...p, for my delectation, some ...e innovations which his ...shment was then sponsor- ...Among them was a sherbet ...icate and delectable flavor. ...at in the world is this?" ...ed. "Passionflower," said ... and went on to predict ...s juice might well become ...urth most popular in the ... after the present leaders, ..., grapefruit and pineapple. ...comparison with it, orange, ...ruit and pineapple are ... not to say coarse; but in ...eriod of gastronomic illit- ...where is the public for ...ty?

...e is the only form in which ...on-tropical world knows the ...n fruit: The fresh fruit is ...arishable to travel. ... passionflower acquired its ... in the 17th century when ...anonymous observer gifted ... certain amount of imagi- ...saw in it a representation ...Passion of Christ. Once ...lea was implanted, it must ...been elaborated upon by ... for so far as I know there ... single member of the genus Passiflora, which includes more than 400 species (the "Encyclopaedia Britannica"), or several hundred species (the "Grand Larousse Encyclopédique"), or 300 species (the "Practical Encyclopedia of Gardening") which incorporates all the features which have been associated with the Crucifixion.

The flower as a whole, when it is of an appropriate color, is held to suggest the wound in Christ's side, and the pointed leaves (which are not the same shape in all passionflowers) the lance which made it. The filaments of the corona picture the crown of thorns, the three styles of the pistils the nails, and the stamens the hammers used to drive them in. A slight difficulty arose when it was attempted to make the petals and stamens represent the disciples. There were 12 disciples, but the five petals and five stamens refused to add up to more than 10. There was no trouble about eliminating one of the superfluous persons, Judas, but getting rid of another posed a problem. It was resolved by ruling out Peter, who had indeed denied Jesus. He made up for it later, but the passionflower has never forgiven him.

The United States has about 10 native passionflowers; for instance, the passion vine, alias the maypop, which grows in the South, and the yellow passionflower, but they are less desirable as food or juice than those which grow farther south, in the West Indies and Latin America. These are apt to be called granadillas, a name given them by the first Spanish discoverers, which means "little pomegranate." Pomegranate is understandable enough, since the granadilla, like the pomegranate, is tightly packed with seeds, so inextricably imbedded in the pulp that the fruit, when eaten fresh, is downed seeds and all.

Misnomer

"Little" seems something of a misnomer, for the most widely cultivated granadilla is 10 inches long, a husky fruit from the point of view of a pomegranate. We may surmise that this was not the first granadilla the Spaniards encountered. They probably first met, and bestowed the name of granadilla on what Bernal Diaz, when he accompanied Cortes in Mexico, called "the local grape" —*Passiflora caerulea*, whose fruit is only the size of a large bay. Today's favorite species is called with justification the giant granadilla, and is the one most exploited because it travels better than the others, which is not saying much. That it is not the most interesting in flavor might be suspected from the fact that on its own territory it is sometimes boiled and eaten as a vegetable, a treatment which would seem horrifying if applied to the purple granadilla, which has been tagged as the tastiest of all passion fruits by the taxonomists who named it *Passiflora edulis*.

A circumstance which militates against the commercial exploitation of the passionflower in the United States is its name. Not many Americans, even Catholic Americans, think of the word "passion" primarily in its religious sense. They are more apt to interpret the name as marking an aphrodisiac, which might not do its sales any harm if it were being offered to adults, but the only present use of the passion fruit in the United States known to me is in a drink of mixed fruit juices, including passionflower juice, which is being promoted as a healthy beverage for children. Its makers are living in fear of more drastic labeling regulations which would oblige them to name the components of their product. Of the four variants of this drink at present on the market, two are labeled "10 per cent fruit juice," one is labeled "11 per cent fruit juice," and the fourth "not less than 11 per cent fruit juice"—Kinds of juice not identified. What will happen if a change in the law obliges the company to name its juices? Would they rebaptize it "barbadine." Its alternative name in the West Indies? Or would they just leave it out altogether?

...ildren's 'Night Terrors'— The Expert Interpretations

By Richard Flaste

...Y YORK (NYT).—A child ...ho had been sleeping peace- ...just moments before sits ...t up in bed and shrieks ...inconsolable. Soon the cry- ...ubsides, and the child goes ...to sleep. The "night ter- ...have ended.

...p researchers in recent ...have been learning a good ...about the content of chil- ...dreams and nightmares. ...of those researchers, Dr. ...Foulkes, a psychologist at ...niversity of Wyoming, said, ...y experience parents have ...ed view of kids' dreaming. ...ost striking finding of the ...ch is just how ordinary the ...s really are, rarely fright- ...and fantastic."

...said that children of 3 or 4 ...l to dream about family ...s although often the ...ing was in terms of animal ...ism. "It's clear," he said, ...nimals are relating to each ...as the family would."

...reason for the symbolism, ...oulkes speculates, could be ...dults so often tell children ..., about animals. But it's ...e children's own language, ...way of seeing themselves as ...l-like, small and dependent. ...ir minds, Dr. Foulkes said, ...'s not yet a clear divid- ...e between animal and hu- ...

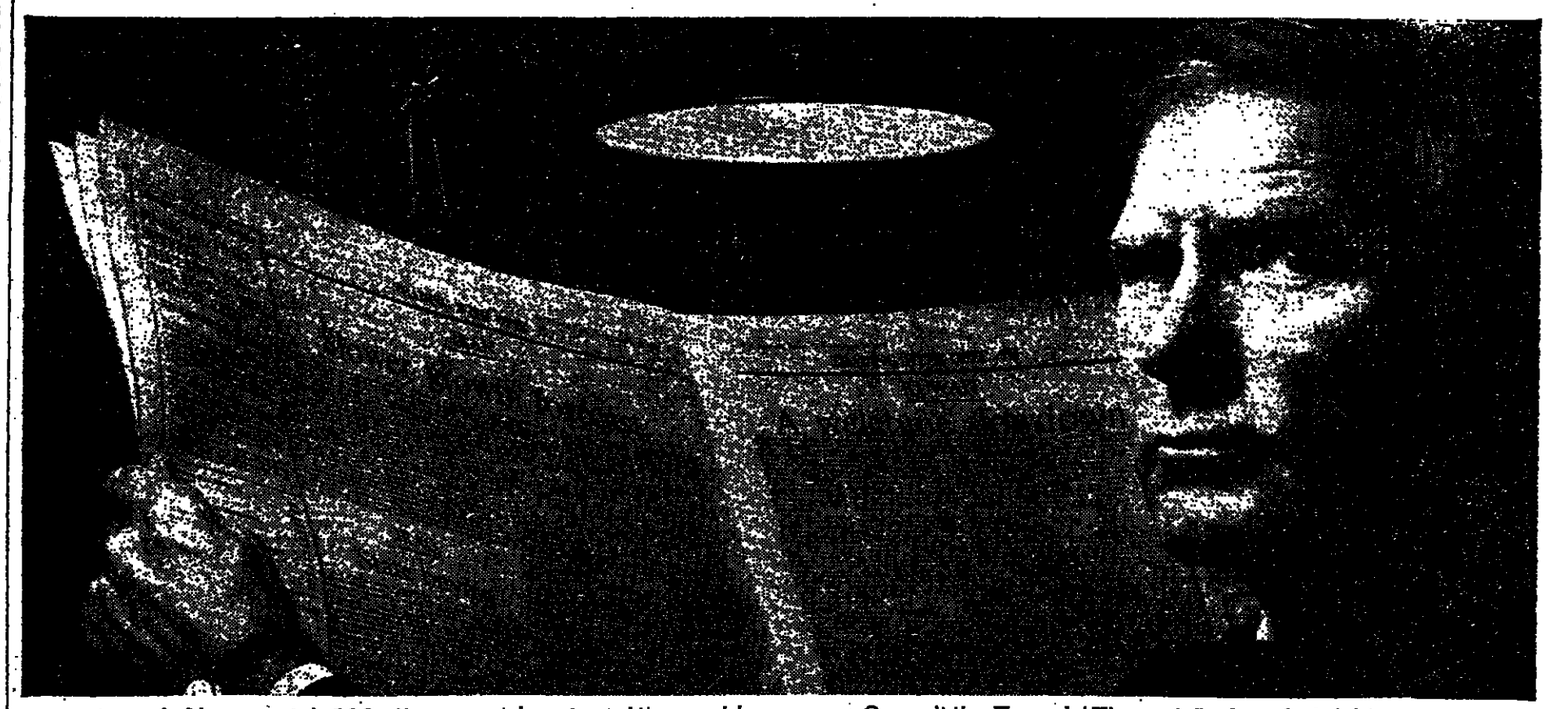
...le the preponderance of ...ing might involve ordinary ...nships with families and ...s, children undeniably do ... nightmares. And some- ...they have what appear to ...htmares but are not. Those ...ing "night terrors," for ...ce, are evidently unrelated ...l dreams.

...searchers can tell when a ... (or an adult) is dreaming ...s the child moves into one ...e cyclical periods of sleep ...d by rapid eye movements ...h the closed lids.

... the night terrors almost ... happen during dreaming ...s. So what causes them?

... don't know exactly," said ...Christian Guilleminault, a ...atrist who is associate di- ...of the Sleep Disorders ...at Stanford University. "But in children, it's fairly normal and happens mostly when a child is slightly more fatigued, usually during the first part of the night, and there's no remembrance of it in the morning." Children generally outgrow it, he said.

Then there are the problems that seem to emerge during a half-sleep, when a child is 3 or 4 and hearing noises in the dark—"It's more like imaginings than a dream," Dr. Guilleminault said.



He said that genuine nightmares, sometimes called anxiety dreams, happen "particularly if something frightening has occurred just before sleep or they've heard something they don't fully understand that they interpret in ways that leave them anxious during wakefulness and this continues into the sleep."

When such anxiety dreams regularly take place, Dr. Guilleminault sees them as an indication that there may be something wrong in the family.

He tells, for instance, of the woman who was terrified that her daughter would stop breathing in the night. She kept checking on the girl, "opening the door, closing the door, and the anxiety of the mother was so obvious that the child felt it and became anxious, too. She began to dream that she was being pushed under a pillow and killed and taken away night after night, until by 4 1/2 she refused to go to sleep."

LARGE CHAIN OF HOTELS
in one of the most agreeable areas of the Middle East
REQUIRES Highly qualified & experienced
GENERAL MANAGER
to be fully in charge of all aspects of hotel operations & implementation of corporate policy and plans.
Qualifications:
High professional standing & considerable hotel management experience both at home & abroad.
Salary:
To be negotiated, dependent upon successful candidate's past experience & success.
Excellent fringe benefits & living conditions assured.
Box D-5,533, Herald Tribune, Paris.

BUSINESS CONSULTANCY REVEALS ARAB OIL PLANS TO NORWEGIAN FISHERMAN

In Norway, as in 120 other countries around the world, a great many executives monitor significant market movements affecting their business by referring to the Financial Times every working day. It's not merely their business newspaper but their business consultant too.

These are the executives whose decisions may make or break a company. These are the readers who look to the Financial Times to publish the best business information available. Concisely, factually and with unbiased comment. And, moreover, it provides, editorially, 32%* more international political, economic and commercial information than any other English-language daily newspaper printed in Europe.

It takes an exceptional network of international correspondents to maintain this volume and quality of reporting. But that is what strategy-planning businessmen throughout the world expect of the Financial Times. And that is what they get. Plus foresight and insight of course. Hindsight we leave to the historians.

Consult the Financial Times daily, for a fortnight, free of charge.

We invite you to consult, assess and judge the Financial Times personally. Without charge. Without obligation. Just complete the coupon below and put the Financial Times to work.

*Content analysis of five newspapers. Research Services International. August 1976.

FINANCIAL TIMES
Your European Business Consultancy

Send to: The Circulation Manager, Financial Times, Bracken House, 10 Cannon Street, London EC4P 4BY. Telephone 01-248 8000.
Please send me the Financial Times for two weeks free of charge.

affected because most of its exports are through DISCs, sources at GATT said.

About 70 per cent of U.S. exports were through DISCs last year, the source said, quoting a statement earlier this year by President Gerald Ford.

In relative terms, the panels' conclusion that certain income tax breaks in the three European countries amounted to subsidies is not as serious, the sources said. Some of these tax breaks have been in effect for a long time, "more than 70 years in one case," one source said.

The conclusion of the four panels is expected to be discussed by the GATT council when it meets next on Nov. 12.

The council is not expected to take any action then, however. "A certain amount of horse-trading is a definite possibility," one source at the trade body said. The issue could also make its way into the Tokyo round of world trade talks, or the multilateral trade negotiations, other sources said.

U.S. Plans Study

In Washington, U.S. international trade negotiator Frederick Dent said the United States will study the GATT findings.

Mr. Dent said the government could not comment immediately on the charges "because we haven't yet seen the specific arguments" of the GATT panel.

Previously the United States has taken the position that it is willing to negotiate the removal of DISC export tax incentives. However, this hinges on the willingness of other nations to join with the United States in the world trade negotiations in Geneva to adopt a new set of rules limiting the use of export subsidies by all countries.

The DISC program has been in the U.S. tax system for a number of years. It would be up to Congress to eliminate the system, under which U.S. corporations, by setting up DISC affiliates, may defer payment of U.S. income taxes on part of their export earnings.

President-elect Jimmy Carter has indicated that he opposes the DISC program and it is widely expected he will urge Congress to repeal it.

As Pace of Recovery Falters

Joint Action Needed on Ailing Economies

By Hobart Rowen

WASHINGTON, Nov. 4 (WP).—With the election out of the way, the time has come for the United States to join forces with other major nations to tackle international economic problems of overwhelming importance.

The most immediate of these, of course, is the slide in the British pound, the Italian lira and, to a lesser extent, the French franc, tell-tale symbols of pervasive economic malaise in those countries.

Specific action, in the form of international rescue packages, will be taken soon on behalf of Britain and Italy through International Monetary Fund loans. In reality, the United States, West Germany and Japan will be financing these loans with advances to the IMF totaling about $5 billion.

France, whose troubles have been relegated to the back pages by the more dramatic happenings in Britain and Italy, for the moment has adequate resources of its own. The French government has taken a series of measures to cut inflation and stimulate exports. But the situation in France is an object lesson in how quickly the economic tides can shift in what a State Department official calls "a volatile and parlous" environment.

As serious as is the problem in the weakening economies of Britain, Italy and France, a fact of perhaps even greater significance is that the pace of economic recovery in the three largest free world economies—the United States, West Germany and Japan—is slowing down.

Real gross national product in the United States increased only about 4 per cent in the second and third quarters, after a 9-per-cent rate in the first quarter. In Germany the slide over the same period was from about 6.5 per cent to 3 per cent and in Japan the gain plunged from 18 per cent to 4 per cent, according to statistics compiled by Morgan Guaranty Trust Co.

To some extent, the easing of the pace of recovery was predictable, but in all of the "big three," on whom the other countries depend for support, the slack was greater than anticipated. At current levels, the rate of growth cannot cut the rate of unemployment.

There is reason to believe that much of this problem has been man-made. Fear of inflation and out-size welfare statism became so overwhelming that stress was placed on the wisdom of "slow growth," even at the expense of delaying a return to full employment.

But one begins to wonder about the wisdom of this policy, or, at least, if there has not been an over-reaction. If it means suffering along with a growth rate in the industrialized West of less than 5 per cent a year, high unemployment levels will persist and social strains will be inevitable.

Moreover, a protracted slow-growth policy will condemn those poor countries which depend heavily on exports to the richer countries to a steadily worsening balance of payments. How will their deficits, already crushing, be financed? To complicate things, the Western world is being challenged anew by the oil cartel, which will boost prices again next month.

By the turn of the year, when a Japanese national election should have been completed, all three major industrial nations will have new governments in place. If the world is not to drift into a major global crisis, the United States, West German and Japanese leaders must use these next few months to make sense out of complicated, intermingled economic relationships.

But No Specific Decisions Taken at Meeting

Japan Businessmen Agree on Trade Surplus Correction

TOKYO, Nov. 4 (Reuters).—Japanese business leaders and trade officials agreed in principle today that something should be done to correct Japan's growing trade surplus with Western Europe, the federation of economic organizations (Keidanren) said.

But a Keidanren spokesman said after a meeting between officials of the powerful business organization and the Ministry of International Trade that they had been unable to decide on any specific measures.

Those attending the meeting had agreed in broad terms that imports from Western European countries should be increased and the export of Japanese goods to the area should be made more orderly, the spokesman said.

When a team from Keidanren was in Brussels last week, Common Market officials emphasized growing concern at the widening trade gap with the nine-nation community, which is likely to be over $4.2 billion this year.

The chief Foreign Ministry spokesman, Kensuke Yanagiya, told a regular news briefing that government officials were preparing Japan's policy for trade talks with the EEC in Brussels later this month.

Asked about the European tour by Keidanren members, Mr. Yanagiya said trade problems raised by the Europeans should be considered on the basic principle of free trade.

He added: "In addition, if there is a question of a considerable imbalance between Japan and the EEC countries, such a matter should be solved in the long term, and the overall aspect of a (trade) balance should be restored by expansion and not by restriction of trade."

Mr. Yanagiya said remarks made by the Europeans to the Keidanren team included "misunderstandings, over-simplification and exaggeration," but the Foreign Ministry believed the Japanese businessmen had succeeded in explaining the true situation.

However, he also said there were some complaints raised by the Europeans that Keidanren had felt necessary to bring back to Japan for careful examination.

President Warns

The Keidanren president, Toshio Doko, warned on his return to Japan that there was the possibility of the EEC unilaterally imposing restrictions on Japanese goods. He said the trade imbalance in Japan's favor was turning into a political issue because of unemployment in Western European countries.

Mr. Doko earlier called on Japanese exporters to exercise self-restraint in dealings with the EEC, but his plea received a poor reception from industry spokesmen in Japan.

The steel and ball-bearing industries are the only ones now curbing their trade with Western Europe. Other industries said they had no plans along this line.

Toshinobu Wada, Vice-Minister of International Trade, told another press conference that while the present official and private controls over Japanese exports should be maintained, the best way to solve the trade imbalance would be to stimulate business in Japan and expand imports.

No Promise to U.K.

Meanwhile, a spokesman for the Japanese electronics industry said it made no definite commitments on its exports to Britain at talks here with a British delegation earlier this week.

Noboru Yoshii, senior adviser to Sony Corp., who led the Japanese delegation, said an understanding reached at the talks only provided for continued exchange of information on the British demand for monochrome and color television and other electronic appliances.

He said the British delegation, headed by Lord Thorneycroft, chairman of the British Radio and TV Industrial Council, pointed out that the U.K. government might tighten up aggregate demand so that British consumers' disposable income might decline next year.

The Japanese delegation agreed to pay attention to the U.K. market trend but made no commitment on export levels to Britain next year, Mr. Yoshii said.

He said it should still be possible to increase trade between the two countries under free trade principles.

Mr. Yoshii added that the British delegation told Japanese delegates the U.K. industry does not intend to seek import curbs or voluntary control of Japanese exports.

SEC Proposes to Expand Data Made Public by Firms

By Robert D. Hershey Jr.

WASHINGTON, Nov. 4 (NYT).—The Securities and Exchange Commission, proposing that companies be required to disclose significantly more information about their managements, suggested yesterday that it might be possible to devise a standard by which compensation—in all forms—of top officials could be readily compared.

This was perhaps the most striking of a series of proposals to increase the amount of information available to investors while at the same time simply reporting requirements.

The commission did not deal, however, with the hotly debated issue of whether the involvement of individual officers or directors in questionable or illegal payments should be disclosed.

The SEC was tentative in suggesting that a standard for comparing management compensation—one that might include indirect income such as company vehicles and country club memberships—could be devised.

Difficult Task

These perquisites, plus such financial incentives as stock options and bonuses that the commission said appeared in "a myriad of complex forms which are difficult to comprehend," would be extremely difficult to reduce to comparable terms, an SEC official conceded.

The commission said it was inviting comment on this question, as well as the adequacy of current requirements involving such things as a company's loans to its management, "only as a first step toward improving" investor understanding.

The proposals the commission formally put forward—as opposed to ideas on which it simply seeks opinion—broke less new ground.

In general, the proposed amendments to its rules would require the same disclosures about the background of executives and directors in proxy statements as would be required in the detailed annual report submitted to the commission.

Expanded Disclosure

A change, however, would be made by expanding the disclosure of litigation and regulatory action against individual officials while reducing to five years from 10 the period for which such actions would need to be reported.

A specific area for increased disclosure involves legal proceedings during the prior fiscal year in which an officer had an interest opposed to that of the company. This would occur, for example, if the officer was sued by shareholders for making an illegal short-term profit in the company's stock.

The SEC also proposed that disclosure of compensation from the company and its subsidiaries be broadened to include affiliated concerns. The SEC said it anticipated that any burden on companies to produce this additional data would be offset by more uniform reporting requirements and a reduction in the time to be covered.

Jobless Rate Up By 5 Per Cent In West Germany

NUREMBERG, West Germany, Nov. 4 (Reuters).—The number of people without a job in West Germany rose by around 5 per cent last month, and the total could again top 1 million this winter, the Federal Labor Office said today.

Official figures showed the number of unemployed in October was 943,700, almost 45,000 up from September.

Labor Office president Josef Sting, told a press conference here he was not surprised at the rise, which he said was lower than in the same month of previous years.

Unemployment had fallen last month in the metal and electrical trades, showing that West Germany's economic upswing was continuing slowly but steadily, he said.

But Mr. Stingl added that seasonal factors, which had influenced last month's increase, were liable to take the jobless total over 1 million during the winter.

The number of unemployed dropped below the million mark in May for the first time in 17 months.

Alien Car Sales Increase in U.K.

LONDON, Nov. 4 (AP-DJ).—Foreign cars are taking an increasingly large slice of the British car market, according to the latest statistics from the Society of Motor Manufacturers and Traders.

The British car organization announced today that imported cars accounted for 42.4 per cent of last month's new registrations, compared with 37.7 per cent in October, 1975.

In each of the last three months, foreign cars have accounted for more than 40 per cent of total sales in Britain, reaching a record monthly high penetration of 43.5 per cent in September.

Car sales in Britain for the first 10 months of this year rose 5 per cent to 1,117,253 from 1,063,728 a year earlier, but all this gain is from sales of foreign cars, which increased to 415,957, or 37.2 per cent of the market, from 354,676, or 33.6 per cent, a year earlier.

Market Closed

All stock exchanges and banks were closed Thursday in Italy for a national holiday.

Wholesale Prices Rise By 0.6 Per Cent in U.S.

WASHINGTON, Nov. 4 (AP).—Higher costs for automobiles, fuel and other industrial goods boosted U.S. wholesale prices by 0.6 per cent in October, marking the second consecutive big monthly increase, the government said today.

The rise was smaller than the 0.9-per-cent increase in September, but still was the third-sharpest monthly increase this year and by no means good news for the incoming Carter administration.

Only a decline in agricultural prices kept the wholesale price index from rising more sharply.

The Labor Department said industrial prices surged 1 per cent higher last month, the largest one-month increase since last October, when they rose 1.2 per cent. These prices have continued rising at a rapid rate since last June.

Less Volatile

Economists are usually more concerned about price trends for industrial commodities as an indication of the underlying inflationary pressures in the economy, since they are less volatile than farm prices.

Farm prices were down 1.2 per cent in October after rising 1.9 per cent in September. They had declined in both July and August. Prices for processed foods and feeds also dropped in October, declining 0.7 per cent.

The wholesale price index stood at 185.2 in October, meaning that goods selling for $100 at wholesale in 1967 now cost $185.20. Wholesale price changes usually are reflected, after a lag, in consumer prices, although the linkage is not precise.

October's 0.6-per-cent increase, adjusted for seasonal factors, translates into an annual rate of 7.4 per cent. In absolute terms, wholesale prices rose 0.3 per cent last month.

For analyzing general price trends, economists prefer the seasonally adjusted figures. These figures eliminate the effect of changes that normally occur at about the same time and in about the same magnitude each year due to such things as weather patterns, supply cycles, model changeovers and seasonal discounts. The unadjusted data reflect actual monthly changes.

The latest price report indicated that inflationary pressures are still strong in the economy.

Most economists believe that inflation as measured by consumer prices will increase about 5 to 6 per cent this year. That would be a slight improvement from the 7-per-cent rate in 1975, but still would be high by historic standards.

The surge in industrial prices reflected increases in transportation equipment, especially the 1977-model cars and trucks. Most vehicles and other equipment rose in cost 3.6 per cent last month, the government said.

Sharp increases also were reported for most fuel products, including crude petroleum and natural gas. Prices also rose for lumber and wood products, rubber, machinery and metal products.

Especially significant for future trends was the 4-per-cent price increase for crude materials in October. Price movements for these materials, the first step in the price chain, usually signal broader trends several months in advance.

Wholesale prices of consumer foods—basically the prices paid by supermarkets—declined 0.4 per cent following an increase in September and three consecutive months of decline in the summer.

Over the past 12 months, wholesale prices have risen 3.5 per cent, the smallest 12-month increase since November, 1971, when they rose 3.3 per cent during a period of government controls.

Industrial prices have risen 6.6 per cent over the past year while farm prices were 5.4 per cent lower and processed foods and feeds were down 6.1 per cent.

Currency Trade Standards Being Prepared by Fed

NEW YORK, Nov. 4 (AP-DJ).—The Federal Reserve Board examining staff is preparing detailed standards for bank management of foreign exchange activities, it was disclosed here today.

Hugh Conway, supervisory examiner for the board, said these standards are aimed at improving the accuracy and completeness of records in bank foreign exchange departments.

Speaking before a meeting of the American Bankers' Association, Mr. Conway emphasized that the standards are not aimed at correcting any immediate problems.

He said the purpose is to assure that banks continue to maintain the good policies and procedures which are now being followed.

The Federal Reserve Board said the standards will require detailed records of all transactions so that bank examiners can detect unusual risks in a bank's activities.

Second Look at Carter Victory Pushes Stock Prices Higher

NEW YORK, Nov. 4 (IHT).—New York Stock Exchange prices did an about-face today and closed broadly higher in moderate trading.

Although it finished below the best levels of the day, the Dow Jones industrial index rose 3.91 points to 960.44.

Breadth figures almost exactly reversed yesterday's downside pattern. About 1,180 stocks finished higher today and about 340 shares closed lower.

Volume totaled 21.7 million shares, compared with 19.4 million shares yesterday.

Some analysts who said yesterday's selling was caused by concern about President-elect Carter's possible economic policies, said today that investors are having second thoughts and are beginning to think that perhaps Mr. Carter's administration will be able to revive the country's lagging economy.

Brokers add that although the market fell almost 10 points yesterday, much of that liquidation was confined to the first hour's activity by disappointed investors who had earlier gambled on a Ford upset.

Among the issues reacting to favorable corporate earnings were General Dynamics up 1 to 47 1/2, International Flavors & Fragrances 3/4 to 21 3/4, Santa Fe International 2 5/8 to 36 1/8, and Belco Petroleum 1 1/4 to 20 3/4.

Wesco Financial, a take-over candidate, climbed 3 7/8 to 19 1/2.

Also on the upbeat were MCA 1 1/4 higher at 34 3/4, Superior Oil 3 to 215, Kennecott Copper 1 1/8 to 28, Tropicana Products 1 7/8 to 28 1/4, Sears, Roebuck 2 1/8 to 69, U.S. Steel 1 1/8 to 48 1/8, and heavily traded Travelers 7/8 to 37 3/8.

Bally Manufacturing, which moved ahead 2 1/4 yesterday, climbed another 1 1/2 to 24. The slot machine maker said the effect of opening the East Coast to gambling could add 10 to 15 cents a share to its annual earnings.

S.S. Kresge, J.C. Penney, and F.W. Woolworth showed gains after reporting higher October sales.

Burroughs eased 3/8 to 89 1/4.

Prices on the American Stock Exchange advanced in active trading. The Amex index rose 1.48 to 99.99.

Soybean futures, much in demand by a mixed speculative element, advanced 15 cents a bushel on the Chicago Board of Trade.

The strength and interest in soybeans strongly influenced a demand for other farm commodity futures. Soybean meal rose $3.50 a ton and soybean oil was up more than 50 points, or 1/2 cent a pound. Corn gained 3 cents a bushel and oats and wheat were almost as much higher.

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or paid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Payable in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

ADVERTISEMENT

SEKISUI PREFAB HOMES, LTD.

(CDRs)

Referring to the advertisement in this paper of 6th July, 1976, the undersigned announces that the original shares from 5% free distribution have been received.

As from November 15, 1976, one new CDR Sekisui Prefab Homes, Ltd. cumcp. No. 20 and talon will be available at Kas-Associatie N.V., Spuistraat 172, Amsterdam, against delivery of 20 div. cps. No. 18 of CDRs Sekisui Prefab Homes, Ltd. After December 31, 1976, the equivalent of the CDRs, which have not been claimed by the holders of div. cp. No. 18, will be sold. The proceeds, after deduction of expenses, will be held in cash at the disposal of said holders.

Further the undersigned announces that as from November 10, 1976, at Kas-Associatie N.V. div. cp. No. 19 (accompanied by an "Affidavit") of the CDRs Sekisui Prefab Homes, Ltd., each repr. 50 shs. will be payable with Dfls. 2.73 net.

(Div. per record-date 7.31.76: gross Yen 7.50 p.sh.)

After deduction of 15% Japanese tax = Yen 56,25 = Dfls. —.48 per CDR.

Without an Affidavit 20% Jap. tax (= Yen 75.— = Dfls. —.64) will be deducted.

After 3.15.77 the div. will only be paid under deduction of 20% Jap. tax with Dfls. 2.57 net, in accordance with the Japanese tax regulations.

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. l—Declared or pld after stock dividend or split tup. l—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

Where a split for stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

BOOKS

PLAGUES AND PEOPLES

By William H. McNeill. Anchor/Doubleday. 369 p

Reviewed by John Leonard

FEELING bad about it, we won't let history alone. We keep poking at or thumping on it with a stick: Talk. Fess up. Who's to blame? Patriarchy, monotheism, capitalism, sublimation, the territorial imperative, Gutenberg, sunspots, the Zodiac, fluoridated water?

William H. McNeill argues on behalf of disease. Mr. McNeill is a professor of history at the University of Chicago, editor of The Journal of Modern History, and author of, among other books, "The Rise of the West," which won a National Book Award in 1964. He believes that "civilized infections" — "whether propagated via the respiratory tract, like measles, smallpox, and influenza, or via the alimentary canal, like typhoid and dysentery," not to mention the ever-popular cholera, malaria, syphilis and bubonic plague — have been underrated in most historical accounts of how the human community came to be the way it is.

According to "Plagues and Peoples," our relations with microparasites (viruses, bacteria, etc.) have played a crucial role in the development of cities, the outcome of the Peloponnesian wars, dynastic rule in Egypt, the susceptibility of Europe to Christianity and of China to Buddhism, the decline of the Roman and Spanish empires, the imperialisms of Great Britain and Japan, the Indian caste system, the conquest of the New World, the ideas of the Enlightenment, the population explosion and the energy crisis.

A microparasite is always looking for a host to live on or in, whether that host is a rat or a human being. Either the parasite and the host work out some sort of accommodation, or both die. Disease organisms appear to have been just as successful as human beings in adapting to the new "ecological niche" we made for ourselves when we climbed out of the trees, took up farming, started cities, sailed the oceans and went to war. In fact, the disease organisms came right along with us. Those of us who developed resistances and immunities to these organisms — or managed to domesticate them so that they only attacked children, thereby building up antibodies in the survivors — tended to fare better in confrontations with those who had not experienced the disease. Amerindian civilization, Mr. McNeill suggests, collapsed not so much from the force of Spanish arms as from the smallpox Cortez and Pizarro brought with them to Mexico and Peru.

The history of war is, in fact, Mr. McNeill's best evidence. Until the 20th centur was always a far n factor than enemy a during active campaign Crimean War (185 example, 10 times as m soldiers died of dy from all the Russian w together; and half later, in the Boer War British deaths from officially recorded were as great as deaths fi action." All that lo warfare on the Weste World War I was ma by modern medical sta had finally figured out were up to, just as jun in the tropical Pacific World War II was sible by figuring out quitoes were up to. A ing the advantages of soldiers, we got aroun ulating civilians. And are too many civilians

Mr. McNeill is at fascinating when he the relationship betwee and philosophical syste the Enlightenment p grew up in relative times, and it was eas that man could perfe When, on the other ha surrounded by plague, something you don't exists, the idea of a and a divine meanin console you.) He is a ambitious in proposin calls a "macroparasitic ing of man on men. he more or less mea ments, with their a their taxes. Egyptia would probably not hav despotic dynasts as lo did if they hadn't bee from chronic schis they didn't have any e

One might have wis anyway — for a chapter the literary imaginati silence, of meaningle the plague, say, from pe to Albert Camus. was as much influenc losophy and theology. interested in the sub do well to consult D Rosebury's "Life on M an elegant argument o the microbes that bodies their environmen ing to Dr. Rosebury, get along without thos to help develop antibod infection and to develo of our various tracts. how itchy it is in the ninhe, there are usually sons for the company

Still, an enormous information and intel crammed into "Pla Peoples," including history of medicine, scholarly work on c climate, trade patterns ing habits being done del and others associ Annales "Economies, Civilisations," it is o reminder that Marx didn't figure everything more than Gibbon Thucydides. I find it ing; we are more co than we imagine, or a to settle for.

John Leonard is on the The New York Times.

BRIDGE — By Alan T

In world championship competition nearly all the swings depend on bidding. On the great majority of deals the players will prove to be equally skillful in the play of the cards.

But there are exceptions, as witness the diagramed deal from the 1975 world championship in Bermuda. Faced with a tricky playing problem, the Italian declarer found a better solution than the American expert who held the same cards in the same contract.

After a natural auction, South reached three no-trump and a diamond was led. The American declarer won in dummy and led a low spade. He eventually had to rely on an even spade break and when this failed to materialize he was down one, losing three spades and two hearts.

The Italian also won the opening diamond lead in dummy but made a better move by leading the heart queen. He hoped to build up his ninth trick in hearts, and as it turned out there was no effective counter. ... fenders ducked, hoping ... out hearts, and the ... for home with nine ...

In the post-mortem ... analysts suggested that ... have saved the day ... the heart queen with ... shifting to the spade ... appears at first ... declarer would have ... tricks in the major ... Italian could still have ... with a most unusual ...

If he had won the ... with the ace and cash ... king, not a play that ... to consider in the heat ... the position, would ... this:

	NORTH ♠ 9642 ♡ — ◇ AQJ ♣ K3	
WEST ♠ Q107 ♡ K5 ◇ 8653 ♣ —		EAST ♠ ♡ ◇ ♣
	SOUTH ♠ 1 ♡ J986 ◇ K2 ♣ 10	

	NORTH ♠ A2543 ♡ Q ◇ AQJ10 ♣ K32	
WEST ♠ Q1073 ♡ K53 ◇ 87653 ♣ 6		EAST ♠ K8 ♡ A1074 ◇ 2 ♣ J109742
	SOUTH (D) ♠ J6 ♡ 98862 ◇ K94 ♣ AQ8	

Neither side was vulnerable. The bidding:

South	West	North	East
Pass	Pass	1 ♠	Pass
2 ♡	Pass	3 ◇	Pass
3 N.T.	Pass	Pass	Pass

West led the diamond seven.

Another club lead ... apparently a ... would subject West to ... unusual triple squeeze ... the count. If he shifts ... spit card, South would be ... play the same suit to develop ... ninth trick. Therefore ... would have to throw a club ... Then, South could cash ... rounds of diamonds and ... spade, and playing West ... guaranteeing a ninth trick.

NBA Roundup

ockets Outslug and Outscore Celtics

ON, Nov. 4 (UPI).—The Rockets needed the department and Calvin machine-gun fight it for the second time they made the Boston sh they were having a m.

has beaten Houston 11 their last 13 meetings. ns' two losses, however, ckets.

raged Rockets fan ran basketball court last nd kicked Celtics center ans in the ship before being pounded by Cowens and guard Charlie Scott. In that game, Celtics' coach Tom Heinsohn was ejected from the court and the Rockets pulled off an upset.

Last night was worse for the Celtics. Rallying around guards Murphy and Mike Newlin, the Rockets came back from 17 points down to stun Boston, 117-111, in overtime.

Boston completely dominated the game until, with eight minutes left in the third quarter, a shoving match between Murphy and Boston forward Sidney Wicks intensified into a fist fight.

Murphy, a powerful 5-9 guard, attacked the 6-9 Wicks, who outweighs the smaller man by 60 pounds, and repeatedly hit him in the face and throat as he wrestled the bigger player to the court.

Wicks suffered a cut nose and received a stitch while missing most of the third quarter.

"Calvin Murphy has a big-man complex," Wicks said later, "but that's cool. He doesn't think the big men will come after him, but he will learn one of these days. I've just got one thing to say to him. Watch out." Murphy said Wicks caused the fight.

Houston trailed, 65-54, when Murphy was assessed two personal fouls and Wicks one for the fight. But then Newlin took control of the game and scored 17 of his 35 total points in the fourth quarter and five-minute overtime period.

"It was crazy. I just felt possessed. like I wasn't even thinking, just throwing myself around and going wild," Newlin said.

Rudy Tomjanovich's 20-footer with 1:22 left in regulation pulled the Rockets into their first tie of the game at 105-105, and that's the way the fourth quarter ended after each team took one poor shot apiece.

Besides his second loss in two nights, Heinsohn had a court order to worry about.

During halftime, a Harris County Sheriff's deputy served the coach, Cowens, Scott and Celtics' president Red Auerbach with summonses to appear in a Houston court in 20 days for a hearing regarding the Feb. 11 incident.

The summons, served on the Celtics on their first trip back to Houston since the Feb. 11 game, resulted from a $1-million *damage suit filed by Rockets' fan* James Bates.

Bates, 34, claimed in the suit filed earlier this year that "Cowens and Celtics teammate Charlie Scott . . . proceeded collectively to physically beat [Bates] to the state of incapacity."

"How ridiculous is this?" Heinsohn said after the game.

Nuggets 119, Knicks 110

At Denver, guard David Thompson, the American Basketball Association's rookie of the year a year ago, returned to his old form with a 34-point performance that lifted the Nuggets to a 119-110 victory over the New York Knicks.

The 6-5 Thompson, who had difficulty adjusting this season to a shift from forward to guard, scored 10 of his points in the first quarter as the Nuggets, now leading the NBA's Midwest Division with a 5-0 record, outscored New York 37-22.

Kings 126, Sonics 106

At Kansas City, former ABA players Ron Boone, Jim Eakins and Brian Taylor combined for 67 points to lead the Kings to a 126-106 victory over Seattle.

Boone led the Kings with 26 points while backup center Eakins had 23 and 9 rebounds and Taylor scored 18 points. Fred Brown paced Seattle with 16 points while Mike Green had 10 rebounds.

Pacers 113, Spurs 97

At Indianapolis, center Dan Roundfield topped five players in double figures with 24 points as Indiana rolled to its fourth straight victory, 113-97, over San Antonio.

The Pacers trailed only once at 4-2 and widened their advantage after each quarter. Veteran Freddie Lewis added 18 points to the Indiana attack and Wil Jones contributed 17. Billy Knight, returning after missing four games with a sprained ankle, scored 14 points in less than two periods of action and Steve Green scored 11.

Nets 100, Braves 96

At Uniondale, John Williamson scored 36 points and led a 29-point third-period outburst which paced the New York Nets to a 100-96 victory over Buffalo.

The victory snapped a three-game losing streak by the Nets and extended the Braves' losing streak to four games. Williamson scored eight points during the third-period drive as the Nets broke away from a 46-46 halftime tie to take a 75-66 lead at the end of the third period.

Bullets 117, Bucks 105

At Landover, Md., Elvin Hayes scored 31 points and Len Robinson 24 to help Washington snap a three-game losing streak with a 117-105 victory over Milwaukee.

Hays had 17 and Robinson 15 points in the first half as Washington took a 62-52 lead and was never headed. Hayes led all rebounders with 14 and had 5 blocked shots.

NHL Canadiens Top North Stars

BLOOMINGTON, Minn., Nov. 4 (UPI).—The champion Montreal Canadiens fought a tight battle last night for two periods, then scored three goals in the last period to beat the Minnesota North Stars, 5-2.

"We've got to keep winning the close games this year," said Montreal coach Scotty Bowman.

There was some doubt in the minds of fans how close the game really was. The Canadiens took an early lead on Pete Mahovlich's tip-in of Larry Robinson's power-play point shot at 4:12 of the first period. Minnesota tied it on Bill Hogaboam's rebound goal at 10:52. Next the Canadiens scored on Steve Shutt's 13th goal of the season with 1:05 remaining in the first period. The game could conceivably be called close in the second period when just one goal was scored—by Minnesota. Dean Talfous jammed his sixth goal beneath Montreal goalie Ken Dryden's pads with just 18 seconds left in the period.

Rangers 6, Canucks 1

At Vancouver, rookie Don Murdoch scored two goals to take over the National Hockey League lead, with the second—his 14th of the season—coming on a penalty shot to lead the New York Rangers to an easy 6-1 victory over the Canucks.

Rod Gilbert also scored twice as the Rangers improved their road record to 4-2-1 but failed to pull out of the Patrick Division basement. They are 6-7-1 overall, one point behind Atlanta.

Murdoch's second goal came after Harold Snepsts threw his stick at the Ranger forward when he broke into the clear. A penalty shot was called and Murdoch scored into the lower left side, the second successful penalty shot this season. Last year only one penalty shot was successful, that by Bob Nevin, then with the Los Angeles Kings.

Flames 70, Capitals 0

At Atlanta, Tom Lysiak and Eric Vail each scored a pair of goals and goalie Phil Myre got the first Atlanta shutout of the year in a 7-0 victory over Washington.

The Flames had two shorthanded goals. Bill Clement took a pass from Tim Ecclestone in the third period and scored on an 18-foot shot for his third short-handed goal of the year, a Flames record.

Kings 4, Barons 2

At Richfield, Dave Hutchinson broke a 2-2 tie with 1:09 to play and Tommy Williams added an open net goal with six seconds left to give Los Angeles a 4-2 victory over Cleveland.

The loss was the fifth straight for the Barons, who dropped to 3-7-2. *The Kings are 3-4-3.*

Blues 6, Maple Leafs 2

At Toronto, left wing Ted Irvine's second-period goal plus two assists vaulted St. Louis into first place in the Smythe Division with a 6-2 defeat of the Maple Leafs.

Irvine netted the winning goal at 18:19 of the second period as he shoveled a rebound under Toronto goalie Mike Palmateer for a 3-1 lead. Pierre Plante opened the scoring for the Blues at 18:05 of the first period and Irvine assisted on Red Berenson's second-period goal at 7:36.

Orantes Moves to Semifinals Of British Dewar Cup Tennis

LONDON, Nov. 4 (Reuters).—Manuel Orantes of Spain moved into the semifinals of the $135,000 Dewar Cup International Tennis Tournament here when he beat South African Bernie Mitton, 6-2, 3-6, 6-3, today, giving him an undefeated run of 21 matches.

Top-seeded Orantes, unbeaten since the semifinals of the U.S. Championships at Forest Hills in September when he lost to Swede Bjorn Borg, said he thought his feat was a record.

"I have been told the previous best run was 20 matches last year by Rod Laver," said the Spaniard, whose recent championship victories include Tehran, Barcelona and Madrid.

Orantes had to work hard here to win his 90-minute quarterfinal against Mitton. After sharing the first two sets, Mitton was battling to stay in the match when he crashed into the back netting and almost toppled off the raised playing area.

Mitton somehow managed to return the ball as he extricated himself from the netting. But Orantes then turned on the pressure with some precision lobs to break through for a 4-2 lead. That was virtually the end of Mitton's resistance.

Orantes's opponent in the semifinals will be Briton Mark Cox, who beat Italian Antonio Zugarelli, 4-6, 6-3, 6-2.

Both players put on a hard-hitting display while sharing the first two sets. Cox broke through in the decider when Zugarelli double-faulted.

The Italian was upset by a bad line call in the sixth game of the third set. Cox took the game to love for a 4-2 advantage and Zugarelli's effort fizzled out as his service let him down.

Battle for Talent

NEW YORK, Nov. 4 (AP).—The newest battle for talented athletes is a fight f tennis stars. "They are trying to put us out of business," Mike Davies, executive director of World Championship Tennis, said yesterday after hearing of plans for an enlarged 70-tournament men's Grand Prix circuit that would have prize money of more than $7 million.

"It is war," Davies said.

The WCT, which last week announced plans for a $2.5-million circuit, has operated the first four months of the year and the Grand Prix previously ran during the last eight months.

But now the Grand Prix competition will begin in Sydney, Dec. 29, and have 35 tournaments in 16 countries during the first six months.

New Baseball Auction

Bidding for Major-League Muscle

By Dave Anderson

NEW YORK, Nov. 4.—After a century of hiding behind their money clips, baseball's club owners must stand up to be counted at the first auction of liberated major league muscle. Counted by the fans.

Disenchanted fans always have blamed the players or the manager for a team's demise, sometimes when the owner was the real culprit. But there seldom was tangible evidence to indict the owner. The owner didn't strike out with the bases loaded. The owner didn't leave a pitcher in too long. But now tangible evidence will be available.

The owners can be scrutinized in a new box score—free agents drafted, free agents seriously negotiated with, free agents signed, dollars invested. Nowhere will the new box score be inspected as closely as it will in New York where—judging by their banking habits—George Steinbrenner of the Yankees will be spending money with both hands, while Donald Grant of the Mets is trying to save money with both hands.

Possible Moves

Of the 15 most celebrated free agents, here is one man's opinion of which team each will join:

Don Gullett (11-3 won-lost record, 3.00 earned-run average)—The Dodgers would enjoy using an ex-Red pitcher to challenge the Reds, especially the only left-hander available. The Dodgers haven't had an exceptional left-hander since Sandy Koufax retired.

Doyle Alexander (13-9, 3.36)—He wants to go where he will be in the starting rotation. The Padres could accommodate him.

Wayne Garland (20-7, 2.68)—He keeps raving about his minor league manager, Joe Alpobelli, who is the Giants' new manager.

Rollie Fingers (13-11, 20 saves)—The Red Sox paid $1 million to the A's for him but the commissioner nullified the deal.

Bill Campbell (17-5, 20 saves)—The Cardinals keep saying they will bid high for a righ-handed relief pitcher.

Gene Tenace (.249 batting average, 22 homers, 66 runs batted in)—He's the only catcher available and the Royals need a catcher, especially a catcher who *hits home runs. With him, the* Royals could win the World Series.

Don Baylor (.247, 15 homers, 68 runs batted in)—The Indians need a cleanup hitter and a left-fielder.

Bobby Grich (.266, 13 homers, 54 runs batted in)—He's thinking about the Red Sox, aiming for Fenway Park's leftfield wall and teaming with Rick Burleson on the double play.

Dave Cash (.284, 1 homer, 56 runs batted in)—He might stay with the Phillies; if not, the Expos will bid high.

Bert Campaneris (.256, 54 stolen bases)—It's difficult to imagine the Yankees being outbid for the only shortstop.

Sal Bando (.240, 27 homers, 84 runs batted in)—The White Sox need a third baseman and a leader. Bando is both.

Richie Hebner (.249, 8 homers, 51 runs batted in)—The Braves are interested but the Mets always need a third baseman.

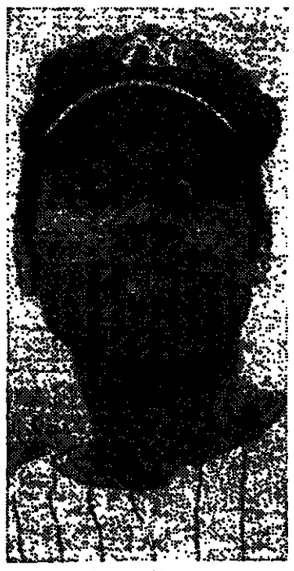
Reggie Jackson (.277, 27 homers, 91 runs batted in)—Only a few teams will be willing to afford his $3-million price. As much as the Yankees talk about him, he is understood to prefer the Phillies, who need a left-handed slugger and an every day rightfielder. He *also grew up in the Philadelphia* area.

Joe Rudi (.270, 13 homers, 94 runs batted in)—The Yankees need a right-handed slugger. He's always played leftfield, but the Yankees would use him in rightfield.

Gary Matthews (.279, 20 homers, 84 runs batted in)—The Braves already have been fined $10,000 for tampering with him. They even threw a party for him.

It's unlikely that any team will be deprived of an opportunity of selecting the two or three players it needs most. But that is possible if 12 teams were to choose Campaneris or Rudi in an organized plot to prevent the Yankees from negotiating with the A's former star. Conspiracy among club owners is always possible. Andy Messersmith suspected club owners of price-fixing in his travels last spring as a free agent. Players also would conspire to raise their prices from various teams, especially those players represented by the same agent.

But of all the elements in the free-agent draft, the most appealing will be the new box score for the club owners. They are not accustomed to being audited by the fans.



Baseball's Comeback Award Is Given to Ellis of Yankees

NEW YORK, Nov. 4 (UPI).—Dock Ellis, whose pitching days were believed by some experts to be near an end when he left the Pittsburgh Pirates for the New York Yankees, was voted yesterday the American League's comeback player of the year by the United Press International.

Ellis, acquired as a virtual throw-in when the Yankees got second baseman Willie Randolph from the Pirates last winter, was voted the honor by 9 of the 25 UPI baseball correspondents who participated in the annual post-season survey.

Lou Piniella of the Yankees was second with four votes, followed by Minnie Minoso of the Chicago White Sox with three, Amos Otis of the Kansas City Royals and Wayne Garland of the Baltimore Orioles, with two each, and Nolan Ryan of the California Angels, Bill Campbell of the Minnesota Twins, Craig Nettles of the Yankees, Ray Fosse of the Cleveland Indians and Ron Leflore of the Detroit Tigers with one each.

Ellis had an 8-9 won-lost record and a 3.79 earned-run average for the Pirates in 1975 and was suspended at one point in the season by the team manager. He went to the Yankees along with Randolph in the deal that sent pitcher Doc Medich to the Pirates. With the Yankees, he compiled a 17-8 record and a 3.18 earned-run average in 212 innings. It was Ellis's best season in the majors since he compiled a 19-9 mark for the Pirates in 1971.

Dock Ellis

Defense in Denmark

COPENHAGEN, Nov. 4 (UPI).—Danish boxing promoter Mogens Palle said that European middleweight boxing champion Germano Valsecchi of Italy will defend his title in a match against Danish boxer Poul Knudsen in Randers, Jutland, on Nov. 19.

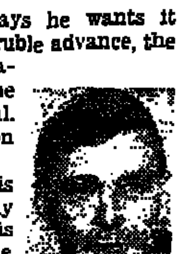
Observer



Hey, Ruble!

By Russell Baker

NEW YORK—Leo Tolstoi is tired of writing for kopecks. He wants the big rubles.

"So you think you're ready for the big rubles, Leo," says his agent.

Leo Tolstoi says he wants it all. The 250,000-ruble advance, the 1,275,000-ruble paperback sale. The big movie deal. The television sale.

Baker

"Such talk is music to my heart," says his agent. "Go home and write me a few hundred words describing your novel."

Leo Tolstoi goes home and writes 250,000 words. His agent cannot wade through it. "Leo, Leo," he groans. "All this talk about Napoleon in somebody's parlor and I can't even keep the names straight. Go home and write letters to John Kenneth Galbraith and Norman Mailer and Philip Roth and ask them to give you some punchy sales lines for the jacket, and maybe I can find a sucker."

Leo Tolstoi writes letters of 100,000 words each to Galbraith, Mailer and Roth. They do not answer. Turgenev and Henry James, however, agree to send jacket blurbs on condition that Leo Tolstoi stop writing them 100,000-word letters.

"Leo," says the agent, "I will give it to you from the shoulder. James and Turgenev do not sell books, but I will tell you what."

And he tells Leo Tolstoi to forget the book for the time being and write the condensation for the Reader's Digest.

Leo Tolstoi writes the condensation. It runs to 575,000 words.

"Let's skip the condensation, Leo, and go right to the movie," says his agent. "Once you have written the movie, you can do the condensation of the film and then work backward to the full novel."

At home, Leo Tolstoi writes a great movie. If filmed, it will run for 37 hours, not including intermissions for meals. "Leo," says his agent, "nobody is going to buy a 37-hour movie, a 575,000-word condensation, or a full-length novel that takes a 100,000-word letter to describe."

Leo Tolstoi is depressed. He sees the big rubles eluding him.

"However," says the agent, "if you write the soundtrack music for the movie, it will create a terrific audience, which will then demand that the rest of the movie be made, which will create a huge demand for the condensation of the original novel, which will make everybody want more and have the publishers begging you to write the full-length best-selling novel."

Leo Tolstoi goes home and sits down at the piano. After having a lot of fun learning to play "Chopsticks," he realizes he cannot write music.

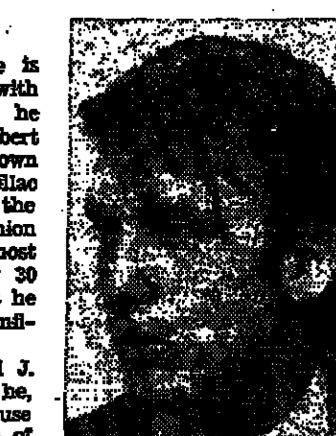
"In that case, Leo," says his agent, "do the comic book first."

Leo Tolstoi goes home and does the comic book. It is thicker than the Manhattan telephone directory and is very poorly drawn.

"Leo," says his agent, "I don't suppose you could make the bubble gum."

"Bubble gum?" says Leo Tolstoi.

"The 'War and Peace bubble gum,'" says his agent "It would create a demand for the 'War and Peace comic book,' which would trigger demand for the 'War and Peace sound-track record,' which would set up demand for the film, which would create demand for the condensation of the book on which the film is based, which will create demand for this best seller you want to write."



Leo Tolstoi admits to an inadequacy. He cannot make bubble gum.

"Not to worry," says his agent. "We'll go all the way to the end to start and work backward. Go home and make me a 'War and Peace T-shirt.'"

Leo Tolstoi sits at home sewing. He sews for days. The T-shirt already covers 14 acres. "Sometimes," thinks Leo Tolstoi, "literature doesn't seem to be my glass of tea." He toys with the idea of chucking it all and looking for the big rubles in the garment trade.

The Robert Redford of Real Estate

By Judy Klemesrud

Washington Post.
Donald J. Trump.

NEW YORK (NYT).—He is tall, lean and blond, with dazzling white teeth, and he looks ever so much like Robert Redford. He rides around town in a chauffeured silver Cadillac with his initials, DJT, on the plates. He dates slinky fashion models, belongs to the most elegant clubs and at only 30 years of age, estimates that he is worth "more than $200 million."

Flair. It's one of Donald J. Trump's favorite words, and he, his friends and his enemies use it when describing his way of life as well as his business style as New York's No. 1 real estate promoter of the middle 1970s.

"If a man has flair," the energetic, outspoken Trump said the other day, "and is smart and somewhat conservative and has a taste for what people want, he's bound to be successful in New York."

Trump, who is president of the Brooklyn-based Trump Organization, which owns and manages 22,000 apartments, currently has three imaginative Manhattan real-estate projects in the works. And much to his delight, his brash, controversial style has prompted comparisons with his flamboyant idol, the late William Zeckendorf sr., who actually developed projects as striking as those Trump is proposing.

The proposed projects are:

• A large Manhattan convention center over the Penn Central Transportation Company's 34th Street yards. Trump, who acquired the development rights from the bankrupt railroad, has drawn up plans for a $90-million center, hoping it will replace the stalled convention center project on the Hudson River.

• A 1,500-room Hyatt Regency Hotel following the reconstruction of Penn Central's Commodore Hotel near Grand Central Terminal. Last April, Trump received a controversial $4-million-a-year tax abatement from the city, the first of its kind, for his proposal to rebuild the aging hotel building.

• Construction of 14,500 federally subsidized apartments on the Penn Central's 60th Street yards, to which Trump has acquired the development rights.

"What makes Donald Trump so significant right now," said one Manhattan real estate expert, "is that there is nobody else who is a private promoter on a major scale, trying to convince enterpreneurs to develop major pieces of property."

Commenting on the Commodore Hotel deal, the expert said he thought Trump was "on the threshold of the greatest real estate coup of the last miserable three years." If it goes through, you could call him the William Zeckendorf of bad times.

Typical Day

The other day, Trump, who says he is publicity shy, allowed a reporter to accompany him on what he described as a typical work day. It consisted mainly of visits to his "jobs," the term he uses for housing projects owned by the Trump Organization, which was founded by his 70-year-old father, Fred C. Trump, now the company's chairman.

The day began at 7:45 a.m., when Trump's chauffeur, Robert Utsey, a husky, guntoting laid-off New York City policeman who doubles as a bodyguard, pulled the Cadillac up in front of the Phoenix apartment building, on East 65th Street.

Trump, who lives in a three-bedroom penthouse apartment done mostly in beiges and browns and lots of chrome, was waiting in front of the building. He is 6 feet, 3 inches tall and weighs 190 pounds, and he was wearing a three-piece burgundy wool suit, matching patent-leather shoes, and a white shirt with the initials "DJT" sewn in burgundy thread on the cuffs.

Speaking occasionally on his car telephone to his secretary and his banker at Chase Manhattan, Trump directed his chauffeur to make stops at the 60th Street yards; the convention-center site; a federally subsidized Trump housing project for the aged in East Orange, N.J., which he calls "our philanthropic endeavor"; a middle-income housing project on Staten Island; the flagship 4,000-unit Trump village in Brooklyn and several other older Trump-owned projects in Brooklyn that the company bought in recent years.

"That's one of the reasons for our success—while others were building over the last three or four years at 10 per cent interest, we were buying, at 5 1/2 per cent mortgages," Trump said. "And the units they produced in their new buildings were much smaller than the ones we were buying."

Although the Trumps have been building in New York City since 1923, the family has not gotten as much publicity as other real-estate developers because they did not enter the Manhattan market until three years ago.

"It was psychology," Trump explained. "My father knew Brooklyn very well, and he knew Queens very well. But now, that psychology is ended."

One of the reasons for the current intense push in Manhattan, he said, is that the Trump Organization, with 15,000 of its 22,000 apartments situated in New York City (mostly in Brooklyn, Queens and Staten Island), has a stake in the future of the city.

The organization, which is made up of 60 partnerships and corporations, also owns apartment buildings in Washington, D.C., Maryland and Virginia and land in California and Las Vegas, and it employs about 1,000 people.

"New York is either going to get much better or much worse," Trump predicted, "and I think it will get much better. I'm not talking about the South Bronx. I don't know anything about the South Bronx.

Turning Point

"But in Manhattan, I feel a new convention center will be a turning point for the city. It will get rid of all that pornographic garbage in Times Square. Psychologically, I think if New York gets a convention center, it will resurge and rejuvenate."

Donald Trump was in the headlines in 1973, when the Department of Justice brought suit in federal court against the Trump Organization, charging discrimination against blacks in apartment rentals. Trump denied the charges, and later signed an agreement to provide open-housing opportunities for minority groups.

"We never discriminated against blacks," Trump said angrily. "Five to 10 per cent of our units are rented to blacks in the city. But we won't sign leases with welfare clients unless they have guaranteed income levels, because otherwise, everyone immediately starts leaving the building."

Trump, a glib, nonstop talker, suddenly turned quiet when he stopped at the Trump Organization's headquarters in Brooklyn to consult with his father. Face to face, the son seemed affectionately intimidated by the older man.

"I gave Donald free rein," Fred C. Trump said in his office. "He has great vision, and everything he touches seems to turn to gold. As long as he has this great energy in abundance, I'm glad to let him do it."

PEOPLE: *Washington Hostess Hired for TV 'Who's [...]*

Barbara Howar

Barbara Howar, Washington hostess, partygoer, writer and wit, has been hired by CBS News to be one of three regular stars of a new prime-time news series. The weekly program will be called "Who's Who" and will, according to John Sharnik, vice-president of the news division, consist of notes on people "well-known and unknown, whose doings make them worthy of attention." The other stars: Dan Rather and Charles Kuralt.

* * *

Dickinson (N.D.) State College honored its most famous daughter the other day by dedicating its new Dorothy Stickney Auditorium. The veteran Broadway actress who starred in "Life With Father," which was co-written by her late husband, the actor Howard Lindsay, was born in Dickinson 73 years ago. Her father, Dr. Victor Stickney, settled in the town soon after it was established, and she grew up there. As part of the festivities in the dedication of Stickney auditorium, she appeared there in her one-woman show, "A Lovely Light," and attended a student performance of "Life With Father."

* * *

Michelle Palmer, 12, of Indianola, Iowa, has become a member of the International Order of the Rainbow. Perhaps. Her membership and that of 5,000 other Iowans is in doubt. Officials of the national group, which is affiliated with the Masons, first expelled Iowa's 136 Rainbow assemblies, then changed their minds and suspended them. The reason: an "unwritten law" banning blacks. Miss Palmer's mother is black, her father white. National officials are blaming the situation on the Indianola chapter's failure to follow the correct nominating procedure.

TORY VICTORY—Margaret Thatcher, leader of the opposition Conservatives, said she was thrilled by by-election victories and called for a general election.

After Losing 2 Seats

Labor to Keep Trying With 1-Vote Majority

LONDON, Nov. 5 (Reuters).—Britain's Labor government today declared its intention to maintain current policies despite severe defeat in by-elections that left it with a one-vote majority in the House of Commons.

In the biggest by-election swing in 40 years, the Conservatives yesterday gained two out of three working-class areas that are usually solidly loyal to Labor.

Conservative leader Margaret Thatcher said that the government was crumbling and must call a general election as soon as possible.

But Prime Minister James Callaghan issued a statement saying that the admittedly disappointing results would "in no way affect the government's determination to pursue the task of national recovery."

Such a prompt reaction by a Prime Minister to by-election results was seen as a measure of how badly hit the government felt and as a reassurance to foreign countries that it was still in control of government.

Leaders of the Labor party had ruled out an early general election.

However, Conservatives said that March was the first likely date and bookmakers made March or February the favorite dates for a 1977 election. Under normal timing, an election is not required until 1979.

Yesterday in Walsall North, in the Midlands, the Conservatives easily won the seat that formerly belonged to former Labor government minister John Stonehouse. Last August, he received a seven-year jail term for fraud.

The Conservatives received 49.3 per cent of the total vote against Labor's 31.6 per cent. But the turnout was low with only half the electorate voting.

In the northern English industrial area of Workington, where three-quarters of the electorate voted—as many as in a general election—the Conservatives received 48.2 per cent of the vote against Labor's 45.6 per cent.

Margin Cut

Labor held on to Newcastle Central, in northeast England, with 47 per cent of the vote, although its margin was sharply cut. There, however, the Conservatives were pushed to third place, with the candidate for the Liberal party coming second. The Liberals got 29 per cent and the Conservatives 19 per cent of the 41 per cent of the electorate who voted.

Before the by-elections, Labor and its allies held 315 seats in

Fighting Continues

U.S. Renews Efforts to Help Stop Civil War in Lebanon

BEIRUT, Nov. 5 (UPI).—The United States today renewed diplomatic efforts to help bring an end to the Lebanese civil war. Leftists and rightists continued to battle in Beirut.

Confusion reigned as to the exact arrival, composition and deployment of the proposed 30,000-man Arab peace-keeping force. Appointment of a Lebanese military commander for the force raised objections from both Palestinians and leftists.

No reliable casualty figures were available for the fighting in the capital, but hospital and militia sources indicated that at least 24 persons had been killed and 30 wounded in the last 24 hours.

U.S. Chargé d'Affaires George Lane met with rightist National Liberal party leader Camille Chamoun in east Beirut today, the first time a U.S. diplomat has crossed from west to east Beirut since U.S. Ambassador Francis Meloy Jr. was murdered in June while on his way to visit Elias Sarkis, then President-elect.

Usual Contacts

After the one-hour meeting with Mr. Chamoun, Mr. Lane commented that it was his first look at the Christian-held zone and said that it came within the framework of his "usual contacts."

Mr. Chamoun said that the U.S. is showing a serious interest in the situation in Lebanon and wants to help as far as possible without interfering in Lebanon's "internal affairs."

Mr. Lane held a similar meeting in west Beirut with leftist leader Kamal Jumblat on Tuesday.

Although the reinforcements for the token 2,300-man peace-keeping force already in Lebanon were generally expected to arrive in the country sometime over the weekend, details of its exact composition and deployment remained obscure.

Arab League envoy Hassan Sabry al Kholy declared today after a meeting with Mr. Sarkis —who will have overall command of the force—that arrival of the troops had been delayed for "technical and administrative" reasons.

Deterrent Role

The independent newspaper An Nahar said that the "technical" reason was that Arab and Lebanese officials wished to complete equipping the force with heavy armor for its deterrent role.

A disagreement has been going on among rightist leaders

Smith Eyes Own Plan If Geneva Talks Fail

By Michael T. Kaufman

SALISBURY, Rhodesia, Nov. 5 (NYT).—Prime Minister Ian Smith of Rhodesia, who returned from peace talks in Geneva yesterday, said today that even if those talks fail his government was committed to implementing the Kissinger proposals for majority rule, perhaps through discussions with moderate blacks inside Rhodesia.

"Too much effort has been put into this idea, into this theme," Mr. Smith said at a news conference here. "I certainly would be reluctant to let the work go by the boards. The momentum that the Anglo-American agreement generated, I believe this will continue."

While asserting that there has been "no progress" in the two-week-old talks and while expressing criticism of the behavior of some black delegations, Mr. Smith insisted, "There is still a chance." He said he was led to this view because "there is a will on the part of the major countries of the free world to bring peace to southern Africa and thus prevent Russian imperialism from coming into this part of the world."

Yet, he said, if the talks were doomed his thinking now was to set in motion discussions with blacks here within the Kissinger framework and then seek endorsement from the free world for these moves to obtain the removal of economic sanctions and international condemnation of guerrilla terrorism.

In a candid assessment of the nationalist delegations taking part in the talks, Mr. Smith noted that some "had conducted themselves immaculately."

He added, however, that in conversations he had with foreign observers in Geneva he discerned a view that the delegation led by Bishop Abel Muzorewa "was the best behaved, most responsible and that it had the greatest support here in Rhodesia." He added that he concurred in this assessment of the bishop's backing inside the country. Furthermore, he declared that the delegation headed by the Rev. Ndabaningi Sithole "has come up rather better than we expected."

He said Joshua Nkomo, the nationalist leader who had until recently been viewed by whites here as offering the best chance for a peaceful and prosperous transition, "has faded." He said that by forging what he called a "grand alliance" with Robert Mugabe, the nationalist claiming close links to guerrillas, Mr. Nkomo has lost credibility."

But he saved his harshest remarks for Mr. Mugabe, who, he said, had "decked himself out like a terrorist leader even though he doesn't know anything about terrorism."

According to some observers Mr. Nkomo's fall in Mr. Smith's estimation appeared significant. Last year, when Mr. Smith was under pressure to enter talks with nationalists, it was Mr. Nkomo who was singled out. He was said to be a pragmatist, who would be most likely to protect the private and profitable economy were he to lead Zimbabwe.

Key Factors

It is believed by some observers, however, thata the key factors that led to Mr. Nkomo's most favored position in white eyes were precisely his minority support, his belonging to a minority tribe, and his command of what were conceded to be the weakest guerrilla forces.

With the acceptance of the Kissinger proposals, the situation changed radically. The arguments over which leader has most popular support, which previously had been seen as irrelevant, gained importance. Mr Nkomo, aware that he needed a broader base of legitimacy, moved to join with Mr. Mugabe, a relative newcomer, but one with claims on being the most militant.

Now, in light of Mr. Smith's remarks, some observers feel there may be a shift which would lead Bishop Muzorewa and Mr. Sithole, both of whose participation in the Geneva talks had been seen as peripheral, to be more central in the negotiating process, at least as far as Mr. Smith is concerned.

• Delegates at Geneva again fail to set independence date. Page 2.

10 Guerrillas Killed

SALISBURY, Rhodesia, Nov. 5 (AP).—Rhodesian troops killed 10 black nationalist guerrillas in clashes in the last 48 hours, security officials disclosed today.

Five black civilians also died in the latest upsurge of fighting in almost four years of war.

Associated Press.

TOGETHER—President-elect Jimmy Carter and his vice-president, Walter Mondale, in Plains, Ga., before giving a joint news conference, their first since the elections.

Unanswered Questions

Soviet Felicitations to Carter Reflect Doubt

MOSCOW, Nov. 5 (NYT).—The Soviet government expressed hope today for continued improvement in Soviet-U.S. relations during Jimmy Carter's presidency, but it did so with a trace of uncertainty that seemed to reflect unanswered questions here about what foreign policy will emerge under a Carter administration.

Soviet President Nikolai Podgorny sent Mr. Carter a congratulatory telegram that was a shade less confident about future relations than similar messages to former President Richard Nixon in 1972 and President Ford in 1974.

Furthermore, in a major address this evening, Politburo member Fyodor Kulakov gave the President-elect an oblique reminder that he should feel himself bound by pledges of the previous administration to negotiate a new treaty to limit strategic nuclear arms.

The Russians have long regarded such an agreement, to be known as SALT-2, as a centerpiece of Soviet-U.S. relations. Soviet officials have made no secret of their disappointment with what they consider President Ford's susceptibility to conservative political pressure in his failure to complete negotiations.

Speaking in the Kremlin at the opening celebrations of the 59th anniversary of the Bolshevik Revolution, Mr. Kulakov recalled the Vladivostok accord of November, 1974, in which Mr. Ford and Communist party leader Leonid Brezhnev outlined a new SALT agreement.

"It would be hoped," Mr. Kulakov said, that newly elected leaders "will abide by the accords reached earlier."

Mr. Podgorny's message to Mr. Carter said after congratulation him:

"In recent years the joint efforts of both sides have secured a turn for the better in relations between the U.S.S.R. and the U.S.A. and have created a good foundation for their stable development.

"We should like to hope that in the forthcoming period our countries will manage to achieve further progress along this road . . ."

To Brief Carter Team

Kissinger's Plans for Transition

By Bernard Gwertzman

WASHINGTON, Nov. 5 (NYT).—With his plans for further foreign policy initiatives canceled by the election results, Secretary of State Henry Kissinger ordered the State Department yesterday to cooperate fully with the incoming Carter administration "to assure an orderly and creative transition."

Lawrence Eagleburger, Mr. Kissinger's closest adviser, was named to head a high-level transition committee that was instructed by the secretary of state to open up departmennt files and assign personnel to help President-elect Jimmy Carter's aides take over the management of foreign affairs on Jan. 20.

At the Pentagon, Defense Secretary Donald Rumsfeld said that he had directed defense officials to be as "cooperative as possible" with Carter representatives during the transition period "so that when they assume responsibility they can be in a position to hit the ground running."

Mr. Kissinger, in a statement sent to all missions abroad and released here, said: "All foreign governments should be aware that this administration will, in the time remaining to it, continue to support America's friends and resist its adversaries."

America's Resolve

"No nation need feel any concern that we might fail to meet our commitments; no nation should mistakenly believe that this is a time to test America's resolve," Mr. Kissinger said. "We intend to turn over a functioning foreign policy to the new administration."

In practice, officials said, the outgoing administration will probably avoid any major new initiatives in foreign policy that can be prudently left to the Carter administration. But the Ford administration will continue to take responsibility for diplomatic problems that require urgent attention.

In addition, if a national emergency develops between now and Jan. 20, the Carter team will be contacted and asked for its views to try and put together a consensus. But officials stressed that until the Ford administration has had a chance to talk to Mr. Carter's aides, it was not known what degree of consultation will take place.

If President Ford had been elected, Mr. Kissinger had a number of diplomatic moves under consideration. For instance, he probably would have flown to Peking before the end of the year to contact the new Chinese leadership, he would probably have taken the lead in trying to conclude the drawn-out Strategic Arms Limitation Talks, and he would have taken a new look at restarting Middle East diplomatic efforts.

For the moment, however, all

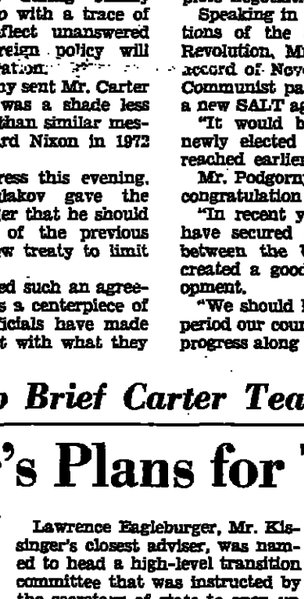
(Continued on Page 3, Col. 1)

Fukuda Quits to Oppose Miki For Japanese Premiership

TOKYO, Nov. 5 (Reuters).—Deputy Premier Takeo Fukuda resigned today to launch his campaign to replace Premier Takeo Miki.

Mr. Fukuda, already nominated by two-thirds of the members of the ruling Liberal Democratic party as their candidate for the premiership, has been a leading figure in a campaign to topple Mr. Miki.

He told a council of party opponents of the Premier today that he had "borne the unbearable" in remaining in the Miki Cabinet to steer important economic legislation during a special session of the Diet (parliament), which ended last night.



Mr. Miki has been under fire for six months for alleged weak leadership and his handling of the Lockheed bribery scandal, which has reached high into the Japanese establishment.

Former Premier Kakuei Tanaka has been indicted on charges of receiving a bribe from the U.S. company while in office.

Mr. Fukuda, 71, will be making his third attempt in 4 1/2 years to become premier. He told the council he would now work for the reconstruction of the party before the general elections on Dec. 5.

He also resigned as director-general of the government's Economic Planning Agency.

Mr. Miki said he tried to persuade Mr. Fukuda to stay on.

UPI.

Takeo Fukuda yesterday

Despite the strong party pressure for six months, the Premier has refused to resign. Mr. Miki won another battle for his political survival last week when a special party convention scheduled for Oct. 31 was postponed

(Continued on Page 2, Col. 8)

Carter Declares He Has Mandate For His Program

By James T. Wooten

PLAINS, Ga., Nov. 5 (NYT).—Jimmy Carter said yesterday that he saw his narrow victory over President Ford as a sufficient mandate for him to achieve the programs, policies and reforms he proposed during his long campaign.

In his first news conference as President-elect, he maintained that despite the slim margin of his triumph he felt confident of the support of Congress and the electorate.

The 52-year-old Democrat struck a conciliatory note toward Mr. Ford, promising to work closely with him in the 2 1/2 months of transition, and said the election showed that millions of Americans respected the President and approved of his approach to government.

Mr. Carter also said that there was a "very strong possibility" of a payroll tax cut in January if the economy did not improve, that he would not name any Cabinet officers before December, and that other nations could count on continuity between the Ford and Carter administrations on foreign policy matters.

He said to a Congress waiting to hear it, more than to assembled reporters, that he would "work intimately with Congress on a bipartisan basis" to attain his goals. But he noted he was depending on cooperation from Capitol Hill and the public.

Calls Margin 'Typical'

"I wish I could have carried all 50 states," he acknowledged in one of a number of questions about whether his mandate was sufficient to govern successfully. But he said he believed that his margin was "fairly typical" and would be sufficient.

The President-elect thanked the voters, his campaigners and the defeated President for their expressions of confidence and offers of assistance in the transition to the new, Democratic administration.

And he renewed his pledges to give Vice-President-elect Walter Mondale a larger role than any predecessor and to hold at least two "full-scale" news conferences each month in the White House.

Asked about his proposed changes in government, such as reorganization and tax reform, and whether he had a sufficient mandate to carry them out, Mr. Carter said he believed that he had. He said his vote had been broadly based, that his electoral vote was similar to that of past close elections and that he had a clear majority.

Because there had been a "clear discussion" of issues during the campaign and with a Democratic Congress, he said he believed that his reforms were possible and would be achieved.

Tax Cut Weighed

Mr. Carter called it "a strong possibility" that he would heed the recommendations of economic advisers and propose an additional federal tax cut early next year if the economy appeared to be "as stagnant" as he said it was today. He said the reduction of income taxes would, in such a situation, be directed primarily at those with the lowest incomes.

Smiling, the President-elect said, though, that he was not certain if it would be necessary and that, before taking office, he was not required to be too specific about the nature of a possible tax cut.

Asked about foreign policy priorities, Mr. Carter said he would seek to restore good relations with allies and open up the policy-making process to Congress and the American people.

During the next few weeks, he said, a two-day session would be held with foreign policy leaders, perhaps including the present administration, and with congressional leaders.

He said he was hopeful that problems in the Middle East could be alleviate, but did not offer specifics.

He added that there would be continuity in policies and that within the next few weeks he might meet with President Ford and administration officials for briefings. He assured the nation's allies and adversaries that he would constantly search for peace.

He indicated that he did not expect to pick any Cabinet officers until December. Mr. Carter said that he wanted a methodical, careful analysis of

(Continued on Page 3, Col. 3)

Carter Planning To Meet Press Twice Monthly

PLAINS, Ga., Nov. 5 (AP).—President-elect Jimmy Carter said yesterday he hoped to hold at least two full-scale news conferences a month after he takes office in January.

In his opening remarks in his first nationally broadcast meeting with reporters since Tuesday's election, Mr. Carter said: "This will be the first of many press conferences I hope to hold during the next four years. I hope I can have at least two full-scale press conferences a month while I am president."

He said news conferences will be less frequent in the next 12 weeks before his inauguration Jan. 20, but "we anticipate another one in about two weeks."

Spain's Opposition Threatens Boycott Campaign on Reform

MADRID, Nov. 5 (UPI).—Spain's main leftist opposition groups today threatened "a campaign of active boycott" against a scheduled referendum on democratic reform unless the government accepts a series of conditions including legalization of the Communist party.

The opposition groups—in a statement issued after a meeting in the Canary Islands—also demanded participation in the control of the referendum and full and equal access to the state-controlled television and radio.

The referendum on constitutional reform was originally planned for last month but has been put off until next month. A government crisis last July and heel-dragging on reform legislation by the Cortes, the conservative-dominated Franco-era parliament, caused the delay.

The opposition statement charged that the referendum was part of the government policy of Premier Adolfo Suarez "to try to retain the power monopoly held by the same class during 37 years."

Board Meets

The Canary Islands meeting was the first meeting of the 20-man executive board of the new Platform of Democratic Organizations, a national alliance dominated by Socialists and Communists.

The other demands by the platform were:

• Legalization of all political parties and labor groups including the outlawed Communist party.

• Amnesty for Spain's remaining 300 political prisoners and return of exiled politicians.

• Scrapping of a Franco-era anti-terrorist law and abolition of the Public Order Court, the political arm of the judiciary.

• "Any referendum that is called without fulfilling the conditions will be rejected by the Platform of Democratic Organizations which will then begin a campaign of active boycott," the statement said.

Backs General Strike

The alliance also expressed backing for a nationwide one-day general strike—Spain's first in more than 40 years—called for next Friday by left-wing labor groups as a protest against the government's economic policy and in support of a 6,000 peseta ($90) a month pay increase for all Spanish workers.

The sharpness of the statement belied reports that the opposition has come to a tacit agreement with the government to refrain from any actions that would provoke the rightists to act against reform legislation.

U.S., Prague to End Envoys' Travel Bans

PRAGUE, Nov. 5 (Reuters).—Czechoslovakia and the United States have each agreed to end the system of barring large areas of their territory to the other nation's diplomats, the U.S. Embassy announced.

Such restrictions, in effect since 1963, could be described as a remnant of the cold war. Negotiations on a reciprocal abolition of the "closed areas" had been going on here for some time.

ip by CIA Led to Nice Arrests, rench Report

ARIS, Nov. 5 (AP).—Albert ggiari, the former paratrooper ged with organizing the $10-ion subterranean bank theft ice, was captured because he ged to the U.S. Central Intelence Agency about his feat, ch police sources reported y.

ggiari, 40, was arrested on 27 and charged with masterding the gang that tunneled the bank through the city's r system in July. Spaggiari ed he gave his share of the to an underground internaal anti-Communist organiza-

nch police investigators disd that they were first put his trail by a tip the CIA mitted through Interpol ly after Spaggiari visited the ed States in September.

e sources gave this account: went to New York, Miami Washington, apparently look-for a restaurant to buy with of the stolen money. When fell through, he went to headquarters in Washington offered to break into any enty the agency wanted burgled. n CIA officials asked for his erences" as a burglar, Spagi boasted that he organized Nice robbery.

Giscard Asks Panel to Rule On European Parliament Vote

By James Goldsborough

PARIS, Nov. 5 (IHT).—Faced with increasing Gaullist hostility to his proposed plans for direct elections to the European Parliament, President Valéry Giscard d'Estaing asked a government council today for a definitive ruling on the constitutionality of the vote.

It is an unusual procedure and has its risks. Mr. Giscard d'Estaing met today with Roger Frey, a former Gaullist party leader who is now the president of the Constitutional Council, and Mr. Frey announced after the meeting that the council would rule on the elections.

The move became necessary after former Prime Minister Michel Debré announced that he and other Gaullists would oppose the European Economic Community's decision to hold the elections, scheduled for early 1978. He called the decision an "abandonment of sovereignty," and said it could not be done without revising the Constitution.

The issue is a potentially divisive one for the government because the factions that compose the majority—Gaullists, Independent Republicans and centrists—do not hold the same views. But it also threatens to divide the opposition, for the Socialists have been defenders of the vote and the Communists have been strongly opposed.

Chirac, Giscard Meet

The elections were suspected to have been one of the subjects of conversation yesterday between the President and former Prime Minister Jacques Chirac at their first meeting since Mr. Chirac's resignation in August.

Since then, Mr. Chirac's political activities have given the impression of growing differences between the President and the former Prime Minister. Mr. Chirac refused all comment after the 70-minute meeting.

Mr. Frey, still a powerful man in the Gaullist party, also refused comment after his meeting with the President today. The nine-member council that he heads is expected to reach its decision in about a month.

The council's decision is usually decisive, but it is not legally binding. In 1962, the council opposed President Charles de Gaulle's national referendum on direct election of the French president, but the referendum was held anyway, with the measure approved.

The debate on direct elections is expected to be the most heated since that on a capital-gains tax last spring, and it is also the first one since then on which Mr. Giscard d'Estaing has fully engaged his prestige. If the council rules that the French can participate in such an election without amending the Constitution, as is expected, then it will be up to parliament to approve the government bill, with the attendant risk of the bill failing.

Another problem is that the Socialists, on whom the government will have to count if the Gaullists join the Communists in opposition, have said they would support the measure only if the National Assembly approves proportional elections. The Gaullists, however, are strong opponents of proportional voting, which is not used in any other elections here.

The government position is that, in accepting the Treaty of Rome in 1957, the National Assembly accepted the provision for direct elections, and that the Constitution is not affected. The Gaullists, led by Mr. Debré, take an opposing view.

The EEC nations finally agreed last September to hold the direct elections in May or June, 1978, to increase the democratic controls of the European Parliament over Community affairs. It took long months of difficult negotiations before the Nine could agree on the distribution of the 410 seats in the new parliament.

France is not the only nation in which difficulties have developed. The British Labor party also has taken a firm stance against the elections. As a French official commented today, however, the debate has not really heated up yet in Britain, as it has here, because "the British have other things to worry about."

His Castle Wasn't Home

REHOBOTH BEAR, Del., Nov. 5 (UPI).—State police have arrested a 45-year-old Delaware man for possession of stolen property—a house.

Albert Zecca of New Castle was arrested yesterday and charged with illegally possessing a $20,000 modular house.

The house, removed this summer from a modular home park here, was found behind Mr. Zecca's home.

Police said they had no idea how the house was moved.

Associated Press.

SOMEONE HAD TO THINK OF IT—Sand for use on icy roads. A sandcan operated from inside the car is shown at Nuremberg inventors' fair. It can be refilled whenever need be. It's simple, it should work.

Chinese Stay at Kremlin Fete For the First Time in 5 Years

MOSCOW, Nov. 5 (AP).—For the first time in five years, the Chinese representative has not walked out on the annual Kremlin commemoration of the 1917 Bolshevik revolution.

The decision to remain by Chinese chargé d'affaires Wang Chin-ching was apparently in response to the moderate tone of remarks on Soviet-Chinese relations by the program's main speaker, Soviet Communist party Politburo member Fyodor Kulakov.

Mr. Kulakov spoke for the party hierarchy today before thousands of Soviet and foreign representatives in the flower-decked Palace of Congresses.

"It must be said that we consider unjustified and unnatural the fact that friendly relations between the Soviet Union and the People's Republic of China have been disrupted, through no fault of our own, for almost 15 years now," he told the gathering.

A Moderate Line

Mr. Kulakov then recalled Communist party leader Leonid Brezhnev's speech last month to a meeting of the party Central Committee, in which Mr. Brezhnev also took a moderate line and called for improved Chinese-Soviet relations.

By contrast, the chief speaker at last year's Soviet revolution anniversary program had cited "the enormous damage that is being done by the Maoists' great-power and hegemonistic policy to the cause of socialism and to the Chinese people themselves."

Soviet officials have refrained from harsh language against the Chinese since the death of Chairman Mao Tse-tung in September, publicly leaving open the door for a warming of relations with the new Chinese leadership under Hua Kuo-feng.

So far, however, there have been no clear indications from Peking that the Chinese are interested in accepting the Soviet olive branch. Recent speeches by Chinese officials at the United Nations have included sharp criticism of Moscow.

Peking Shuns Reception

TOKYO, Nov. 5 (AP).—China's top leaders failed to attend a Soviet reception in Peking today celebrating the 59th anniversary of the Bolshevik Revolution.

The party was given by V.S. Tolstikov, Soviet ambassador to China, the Chinese news agency said.

Mr. Hua and other top Chinese leaders were absent. A broadcast monitored in Tokyo said that Chinese officials who did show up at the event included Yu Chan, vice-foreign minister; Chen Chieh, vice-minister of foreign trade, and Ho Cheng-wen, deputy chief of the general staff of the hinese People's Liberation Army.

Soviet Film Suddenly Finds Favor in China

HONG KONG, Nov. 5—For the first time in at least a decade, a movie made in the Soviet Union is appearing on television in the southern Chinese city of Canton, the Los Angeles Times reported.

The movie depicts "reactionaries' plots" to assassinate Lenin. This is strikingly parallel to one of the charges leveled against the four "radical" Chinese leaders who were purged last month—that they plotted to kill new Communist party Chairman Hua Kuo-feng.

The film, called "Lenin in 1918," was produced in 1939. It includes a character who resembles Chiang Ching, the purged widow of Chairman Mao Tse-tung, who is considered the radicals' leader.

'As Far Apart as Far Apart Can Be'

Geneva Talks Still Stalled on Independence

GENEVA, Nov. 5 (Reuters).—Delegates at the British-sponsored Rhodesia conference failed again today to set a date for the breakaway colony's legal independence.

One nationalist leader, the Rev. Ndabaningi Sithole, said black and white negotiating positions were "as far apart as far apart can be" and he blamed the white Rhodesian delegation for preventing progress.

A two-hour meeting of one white and four black teams at the talks broke up with most delegation leaders indicating to journalists that the session had made little progress.

Before it began, nationalist leader Joshua Nkomo said there was a risk of chaos and insurrection in Rhodesia unless it was granted independence within 12 months.

The nationalists have turned down a British proposal for independence at the beginning of March, 1978.

Britain is hoping that if the slow-moving conference can fix an independence day delegates will be able to bridge the wide negotiations to bridge the wide gulf between blacks and whites over how power should be transferred from Rhodesia's 270,000 whites to its 6 million blacks.

After today's meeting, Rhodesian Foreign Minister Pieter van der Byl, who is leading the white delegation at the talks in the absence of Prime Minister Ian Smith, told reporters: "It has gone on and nothing really has happened—our position remains unchanged."

The delegations, under the chairmanship of Ivor Richard, Britain's ambassador to the United Nations, began negotiations last Wednesday on fixing an independence date, and had inconclusive informal talks yesterday.

The nationalist leaders—Mr. Sithole, Bishop Abel Muzorewa, Mr. Nkomo and Robert Mugabe—are demanding that independence under black majority rule must come in 12 months or less. They have proposed Sept. 1, 1977, as independence day.

But Mr. van der Byl has said there could only be minor reductions in the position of Rhodesia's white minority government, that the various processes for independence will take around two years, and any shorter period would be impractical.

British conference sources said there was no shift in the various positions at today's plenary session in Geneva's Palais des Nations.

Mr. Richard told reporters after the session: "We had a further thorough discussion on the subject of fixing a date for independence. We have not yet reached a conclusion. We will continue our consultations bilaterally. The tone of the meetings was friendly and good."

Associated Press.

Water pouring out of the Arno into the streets of Florence, Nov. 4, 1966.

But Communist Mayor Has Ideas

Florence Still Haunted by 1966 Flooding

FLORENCE, Nov. 5 (AP).—This Renaissance city is still exposed to threats of floods 10 years after the waters of the Arno killed dozens of people and caused $25 million in damages to art works.

The memories of Nov. 4, 1966, were accentuated by heavy rains throughout Italy yesterday that flooded many areas from Venice to farmlands south of Naples. The Arno stayed well within its banks this time and damage elsewhere was limited.

In 1966, 113 persons were killed in the floods that covered large portions of the Italian peninsula. This city drew the most concern, because of the damage to its art treasures.

"It's been ten years since the big flood and where are we now?" Communist Mayor Elio Gabbuggiani said in a recent interview. "Not one thing has been done yet to control the Arno and prevent it all from happening again."

Restoration experts have been working since then on the estimated 1,200 paintings and thousands of illuminated books that were damaged by the waters. Authorities say the job is about half finished.

The most celebrated victim of the flood, a 13th-century crucifix by Giovanni Cimabue, was submerged for days and lost major portions of paint. What is left of it is almost ready to go back on display.

There have been many ideas about how to control the Arno—dredge the riverbed, reconstruct the bridge bases to prevent them from forming dams with entangled debris or dig artificial lakes to drain off any overflow. But nothing has been done.

The regional government recently launched a study of the problem.

Mr. Gabbuggiani accuses the national government of virtually "abandoning" the city after the flood, but he also blames the former Christian Democratic local administration.

Mr. Gabbuggiani, who became the first Communist mayor of this city last year, noted that "since 1965, there have been eight different city administrations, some of them lasting only a matter of months."

He has pushed through a "Florence Project" for urban renewal over Christian Democratic opposition. The project aims to revitalize the artisan backbone of the city's economy, restore the central city without destroying its historical authenticity and reorganize development planning.

He said the city's prison will be moved to a location on the outskirts rather than in the center, and studies have begun on the feasibility of running the railroad tracks under the city at a depth of 34 meters.

U.S. Active In Lebanon

(Continued from Page 1)

in the last few days, with all but the Phalangists opposed to allowing the peace forces into sectors they control.

Meanwhile, the Palestine Liberation Organization, as well as leftist leaders, objected to the appointment of Lebanese Col. Ahmed al-Hajj as military commander of the force.

The Palestinians and leftists called the appointment "an open violation" of the Arab peace plan for Lebanon, which they contend calls for a non-Lebanese Arab commander.

Col. Hajj, 45, is a Sunni Moslem. Although he has managed to remain out of most of the fighting, he is more favored by the rightists than the leftists.

Fighting continued in Beirut on the line dividing the city as the rival factions traded rocket, mortar and machine-gun fire.

Shelling of residential districts was heavy as well, with the west Beirut neighborhood of Sabra receiving a particularly heavy pounding. Clashes also occurred between extremist "rejection front" Palestinians and the el-Fatah group in west Beirut. Sporadic internal fights were also reported between rival rightist militias.

Ready for Talks

BEIRUT, Nov. 5 (AP).—George Habash, the leader of the Palestinian movement's extremists, said today that mainline guerrillas of el-Fatah headed by Yassir Arafat, are ready to negotiate with Israel and accept a Palestinian mini-state.

But Mr. Habash, chief of the Popular Front for the Liberation of Palestine, said that his rejection front will never stop armed attacks on Israel, no matter what the others settle for.

"It is inevitable that our struggle should continue against the Zionist enemy as long as there is something called Israel on any part of Palestinian soil," he added in a newspaper interview.

INTERPOL VICTIM?

The National Commission on Law Enforcement and Social Justice in the United States has been conducting an investigation into INTERPOL, the private French-based police organization. If you have been abused or victimized by INTERPOL or harassed by possible false INTERPOL files, we want to help. Most people are unaware that INTERPOL may be the source of this harassment. If you know or suspect INTERPOL harassment, please contact: Barclay Bean, 2125 "S" St. NW, Washington, D.C., U.S.A., or phone (in Washington, D.C.): (202) 797-9839, or 797-8281

Mrs. Peron Wins A Round in Court

BUENOS AIRES, Nov. 5 (AP).—An Argentine appeals court yesterday upheld a lower court in acquitting former President Isabel Peron of fraud charges in a case involving a check for $700,000.

However, the court said Mrs. Peron, 45, will remain in custody because she still is being prosecuted on other charges of alleged misuse of public funds.

Mrs. Peron was overthrown in a coup in March and has been under arrest since then.

Prostitutes in Madrid May Name Top Clients

MADRID, Nov. 5 (Reuters).—Madrid prostitutes have threatened to divulge the names of their clients who hold high-ranking government posts if the authorities do not legalize their profession, the newspaper Diario 16 reported today.

A young prostitute called Maria, who said that her earnings paid for her studies at Madrid University, was quoted as saying: "If the present situation continues, we are ready to publish names of eminent clients who occupy senior posts in the highest spheres of the administration." The women are demanding the legalization of brothels and the banning of foreign competition, mainly French and Portuguese.

A French Journalist Slips Out of Israel

TEL AVIV, Nov. 5 (UPI).—Israeli officials blamed a bureaucratic snaf for permitting French journalist Josette Alia to slip out of the country despite a court order barring her departure pending payment of damages by her magazine, Le Nouvel Observateur.

A police spokesman said that the journalist managed to leave last night because passport controls had not been informed of her legal name, Josette Ben Brahem.

In Paris today, Miss Alia said that she has never been told by Israeli authorities that she could not leave the country.

9 Alps Passes Closed

GENEVA, Nov. 5 (AP).—Snowfalls have closed nine mountain pases in the Swiss Alps, among them three on the main roads from Switzerland to Italy.

Academy Expels Hajek, Former Prague Minister

VIENNA, Nov. 5 (NYT).—Former Czechoslovak Foreign Minister Jiri Hajek, who in 1968 appeared before the United Nations Security Council to protest against his country's invasion by Soviet and other Warsaw Pact troops, this week suffered disciplinary action.

Mr. Hajek, a 63-year-old historian, was informed by the Czechoslovak Academy of Sciences that his membership had been canceled on orders from the government.

The former minister, reached by telephone at his apartment in Prague, said no reason was given for his exclusion from the institution to which he was elected as a corresponding member in 1965.

He said he had been subjected to minor unpleasantness lately, "but this is of no importance." According to some reports, the former minister was recently attacked and jostled by unidentified men in a Prague street.

Over the phone, Mr. Hajek said he had sent letters to the academy and to Premier Lubomir Strougal to ask for the reasons of his ouster from the institution.

Ceausescu Commutes Two Death Sentences

BUCHAREST, Nov. 5 (AP).—President Nicolae Ceausescu of Romania has commuted death sentences imposed on two officials for industrial espionage, the Romanian news agency Agerpres reported.

The presidential pardon came after the Supreme Court turned down appeals of the defendants.

U.S. and Mexico Reach Agreement On Prisoner Pact

WASHINGTON, Nov. 5 (AP).—The United States and Mexico have reached general agreement on a treaty that would allow about 600 Americans now in Mexican jails to be transferred to U.S. prisons, the State Department announced today.

Some 1,200 Mexicans in U.S. federal prisons similarly would have the option of returning home. Most of the Americans serving time in Mexico were convicted of drug offenses. In many instances, they have complained of maltreatment and lack of access to U.S. consular officials and lawyers.

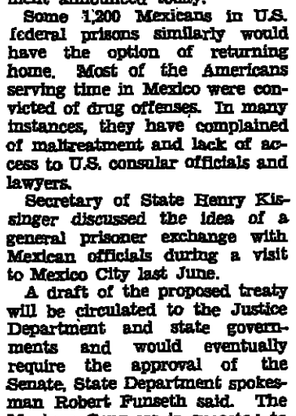
Secretary of State Henry Kissinger discussed the idea of a general prisoner exchange with Mexican officials during a visit to Mexico City last June.

A draft of the proposed treaty will be circulated to the Justice Department and state governments and would eventually require the approval of the Senate, State Department spokesman Robert Funseth said. The Mexican Congress is expected to approve the pact.

Three Held in Threat Against Philadelphia

PHILADELPHIA, Nov. 5 (AP).—Three men have been charged with threatening to contaminate Philadelphia's water supply with heating oil unless their demand for $1 million was met.

The men, pipe fitters at the naval shipyard here, were arrested Wednesday and charged with theft by extortion, making terroristic threats and criminal conspiracy. The police said they were David Nugent, 37, Louis Scott, 25, and Kevin Grosso, 23.



Ransom of $2 Million Frees W. German Supermarket Heir

MUENSTER, West Germany, Nov. 5 (AP).—A kidnapped West German heir to a supermarket fortune and Olympic horseman was freed today for a 5-million deutsche mark (about $2 million) ransom, police said.

Hendrik Snoek, a reserve rider on West Germany's Olympic equestrian team at Montreal, was discovered in a hollow shaft on a bridge two days after he was abducted. He attracted attention by dropping little bits of paper from a hole in the structure, which supports a double-lane highway and spans a valley. Mr. Snoek, 37, was the second scion of a West German supermarket fortune to be kidnapped in the last two months.

On Oct. 8, Wolf Gutberlet, 32, who with his father owns a chain of supermarkets and drugstores in the state of Hesse, was kidnapped and held for seven days before being ransomed for 2 million marks. Police quickly arrested three of four suspected kidnappers and recovered the money.

Police hushed up Mr. Snoek's abduction until he was released. They said they were trying to determine whether there was a link between Mr. Snoek's abduction and an anonymous kidnapping threat against his sister Marion two years ago.

AP.

Hendrik Snoek

Police said Mr. Snoek was abducted from his Muenster apartment early Wednesday morning and released at noon today in the vicinity of the Hessian town of Herborn.

About 11 hours earlier, a friend of the victim delivered the ransom to a prearranged pickup point on the autobahn south of Muenster.

Labor Loses By-Elections

(Continued from Page 1)

the House of Commons—a majority of two against the combined opposition's 313. Now the Labor coalition has 316 and the opposition 315.

The government can still continue to function since smaller opposition groups rarely unite against it. But it may fail to get a series of major bills through next week.

Some highly controversial bills, including the nationalization of shipbuilding and aircraft industries, are due for urgent consideration.

Despite these difficulties, the government is not expected to call an election soon with public opinion running against it.

Labor leaders today bitterly reflected on reports that voters had been dispirited by the party's "left-wing image."

Election Disaster

The strong Labor left wing, which gained ground recently and has opposed the government's austerity measures, will come under increased pressure from Mr. Callaghan to be more loyal or face possible election disaster.

A worry looming up for the government is the planned resignation from the House of Commons of former Home Secretary Roy Jenkins, who becomes president of the European Economic Community Commission next year. This could mean another by-election early in the new year and Labor may then lose its majority.

Commons Demonstration

LONDON, Nov. 5 (Reuters).—Welsh language demonstrators hurled pink leaflets from the public gallery into the House of Commons today, interrupting a debate on Wales.

A spokesman for the Welsh Language Society said that the group had protested against broadcasting arrangements in Wales, where the society wants the government to establish Britain's fourth television channel.

French Connection Reported Neutralized

MARSEILLES, Nov. 5 (Reuters).—The French Connection, the lucrative trade in narcotics from here to North America, has been broken, drug control officials of France, the United States and Canada declared today.

But they said that it has been replaced by the Asian Golden Triangle of Burma, Laos and Thailand, which are now the main source of drugs sold on the streets of North American cities. The officials said in a communiqué after a meeting here: "The French Connection has been totally neutralized."

House in India Affirms Delay In Elections for Another Year

By William Borders

NEW DELHI, Nov. 5 (NYT).—Over the protests of the small but voluble opposition, the lower house of the Indian Parliament voted today to postpone national elections for another year.

The postponement, which was the second since the government declared a state of emergency and suspended civil liberties 16 months ago, was seen by Prime Minister Indira Gandhi's critics as a significant milestone in the dismantling of India's democratic institutions.

Mrs. Gandhi's government announced last Saturday that the elections would be postponed.

"The general impression around the country is that the ruling party wants to avoid elections for its own advantage," said Indrajit Gupta, a leader of the pro-Moscow Communist party of India, which used to be a firm parliamentary ally of the Prime Minister. "This is the beginning of the end of parliamentary democracy, to deny people's most cherished right of voting."

The vote today was the climax of one of the most momentous weeks since the declaration of the emergency on June 26, 1975. On Tuesday, in another major move, the house adopted a far-reaching set of constitutional amendments that will reorder the balances of government, concentrating power in the hands of the Parliament and the Prime Minister.

Vote Is 180 to 34

Today, with the Communists voting against the government and most of the other opposition members continuing their boycott of Parliament, the vote to postpone elections was 180 to 34. The bill now goes to the largely ceremonial upper house, where approval is considered a foregone conclusion.

The government maintains that an election would have a disrupting effect on the country and threaten the disciplined mood of India's new political order.

"We have come to a stage where we are beginning to feel that certain things—particularly economic—are beginning to stabilize," Law Minister H.R. Gokhale told the house this afternoon just before the vote. "This situation should not be disturbed for the time being."

Mr. Gokhale disputed opposition statements that the postponement of the election, which was to have been held before next March, would strike a blow at democracy.

"What is being done is not at all to destroy democracy, but to maintain and protect that democracy," Mr. Gokhale declared. "We have said repeatedly that this country would not deviate from the path of democracy."

A Year at a Time

Under the Constitution, the Parliament can postpone elections one year at a time for as long as the state of emergency is in force and the emergency can last as long as the government wants it to.

The present Parliament, which is dominated by Prime Minister Indira Gandhi's Congress party, was elected in 1971, with a five-year mandate that expired last March. In February, the Parliament extended its life by a year. The bill voted today will extend its life by another year, to March of 1977.

As Mr. Gokhale pointed out, however, there could be an election before that date, since Prime Minister can dissolve Parliament at any time.

Fukuda Quits To Seek Post

(Continued from Page 1)

until after the December party elections.

The Premier has vowed to get to the bottom of the full extent of the Lockheed scandal regardless of the political implications.

Following Mr. Fukuda's resignation, Mr. Miki presided over a scheduled over a National Security Council meeting to discuss military expenditure. He then held a regular Cabinet session.

Among those attending Mr. Miki's other bitter rivals within the Cabinet, Finance Minister Masayoshi Ohira. Mr. Ohira said this morning he did not intend to resign.

4 MPs Charged

TOKYO, Nov. 5.—Four members of parliament from the ruling Liberal Democratic party were officially accused yesterday of receiving a total of $[illegible] in secret payments from the Lockheed Aircraft Corp., the Los Angeles Times reported.

The four, charged by the Budget Committee of the [illegible] the lower house of parliament, were:

- Susumu Nikaido, 67, the Cabinet secretary in Mr. Tanaka's administration, who was accused of accepting a bribe of $[illegible].
- Hideyo Sasaki, 67, transportation minister in Mr. Tanaka's first Cabinet, $10,000.
- Kazunori Fukunaga, chairman of the ruling party's aviation Committee under Mr. Tanaka, $10,000.
- Mitsuki Kato, 50, vice-minister of transportation in Mr. Tanaka's first Cabinet, $6,667.

Mr. Tanaka, 58, was accused of receiving a Lockheed payment of $[illegible] in addition to a $1.8-million bribe he was charged with receiving in an indictment on Aug. 16.

Ford Is Undecided on Future, Aides Say, but Not Insecure

By Edward Walsh

WASHINGTON, Nov. 5 (WP).—President Ford has made no firm decisions on what he will do after he leaves office in January and probably has not even thought much about his future, according to numerous White House aides.

The President leaves Sunday for a week of rest and golf in Palm Springs, Calif., and it is there, his aides believe, that he will begin sorting out his plans. Whatever he decides, Mr. Ford will enjoy the full benefits provided to all former presidents and can look forward to a financially secure future.

He is already well off financially. In a net-worth statement released earlier this year, he reported he has $524,000 in total assets, the bulk of it in real estate, and only $1,200 in debts.

His salary as President is $200,000 a year, and when he leaves office he will still receive pension benefits totaling about $100,000 from his government service, $63,000 of it under the Presidential Pension Act.

Custody of Papers

Two separate laws govern what other services and facilities Mr. Ford will receive after he leaves office.

Under one, up to $1 million is available for the first six months after he leaves office to provide various services. These include office space at a site he chooses, staff, the deployment of other employees from government agencies, a travel allowance and communications equipment.

After this period, the benefits are covered by the Former Presidents Act, which provides an office and up to $96,000 a year in pay salaries.

The President will also have custody of his own papers and his designated military aide, Army Maj. Robert Barrett, to handle the accumulation and transportation of his papers and other belongings.

But where the papers will end up—one clear possibility is Mr. Ford's alma mater, the University of Michigan—is as uncertain as his other plans.

One reason there is uncertainty about the President's plans is that he has spent so much time in Washington and has been so much a part of the Washington scene it is hard to imagine him anywhere else. Unlike a Dwight Eisenhower or Lyndon Johnson, he has no farm in Pennsylvania or ranch in Texas to go home to.

Possible Future Homes

Mr. Ford does own a house in Grand Rapids, Mich., and holds genuine affection for the city and its people. But the house is small and rented and the President has been away from Grand Rapids for so long that the people around him doubt he will end up where he started.

More likely, his aides say, he may spend considerable time in Vail, Colo., where he owns a condominium and can ski in the winter and golf in the summer, and Palm Springs, where he stays at friends' homes and can golf year-round.

Others point out that Mrs. Ford prefers warm weather, another argument for a place like Palm Springs.

The President also owns a house in Alexandria, Va., which is also rented. Many of those around him believe Mr. Ford will continue to spend time in the Washington area, but whether it would be at the Alexandria home or elsewhere is not clear.

The President's aides also expect him to remain active after he leaves office, but in what capacity they do not know. "I suppose there will be Ford memoirs," one said, "but that is not high on his priority list."

Today, the President got a standing ovation from his Cabinet, told them "we lost a close one" and praised the job they have done in his administration.

Mr. Ford still was feeling "terribly disappointed but not brokenhearted" over Tuesday's election defeat, aides reported.

OPEN AIR—President-elect Jimmy Carter speaking from rostrum at the onetime railroad station in Plains, Ga., during his open-air news conference.

UPI.

Carter Terms Mandate His

(Continued from Page 1)

various candidates for the key positions, such as went into his choice of Mr. Mondale as his vice-presidential candidate.

In reply to one question, Mr. Carter said he did not wish to try, as President-elect, to make policy for a government still headed by President Ford. Mr. Ford retains "full authority" until Jan. 20 "and I have none whatsoever," Mr. Carter said.

Pressed to say whether he would oppose an increase in oil prices by the producing nations, he said he would hope the producers "would be reticent" about setting off another round of energy inflation.

Asked if he had a timetable such as Franklin Roosevelt's first "100 days" to put into effect the many changes and reforms he had pledged, Mr. Carter said, "I intend to have it, but it is too early" to say what it will be.

Explaining that he had a thick bundle of recommendations on the formation of government, Mr. Carter said he hoped to assimilate the information in the next week, and that as he formulates priorities he would make them public.

Plains Is Good Enough

PLAINS, Ga., Nov. 5 (AP).—Mr. Carter will forgo lavish vacation homes in favor of his one-story brick home in this tiny farm town.

His press secretary, Jody Powell, told reporters yesterday that an additional presidential retreat "would be unnecessary and a waste." He noted that the government already maintains a presidential hideaway at Camp David in the Maryland mountains near Washington.

President Park Reported Angered on Spy Charges

U.S.-South Korean Ties Severedy Strained

By James P. Sterba

SEOUL, Nov. 5 (NYT).—Relations between the U.S. Embassy and President Park Chung Hee's government here have turned unusually chilly, and the South Korean leader is reportedly infuriated over allegations that U.S. agents eavesdropped on him in his office.

South Korean politicians and diplomats in Seoul said they had never seen relations between the two governments as strained as they are now. Subsequent to published charges in the United States that Mr. Park's agents attempted to buy congressional influence in Washington, U.S. diplomats here adopted an uncharacteristic posture of stiffness and formality in dealings with senior Korean officials.

The South Korean sources, some of whom have access to the President's inner circle of advisers, said Mr. Park is far more concerned about assertions of U.S. spying on him than he is about the election of Jimmy Carter to the presidency. Mr. Carter suggested in his campaign the possibility of withdrawing U.S. troops and tactical nuclear weapons from South Korea.

Significantly, the sources said, U.S. diplomats have not officially denied, either publicly or in private, published assertions in the United States that Mr. Park was under surveillance by U.S. intelligence equipment or operatives in his executive compound, called the "Blue House."

Left Dangling

"It certainly appears as though they are letting him dangle in the wind on that one," a Western diplomat said. Korean politicians echo that sentiment, saying it leaves Mr. Park open to ridicule in his own country.

"If the State Department is interested in preserving the relationship, those press reports should have been immediately and strongly denied even if they are true," a senior Korean lawmaker said. "What's involved here is a tremendous loss of face and that could have very serious consequences domestically."

Foreign Minister Park Tong Jin reportedly summoned Richard Sneider, the U.S. ambassador here, to a meeting Tuesday to request an official clarification from the U.S. government on charges of U.S. spying in the Blue House. The two men are said to have met last Saturday informally. Mr. Sneider reportedly told the foreign minister that if the State Department denied spying allegations, it would be put in a position of having to answer various other charges in detail and it was not prepared to do so.

U.S. officials have had no direct contact with President Park since the influence-peddling scandal was made public, according to South Korean officials.

'No Comment'

U.S. Embassy spokesmen would not acknowledge that any talks had taken place with the South Korean government. Because of the "highly sensitive nature of current matters," the embassy has adopted a posture similar to that imposed when the U.S. spy ship Pueblo was captured by the North Koreans, an official said. The embassy has had "no comment" on virtually all inquiries concerning U.S.-South Korean relations.

Although information about the charges of South Korean influence-peddling and U.S. spying is circulating by word of mouth in Seoul, most Koreans are not aware of the scandal because South Korean newspapers, under strict self-censorship guidelines, have not mentioned it. The same is true for radio and television stations, including the U.S. armed forces radio and television stations here. Articles in foreign newspapers and news magazines about the affair are clipped out before the publications are distributed.

Californian Is House Majority Whip

Rep. McFall Admits Taking $3,000 From South Korean

By Scott Armstrong and Maxine Cheshire

WASHINGTON, Nov. 5 (WP).—House Majority Whip John McFall of California, who ranks third in the House Democratic leadership, admitted yesterday that he received $3,000 in $100 bills from Washington-based South Korean businessman Tongsun Park in October, 1974. Before Rep. McFall was elected Tuesday to his 11th term in Congress, his administrative assistant, Raymond Barnes, speaking for the congressman, twice denied to Washington Post reporters that Rep. McFall had received money from Mr. Park.

Rep. McFall himself said yesterday that the money from Mr. Park was unsolicited and was put into his congressional office account, which is used for buying stationery and office supplies, printing newsletters and the like.

"I don't know what [the $3,000] was for," Rep. McFall told Washington Post reporters. "It came about campaign time. I was under the impression that it was illegal to accept a contribution from a foreign national, so I put it in my office account.

'Not Being Bribed'

"I'm not being bribed. I handled it legitimately."

[The Washington Star said yesterday that South Korea's ambassador to the United States in 1973 contributed $2,000 to a former California congressman's gubernatorial campaign and gave gifts to members of his family, the Associated Press reported.

[The newspaper also quoted a former embassy official, Jai Hyon Lee, as saying he saw the ambassador, Dong Jo Kim, "stuffing $100 bills" into "about two dozen plain white envelopes" and then rush off "to deliver them to the U.S. Capitol," the AP reported.

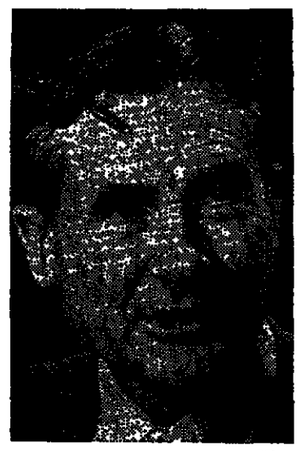
[The former congressman, Jerome Waldie, a Democrat, acknowledged receiving the contribution from Mr. Kim in his unsuccessful 1973 race but denied that the ambassador "ever asked me for anything," the Star said. Mr. Waldie also acknowledged that Mr. Kim gave gifts to his family.]

At least 22 and perhaps as many as 90 present and former congressmen are currently under federal investigation concerning allegations that they and other U.S. officials were given cash, campaign contributions, jewelry, furniture, vacations and other gifts by Tongsun Park and other agents of the South Korean government to influence U.S. attitudes toward the regime of President Park Chung Hee.

Petty Cash

Rep. McFall said that $2,400 of the cash from Tongsun Park was deposited in his office checking account, that the other $600 was divided between the petty cash funds of his congressional office and his House whip office.

He said the money can be completely accounted for by Mr. Barnes. However, Rep. McFall refused to make those or any other records available to The Post.



A law making it illegal for congressional candidates to accept campaign contributions from foreign nationals did not take effect until Jan. 1, 1975.

Any Source

According to a deputy House clerk, congressional office accounts are not official government accounts and can contain money from any source. If a congressman uses any of the money for personal purposes, he must report it on his income tax return.

Rep. McFall said he received the money from Tongsun Park in October, 1974, when a South Korean named Kim, who Rep. McFall knew worked for Mr. Park, arrived at Rep. McFall's office and gave Mr. Barnes a sealed envelope that contained the $3,000 in $100 bills. According to Rep. McFall, Mr. Barnes called him and said, "We got a contribution."

The Washington Post first learned four weeks ago from an associate of Tongsun Park about the money the South Korean gave to Rep. McFall. But when two reporters made separate calls to Rep. McFall's office about it before Tuesday's election, Mr. Barnes denied that Rep. McFall had received any money from Tongsun Park.

Rep. John McFall AP.

Proposal on Press at Unesco Appears Headed for Defeat

NAIROBI, Nov. 5 (UPI).—The United States and other Western nations led an apparently successful attack today on a UN agency proposal on the press that they said could lead to government control of information.

The controversial issue was debated far into the night by a commission of the UN Educational, Scientific and Cultural Organization at Unesco's general conference.

With almost all commission members heard from, sentiment was running more than 2 to 1 in favor of a Brazilian proposal to turn the question over to a special negotiating committee.

The commission scheduled a final session and vote for tomorrow morning.

Soviet Bloc Defeat

Adoption of the Brazilian proposal, which seemed virtually certain, would represent a defeat for the Soviet bloc, which argued that the draft proposal would "protect" press freedom and which urged that it be adopted after a compromise on its final terms.

Western nations were confident that they have enough votes on the negotiating committee to get the draft declaration deferred for further study and revision before being presented to Unesco again at its 1978 conference.

The Soviet-inspired draft says, "States are responsible for the activities in the international sphere of all mass media under their jurisdiction."

It also calls for use of the media in combating war propaganda, racism and apartheid.

Western delegates, with support from some Third World nations, argued that the draft endorses government control of the press, infringes the right of each nation to decide its own information policy and violates the Unesco constitution.

Several Western speakers said that adoption of the measure could cause some countries to withdraw their financial and technical support from Unesco.

Small Working Group

Yugoslavia, with the backing of Egypt and some other countries, proposed that instead of going to the negotiating committee the issue should be turned over to a small working group drawn from the commission itself.

But most Western delegations called that proposal unacceptable.

Leading the assault on the measure, U.S. delegate Clayton Kirkpatrick said that Western nations "totally rejected" the philosophy of those who drafted it.

Mr. Kirkpatrick, editor of the Chicago Tribune, said the document, "reflects the view that information media is to be used as a tool or an implement to further the aims and objectives of the state."

Approval of the document "would put the moral sanctions of Unesco on the side of a controlled and subservient mass media."

He was vigorously supported by speakers from European countries.

A Dutch spokesman, speaking for the nine-member European Economic Community said the EEC would "not contribute to discussion on the substance of the draft declaration," but would continue to work for a compromise.

He said that the existing declaration was "unacceptable" against "our profoundest principles" on press freedom and endangered the future of Unesco itself.

Limited Scope

A Norwegian spokesman, speaking for his country, Denmark, Finland, Sweden and Iceland, described the resolution as a "declaration of very limited scope" and unacceptable or unconstitutional to many member states.

A Soviet spokesman responded that the draft was in fact designed to "protect" the free flow of information and was not aimed at curbing independent Western news media.

He added, however, that the controversial passage on state responsibility was "perhaps not clear" and said that a compromise probably could be worked out.

Despite the Western setback in failing to cut off debate, Unesco and conference sources said that they believed the draft in its original form had virtually no chance of passing.

Two Germanys To Build Roads

BERLIN, Nov. 5 (AP).—East Germany has agreed to allow the building of a new autobahn linking West Berlin with two major cities of West Germany, West Berlin Mayor Klaus Schuetz said today.

In return, West Germany is to provide assistance for constructing a major part of a new highway from East Berlin to the East German port of Rostock on the Baltic Sea.

Mr. Schuetz said that negotiations with the East Germans would begin in 1978 concerning the route from West Berlin to Hamburg and Bremen. Construction is to start in 1980. The mayor spoke at the first joint meeting, of officials from the German city states of West Berlin, Hamburg and Bremen.

Scholars Uncertain of Procedure If the President-Elect Should Die

WASHINGTON, Nov. 5 (WP).—If Jimmy Carter were to die before the Electoral College meets on Dec. 13 to ratify his election, the next president of the United States would be chosen by the Democratic National Committee.

Under provisions of both Republican and Democratic rules, the national committees have the responsibility of selecting a replacement if an elected president dies or becomes incapacitated before the electors have acted. The electors would presumably ratify the committee's selection, although there is no precedent for this and legal scholars are uncertain.

According to these scholars, an even more difficult question arises if the person elected as president were to die after the Electoral College had acted and before he was sworn into office.

John Feerick, a New York attorney who is an expert on presidential succession, said the Electoral College vote would be valid because the designated president would have been alive at the time the electors met. But it would be up to Congress to make this decision.

If Congress accepted the electors' result as valid, the vice-president would then be sworn in as president as provided by the 20th Amendment to the Constitution. He would then name a vice-president and submit the name to Congress for confirmation as required by the 25th Amendment.

If both the president and vice-president died after the electors met, Mr. Feerick said, the 1947 Law of Succession would apply. This would mean that the speaker of the House of Representatives would become president.

Bribery Remark Is Taken Back By Gov. Edwards

BATON ROUGE, La., Nov. 5 (AP).—Gov. Edwin Edwards now says he did not really mean it when he said he thought it was all right for U.S. businessmen to bribe foreign officials.

Go. Edwards acknowledged yesterday that he had "caught hell" from the public for the remarks he made in an informal news conference last week. The remarks got national attention, coming a day after he admitted that his wife had accepted $10,000 from South Korean businessman Tongsun Park in 1971.

It has been reported that Mr. Park distributed up to $1 million a year in the early 1970s to congressmen and other officials. Gov. Edwards was a congressman running for his first term as governor when his wife took the money, but he said he did not learn of the gift until three years later.

He said he was angry and frustrated over reaction to news of the gift. He said that when asked the next day about bribery of foreign offcals he "made a horrible mstake."

Gov. Edwards sad he really meant to say: "American businessman should be allowed to compete in the framework of rules of foreign countries and if those rules include paying fees or commissions to public officials, then that's all right. It can't be a bribe if it's not illegal. I do not condone bribery. I wish nations without bribery laws would adopt them."

Kissinger Names a Team For Changeover to Carter

(Continued from Page 1)

ese plans have been put aside, ficials said, because they de- nd on policies that will have to worked out by the incoming ministration.

But the Ford administration ll remain active, officials said, these areas:

• The Rhodesian negotiations. cause there seems no opposi- n from Mr. Carter, Mr. Kissin- r plans to keep the United tes deeply involved in the ef- t at Geneva to bring about a lement for black majority rule Rhodesia.

• The Vietnam negotiations. e Ford administration, after nths of preliminary exchanges, agreed to meet with repre- atives of Vietnam in Paris at embassy level later this month. e U.S. position is that no nor- lization is possible until the tnamese provide all remain- information on Americans still counted for. Mr. Carter has eed with this position and it is expected that negotiations l get very much further along fre Jan. 20.

Portugal. The Portuguese e reportedly asked for an ergency loan of $300 million to p them out over the next few nths. The administration would bably like to help them and e Mr. Carter has not indicated thing to the contrary, this ht happen.

uring the campaign debates, Mr. Carter took a hard line against giving control of the Panama Canal to Panama. Negotiations for a new canal treaty are currently recessed and the State Department would like to know Mr. Carter's policy, but officials do not expect that to be worked out before his taking office.

Mr. Carter's victory has been received with enthusiasm by Greeks and Cypriots, who believe it presages a more pro-Greek policy in Washington.

This has brought expressions of concern from Turkey and from some State Department officials who would like a statement from Mr. Carter to ease Turkish concern and forestall any drastic anti-U.S. moves. But, again, such a statement would require considerable study and is not deemed likely before January.

In his message, Mr. Kissinger said that the foreign policy of the United States is nonpartisan and that Foreign Service professionals "can be counted on to work with the dedication, patriotism and ability which is characteristic of the Foreign Service.

"For the weeks ahead, they have no more important task than to assure a smooth transition," he said. Mr. Kissinger said the department would "cooperate fully with the President-elect's transition team when it is named, making its files and personnel available as requested and assisting in every way."

The transition team headed by Mr. Eagleburger, who is deputy under secretary for management, includes Charles Robinson, deputy secretary of state; Philip Habib, under secretary for political affairs, and Winston Lord, director of policy planning.

Soares Chooses A Moderate to Be Farm Minister

LISBON, Nov. 5 (AP).—Socialist Premier Mario Soares today named a moderate to replace leftist Antonio Lopes Cardoso as agriculture minister, apparently forfeiting leftist support for his government in next month's local elections.

Mr. Soares announced that Antonio Barreto, 34, tourism and external commerce minister in the Cabinet, would also handle Mr. Cardoso's former post. Mr. Cardoso, unofficial leader of the Socialist radical left faction, resigned from the Cabinet this week over differences with the dominant moderate line.

Mr. Cardoso's sudden departure and his announced return as a Socialist delegate to the National Assembly seemed likely to further dilute the party's 40-per-cent voice in Parliament and hurt the Socialists in the local elections, which Mr. Soares has described as a national referendum on recent austerity measures.

Government sources said that Mr. Soares's choice of Mr. Barreto indicated that the Premier had written off the electoral support of leftist farm workers in the south and might now back a gradual retreat from Mr. Cardoso's controversial land reform campaign.

Center Victorious In Egyptian Vote

CAIRO, Nov. 5 (UPI).—The government-sponsored center wing of the Arab Socialist Union, the nation's only legal political party, has won a comfortable majority of seats in a new parliament and was assured of a mandate to form a cabinet.

Government sources said that President Anwar Sadat is expected to receive Premier Mamdouh Salem, leader oft he center wing, tomorrow to instruct him to form a new cabinet. This will not mean any basic policy changes, they said.

More than 1,500 candidates ran for 342 parliamentary seats in nationwide balloting Oct. 28 and runoff elections held yesterday. They were the first genuinely contested elections in 24 years. By early afternoon today—and with about 80 per cent of the results declared—tallies released by the Interior Ministry showed that the center won 200 seats, the right 15, the left 2 and independents 71.

More House Seats ained by Democrats

ASHINGTON, Nov. 5 (IHT). emocrats have been declared ners in three of the five se races not decided on Elec- Day. The two other contests still undecided.

he democratic winners are Gammage (Texas 22d), Joe all (W. Va. 4 th) and Timo- Wirth (Colo. 2d).

till undecided are the 3d con- sional district in Washington the 10th congressional dis- t in Illinois.

$501 Million for UNDP

UNITED NATIONS, N.Y., Nov. 5 (Reuters).—The UN Development Program has received $501.3 million in voluntary contributions and pledges for its 1977 budget, an 8-per-cent increase over the amount donated last year.

Acting Chief Appointed Agriculture Secretary

WASHINGTON, Nov. 5 (Reuters).—President Ford yesterday appointed John Knebel as agriculture secretary until Jimmy Carter assumes the presidency Jan. 20.

Mr. Knebel became deputy secretary of agriculture last December and had been acting head of the department since Earl Butz resigned last month amid criticism over his remarks about blacks.

France Got Most Of EEC Farm Aid

BRUSSELS, Nov. 5 (Reuters).—France, closely followed by Italy and Britain, was the biggest beneficiary of cash from the European Economic Community's farm fund last year, according to official figures released here.

The 1975 report on farm fund expenditure, by far the biggest item in the EEC budget, disclosed that Britain's allocation of £340 million ($552.8 million) was more than three times the total it received in 1974.

Officials said that of the nine member countries, only West Germany, Belgium and Luxembourg last year contributed more to the fund than they received from it. Among them they paid out more than a billion dollars for the benefit of their partners.

Polish Workers Urge Rehiring of Fired Colleagues

WARSAW, Nov. 5 (UPI).—Workers at the Ursus tractor plant near Warsaw have appealed to Communist party leader Edward Gierek for reinstatement of colleagues who were fired after food price riots, it was disclosed today.

A letter sent to Mr. Gierek and the government yesterday signed by 889 workers, said the loss of experienced men was causing production difficulties at the plant.

"We, the workers of Ursus, appeal for the reinstatement in their jobs of all those expelled in connection with the strike and demonstration June 28, 1976," it said.

More than 200 workers were dismissed after the disturbances at Ursus, when a crowd several thousand strong blockaded rail lines south and west of Warsaw for a day until the government withdrew food prices increases.

"We consider [their return] as indispensable, taking into account the country's difficult situation, the tense atmosphere in the plant, and difficulties in the fulfillment of production targets caused by the lack of experienced members of our crew," the letter said.

A fabulous suit in a mink-and-wool mixture

IF YOUR DREAM is a town suit that's even softer to the touch than cashmere, come and feel this most unusual mink-and-wool mixture, offered by Lanvin 2.

It's warm, light, and quite exceptionally caressing, thanks to a special weaving process that blends the mink intimately in with the wool.

It's available in a small herring-bone design in pastel brown or light grey, or in a check of various tones of chestnut brown (F 1950).

The First Order of Business

Now then, moving briskly along to the business at hand, let's have another look at that long list of commitments that President-elect Carter has made. The most urgent questions of policy pressing upon him are, generally speaking, the ones dealing with money and economics. The law requires President Ford to submit a draft budget for fiscal 1978 to Congress before he leaves office. But Mr. Carter may have to change the federal government's fiscal direction much sooner than the normal budget process allows. There is now widespread and justified concern in this country that the recovery from the recession is losing momentum prematurely. If the evidence of it continues to pile up, Mr. Carter will have to stimulate the economy—which means increasing the budget deficit—this winter. He has declared, after all, that his first priority will be jobs.

But a larger deficit suggests a higher inflation rate. If businesses and labor anticipate that, they will try to protect themselves by tactics that, unfortunately, make inflation worse. There is going to be quite a long delay—2 1/2 months—until Mr. Carter is actually inaugurated. Two and a half months of deepening uncertainty can only make matters worse. The more explicit Mr. Carter can make his intentions, the better. He is entirely right to respond to questions now about his plans.

During the campaign, he went much farther than candidates customarily go in pledging himself to explicit goals of economic performance for the entire four-year term. He has repeatedly promised a balanced budget by 1981, and, at the same time, high employment as well as inflation lower than the present level. He has talked of tax cuts, but also of a comprehensive national health insurance plan. How is all of that to be fitted together?

Theoretically, it is possible to do all of these things simultaneously if economic growth is high enough. But it needs to be added that there are only two periods, in the past three decades of our history, when we went through growth on the scale that Mr. Carter expects to accomplish. One was the four years 1950 through 1953; the other the five years 1962 through 1966. Both, you will immediately notice, were periods of war, and neither Mr. Carter nor any other sane person has that in mind. You may also notice that the great boom of the mid-1960s ended long before the Vietnam war did. The war was inflationary, of course, and one of the great lessons of the past decade is that inflation causes unemployment.

Mr. Carter understands that truth perfectly. But he will now be dealing with a great many people of real influence—some in the unions, some in Congress—who resist it. They cling to the idea that a warm-hearted president can always create a few more jobs at the cost of a little more inflation. It's true that inflationary policies can pump up employment temporarily, but then they start to do queer things to credit and costs; that, in turn, shortly begins to destroy jobs. Mr. Carter is now going to have to find a way to deal with people in his party, and in the labor movement, to whom he owes his election triumph—and who now want him to use the old orthodox methods of creating jobs. But at the same time, Mr. Carter has perceived altogether accurately the deep and pervasive uneasiness throughout the country regarding inflation.

* * *

Economic growth, as we have also learned in recent years, can be interrupted in all sorts of unexpected ways. As if to underscore that truth, the oil-exporting nations will meet next month, presumably to increase the price of oil once again. Even apart from oil, the prospect for rapid growth is not a brilliant one. If the present recovery from the recession is in doubt in the United States, it has fallen into far greater doubt in Europe. There the weak economies have fallen into a destructive cycle of high inflation, devaluation and unemployment.

Any formula for high growth in the United States requires expanding markets for U.S. exports. But exports to where? The Ford administration has been pressing the European debtor nations—notably Britain and Italy—to cut their deficits and bring down their inflation rates. That's all very necessary, but it has to be done with great delicacy and skill. If this country pushes too hard and tips Europe into another recession, the price will not be paid exclusively abroad. It will cost jobs here. The point is one that a candidate could afford to bypass—but that a president cannot.

Now that the returns are in, Mr. Carter has a full claim on the government's resources of staff and expertise. The faster he can take advantage of them, the better. It is not merely a matter of orderly transition from one administration to another. It is an uneasy moment of hesitation in U.S. economic development and the world's. Decisions made, or not made, over the next several months may well set the course for Mr. Carter far into a term that has not yet begun.

THE WASHINGTON POST.

U.S.—No Trespassing

Evidence is mounting that secret police agents of some foreign powers routinely spread terror among their countrymen who reside as aliens in the United States. In some instances, such harassment is extended to naturalized or even second-generation U.S. citizens.

Federal authorities are investigating charges that South Korean intelligence agents and diplomats are violating the rights of Korean aliens and of Korean-Americans. The Shah of Iran admitted in a recent televised interview that agents of Savak, his secret police, are spying on Iranian students in the United States. Similar activities have been alleged to be engaged in by agents of the Chilean junta and of the Taiwan government.

U.S. investigators of these charges have complained that cloudy legal provisions governing foreign diplomats make it difficult to put a stop to such odious activities. The obstacles ought not to prove insurmountable. Demanding the withdrawal of foreign diplomats who violate the laws of their host country is an old tradition in international affairs. It should be used against any embassy or consular officials found guilty of harassing or coercing the political opponents of the regimes they represent. If existing laws governing illegal police activities by foreign nationals in the United States prove inadequate, Congress should enact the necessary legislation to rid this country of such intruders.

The civil rights of Americans, regardless of their national origin, must be fully protected against the evil outreach of foreign potentates. Equally important the right to political asylum, so fundamental to the U.S. role as a protector of freedom, must not be nullified by the long arm of any foreign government.

THE NEW YORK TIMES.

International Opinion

Carter's Victory

If nobody knows who Jimmy Carter really is, it means that Jimmy Carter is himself still free to decide.

—From the Times (London).

* * *

President Ford's ban on mention of the détente policy during his campaign was a factor in his defeat because it caused doubts he would follow a course in international relations which the rank and file of Americans wanted.

—From Pravda (Moscow).

* * *

Carter's victory is a protest against détente because the policy encouraged Soviet military expansion. Americans are afraid the Soviet Union could become the world's most powerful military country and the United States could be relegated to second place.

—From Wen Wei Po (Hong Kong).

* * *

The policies of Mr. Carter and Mr. Ford are remarkably similar, but one basic difference is that [Secretary of State Henry] Kissinger will not be around . . . Carter is likely to support Israel strongly and to move closer to the Western democracies and Japan with less emphasis on China and Russia.

—From the Straits Times (Singapore).

* * *

The Americans wanted to turn the page . . . They voted for a surprise, hoping that it will turn out to be a happy one.

—From Le Figaro (Paris).

* * *

Carter's victory is the defeat of a party—the Republican—which has given the United States the presents of the Watergate scandal, political espionage, the persecution against those who battled against the Vietnam war and U.S. commitments in Asia.

—From Avvenire (Milan).

* * *

Taking into consideration the many difficult and unsolvable problems that face the United States nowadays, it is doubtful that a new man in the White House can effectively solve such problems.

—From Nhan Dan (Hanoi).

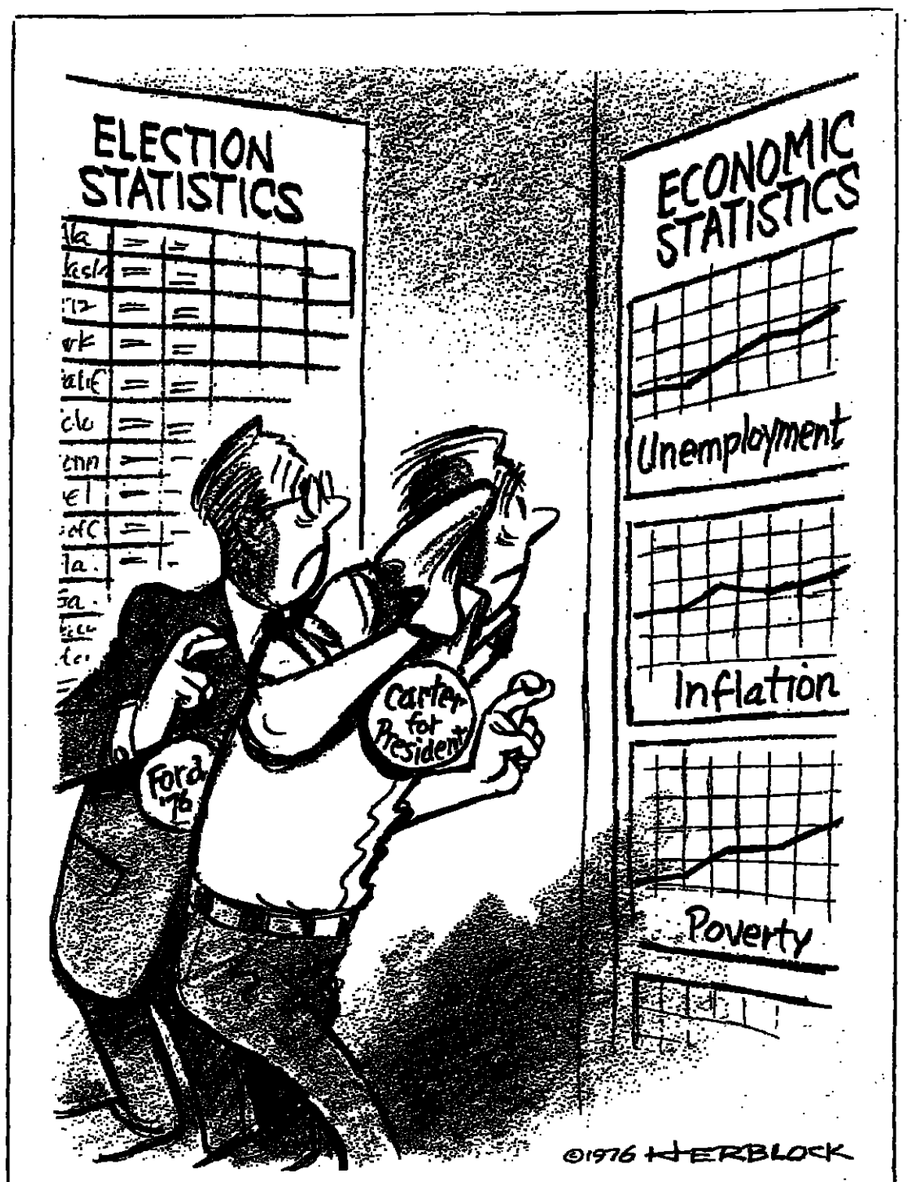
Seventy-Five Years Ago



November 6, 1901

NEW YORK.—Mr. Seth Low, the candidate of the Fusionists, has been elected Mayor of Greater New York. It is a stunning victory for the Reform Ticket, and Tammany Hall has sustained the most disastrous defeat in its history. Boss Richard Crocker's power has been completely smashed. Not only did the Fusionists elect a Mayor, but also their Borough tickets. They now run the town. Let's see what they will do.

Fifty Ago

November 6, 1926

LONDON.—Today's woman seems to say, "If it's masculine, then let's do it." A club to popularize cigar smoking by women has been formed by the wives and daughters of some wealthy businessmen of Wallesley in Cheshire. Regular meetings are held and politics are discussed over tea and cigars. One of the rules of the club is an obligation to smoke in public and lots are drawn to select members for this purpose.

'Transition.'

Those Important 78 Days

By James Reston

WASHINGTON.—Much is made by the calendar-worshippers of "the first hundred days" or "the first thousand days" of a new administration in Washington, but probably more important are the 78 days between the election of a president and his inauguration.

For it is in these eleven weeks that the president-elect must pick the team, set the tone of the new government, establish at least tentative relationships with the White House staff, the Cabinet, and the leaders of the Congress. And these threshold decisions—which must be made even before he takes the oath of office—are likely to determine what happens in his "first thousand days" more than anything else.

Maybe this is shoving it too fast, for after a long, hard, close political struggle, the first priority for the survivors is a couple of weeks of rest, and if possible, even of silence. They are visibly bone-tired but there is a problem, several problems *coming up between* the election and the inauguration that require serious and urgent consultation between the outgoing and the incoming administrations.

Oil Prices

Between now and Christmas, we are clearly going to have to face the likelihood of another steep rise in the world price of oil. How to avoid it, if possible, or react to it if it comes, and how to consult between Ford and Carter in the meanwhile?

The strategic arms talks with the Soviets and the fragile peace negotiations in the Middle East can probably be postponed until the new administration is in place at the end of January, but the *British financial crisis cannot* be finessed much longer, and the Rhodesian peace talks in Geneva are falling apart.

Jimmy Carter and his aides are well aware of these policy questions, but they have a dilemma. They don't want to be responsible for decisions they can't control and yet they can't be indifferent to decisions about oil prices, Britain and Rhodesia, which they will have to deal with after they take over the White House.

Also, they don't want to be hurried into choosing secretaries of state, Treasury, and defense who can consult with Kissinger, Simon and Rumsfeld. Jack Watson and his staff in Atlanta have made a serious analysis for Gov. Carter of the talent available for the main jobs, but the governor has been too preoccupied with the campaign to put his whole mind to selecting his team.

Carter has another problem. He captured his party against the will of many of its political, union, and intellectual leaders, and owes his narrow victory to their exertions in the North. But he doesn't want to be captured by them in the end, or even unduly influenced or controlled by the Democratic Old Boy network in the selection of his principal aides and advisers.

I have the impression that the Carter people are absolutely right in their determination to come to Washington with a fresh team and not with a collection of *distinguished has-beens from the* past. But also that they may be misjudging and maybe overestimating the problem.

The Democrats have been out of power now for eight years, and the main point about the Old Boy Democratic network is that most of them are over the hill. They would be willing to help, and have a lot to give in the short-range period between now and the inauguration, but are not really looking for, and most of them would not accept, long-term jobs which they know to be beyond their energies.

Former Secretary of State Dean Rusk, now teaching at the University of Georgia Law School, is a case in point. He is available for consultation. He knows the cards in the old if not the new deck, and he's being consulted. There are many more like him, who can be useful in this critical transition period, but don't want anything for themselves.

Awkward

It is very awkward now for Gov. Carter to consult comfortably with Henry Kissinger, since he made Kissinger a main target of the campaign, but there are many trusted Carter supporters who are trusted by Kissinger, whose main concern now is to avoid unnecessary problems abroad during the transition.

In the short run, to assure continuity without confusing responsibility, to get objective help in mastering the facts without committing himself to a Cabinet, Gov. Carter has many experienced men at his disposal, including senior civil servants like Gen. Brent Scowcroft, director of the National Security Council staff, who is on the point of retirement.

Actually, the mood in Washington for the transition is not only calm but hopeful. The fevers of the campaign have passed. Even nature, exhausted after the long, hot summer, is resting but radiant.

The capital is still ablaze with autumn flowers, Lady Bird Johnson's abiding present to her old neighbors; and from the tidewater between the Potomac and the Rappahannock to the Blue Ridge, the trees are golden red much later than usual.

Everything has been threatened in these turbulent years but nothing has been lost, and Washington is now waiting to hear where the new President is going, and particularly, who's going with him.

Assessing the Elections

Primer for the Losers

By William Safire

WASHINGTON.—How come I cannot work myself up into feeling really miserable about the outcome of the 1976 elections?

How come my Democratic friends are not pounding each other's backs in triumphant glee, as in 1960?

Here are a few reasons why the losers are not desolate and the winners are not delirious.

1. *Accountability has arrived.* No longer will flowering fields of congressional alibis be watered by executive branchwater. The Democrats are in charge, and since the buck can no longer be passed, perhaps the dollar will be treated with more respect.

2. *The land did not slide.* The language of natural disaster—landslide, avalanche, *snowed* under, tidal wave—so often used to describe political movements is out of place today. President Ford's strong campaign results in his leaving office with far more respect than he was given in it, and leaves those Republicans to whom he was the second choice the feeling that he carried their banner most honorably.

3. *Henry will be gone.* This delights the losers as much as it worries the winners.

4. *The quality of the Senate is improved.* Three Democratic duds were retired—Hartke, Montoya and Tunney—and a couple of the Republicans turned out; Beall and Taft, lacked luster. The saddest conservative moment of the night came with able Bill Brock's defeat. But I want to be in the Senate gallery when professor Sens. Hayakawa and Moynihan light up that sloppy place with linguistic fireworks.

5. *The center-right has held.* Except for one brief period of leftward lurching—promptly corrected as his ratings slipped—candidate Carter showed he knew where the political action was: "inevitable" tax reduction, budget balancing, strong defense posture, and postponement of social spending that interferes with those. Liberals worry that Carter might have meant what he said, while conservatives intend to rivet him to his rhetoric.

6. *The back-up quarterback is good.* For all his liberality, Walter Mondale is a man of character, intelligence and good humor. To many, Carter-Mondale was the classic "kangaroo ticket"—stronger in the hind legs than in the front.

7. *The commitment was never intense on either side.* The winners were mostly Democrats, far more organized-laborites than "Carterites"; the losers often those who sided with the President because of their distrust of his opponent, who reminded them of Dr. Fell. The financial journal, Barron's, shrewdly diagnosed the reason for the long-sinking market: Investors were worried that either Ford or Carter would win.

8. *The South will not rise again.* The states of the South having solidified to put one of their own across for the first time in a century, will soon come to understand that their men must lean against them, and toward the suffering Northern states, in dispensing federal funds. After Carter, Southern solidity will vanish, making possible a two-party system there for the first time.

9. *The West was won.* A hopeful lesson to the losers is the formation of the winning West as the future alternative to the Carter solid South. With such a base, a conservative candidate could aim for added "heartland" support to put together a victory. This is not a most original idea to strike strategists, but its time may well be coming.

On balance, then, the person on the losing side are disappointed but not devastated. Our first natural reaction, to growl "Don't treat a squeaker as any kind of a mandate" at President-elect Carter, should be set aside. A one-vote victory is a mandate to lead.

Another temptation for loser is to resist is the tendency to look for justification of previous suspicions. Cartoonist Herblock, who had always drawn Richard Nixon with a sinister five o'clock shadow, greeted the Nixon presidency with a drawing announcing that his department always treated the new president to one free shave.

And so this "essay" department will put free mental dental floss on those Carter incisors that on Tuesday looked so much like fangs. For a little while, we urge to holler "Aha! Worse than Nixon, and you're letting him get away with it!" will be wrestled to the ground. (The match is not fixed; the urge may occasionally win.)

Good Wishes

The reason, in all seriousness, is that he is my President-elect as much as he is Jody Powell's President-elect. Supporter of the loser, we may wish candidate Carter had not won, but we must wish President Carter well.

Of the last four occupants of the Oval Office, one has been shot out, one scared out, one thrown out, and one voted out. It would be very good for all of us to have a president serve a full, successful term.

In his victory remarks, the new President struck just the right note with this line: "We have a lot to learn about each other." If he means that—and we should assume that he does—then presidential success might just be his and ours.

The Most Dangerous Sea

By C. L. Sulzberger

ANKARA.—The crux of that aspect of the Turkish-Greek quarrel involving sea space—territorial waters and the continental shelf—is now being gingerly approached in bilateral negotiations at Bern. The issue is quite simply posed. The Greeks claim Turkey is trying to turn the Aegean into a Turkish sea. The Turks say Greece is trying to make it a Greek sea.

This is the single most dangerous facet of mounting hostility *between NATO's bickering allies* in the east Mediterranean. The Greeks, who are more gifted than the Turks in expressing their views internationally, claim that since Turkey twice invaded Cyprus in 1974, grabbing 40 per cent of the island, it is edging outward at the expense of Greece in other areas.

The Turkish argument is complex. It contends that Athens has violated treaty obligations to keep the Dodecanese (acquired from Italy after World War II) and other offshore Asia Minor islands demilitarized; that Greece sought to double the previous six-mile limit of Dodecanese territorial waters.

Under a Greek six-mile limit, Ankara argues, Turkey has five outlets to open Aegean waters. Under a 12-mile limit it has only two such outlets. Ankara claims Greek islands can block access to Turkey's western shoreline and that the southern Turkish ports of Mersin, Iskenderun and Antalya were dominated by Cyprus—until the 1974 Turkish invasion there.

At this point Turkish spokesmen drag in the "megali" or "great" idea seen here as the core of Athens policy. This is regarded by Turks as an exaggerated continuance of the 19th and early 20th century liberation of Greek-inhabited territories held by foreign states, terminating with the Dodecanese.

The idea of "Panhellenism," with Constantinople—capital of Greek-ruled Byzantium—as its ultimate goal, is much bruited by immoderate Turks, just as the idea of "panturanianism" with a restored Ottoman Empire as its *ultimate goal is much bruited by* immoderate Greeks. In fact, in 1931, Ataturk, father of modern Turkey, and Greek Premier Venizelos agreed on existing borders and mutual friendship.

This situation basically prevailed and both countries joined NATO, even holding joint maneuvers, until the Cyprus issue festered. The Cyprus squabble was followed by arguments over territorial waters, the continental shelf and mutual airspace.

Blame Makarios

The Turks blame President Makarios for feeding the embers of an always uneasy situation in Cyprus, whose Greek-speaking majority and Turkish-speaking minority agree on only one thing: that they are not Cypriots but respectively Greeks or Turks. Makarios dropped the idea of joining Cyprus to Greece because he enjoyed the trappings of independence; but he strongly disfavored the Turkish minority.

The Turks have been straining at the leash to seize a chunk of Cyprus since 1964 when President Lyndon Johnson warned them off. Ten years later they did just that while the United States was waddling in Watergate. Both Ankara (publicly) and Athens (privately) imply the only way to settle the argument is by a national federated state; but they can't agree on frontiers between its two communities.

It seems logical to proceed with bilateral Greco-Turkish negotiations as started—at a low level in Bern (and also in Paris where national airspace is under attack) tiny) before moving on to the thorny subject of Cyprus, which *includes the Makarios government* plus Britain as a guarantor.

The initial problem remains the Aegean. Ankara insists the Dodecanese Islands are 200 miles from mainland Greece and only from 2 to 12 miles from Turkish Anatolia, of which they geologically form a unit. The trouble is that both nations are now screaming at each other about territorial waters and the continental shelf (where valuable minerals can be mined).

There has been no agreement on these issues among nations participating in five sessions of the Law of the Sea Conference sponsored by the UN. The last meeting recently concluded in total disarray. Therefore, no treaty or law exists that can be accepted by both Athens and Ankara as a precedent; nor is there any valid binding body of international law on which the Hague International Court could easily base an arbitration.

Yet it is obvious that, in the words of a diplomat who has long observed this scene: "The Aegean is an indispensable part of both Turkey and Greece. It cannot be annexed to one or the other. Were either nation so foolish as to seek to exclude or threaten the other, war would be inevitable."

Letters

Promises to Israel

Why is it that our presidential candidates fall *all* over themselves promising Israel anything and everything?

True, it may attract some Jewish voters and campaign contributions. But what about the rest of us? Perhaps we have not let our candidates know that we see through and are turned off by this blatant pitch for votes.

Maybe it is time to treat Israel like our other allies: stand by to help when help is needed. But I, for one, am tired of our foreign policy being controlled by a wealthy, articulate minority in our nation—while our politicians bow and scrape and promise—and deliver.

BETTY J. MINER.

Innsbruck.

Royal Rhetoric

"We don't want to go along always with the same people, with the same officeholders. For this reason, I hope that these elections will put into office some new personalities who will serve the country well in the coming years." Sound like some U.S. politicians pontificating before Nov. 2? It's a quote from King Hassan of Morocco concerning the elections coming up here this month.

AL HIX.

Agadir, Morocco.

A Difference

Now that the U.S. elections are over with, I wonder how many of the members of the Ford administration will be purged or forced to go into exile or even seek political asylum elsewhere as is the custom in other, non-democratic and noncapitalistic, countries after the power of government changes hands? Do we need any other reason to explain U.S. greatness?

West European Women Politicians Decry Their Role as Oddities

By James R. Peipert

LONDON, Nov. 5 (AP).—Women are assuming growing and more important role in Western European politics, stepping into jobs as Cabinet ministers, party leaders or top political aides.

But some who have made it to the top caution that their political success does not mean woman's battle for quality is over and they wish they were not centers of attention just because they are women.

"One must not imagine that the women's issue is suddenly solved because a woman has become foreign minister," says Karin Soeder, Sweden's first woman foreign minister. She serves in the Centrist government of Thorbjorn Fallidin, which came to power in the Sept. 19 election after ousting the long-time Socialist government.

"I'm tired of being regarded as a phenomenon," says Margaret Thatcher, who in February, 1975, became Britain's first woman party leader. She would also become the country's first woman prime minister if her Conservative party wins the next national election.

AP.

Karin Soeder

"The idea of a woman taking decisions and giving instructions is not yet easily acceptable in Greece and is viewed suspiciously by some male colleagues," says Lina Kontiaffi, who in October became under secretary of education and the third woman since World War II to hold a Greek Cabinet post.

Another woman who recently made her mark in a world traditionally dominated by men is Spain's Carmen Diez de Rivera y de Izcasa. Premier Adolfo Suarez appointed her earlier this year as his chief of staff, a job no woman has held in Spain before.

In the Netherlands, Carolina van den Huevel is chairman of the Labor party, which, with 43 of the 150 seats in parliament, is the dominant force in the left-center coalition led by Socialist Premier Joop den Uyl.

West Germany's outgoing President of the Bundestag, the lower house of parliament, is a woman: Annemarie Renger. France, Italy, Britain, Austria, Greece, the Netherlands and Sweden all have women in their Cabinets. Antwerp, Belgium, has a woman mayor.

But most of them would agree that women are far from fulfilling their potential in a field long considered in most countries a bastion of male chauvinism.

The relatively recent emergence of women in Western European politics may be attributed in varying degree to women's liberation movements, but few of the successful women politicians consider themselves militant feminists.

UPI.

Carmen Diez

Britain's Mrs. Thatcher, 51, a mother of grown twins, says she does not have much time for women's lib. "I had a Cabinet post before the term women's lib became trendy," she said.

But as recently as 1973, when Mrs. Thatcher was education secretary in the Conservative government of Prime Minister Edward Heath, she said she did not think a woman could become prime minister in her lifetime.

Now she expresses confidence that Britain's voters will oust the Labor party government of Prime Minister James Callaghan and sweep the Conservatives to power and to the prime minister's job.

In Spain, there has been a proliferation of women's liberation movements since the death of Franco last November. But the rise of Miss Diez shows no signs of riding that tide.

Miss Diez, 34, first worked for Mr. Suarez in 1970 when he was head of government television. She stayed with him when he became a Cabinet minister as head of the Movement, the only political organization Gen. Franco ever permitted.

"No woman in Spain, and few in Europe, have as much influence at the center of government," commented a former government official on Miss Diez's current job as Mr. Suarez's chief of staff.

But she says she is not a feminist, and she thinks Spanish women should not have the vote in the parliamentary elections Mr. Suarez is trying to arrange for next year "because most of them are not politically prepared enough to make a wise choice."

AP.

Tina Anselmi

Another woman politician not regarded as a militant feminist is Simone Veil, 49, French minister of health since July, 1974, and the only full-ranking woman minister in the government of President Valéry Giscard d'Estaing.

"I am a minister because I am a woman, not in spite of it," said Mrs. Veil, a lawyer and magistrate and wife of the director-general of the French airline UTA.

Soon after her appointment she steered a bill through the National Assembly authorizing abortions for the first time in French history. Shortly afterward, a poll rated her the most popular member of the government.

Another woman picked by the French President in 1974 was Françoise Giroud, 59, who filled the newly created post of secretary of state, or junior minister, for womens' affairs. In a government shakeup earlier this year, Mrs. Giroud became secretary of state for cultural affairs, one of the most important junior posts in the cabinet.

She has always said she has no personal political ambitions.

"I don't have a taste for powers as such—I would rather do things," she said. "Men care about power because for them power is linked to sexual performance. Women achieve positions of power out of a need to do something, not because we need reassurance."

In Italy, growing recognition of women's equality movements assisted the rise of Tina Anselmi, 49, the country's first woman cabinet minister. Premier Giulio Andreotti appointed her as labor minister in July as he put together a 'new look" cabinet.

UPI.

Françoise Giroud

Miss Anselmi, who has since won high marks as a mediator in Italian labor disputes, called her appointment "the fall of another barrier in favor of women's equality," but she disclaimed any higher political ambitions, such as the premiership.

"For years, custo mhad prevented a woman from rising into the cabinet," she said. "My appointment broke that tradition. I am now receiving letters from women all over Italy and from Italian women in the United States." They all seem to feel that as a woman I will bring more honesty and more good sense to government. I hope so."

Obituaries

Dame Flora MacLeod, 98, Chief of Clan for 37 Years

ABERDEEN, Scotland, Nov. 5 (AP).—Dame Flora MacLeod of MacLeod, 98, the only woman among Scotland's 82 clan chiefs, died near here yesterday, her grandson reported.

Dame Flora was the 28th chief of the Clan MacLeod for 37 years. Her ancestral home, Dunvegan Castle, is situated on the Isle of Skye, off the west coast of Scotland.

She was feted throughout the British Commonwealth and in the United States during her frequent visits furthering the interests of thousands of her scattered clansmen and their families.

Patrick Wolrige-Gordon said his grandmother had been holidaying with him at his home near Aberdeen.

The new chief of the clan is mother of her grandsons, John MacLeod of MacLeod.

Dame Flora was the last person to be born at No. 10 Downing Street, the official London home of British prime ministers. She was born Feb. 3, 1887, when Benjamin Disraeli was prime minister. Disraeli had temporarily moved next door to No. 11 as a courtesy to his chancellor of the Exchequer, Sir Stafford Northcote, who was the father-in-law of Dame Flora's mother, who went to stay with him in expectation of the birth.

The clan chief was created a Dame of the British Empire—an honorary title—in 1953 for public services in Scotland.

Rudy Powell

NEW YORK, Nov. 5 (NYT).—Everard Stephen Powell, 69, a jazz musician who played under the name of Rudy Powell and appeared with big bands here and in Europe for more than 30 years, died Saturday.

Mr. Powell, a clarinetist and alto saxophonist, studied privately and at the New York College of Music. His first professional job was in 1928 with Cliff Jackson at the Lenox Club in New York City.

He was associated with Fats Waller a number of times and he played with the bands of Claude Hopkins, Teddy Wilson, Andy Kirk, Fletcher Henderson, Don Redman, Cab Calloway, Lucky Millindor, Charles Ventura, Jimmy Rushing, Arnett Cob and Erskine Hawkins.

James E. Gordon

FTLAN, Va., Nov. 5 (AP).—James E. Gordon, 85, the first U.S. soldier conscripted in World War I, died last week in a Veterans Administration hospital, according to relatives.

Italy Party Picks Woman

NAPLES, Nov. 5 (Reuters).—Italy's small Radical party has elected 36-year-old Adelaide Aglietta as its secretary, the first woman to lead an Italian political group.

Two Iranians Held In Paris Shooting

PARIS, Nov. 5 (UPI).—Two Iranian students suspected of participating in an attack against Iranian Embassy attaché Homayoun Keykavoussi were put under arrest today after being identified by the main witness, police said.

The witness, Jacques Cochet, a police brigadier who said he saw two men fire two pistol shots at Mr. Keykavoussi Tuesday, was wounded himself by a bullet as he tried to hold one of the assailants. Mr. Keykavoussi was shot twice in the stomach and is still being treated in a hospital.

Police said that the two gave conflicting alibis under questioning and that forensic tests for powder traces on their hands proved positive.

Unrest at a Napoleonic Legacy in Paris

By John Vinocur

PARIS, Nov. 5 (AP).—L'Ecole Polytechnique, a military-run training ground of the French establishment, is caught up in a rare gust of rebellion that has led to students being told that their elite status cannot mean doing less work than others.

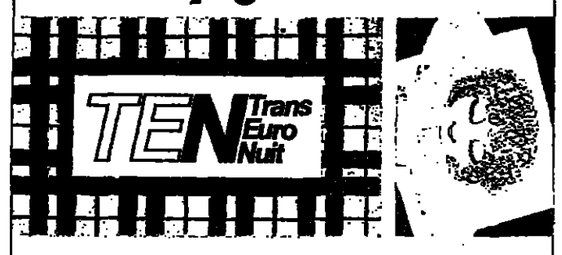
The school was considered to be in such a state of unrest over a dispute about work loads that a planned visit to it by King Juan Carlos of Spain, escorted by President Valéry Giscard d'Estaing, a Polytechnique graduate, was called off last week. Leaves have been canceled, and three student ringleaders have been disciplined.

Nominally an engineering school, described by its directors as more akin to the Massachusetts Institute of Technology than to a military academy, Polytechnique is in fact a remarkable springboard into the high echelons of business and government or to other specialized training. A study made last year by the business weekly L'Expansion reported that graduates leaving Polytechnique received better salaries than those of any other French university.

Now the unrest appears to be worsening, with the pointed rejection by the school's assistant director general, Henri Piatier, of a list of demands for a lightened work load.

"The students at Polytechnique are the best paid in the world," Mr. Piatier said. "They get about 3,000 francs ($600) a month for a work week that barely makes 40 hours. They're also the most expensive students in the world, if you take into consideration the equipment they have at their disposal and the prestigious professors who teach them. They cannot demand to work less than other people."

While the rest of the traditionally volatile French undergraduate world is peaceful this autumn, the Polytechnique students have been complaining about too many scientific courses, required marching and a course realignment that has supposedly left them too little time for study.



The newspaper Le Monde estimated that the demands for change were backed by about two-thirds of the student body of around 650.

The trouble began in the middle of October with the acceptance by the school's director, Gen. Jean-Noel Augier, of a student appeal for the elimination of a course of computer technology. Demands for lighter work loads followed, and when these were rejected, the students staged an unauthorized meeting at which they voted to boycott science classes.

This contravened the school's military bylaws, and Gen. Augier ordered the cancellation of leaves and brought disciplinary action against three students.

The school was founded in 1794 and placed under the control of the military in 1804 under Napoleon. Students spend three years attached to Polytechnique, including seven months of active military training. After the first year, however, there is only an hour a week of military courses

Tongass mask from Hooper collection.

The Man Who Collected Primitive Art—in England

By Souren Melikian

LONDON, Nov. 5 (IHT).—Sixty-four years ago, a 13-year-old English schoolboy, James Hooper, was given a strange wooden sphere. No one knew where it had come from. By the time of his death in 1971, Hooper knew no more about it—but it had awakened his curiosity about faraway objects made by primitive peoples, a curiosity that led to the James Hooper collection of primitive art, one of the greatest in the world. Part of it will be auctioned Tuesday at Christie's.

Hooper never had much money. He was assistant inspector for the Oxford area in the Thames Conservancy (waterworks). But he lived in the days when ethnographic objects were to be had for a song and Britain was the place to be. Missionaries, traders, whalers, colonial officers came back home loaded with souvenirs, to which they attached little or no monetary value. When they died, the quaint weapons, ceremonial bowls and rattles were sent to second-hand stores, where antique dealers retrieved them at little cost. Hooper haunted them.

Then, too, museums were brimming with pieces that had been bequeathed to them by local people. Because such objects were not yet thought of as primitive art, the museums were willing to part with them. Hooper, who also collected pieces of historical interest, always had something to offer for a swap. The exceptional Tongass mask from the Cape Foy area of southern Alaska to be sold Tuesday once belonged to the Worcester Natural Historical Society. It had been acquired by W.E. Gordon, a mate aboard the HMS Virago, in Port Simpson in the summer of 1853. He gave it to the Worcester society two years later. Eventually the society became the Worcester Museum. When Hooper approached the authorities, tantalizing them with objects of local interest, the Tongass mask and another one, both now valued at around £20,000, were gladly handed over to the jubilant Hooper.

He often saved objects from destruction. In the book he wrote about his late grandfather's collection, Stephen Phelps tells how his grandfather saw a girl washing a car in the backyard of a West Country museum, wearing Eskimo boots. She had picked them up from the cart taking objects to the incinerator. The museum officials had been burning material brought back from North America in the first half of the 19th century.

Museums remained a mine for Hooper until well after World War II. The finest Tsimshian Indian ritual object—a "soul catcher" carved from bone—to be auctioned Tuesday was in the Hastings Museum until 1947.

Missionary societies were another source of supply. Another "soul catcher" in the sale came from the Church Missionary Society in 1944. Records specify that it was collected in the second half of the 19th century from a shaman named Dawallasqu of Gilwingak on the Skeena River. For Hooper such documentation was invaluable.

In 1946, he acquired an exceptional piece—a carved ceremonial ladle, the bowl springing out of the mouth of a bear, from St. Augustine's Missionary College in Canterbury. George Hills, first bishop of Columbia, sent it to England in 1865. Christie's presale estimate is £4,000 to £8,000.

Detective Work

Above all, Hooper had a knack for tracking down private owners. A fabulous Haida horn spoon (Lot 161) and a fine oil bowl—Haida or possibly Tlingit—were bought from a Rev. Nind of South Stoke, Berkshire, who had inherited them from his grandfather, a gold commissioner in Vancouver in the late 1850s.

Hooper was as persistent as an Indian on the warpath when hunting for objects. In 1934 a family, who had inherited some important pieces collected in the 1830s in the Marquesas, answered one of Hooper's newspaper ads. But they decided not to sell. Notes expressing his interest in terms of Victorian courtesy—exquisite but firm—followed letters kindly declining his offers. In 1945, the family finally gave up the club and spear. That left one beautiful fan handle. Hooper corresponded with them for another nine years. After his umpteenth missive ("You must think me a great nuisance but I suppose all collectors are"), he landed his catch. It had taken 20 years.

Museum

He never got to the Pacific Islands, nor to North America, for that matter. His only trips abroad were a weekend in Paris in the 1930s and a journey to Istanbul in 1965. Yet he amassed one of the largest collections of primitive art in the world, nearly all of it obtained in Britain. By the late 1950s he had the finest collection of Polynesian artifacts still in private hands, and a remarkable collection of American Indian art, part of which is in Tuesday's sale. Within the second category, his collection is particularly notable for work by Indians of the Northwest Coast (from southern Alaska to Washington state).

When Hooper retired, he set up his personal collection as a private museum in Arundel, Sussex. But, by 1964, the cost of keeping it open became too heavy. Some larger pieces were disposed of. Others went on display elsewhere. He, however, clung to most of his treasures until his death five years ago. Concerned with the preservation of the relics of dead or dying cultures, he summoned a grandson, Stephen Phelps, to help him catalogue the collection. Mr. Phelps carried on the work after his grandfather died. He became obsessed with the idea of saving his grandfather's documentary work.

He convinced Christie's to participate in publishing a book he wrote, "Art and Artifacts of the Pacific, Africa and the Americas: The James Hooper Collection." It is almost an encyclopedia of tribal art.

Tuesday's sale includes only part of the collection. Even Hermione Waterfield, responsible for Christie's primitive art department, says there has not been a group of Northwest Coast items like these for sale since World War II.

INTERNATIONAL EXECUTIVE OPPORTUNITIES

IMPORTANT FRENCH CONTRACTOR
will employ for **NIGERIA**

HEAD OF EQUIPMENT DEPARTMENT

PROFILE :
- Graduated Mechanical Engineer
- Experienced in the use of civil engineering equipment (or similar)
- Fluent English, knowledge of French appreciated.

MISSION :
Based at the Head Office of the Company in LAGOS, he will have to manage an important civil engineering equipment park.

He will be in charge of the central maintenance - Supplies and purchases : care of stocks and spare parts, planning of maintenance programmes for the equipment and sending orders out, locally or abroad.
Supervision of the central maintenance workshop.

Transports : he will have to plan and provide transport of equipment from one site to the other.

Please send C.V., photo and salary to No 83745 CONTESSE Publicité 20, Avenue de l'Opéra - 75040 PARIS CEDEX 01, who will forward.

MERCHANT BANKING

S. G. Warburg & Co. Ltd.

With the continuing growth of our international issuing business, we are now seeking one or two additional young executives with the potential to make a significant contribution to our business.

Successful applicants are likely to be graduates, aged between 24 and 32, who have already acquired first-class experience of international issues or corporate finance in London or an overseas financial centre. Alternatively, they may be professionally qualified in accountancy or law, with some relevant post-qualification experience. Fluency in one or more foreign languages would be an advantage and willingness to travel is essential.

Applications, enclosing a concise curriculum vitae, should be sent in confidence to:

G. E. J. Wood, S. G. Warburg & Co. Ltd.,
30 Gresham Street, London EC2P 2EB.

Manager Of Manufacturing

This position will be part of a growing Houston-based international oil company that is engaged in building an LNG operating organization, resulting in Indonesia's first gas for export.

Reporting to the General Manager, the Manager of Manufacturing will direct and coordinate the efforts for operations, maintenance, technical department and plant protection. You will maintain a constant updated understanding of all activities within the complex allowing you to deputize for the General Manager when required.

The responsibilities of the position require an engineer seasoned by a minimum of 15 years in the petroleum or petrochemical industry including at least 10 years at a senior plant management level and some experience in a foreign environment.

Rarely does an opportunity occur at such a top decision-making level. The demands are strong. The compensation is more than equal to them. In addition to an outstanding salary and liberal fringe benefits, you'll find all the challenge upon which you can thrive.

This position is open now. For more information send resume complete with salary history and expectations in strictest confidence to: Box D-5,545, Herald Tribune, Paris.

An Equal Opportunity Employer m/f

MARKETING MANAGER

Base salary and substantial incentive compensation plan which provides an annual income of $30,000 to $60,000.

Requires extensive background in all of the following:
- Engineering Systems Sales;
- Technical Publication Sales;
- Micro Publishing Sales;
- Sales Administration.

Successful candidate will have bilingual capabilities specifically English and German and willingness to relocate to West Germany. Also the successful candidate will have the ability to conduct business discussion with Executive and Technical management of prospective customers. A background in computing and photo composition is needed.

Box D5,530, Herald, Paris.

ASSISTANT CONTROLLER

EUROPE

Applicant should have 3-5 years experience in public accounting and be familiar with U.S. accounting techniques.
Fluency in English and German is essential.
Knowledge of French would be an advantage.
Location is Frankfurt.
Approximately 30% of travel is required.

Applicants are requested to send their resumé to: Box 842, I.H.T., Gr. Eschenheimer Str. 43, Frankfurt, Germany.

IMPORTANT FRENCH CONTRACTOR
will employ for **NIGERIA**

ROAD SITE AGENT

PROFILE :
- Graduated Civil Engineer
- Experience as road site manager or assistant road site manager of greater sites
- Experience of foreign countries would be appreciated
- Fluent English, knowledge of French appreciated.

MISSION :
The candidat will be entrusted with the responsibility of an important site or several grouped sites, aiming at the turn-key construction of roads and overhead works, first contract's value 50 millions U.S.$

He will be in charge of the management on the technical, administrative and financial level.

He will have to report to the Company in LAGOS on the control of the site or sites.

Please send C.V., photo and salary to No 83744, CONTESSE PUBLICITE 20, avenue de l'Opéra, 75040 PARIS CEDEX 01 who will forward.

DIRECTOR OF RESEARCH AND DEVELOPMENT

PHARMACEUTICALS

F.Fr. 300,000 max.

One of France's leading manufacturers of ethical drugs is seeking its International Director of Research and Development. Based in Paris, he will manage a group of several hundred employees and will have full responsibility for fundamental and applied research, clinical testing and the related administrative functions. He will also interphase actively with the manufacturing and marketing units.

This position would attract a dynamic executive now in a similar function, or a University Professor engaged in pharmaceutical research. He will probably have a degree in medicine or pharmacology. The minimum age is 35, nationality is open but reasonable fluency in French is essential.

His current position, qualifications and earnings must be at a level that would entitle him to command remuneration of up to F.fr. 300,000.

Write in confidence, giving full information on educational background, business experience, current earnings and home address and telephone number to: Box D. 5,546, Herald Tribune, Paris.

As a leading international firm of management consultants retained by our client to select this executive, we undertake that no information will be released without prior consent and after a personal interview.

THE INTERNATIONAL HERALD TRIBUNE
requires
two young but experienced

ADVERTISING SALES EXECUTIVES

—For its London office: an aggressive young man or woman preferably with experience in the financial and classified fields.

—For its Frankfurt office an equally dynamic young person with advertising sales experience. Must be totally fluent in German and willing to travel extensively within Germany.

For both these positions nationality is not a major consideration but EEC citizenship or valid work papers are essential. Salary commensurate with experience and market conditions. Excellent advancement prospects.

Box D-5,523, Herald Tribune, Paris.

EXECUTIVES AVAILABLE

COMMODITY TRADER
Oilcakes, seeds, grain, mid-30s, German, 4 years university, 11 years international & import trade. A-1 multinational corporation experience, open for management position in Germany, Benelux, Switzerland. $60,000 p.a.
Box 847, I.H.T., Gr. Eschenheimer Str. 43, Frankfurt, Germany.

SENIOR BRITISH EXECUTIVE
now in Saudi Arabia, background overseas support/defense contracts/project administration British Navy then industry, seeks new top executive position with relevant remuneration.
Box D-5,541, Herald, Paris.

Effectiveness
is what you're looking for.
In a top executive.
In the advertising medium that will help you find him.

And effectiveness is what you'll get in the International Herald Tribune. Because it's read by senior management throughout Europe.

73% of our readers are executives, including 41% at a senior level.
33% serve on at least one board of directors.

EXECUTIVES AVAILABLE

CONSULTANT
Belgian resident having retired early this year as executive board member of large shipping and transport group and since serving as commercial advisor for important Continental Shipbuilding group has part-time available to act as consultant for ship and/or transport related investments.
Box D-5,540, Herald Tribune, Paris.

U.S. NATIONAL
12 years international experience, 6 in Europe with emphasis in Eastern Europe and Middle East. Marketing, Public Relations and Finance Background. Strong cultural and historical inclinations. Seeks challenging international opportunity. Resident in West Germany, free to travel and relocate as required.
Box 845, I.H.T., Gr. Eschenheimer Str. 43, Frankfurt/Germany.

MARKETING GENERAL MANAGER
Age 41, international multi-industry experience including specialized chemicals, office equipment and pharmaceuticals. Strong in start-up situations, direct and dealer sales experience; good all-round marketing background. Qualified lawyer + business studies. Bilingual English/French. Located Brussels, willing to relocate. Possess Swiss work permit.
Write: Box D-5,543, Herald Tribune, Paris.

MIDDLE EAST - ARABIAN GULF
Important French/Arabic air conditioning and electrical engineering company is requiring

GENERAL MANAGER

For Abu Dhabi. The candidate should be engineer in electrical and/or mechanical, experienced in similar employments. He will be responsible for commercial contacts, execution of work, management of administrative departments. English and French necessary, Arabic appreciated. Excellent salary + profit sharing, various advantages.
Please write with C.V. to:
CIEC, 9 Rue Terrien Cocherel, 49000 Angers, France.

EXECUTIVES AVAILABLE

INTERNATIONAL SALES/MARKETING MANAGEMENT
Experienced sales/marketing manager with broad background in engineering, chemical, appliance and industrial fields, well travelled, 39, married, 4 languages, permit C (CH), with strong proven profit-making record. Seeks new challenging position. Base preferred Switzerland.
Box D-5,547, Herald Tribune, Paris.

ART

The German Romantics in Paris

By Michael Gibson

PARIS (IHT).—The "awakening" of Germany in the 19th century was comparable in its historical consequences to the Renaissance. What some might be tempted to dismiss as "mere" philosophy or "mere" literature implying that such toys have impact on life—was to cultivate, to mention but two of the most visible consequences, in philosophy of Karl Marx and psychology of Sigmund Freud, these two represent the practical spearhead of a new world-view that emerged out of the work[illegible] of German letters in the first of that century.

The fine arts of that hard-driven age have generally been neglected outside Germany itself. The present exhibition at the Orangerie des Tuileries (to Jan. 28), "German Painting of the Romantic Period," assembles over 250 works from 56 museums in six countries (not to mention various private collections).

The living nucleus of the romantic movement is to be found in Germany. It exported its art to England and its mannerisms to France, where "romanticism" was watered down to sentimentalism and melodrama. It may be that the Protestant spirit of Germany and England found a better soil to the romantic quest than did the inherently formal but still powerful Catholicism of France.

In consequence, in any case, it is that German romanticism is more serious (even when it is diabolical) and more substantial than in any other country.

The "movement" has been described as a revolt against Reason (or "la Raison," a French import), and in favor of sentiment. The defense of sentiment implies that the subjective aspect of the psyche is at last asserted as part of the real world. This is not sentimental self-indulgence, but a new concept, and should be taken as such.

In the new German art of the romantic period, especially in the work of Caspar David Friedrich (1774-1840), its foremost representative, this finds a subtle yet unambiguous expression. Again and again, Friedrich's paintings depict landscapes or a person or at most two people contemplating a landscape.

Friedrich's landscapes are quite extraordinarily luminous and delicate in their color. There is something quite new here—a passionate sensitivity to the mood of nature, the cosmos addressing itself to man. Here, then, are the two protagonists of the romantic world-view: the individual (or the individual and his alter ego) and nature.

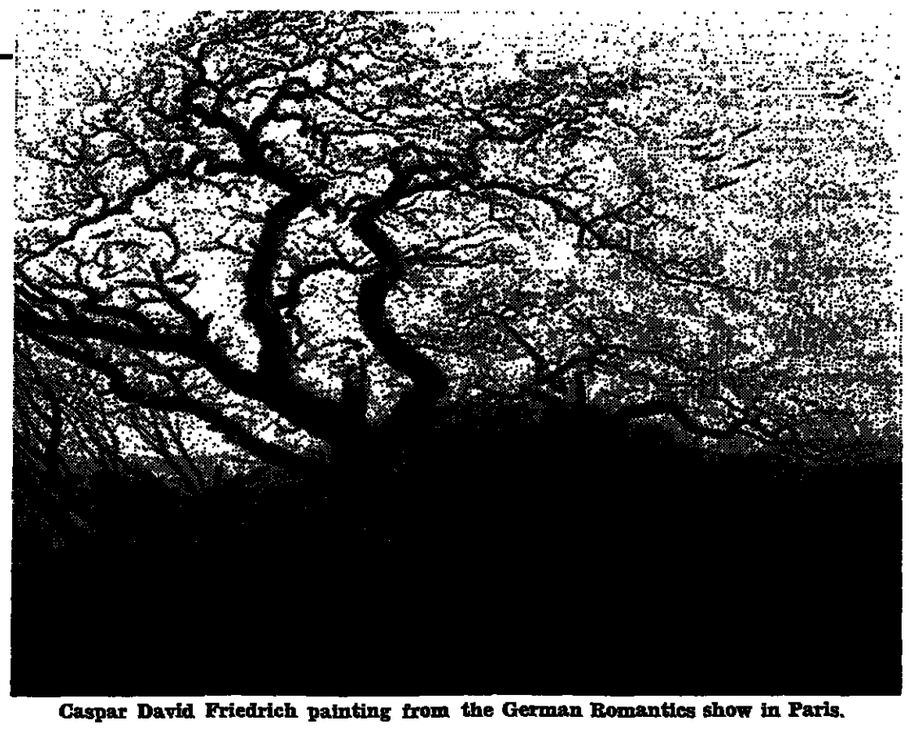
This concept of nature is not decorative or rhetorical, but sincerely sensitive and sincerely expressive. The resulting paintings touch the viewer by their subtly persuasive truth—this is the mood of nature and as such, what other mind does it reflect? What does it signify? And is it more than a mirror of the mood of the viewer (the viewer *within* the painting) himself?

Here are two friends, one leans upon the other's shoulder as they stand on a hill, observing the rising moon between the gnarled roots and branches of a wintery oak. There is something very Goethelike about the scene—the rising moon, the woods and the idea of a communion in friendship.

Elsewhere are two sisters looking at the night sky over the port of a Gothic river town. The twin spires of the cathedral reiterate the intimacy between the two women (one has her hand on the other's shoulder). Other paintings show single figures standing in front of breathtaking landscapes or the landscape alone, the visitor himself filling the part of the observer.

Friedrich makes explicitly religious allusions that suggest that the beauties of nature are there to fulfill a role in the dialogue between the soul and its God. But implicitly the tone is rather more pantheistic, and nature, instead of referring the soul to God, increasingly refers it back to itself.

This terrifying intuition of man's solitude in the universe shook the romantic world. Some, like Lichtenberg, a crisp and tortured wit, might remark: "I thank God that he has allowed me to become an atheist," but others, like Jean-Paul in his extraordinary "dream" about the death of Christ, saw this new solitude as a view of desolation and a victory of entropy.



The Romantic Age, part of a larger process of developing ideas, was contradictory. Just as the idea of subjectivity was gaining recognition, to some it might have seemed that a narrowly deterministic materialism was threatening it.

This excruciating discord was to find a resolution in the mind of the most fundamentally materialistic of modern philosophers. The ultimate goal of history shaped by man, Marx wrote, is "the humanization of nature and the naturalization of man." This sibylline text appears as a quasi-messianic response to the whole romantic question.

German romantic painting as a whole, and as reflected in the present exhibition, refers to many realities and many moods. It is almost indifferent to the cult of historical subjects that dominated French painting with its bombast.

The German claim to profundity has sometimes been derided, probably because it was made by the sort of professors about whom Heine remarked that "they use their nightcaps to stop up the gaps in the structure of the universe." But German profundity is also something very rich and real, and it comes across in the most natural way as a concern with the multiple and conflicting aspects of experience. Friedrich obviously belongs to that class.

Lesser painters in this exhibition have charm and quality: Adolph von Menzel, Carl Gustav Carus. Some succumb, deliciously or pompously, to the sirens of Italy. Three drawings by Goethe reveal his vigorous sense of expressive stenography. And some mention must be made of Philip Otto Runge, a moderate talent but an intelligent artist (and the forerunner of all the romantics) whose sometimes ornate style is still to be felt as an influence in the Jugendstil.

Caspar David Friedrich painting from the German Romantics show in Paris.

Giulio Turcato, Recent Paintings, San Calisto, 5 Via di San Ca...listo, Rome, through Nov. 15.

Swirls of silvery paint on light canvas—white on white, lavender on white, turquoise or salmon on white—condense in buoyant images. Turcato is a natural. Flourishes converge on and flow from a center, evoking the inexplicable. These atmospheric but robust paintings once more testify to the vigor and inven...tion of one of Italy's most unencumbered and prodigious abstract expressionists.

* * *

Lucio del Pezzo, Rondanini, 48 Piazza Rondanini, Rome, through November.

This Neapolitan, who lives in Paris and Milan, has a knack for translating the motifs and colors of fr... art into acceptable symbols and pleasures for the mod...ern drawing room. His relief sculptures, drawings and prints are now neat and cheery—once they were evocative. Hidden meanings lurked behind the barber-pole stripes, stars and targets, and playing-card figures. But now the mystery is gone; all is pat, clean and shiny.

* * *

What was called "An American Sampler" by its originator, Ann Vandevanter of the Baltimore Museum of Art, but later less imaginatively and more officially dubbed "200 Years of American Painting" by its sponsor, the United States Information Agency, has just left Rome. It is on its way to Warsaw (National Gallery of Poland, Nov. 15-Dec. 10). It is an unusual offering because in Rome it became a real people's show. The vitality of content in American art was recognized by the very sophisticated and the unsophisticated alike. At times it was hard to get near the pictures, there was so much attention being paid.

Two thirds of the show consists of portraits and landscapes from the 18th and 19th centuries, meant as a homage to Europe, where the painters then trained. In the early 20th century autonomous trends began emerging with the advent in the 1940s of abstract expressionism. An independent manner was born, with Europe now looking to America. Because Europeans by now are quite familiar with the "latest," it was not thought necessary to present a complete and up-to-date roundup of trends. All the same, the stance and freedom, the spaciousness of American abstraction and pop art come across impressively.

In the earlier section the "Peaceable Kingdom" of Hicks, Peale's young lady, Ammi Phillips's "Mrs. Meyer and Daughter," the land and seascapes of Kensett, Bierstadt and Inness were favorites in Rome. Later the most memorable were Cassatt, Prendergast, Sargent, Twatchman, and, more recent still, Hopper and O'Keeffe. And then there was a particularly fine Gorky, who started it all—the New York school—that is. More exports of this kind, possibly more particularized, would be more than welcome.

—EDITH SCHLOSS.

Paris

The Tiepolos, All Their Engravings, Galerie Marsilio, 22 Rue de Seine, Paris 6, to Nov. 30.

Gianbattista (1696-1770) and his two sons, Giandomenico (1727-1804) and Lorenzo (1736-1776), are represented here in what purports to be the complete collection of their engravings. The father, Gianbattista, published a series of "Capricci" that steer completely away from the traditional iconography, or which make use of it for their own ends. The result is an opus that points ahead to Goya's "Caprichos". They are, of course, neither as violent nor as irrational as the latter, but in their luminous 18th-century grace, one senses a smiling, icy feyness that is quite unconventional. Giandomenico is represented in particular by a rather charming series of fantasies illustrating the flight into Egypt. The short-lived and hence less productive Lorenzo is represented by a few works of quality.

* * *

Première Fête de la Lettre, Galerie Paul Facchetti, 6 Rue des Saints Pères, Paris 7, to Nov. 27.

A playful exhibition devoted to the alphabet: alphabet soup, inflatable letters, quaint conceits, photos, graffiti and some sober type. Niki de St. Phalle, Topor, Roman Cieslewicz, Joan Rabascall, Siné and others . . .

* * *

Paul Wunderlich, Galerie Octave Negru, 23 Rue de Seine, Paris 6, to Nov. 13.

Wunderlich's virtuoso work is built upon something that looks very much like a tough, cool fetishistic obsession that is not far from calling to mind—despite the quite different technique—the mood of a Bellmer. A very elegant form of ritualized angst expressed through sometimes simple, sometimes convoluted sexual themes.

* * *

Kenneth Noland, Galerie Daniel Templon, 30 Rue Beaubourg, Paris 3, to Nov. 12.

Noland (b. 1924) comes under the heading of post-painterly abstraction in the manuals. These eight recent works on canvas have been given entirely unsymmetrical shapes in which straight-edged, uniform areas of color unfold. Noland is obviously questioning the habit of making quadrangular paintings, a habit that is almost universal in all cultures (except Lascaux or Altamira, or in frescoes whose shape is dictated by the architectural support). The shapes he gives these canvases, however, are uncomfortable. One senses even more the restrictions imposed by the straight-edged polygon, the awkward angles which the hard facts of geometry impose. Modifying the shape of the support can be meaningful only if the shape adopted is motivated by more than a rejection, out of principle, of the traditional quadrangle. Color and shape within the irregular frame seek to establish a balance in the asymmetrical universe within which they unfold. A sort of balance is, indeed, achieved. But it looks like a rather uncomfortable formal solution.

—MICHAEL GIBSON.

ARTS AGENDA

Hans Meister is staging and choreographing a new production of Tchaikovsky's "Nutcracker" that will have its first performance Nov. 6 at the Zurich Opera, with sets and costumes by Max Rothlisberger. Galit Shoham, Daniel Weibel, Max Natiez, Reda Sheta and Tibor Olah dance the principal parts at the first performance. Several performances of the ballet are scheduled throughout November and December.

* * *

Two ballets by Todd Bolender will enter the repertory of the Vienna State Opera ballet on Nov. 23. "The Still Point," to parts of Debussy's String Quartet (Opus 10), will have Lily Scheuermann and Michael Birkmeyer as principal performers, and "Souvenirs," to Samuel Barber's score, will have Susanne Kirnbauer and Franz Wilhelm in the main roles. The program will be completed by a new staging of Harald Lander's "Etudes." Later performances are scheduled for Nov. 28 and Dec. 7.

3. Your sister's laughter.

(A good reason to call home.)

An international call is the next best thing to being there.

LONDON THEATER

'Rum an' Coca-Cola'—A Small Look at Trinidad

By John Walker

LONDON, Nov. 5 (IHT).—Whether it is due to the economic crisis or a sudden desire by writers to work on a small scale, there are many two-character plays around at the moment as well as one-man shows.

So far, the rewards of these monologues and duologues have been small. But the West Indian playwright Mustapha Matura's "Rum an' Coca-Cola" at the Royal Court Theatre is, for most of its short length, delightful and charming.

Mr. Matura concentrates on the teacher-pupil relationship between Creator, once Trinidad's top calypso singer and now, 20 years after his great triumphs, reduced to living on the beach and singing to passing tourists, and the younger Bird, who admires the older man and dreams of comparable success.

Creator, beautifully acted by Norman Beaton, belongs to the time when calypso occupied the place in black popular culture that reggae does now—its singers were folk heroes, their songs were full of sharp political comment or uproarious scandal. But times have changed; the tourists rule and calypso has been reduced to local color, ingratiatingly performed to white audiences.

The contrast between Trinidad then and the island now, the loss of a culture, the humiliation of a people, is cunningly revealed in a series of seemingly idle conversations between the two men, lazing and drinking on the sands. Their chat is charming and funny.

But the play begins to lose conviction halfway through, as Bird begins a relationship with a young American girl whom Creator, in an act of senseless violence, murders. It is not that this ending is melodramatic but that it is outside the character created by Mr. Matura and Mr. Beaton.

The play is excellently staged by director Donald Howarth, strikingly designed by Joycelyn Herbert and elegantly lighted by Jack Raby. And Trevor Thomas as Bird, both hesitant and eager to follow his mentor's trade, acts well.

For all its many virtues, though, it is a play on a small enough scale to have been better suited to the Court's studio Theatre Upstairs rather than the main auditorium.

* * *

"Damn everything but the circus," wrote E.E. Cummings, and, indeed, there is something about a circus, even at its least spectacular, which is irresistible. Gerry Cottle's circus at the Round House is a small one, sadly lacking in clowns and disastrously attempting glamour, but delightful nevertheless.

It is one of those circuses where the James Sisters, having spun ropes and eaten fire with great effect, will appear later, in different costumes, as the Inaros Sisters doing a trapeze act.

The Round House, despite its shape, proved not to be an ideal setting for the circus ring, which was pushed to one side of the auditorium and so cramped that the girl of the flying trapeze had to cut short her act after hitting the high wire.

$4,000 REWARD if located

PARIS, SATURDAY-SUNDAY, NOVEMBER 6-7, 1976

Japan to Study Boost n Goods From Europe

TOKYO, Nov. 5 (AP-DJ).—The apanese government and busi- ss leaders have rejected Euro- an urgings for controls on Jap- se exports, but in an effort correct the trade imbalance ith Europe the Japanese are aming steps to increase im- rts.

Keidanren, the federation of onomic organizations, hopes to nounce steps to increase im- rts from Europe before a Com- on Market summit conference Nov. 29, sources said.

Executives of the automobile ufbuilding, household electrical pliance, bearing and pharma- utical industries and major ading firms reached the accord llowing recommendations by idanren.

Toshiwo Doko, Keidanren presi- ident, who recently returned from a visit to European Economic Community countries, has said criticism was mounting against sharp increases in Japanese exports to the EEC and the trade imbalances were developing into a political problem.

During today's session, Keidanren officials proposed increased imports by creating greater domestic demand, review of import duties on EEC exports, review of nontariff barriers and easier import financing.

As long-term measures they suggested providing more information on the Japanese market, strengthening publicity in the EEC, and further cooperation in third-coutry markets.

Japanese government officials and private business leaders apparently have agreed that new restrictive measures on exports to the EEC are not needed.

They say that current self-regulatory measures on various export products to European nations, along with an improvement in the domestic economy, will bring about a better trade balance between Japan and Europe.

According to an official at the Ministry of International Trade and Industry, talks between Keidanren and MITI officials produced a basic understanding that additional measures are not needed, but that certain guidelines will be followed to reduce trade frictions with Europe.

Officials at MITI said the sharp criticism of Japanese exports by European leaders will probably recede as unemployment in those nations declines.

"There has been no proof offered that there is any relationship between the loss of jobs in Europe and a rise in Japanese exports," a MITI official said. He added that the Japanese government understood that these are particularly critical times for some of the European nations.

Meanwhile MITI announced that certified exports in October rose 15.5 per cent from the year-earlier month to tota: $6.183 billion.

This marks the first time since April that the year-to-year increase in certified exports has fallen below 20 per cent. Seasonally adjusted, the exports were down 11.5 per cent from a record posted in September.

Japan Offers To Increase Funds at IMF

TOKYO, Nov. 5 (AP-DJ).—The apanese government has decided offer to increase its commit- ent to the International Mone- ry Fund's General Arrange- ents to Borrow to the equivalent 1 billion special drawing rights 1.15 billion) from the current 0-million-SDR commitment, a inistry of Finance official said day.

The official said the increase the commitment to the Gen- al Arrangements to Borrow, or AB, is deemed sufficient to ver its participation in finance g an IMF credit to Britain.

The increase would place Japan rd in terms of size of GAB mmitment amounts, following e United States with 1.73 bil- n SDRs and West Germany th 1.44 billion SDRs.

In Washington, the IMF's ex- utive directors accepted the apanese government offer today.

The Finance Ministry official id the decision to increase the mmitment at this time was rtly due to the extremely low vels to which the IMF's holding Japanese yen have fallen in cent times.

It is estimated that IMF holdgs of yen are currently equiva- nt to 5 per cent of Japan's IMF ota of 1.2 billion SDRs. The MF's holdings of West German arks is also low, amounting to ly 8.4 per cent of the West erman quota.

The Finance Ministry official id Japan hoped other countries ch as West Germany would llow its lead in offering to help e IMF with its liquidity probns.

The GAB will have to be tivated if and when the IMF ves to provide Britain with request for a $3.9-billion ddit.

The GAB was created in 1962 the Group of Ten major inustrial countries to help nations dich develop severe foreign erve or other financing probns.

loney Supply Up harply in U.S. n Latest Week

EW YORK, Nov. 5 (NYT).— a U.S. money supply is con- uing to accelerate, the Federal serve System reported yester- y.

The narrow money supply, led M-1 and defined as de- nd deposits and currency in culation, averaged $310.4 bil- n in the week ended Oct. 27, $1.8 billion from the previous ek. The broader money supply known as M-2 and also in- ding consumer-type time and ings deposits at commercial nks, jumped $3.4 billion in the st week to an average of 7.7 billion.

n the latest quarter M-1 has wn at a seasonally adjusted nual rate of 6.6 per cent and -2 at a rate of 11.5 per cent. ese are the highest growth es for these aggregates since June 30, when the rates were per cent and 9.9 per cent, pectively.

he Fed's target range for M-1 1/2 to 7 per cent and 7 1/2 1/2 per cent for M-2.

-1 grew at a 5.3-per-cent sonally adjusted annual rate he latest six months and by per cent in the latest year. -2 grew at a rate of 10 per in the six months and 10.7 cent in the year.

the latest week, the cur- y and demand-deposit coments of the money stock fined on an unadjusted basis $1.8 billion. However, this less than the Fed had anated in its seasonal adjustt factors.

parately, the Federal Reserve k of New York reported a -million increase in comcial and industrial loans on books of major New York banks. Almost $300 million he increase, however, was in kers' acceptances—trade bills se payment is guaranteed by ank. These money-market ruments are classified as mercial and industrial loans he Federal Reserve.

With Use of Computers

TV Information Seen Expanding

NEW YORK, Nov. 5 (AP-DJ).—Over the next 30 years, researchers expect television to emerge from its role as a passive entertainer and become an instrument of two-way communications, information and education.

Currently, for example, 5,000 subscribers to a cable TV service in Columbus, Ohio, are linked to a computer that allows them to pay only for those programs they watch. And in Reading, Pennsylvania, television owners are taking part in an experiment that allows them to use their TV sets to interview local officials.

British television is also experimenting with information distribution. Tucked away in a corner of the British Broadcasting Corp.'s television center is a computer named Esmeralda that is sending out coded signals into the airwaves. These signals, however, are only going to privileged viewers such as Queen Elizabeth and Prime Minister James Callaghan.

These viewers, simply by pushing buttons on their sets, are able to ask Esmeralda for all sorts of information, including news summaries, sports scores, time checks, weather forecasts and entertainment listings.

U.S. cable television already enables subscribers to receive 20 or more channels (San Jose, California, has a system with a 75-channel capacity), as well as first-run movies, plays or sporting events through such companies as Time Inc.'s home box office. Cable TV is growing more slowly than once predicted (it is currently in 15 per cent of those homes with sets), but Arthur D. Little, the research company, expects it to be in 30 per cent of TV-equipped homes by 1985.

In the future, engineers see television being used in conjunction with a computer to send and receive information from banks, stores, doctors' offices and libraries. One of the first commercial services using this technology is being planned for Philadelphia by Micro TV Inc., a unit of Radio Broadcasting Co. Next February the company hopes to begin a TV information service for businesses such as banks and stores.

The subscribers will be equipped with TV sets containing special decoders that will allow them to receive part of the TV signal that cannot be picked up by a normal receiver. In this way, customers will be able to receive and transmit information; for example, a store will be able to send price changes to its branches (the decoders will keep the information private).

In Britain, this system is considerably further ahead. Esmeralda is the nerve center of Ceefax, the BBC's pioneering experiment in information distribution. By using a special decoding machine and an ordinary color television set, viewers are able to summon the information they want simply by tapping out a code on the decoder and waiting for the data to appear on the TV screen.

At present there are only about 500 sets in Britain equipped with the decoders, which cost about $2,000. But if tests by the BBC and two other organizations, which are experimenting with similar systems, prove successful, mass production of adaptors could bring the cost down to less than $50, according to industry sources.

The government will decide next year whether to allow these services to go commercial. In anticipation of a go-ahead, Texas Instruments' British subsidiary has begun producing adaptors for use in new sets, priced at about $140. Major manufacturers of color sets also are expected to begin putting adaptors into some sets.

A third, and even more versatile, system under development is called Viewdata. This is different from the other two techniques in that it uses telephone lines rather than TV signals to carry information to the home television set. The Post Office, which operates the telephones in Britain, is now organizing a pilot program for Viewdata and plans to begin test-marketing the system in 1978.

Next Year's Rise Is Only Modest

U.S. Firms' Capital Spending Seen Up 6%

By Ann Crittenden

NEW YORK, Nov. 5 (NYT).—Capital spending by American business, one of the missing links in this year's lagging economic recovery, will rise modestly next year, according to the fall survey of industry's spending plans by the McGraw-Hill publications company.

The survey shows that companies plan to spend $139.55 billion next year, 13 per cent above the expected level for 1976. After discounting inflation, "real" spending will rise about 6 per cent in 1977, a forecast about in line with the results of other private capital spending surveys.

Real capital spending this year is expected to rise by 3 to 4 per cent overall.

Private economists, who rely more heavily on the Commerce Department's capital spending data released in December, say the McGraw-Hill survey has tended to be optimistic. If that is true now, capital spending will not provide a very substantial impetus to the economy in the coming months.

If the 1977 estimate is accurate, however, it is good in the sense that "businessmen are looking ahead to business as usual next year," according to Otto Eckstein, of Data Resources Inc., an economic forecasting concern, and have not negatively reassessed the coming year in light of the worrisome slowdown now apparent in many countries.

Similarly, Doug Greenwald, an economist and author of the McGraw-Hill survey, believes that the upswing in investment represents a carryover of plans that were deferred in 1976.

The failure of industry to undertake major new capital outlays this year was a key factor in producing what economists are now calling a "pause" in the economic recovery. Normally, after consumers resume their spending patterns, as they did early this year, business has to produce more, the higher level of production puts pressure on productive capacity and capital expansion begins to occur.

But this year, although capital spending rose strongly in the first three quarters, it failed to accelerate dramatically. One reason is that the expected pressure on productive capacity never materialized. According to McGraw-Hill, the operating rate of all industry during September was 76 per cent, only 3 per cent above the year-earlier level.

Capacity Expansion

According to Mr. Greenwald, only about 50 per cent of the capital spending scheduled for next year will add to productive capacity, with 41 per cent going to modernize existing facilities and some 9 per cent to install pollution-control equipment.

The Commerce Department has estimated that 6.1 per cent of this year's total capital expenditures went to pollution control, so that expansion of productive capacity was quite moderate this year as well.

The McGraw-Hill survey, released yesterday, also found that business expects sales in 1977 to increase 10 per cent in dollar terms and 5 per cent in real terms.

As for growth in the gross national product, 21 per cent of the survey's respondents expect real growth of more than 5 per cent, 61 per cent expect growth of 3.5 to 4.9 per cent and 18 per cent see slow growth of 1 to 3.4 per cent.

The survey also found a drop in inflationary expectations. The respondents—representing 52 per cent of American companies, including the largest corporations—plan to charge an average of 5 per cent more for their goods and services next year, compared with the 6-per-cent rise estimated for this year.

Mobil Offers $265 Million For Calif. Land Developer

By Robert J. Cole

NEW YORK, Nov. 5 (NYT).—Mobil Corp. disclosed yesterday that it had offered to pay $265 million in cash for all of the stock of Irvine Co. a California land developer.

It made the offer to the Irvine Foundation, holder of 55 per cent of Irvine stock, as well as to minority stockholders, largely the Irvine family. The bid is equivalent to $31.50 a share.

The offer—Mobil's third in the last two years—was called a counterproposal to a bid made last Tuesday by Cadillac Fairview Corp. of Toronto, a real estate developer with assets of $1.2 billion.

If accepted, the acquisition would be Mobil's second major diversification in nonpetroleum ventures in the last two years. Mobil already has a $1.8-billion stake in its merger with Marcor, owners of both Montgomery Ward, the retail chain, and Container Corp. of America.

Company Policy

The acquisition of Marcor, Mobil said, implemented a long-standing company diversification policy. It added that with the exception of Irvine—which Mobil regards as an extension of its long-established real-estate business—the oil company has no plans for any further diversification.

Responding to contentions that it had been moving into non-oil areas rather than spending its profits to find oil, a Mobil spokesman said that in the first nine months of this year the company had spent more than $1 billion around the world on capital goods and oil exploration, almost the same as it spent on the oil business last year.

Mobil's offer came on Wednesday in Santa Ana, Calif., in the fifth week of hearings in Orange County Superior Court to determine whether an earlier Mobil bid was fair to the stockholders.

Late in 1974 Mobil had offered informally to pay the foundation and minority holders $24 a share or $200 million in cash for Irvine stock, but was rejected by minority holders.

Mobil made its first formal offer for Irvine last May, when it agreed to pay $200 million in Mobil stock—a transaction that would have been tax free to the recipients. A cash deal is taxable to both the foundation and the other holders.

U.S. Export Prices Rise

WASHINGTON, Nov. 5 (AP-DJ).—U.S. export prices for 53 categories of manufactured goods and chemicals covered by a Labor Department index rose by 1.6 per cent in the third quarter of this year, the U.S. agency reported. For the year ending Sept. 30, the index reflected a 5.7-per-cent increase.

Zaire and Banks In Debt Accord

LONDON, Nov. 5 (Reuters).—An agreement was reached here today between Zaire and a group of international banks on Zaire debts, avoiding a rescheduling of Zaire's loans, senior bankers said.

The group of U.S., European and Japanese banks, agents for $700 million to $800 million of syndicated loans to Zaire, had been meeting a Zaire government delegation led by central bank governor Sambwa Pida Nbagui.

A joint statement said: "A memorandum of understanding was signed to the mutual satisfaction of the Zaire delegation and of the banks, which provides for the regularization of the service of Zaire's syndicated bank debt."

While the exact form of the agreement is still confidential, Zaire will have responsibility for meeting delayed and missed service payments on its debts, and will now have to show evidence of regular performance on honoring its debts, bankers added.

Leyland Raising Prices

LONDON, Nov. 5 (AP-DJ).—British Leyland Ltd. is raising the prices of its cars sold in Britain by an average of 6 per cent, effective Monday. This is the fourth price increase announced this year by Leyland, whose cars will now cost about 20 per cent more than they did a year ago.

N.Y. Stocks Take Hammering On New Fears for Economy

NEW YORK, Nov. 5 (IHT).—New fears about the state of the U.S. economy dealt the New York Stock Exchange its worst hammering in more than five weeks today.

Blue chips and glamours, particularly those with adverse corporate news, attracted most of the selling pressure.

The fresh economic worries came after the Labor Department reported that unemployment in October rose to 7.9 per cent.

The Dow Jones industrial average was off 17.37 at 943.07. Last Friday, the index stood at 964.93.

By the close, 20.78 million shares had changed hands, compared with 21.7 million yesterday. Declines outnumbered advances by about 930 to 538.

Heavily traded Pepsico fell 4 3/8 to 77 3/4. Coca-Cola, also active, lost 3 1/8 to 77 7/8. A published report said a government advisory committee raised questions about the safety of cola drinks containing caffeine.

Eastman Kodak dropped 4 1/2 to 82 3/8 after a press report criticized the company's instant film, suggesting it was subject to fading. Kodak said the issue of color fading "is being blown out of proportion."

However, General American Oil of Texas spurted 6 3/4 to 57 1/2. Mesa Petroleum, off 1/8 at 31 5/8, acquired an interest in General American earlier in the week.

Fairchild Camera slipped 1 1/4 to 42 despite improved earnings.

Also in retreat were Phillip Morris down 1 1/2 to 58 3/8, IBM 5 1/8 to 262 1/4, Mobil Oil 1 3/8 to 57 7/8, Burroughs 1 5/8 to 87 5/8, Du Pont 2 1/4 to 125 1/4, Digital Equipment 4 1/8 to 146, and Travelers 1 5/8 to 35 3/4. The latter reported higher earnings.

U.S. Steel fell 1 1/2 to 46 5/8.

Prices on the American Stock Exchange declined, with the Amex index off 0.27 at 99.72.

Swiss Bank Corp. Sees Rise in Gold

FRANKFURT, Nov. 5 (AP-DJ).—The price of gold should show a definite rising tendency in the near future, Franz Schmitz, general director of Swiss Bank Corp., said today.

"We won't see the $180-$200 an ounce again, but there should be a certain increase in gold prices," Mr. Schmitz said in answer to a question at the presentation of the bank's participation certificates on the Frankfurt Stock Exchange.

Renewed concern about inflation and uncertainty about supply of gold from traditional sources had led to an upswing in demand, Mr. Schmitz said.

In London today gold was fixed in the afternoon at $127 an ounce, up from $125.60 at the morning fixing and up from $124 at yesterday afternoon's fixing.

Toyota Sees U.S. Sales Rising to Half Million

TOKYO, Nov. 5 (AP-DJ).—Toyota Motor Sales Co. expects to be able to sell about 500,000 units annually in the United States by 1978, which would just about mark the upper limit of the American market for Toyota, a spokesman for the company said today.

After the upper limit is reached, the company will consider building a plant in the United States, the spokesman said. Sales in the United States are expected to be around 350,000 units for 1976, up from 328,918 units in 1975.

SEC Approves Stock-Clearing Plan

By Robert D. Hershey Jr.

WASHINGTON, Nov. 5 (NYT).—Another key element of the evolving national market system for securities trading fell into place yesterday as the Securities and Exchange Commission announced its qualified approval of a plan to merge the clearing, or record-keeping, units of the New York and American stock exchanges and the over-the-counter market.

One result is the likelihood that brokerage charges to investors will ultimately be reduced—perhaps as much as 4 1/2 per cent.

It is also asserted that the merger will virtually eliminate the possibility of future paperwork jams like the one that disrupted brokerage houses in the hectic trading of the late 1960s and led to closing of the stock market one day each week.

The consolidated clearing mechanism, which represents the first time that the bookkeeping function would be separated from each particular market, is expected to go into effect about the end of this month.

The SEC's decision to permit the formation of the unit, called the National Securities Clearing Corporation, was not unexpected even though several regional exchanges opposed the idea and the Justice Department raised questions about possible anti-competitive effects.

Survival Cited

Rejection of the application, according to SEC official Lee Pickard, would have meant the congressionally mandated national market would not have been advanced. He also cited a statement of the National Association of Securities Dealers that its clearing unit could not otherwise survive.

Mr. Pickard added that while he was not certain that the four conditions attached to SEC approval met the objections of critics, who included Rep. John Moss, D-Calif., they made the proposal much more "palatable."

The most important condition provides for "full interfaces and appropriate links" between the combined unit and five still independent clearing agencies for regional exchanges. No fees may be changed for intersystem movement of data.

A second obliges the consolidated clearing unit to provide facilities through which brokers who do not have New York offices can compare transactions with those it will process.

The third provides for utilizing existing branches of the NASD clearing operation as a joint facility of the new unit and the regional clearing units.

The fourth requires that the Consolidated Clearing Corporation furnish to other clearing units free computer programs for trade comparisons of over-the-counter stocks.

The 16-member governing body of the new corporation would be dominated by those who use its facilities; 12 would represent brokers and there would be one each from the three merging bodies. The other member would be the National Securities Clearing Corporation's president.

The SEC solicited public comment on the plan for just two weeks—until Nov. 19—and extended to Nov. 29 the deadline for making its final decision.

Although the two big New York exchanges now clear 72 per cent of the nation's securities trades and the NASD clears about 11 per cent, the new corporation is not expected to conduct 83 per cent of the combined business because of increased competition from regional units.

The possible savings to investors can be derived from SEC estimates that processing costs account for 10 to 15 per cent of brokerage commissions and that these costs could be cut 10 to 30 per cent under a full-fledged national clearing system. The savings that might be passed on range from 1 per cent to 4 1/2 per cent.

The new clearing corporation said in its application that processing costs could be cut through its consolidation by $12 million to $17 million a year.

Jobless Rate Rises in U.S. To 7.9 Per Cent in October

WASHINGTON, Nov. 5 (AP).—The U.S. unemployment rate rose from 7.8 per cent to 7.9 per cent in October, the government reported today, providing fresh evidence that the economic slowdown is continuing.

[Commissioner of Labor Statistics Julius Shiskin said the new unemployment figures underline the fact "the economy is at a very critical junction" and cited "some indications of more sluggishness ahead," Reuters reported.

[In his monthly appearance before the Congressional Joint Economic Committee, Mr. Shiskin voiced the hope that the economic lag would not necessarily lead to a full-scale recession.

[He said such "patterns of sluggishness" have sometimes been followed by renewed growth. "Usually, it has been only after these patterns have extended over a longer period, with deeper declines in the leading indicators . . . that recession has followed," he said.]

The unemployment rate is one of the economic indicators President-elect Jimmy Carter is watching as he considers whether to propose a tax cut after taking office in January. He told a news conference last night that a tax cut for average wage earners "could be a strong possibility if there is no change in the rate of growth of the economy and if economic indicators should show a negative aspect."

The October jobless figure matched the unemployment rate in August and prompted the Labor Department to describe the labor market as essentially unchanged for the past three months.

But because the labor force is constantly growing, the unemployment rate alone can mask the actual number of persons affected by the indicator.

The number of persons unemployed in October was 7.6 million, the most since 7.7 million were out of work in December.

Employment, which has been growing even as the unemployment rate rose from 7.3 per cent to 7.9 per cent this summer, has now declined for two consecutive months to 87.8 million. That is the smallest number of people at work since 87.7 million persons held jobs in May.

Ford administration economists for months have described the current economic slowdown as "a summer lull." But Mr. Carter's top economic adviser, Lawrence Klein, has called for an additional $10 billion to $15 billion in economic stimulus through a tax cut, higher federal spending, or both.

The latest unemployment figures showed that even the individual categories which had shown some improvement in September fell back again in October.

Teenage unemployment had slipped from 19.7 per cent to 18.5 per cent in September, but rose to 19 per cent last month. Black unemployment, which had slipped from 13.6 per cent to 12.7 per cent, hit 13.5 per cent in October.

The unemployment rate for adult men was up from 6.1 per cent to 6.3 per cent. The rate for adult women climbed 0.1 per cent to 7.6 per cent.

U.S. Chain Store Sales Increase

NEW YORK, Nov. 5 (NYT).—The largest U.S. chain-store organizations yesterday reported substantial sales gains in October. Demand for outerwear and other apparel, stimulated by low temperatures in many parts of the country, pushed sales to their highest point of the year.

Sears, Roebuck & Co., the largest merchandising organization, reported sales totaling $1.34 billion for the four-week period to Oct. 27, an increase of 13.4 per cent compared with the 1975 level.

This was the largest year-to-year percentage increase in more than three years. Arthur Wood, chairman of Sears, said that men's, women's and children's outerwear all registered above-average increase in the month.

Sears reported that sales for the 39 weeks to Oct. 27, at $11.51 billion, had increased 9 per cent compared with 1975.

KINGDOM OF MOROCCO
OFFICE FOR THE AGRICULTURAL DEVELOPMENT OF THE LOUKKOS REGION
KSAR EL KEBIR
SOLICITATION FOR INTERNATIONAL TENDERS No. 14/76
The Director of the Agricultural Development Office of the Loukkos region will receive, until the 15th Dou-El-Hidja 1396 (December 7, 1976), 5 p.m. at the latest, bids for civil engineering work on the canals to irrigate the R'Mel area (15,000 ha.).
The work is to be divided into 2 distinct lots as follows:
Lot 1—"Tête morte" canal 8 km. with a yield at the head of 15.1 m3/s.
Lot 2—Main canals 70 and 55, respectively of 26.1 km. and 5.7 km., with a yield "en tête" of 11.6 m3/s. and 3.5 m3/s.
Tender files may be obtained at the headquarters of ORMVAL, Ksar El Kebir, against payment of 800.00 DM (EIGHT HUNDRED DIRHAMS).
To visit the above area, appointments must be made at the headquarters of ORMVAL at least one week in advance.

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or paid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Currency Rates

November 5, 1976

By reading across this table of yesterday's closing inter-bank foreign exchange rates, one can find the value of the major currencies in the national currencies of each of the following financial centers. These rates do not take into account bank service charges.

	$	£	DM	FF	L. It	Gldr	BF com	SwissF.	Dan.Kr
Amsterdam	2.53	4.14	104.415*	50.67*	29.27y	—	6.8040*	103.53*	42.725*
Brussels (c)	37.165	60.81	15.38	7.454	4.30*	14.7075	—	15.218	6.375
Frankfurt	2.4205	3.9624	—	48.48*	2.797x	95.37*	6.510*	99.10*	40.88*
London (z)	1.6365	—	3.95375	8.1525	1414.5	4.13375	60.825	3.99125	9.6775
Milan	865.40	1415.15	357.15	173.31	—	342.20	23.28	353.95	146.15
Paris	4.99125	8.17125	206.035*	—	5.7820x	197.325*	13.4207*	204.225*	84.200*
Zurich	2.4437	4.0032	100.91*	48.95*	0.2824*	95.55*	6.57*	—	41.20*

The following are dollar values only: Danish krone: 5.93625; Escudo: 31.40; Israeli £: 8.56; Peseta: 68.37; Schilling: 17.17; Sw. krona: 4.24875; Yen: 294.50; Belgian financial franc: 37.45; Hong Kong $: 4.8170.

The Canadian dollar is worth U.S. $1.0266.

OECD Revises Growth Forecast For Second Half

PARIS, Nov. 5 (AP-DJ)—[illegible]perts of the Organization [illegible] Economic Cooperation and De[illegible]opment have revised downw[illegible] their previous growth predicti[illegible] for the second half of this y[illegible]

For the 24 member-nations [illegible] a whole, the gross national pr[illegible]uct is now set to grow at an [illegible]nual rate of 3.5 per cent dur[illegible] the second half of 1976, do[illegible] from 4.5 per cent predicted [illegible] the organization last July.

The responsibility is laid [illegible] waning business confidence, [illegible] reflected by flagging private [illegible]porate investments, and to the [illegible]cent monetary upheavals wh[illegible] have considerably changed [illegible] terms of trade of a number [illegible] member countries, according [illegible] qualified sources.

The downward revision refle[illegible] the recent poor economic p[illegible]formance and accompanying [illegible]strictive measures in a number [illegible] member countries, especially [illegible] Italy and Britain, as well [illegible] France's anti-inflationary pla[illegible] and its 1977 austerity budget, [illegible] sources said.

Japanese Jobless Rate

TOKYO, Nov. 5 (AP-DJ)—Unemployment in Japan in Se[illegible]tember declined by 20,000 fr[illegible] August to total 1,010,000, or [illegible] seasonally adjusted 2.4 per ce[illegible] the prime minister's statistics [illegible]fice reported. The figure repr[illegible]sents an increase of 10,000, [illegible] 1 per cent, compared with [illegible] year-earlier month.

Japan Machinery Orders

TOKYO, Nov. 5 (AP-DJ)—Domestic and export machine[illegible] orders received by Japanese ma[illegible]ufacturers in September were [illegible] 144.2 per cent from August an[illegible] 81.1 per cent from the yea[illegible] earlier month, the Japan Societ[illegible] of Industrial Machinery Man[illegible]facturers reported.

Why do 50,000* subscribers look to The Value Line...

and pay $1 million a month for its stock market guidance?

Many want to know what 400 stocks Value Line considers to be the most timely commitments. Others want to know what 400 stocks Value Line believes are the least timely commitments now. Or the 100 highest yielding stocks of the 1600 on which Value Line provides comprehensive coverage with full-page quarterly reports. Every one of Value Line's 50,000 subscribers knows how Value Line rates each of 1600 stocks for timeliness, for safety, for yield, *now.* Do they know something you don't?

To put you in the know, Value Line is offering a special introductory 12-week trial subscription to The Value Line Investment Survey for only $45—about half off the regular price, provided you have not had a subscription in the past two years. As a double bonus at no additional charge, you will receive the 1900-page Investors Reference Service (covering 1600 stocks) and the 64-page booklet, "Investing in Common Stocks." Send check or money order along with name, address and zip code together with this ad to:

The Value Line Dept. 413M01

5 East 44th Street, New York, N.Y. 10017

(This subscription will not be assigned.)

*Average weekly paid circulation 2nd quarter 1976: 50,581.

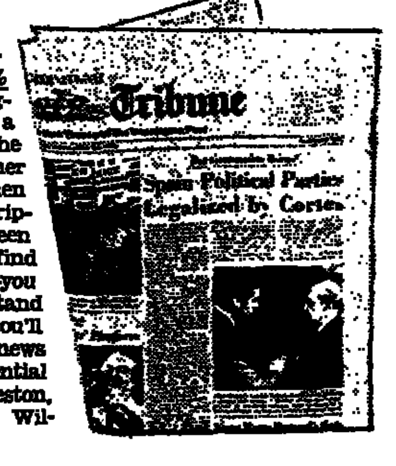
Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or paid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.



cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

BE A NEW SUBSCRIBER
and save up to
47%
of the newsstand price
(Depending on your country of residence)

Take advantage of the International Herald Tribune's 25% Introductory Discount on the regular subscription rates. That's a big saving. But remember that the newsstand prices are always higher than the subscription rates. When you compare the reduced subscription rates with what you have been paying at the newsstand, you find that your saving is a lot more—you can save up to 47% of the newsstand price. In the Herald Tribune you'll find unsurpassed international news coverage and respected and influential columnists including James Reston, C.L. Sulzberger, Anthony Lewis, William Buckley, Art Buchwald, Russell Baker, Red Smith and Brian Glanville. In addition, you'll find special reports from the principal cities of Europe including Claire Sterling from Rome, John Dornberg from West Germany and Peter Lennon from London. You'll also find excellent important coverage of international business and economic news. And complete, daily Wall Street stock tables. Complete the coupon below and mail it to us with your check or money order today.

As the world gets smaller, everyone needs a newspaper with a bigger point of view.

These are the special rates after deduction of the introductory discount.

CROSSWORD PUZZLE

Edited by WILL WENG

COMBOS—By Nancy W. Atkinson

ACROSS

1 Nike or Honor
4 Phony coin
8 Shopping complexes
15 Dallas campus
16 Tablet
19 Protagonist in fiction
21 Off: Prefix
22 Draw a bead on
23 Sinnatra's neighbor
24 Made a full report
25 Political-musical duo
28 Actor-U.S. composer-President
30 French river
31 Drench, with "down"
32 Run of luck
33 Gist
35 Elec. units
37 Showed off
40 S.A. country
41 Atlantic isl.
42 Something often read
45 Came close
47 Most stingy
49 ——— du Diable
50 Mary Ellen or Stuart
53 Skier's need
55 Autograph, for short
56 Spanish wave
57 Climb again
60 Miss Miles
61 Ledger entry
65 Vancour of TV
67 Authorize
69 Take —— with
72 Also, old style
73 Signed off
74 Gromyko
75 Take steps
76 Dog or bob
77 Bridge call: Abbr.
78 Howard and Bob
80 Words with kiss
81 Busy as ——
82 Irish cries
83 Arrow poison
84 Mule
86 Miss Farrow
87 Kind of case or will
88 Treasure or Long
89 Move, as a hairline
90 Bird's wing
92 Biblical place
94 One revising a news piece
96 Album contents: Abbr.
97 Biblical name
99 —— for (summons)
101 —— large
102 Ignited
103 Sweet potato
107 Joint-making machine
110 Slipup
112 Kudos
113 Ending for moral or journal
115 Gambols
117 Male ant
118 Te's partner
119 Drink —— to (honor)
122 "That hurts!"
123 Miss Muller
125 Dukes
132 Stars
133 Yonder
134 " . . . and mine —— one"
135 Grassy area
136 Have, in Cannes
137 Qualifies for
138 Pronoun
139 Hovel
140 Orders, of old
141 —— uncle (gives in)
142 Altos or Pines

DOWN

1 Actress Goldie
2 Concerning
3 Two U.S. writers and Brummell
4 Trim
5 Sierra ——
6 Extinct wild ox
7 Cry of petty triumph
8 Jellyfishes
9 Shaded walk
10 Tra ——
11 Property claim
12 Sauce beans
13 Miss Dee
14 College exam
15 States of pique
16 Jack of films
17 Fifth and others
18 Dennis or Clarence
20 "—— be so
23 Conrad's Lord
26 Opposite of ryo
27 Diving bird
29 Lens and frieno
34 Sandwich initials
35 Songlike
36 Economist and puppeteer
37 School-org. units
38 Stalling sounds
39 Search into
41 "Picnic" host
43 Wealthy in land
44 Chastity's mother
46 "——, a deer . . ."
48 Part of A.D.C.
51 Backdrops
53 Vincent and Baby Snooks
54 Spring landmark
58 Byron hero et al.
59 Scrooge, for short
62 Alexander, Gwyn and William
63 President and explorer

BOOKS

ON HUMAN FINERY

By Quentin Bell. Second Edition, revised and enlarged. Schoken. Illustrated. 239 pp. $14.95.

Reviewed by Christopher Lehmann-Haupt

CONSIDER how absurdly we clothe ourselves. See how on a springlike day in March or April people still bundle up as if it were the dead of winter. Think what we have worn in the past —the crinoline and stay, the wig and pantaloon, the bustle and mailed gauntlet. Recall how changeable Western tastes have been over the past several centuries, especially in contrast to such cultures as Japan, pre-revolutionary China, Pre-Columbian civilization and indeed all pre-literate societies. Why do we do it? Because we are slaves to fashion, of course. But why particularly we in the West since about the time of Charlemagne? And why women more so than men?

Not for the usual reasons advanced, argues Quentin Bell in his "On Human Finery," a revised and expanded version of a book the English art historian and biographer of Virginia Woolf first published in 1945. Changes in fashion are not the work of a few individuals (else why would the putative fashion-setters so often work against their own interest?). Nor is fashion a product of human nature (since not even whatever is consistently true of people is invariably reflected in what they wear). Nor, surprisingly, is fashion "a reflection of great political or spiritual events." (Prof. Bell's analysis shows that whatever influence war or inflation or nationalism has had in one instance is often inexplicably contradicted in another.) Not even "the intervention of a higher power" can explain the vicissitudes of fashion. (Neither zeitgeists nor theories of evolution can be shown to correlate in any systematic way with how people dress.)

No; according to Prof. Bell, the reasons that fashion changes and has done so most pronouncedly in the post-medieval West, are threefold. First: Clothes have primarily been worn for the sake of show, and what people have generally tried to show with their clothes is their status, or to put it more appropriately to Western society, their capacity to spend money, the more the better. Second: The standard of show in the West has been set by the aristocracy; hence the dynamic of style-change can be explained by class-competition. Third: The reason that such competition has been possible is a direct result of the Industrial Revolution.

Thus, writes Prof. Bell, "The history of fashionable dress is tied to the competition between classes, in the first place the emulation of the aristocracy by the bourgeoisie and then the more extended competition which results from the ability of the proletariat to compete with the middle classes. It is only when we take these facts into account that we can understand why fashion should be originally a European phenomenon developing in much the same way wherever the social situation allows of such development. It is for this reason that, while many political events leave fashion unaffected, those which alter the class structure do influence the course of fashion . . . Implicit in the whole is a system of sartorial morality dependent upon pecuniary standards of value."

Thus, as most readers will have recognized by now, what Prof. Bell has done here is to wed the value theory of Thorstein Veblen with a Marxist analysis of class struggle. Indeed Bell is the first to admit this when he borrows Veblen's three categories of pecuniary taste—"Conspicuous Consumption," "Conspicuous Leisure," and "Conspicuous Waste" (adding a fourth of his own, "Conspicuous Outrage")—and when, in a concluding chapter, "Deviations From Veblen," he criticizes the author of "The Theory of the Leisure Class" for putting too much stress on "personal prowess" and not enough on "class solidarity."

So Bell's explanation of fashion is both an elaborate and somewhat dated theoretical construction, and anyone with a serious quarrel with either Marx or Veblen could probably shoot Bell's theory more full of holes than a pair of net stockings. (Moreover, since Marx and Veblen disagreed on so many questions, one hates to think what either one of them would have thought of Bell's marriage ceremony.)

All the same, for all its brittleness, Bell's thesis is both fun and compelling. It offers a plausible explanation of why women's fashions have fluctuated so much more extremely than men's: "the differentiation . . . which begins as a variation of development throughout the 18th century and culminates in the schism of the early 19th century, arises from the fact that the exhibition of wealth on men no longer depended upon a demonstration of [conspicuous waste]; this change was made possible by the emergence of a wealthy manufacturing class. On the other hand, the women of this class, having no employment and being entrusted with the business of vicarious consumption, continued to follow the sartorial laws already in existence."

It explains how "the 'boater,' the 'deer stalker,' and the 'Norfolk jacket,' to name a few of the articles of clothing which derive from sports, have been adopted because they are associated with expensive and purely wasteful pursuits . . . Horse racing is of particular interest in that the spectators, who lose money, set many fashions; while the book-makers, who make money, set none." And it predicts the future: With the triumph of the middle class in the West, fashion as we have known it is coming to an end, argues Prof. Bell. Henceforth, it will be a traditionally experimental segment of society, the student body, who will set our fashions. He might have added that, contrary to tradition, it is now the dress of the proletariat we seem to want to emulate. But then "On Human Finery" can't be expected to explain everything. It has already explained so much.

Christopher Lehmann-Haupt is a book reviewer for The New York Times.

Longest Since Tilden

Orantes Victory String In Tennis Reaches 22

From Wire Dispatches

LONDON, Nov. 5.—Manuel antes went through Briton rk Cox in straight sets, 6-4, today to reach the final of $100,000 Dewar Cup Tennis rnament and stretch his win- streak to 22 matches.

The Spaniard's run of success a record in modern men's ten- It is necessary to go back to 1920s, when American Bill lden ruled the courts, to find longer victory string.

The 21-year-old Spaniard, who t lost a match in September the U.S. Open, said he did not under much strain.

I was feeling pressure before ause I was playing badly," he d. "But now that I am playing ll I am not under pressure."

Orantes has won $100,000 tourments in Tehran, Madrid and rcelona since losing to Bjorn rg in the semifinals at Forest lls.

Today's performance on the w indoor court at the Royal bert Hall made him favorite to n his fourth title in a row to- rrow.

Orantes broke Cox's service in first game and it was all he ded to serve out the set to The two left-handers traded vice breaks in the second set then Cox's forehand volley, weakest shot, let him down in ninth game and it was all Spaniard needed to break his rlies and go on to win, 6-4.

"I don't know why, but things rted to go right when I chang- my racket after Forest Hills," antes said.

Tilden went several months without losing during the 1920s. Tilden, of course, competition was not so extensive as it is now. The current exhausting program obliges some competitors to play three times in 24 hours.

Grand Prix Standings

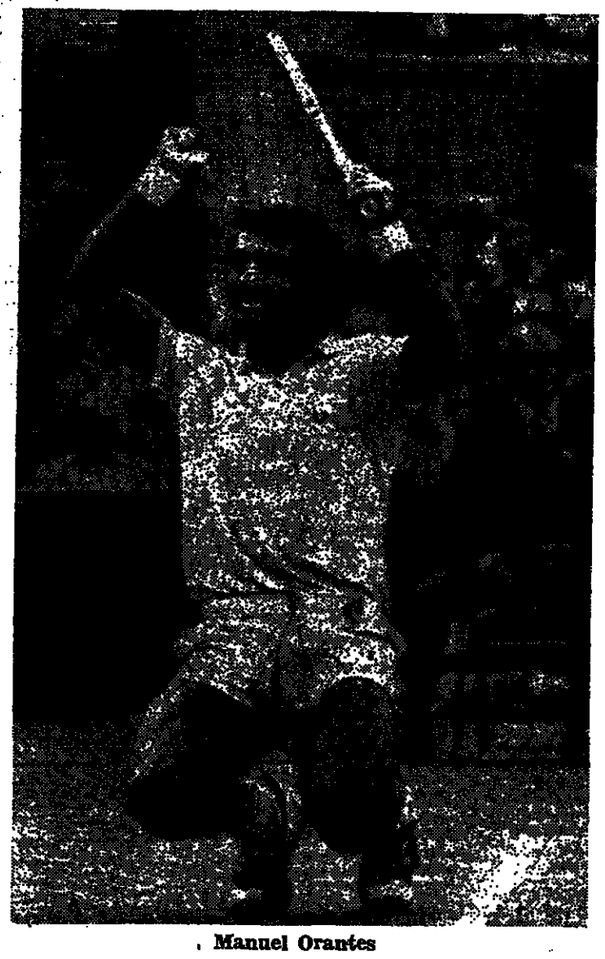
Orantes's triumphs have lifted him into second place in the Grand Prix standings. The competition reaches a climax in December, with the top eight finishers meeting in the Masters tournament in Houston.

Orantes beat South African Bernie Mitton, 6-2, 2-6, 6-3, in yesterday's quarterfinals and, with at least 40 points as a semifinalist, he now has at least 687 points. Grand Prix leader Raul Ramirez had 763 points before this tournament began.

McMillan Ousts Solomon

COLOGNE, Nov. 5 (AP).—South African Frew McMillan beat second-seeded Harold Solomon of the United States, 7-6, 6-2, today to enter the semifinals of the $50,000 Cologne Grand Prix tennis competition.

Playing in the third round of the men's singles, 34-year-old McMillan upset Solomon with powerful and well-placed shots to the farthest corners of the court.



McMillan is No. 7.

Victor Pecci of Paraguay also went through to the semifinals by eliminating American Henry Bunis, 7-5, 6-1. Bunis put up a desperate fight in the first set against the attacks of the South American, who collected most of his points near the net.

Connors Is Victor

Last night, top-seeded Jimmy Connors of the United States overcame stubborn Colin Dibley of Australia in the third set to reach the quarterfinals. Connors, 24, came under tremendous pressure from Dibley's service, which is rated the world's hardest, and needed all his varied shots to pull ahead for the victory, 7-5, 4-6, 6-4.

The 32-year-old Dibley seemed headed for an upset in the second set when his pinpoint service frustrated Connors and either left him without a chance or forced him into give-away returns.

Manuel Orantes

But the American wore the Australian out in the third set with masterful cross shots and sharp, well-placed drives from the baseline.

Connors meets Jiri Hrebec of Czechoslovakia in the third round.

Fourth-seeded Brian Gottfried is paired with Frantisek Pala of Czechoslovakia.

Gottfried used a blazing service to demoralize fellow American Pat Dupre for an easy 6-1, 6-2 second-round victory earlier yesterday.

Japan Semifinals

TOKYO, Nov. 5 (UPI).—Top-seeded Roscoe Tanner of the United States will meet his countryman Dick Stockton and second-seeded Ken Rosewall will play Italian Corrado Barazutti in the semifinals of the Japan Open tomorrow.

Left-handed Tanner, 25, beat Jurgen Fassbender of West Germany, 6-3, 6-2, and the veteran Rosewall, 42, defeated American John Whitlinger, 6-1, 7-6, in the quarterfinals today.

Stockton eliminated Dick Crealy of Australia, 6-2, 4-6, 6-2, and Barazutti conquered Brian Fairlie of New Zealand, 6-1, 6-4, in other quarterfinal matches.

Tanner, who is ranked ninth in the Commercial Union Grand Prix series ratings, is looking for victory in this tournament to add 80 points to his 430 tally. The runnerup in the Japan event gets 60 points.

Focus in Laurel International Race Is European

By Gerald Strine

WASHINGTON, Nov. 5 (WP).—Kelso, for all his failures in the Washington, D.C., International, did more to make the Laurel race a "classic" than any other U.S. thoroughbred. The horse, who graced the 1 1/2-mile turf feature from 1961 through 1964, when he finally won, certified a rating he had been struggling to achieve.

Now, more than a decade later, another great gelding dominates U.S. racing. His name is Forego. And he has hurt the International more than any horse in the 25-year history of the event.

It is no one's fault.

John Schapiro, Laurel's president, has worked diligently over the last quarter of a century to build the International. His effort has paid off, overseas. Shapiro now gets the best horses to come here from Europe to run for the $160,000 purse.

Unfortunately, having solved his major problems overseas, Schapiro has developed some troubles at home. Secretariat did not run in the 1972 International, on purpose. Forego never appeared, although being the Horse of the Year in 1974, 1975 and 1976.

Retired for Season

Without Forego—the 6-year-old gelding was retired for the season before the Jockey Club Gold Cup because of an injury—this year's International has nothing to excite U.S. race-goers. The race will not be telecast.

Ivanjica, having won the Prix de l'Arc de Triomphe, may be the best filly in the world. Rose Bowl is the finest filly in Britain. Youth, the French Derby hero, could be the best 3-year-old colt anywhere. Norway's Noble Dancer, Brazil's Janus II, Germany's Windwurf and Japan's Fujino Pahshia are national champions, but unless they are meeting the best horse in the United States, what does it prove?

The answer is obvious. Such a race does nothing except, in this instance, help settle arguments among French fans as to whether Ivanjica really is better than Youth, as the Arc suggests.

Still, the situation could have been worse. Before he was injured, Forego was expected to run in the $350,000 Oak Tree Champions, a handicap at Santa Anita, tomorrow. Had Forego won the Jockey Club Gold Cup Oct. 23, he would have had an opportunity to pass Kelso's world earnings record in California. The Champions would have been televised nationally. The International would have been presented primarily for the enlightenment of the foreign audience.

United Press International.

Norway's Noble Dancer, left, and France's Youth go through workout at Laurel course.

Light in Quality

The Champions turns out to be light in quality, too, despite all its money. But at least it has Honest Pleasure, the Kentucky Derby favorite, which would have been an interesting U.S. representative in the International. But Honest Pleasure went west because of the richer purse.

Effervescing is a nice U.S. colt, one that deserved his invitation. But he is not about to be proclaimed horse of the world if he defeats Ivanjica and Youth. Improvise, the other U.S. horse invited, did not make it to the International. The 4-year-old gelding pulled a muscle in his hip during a workout Wednesday.

This leaves nine horses set for tomorrow, although Youth continues to be bothered by a heel injury and several of the trainers are not at all happy with the condition of Laurel's turf course.

'Gluey . . . Treacherous'

"It's gluey," declared Alec Head, Ivanjica's trainer. That was complimentary, compared to other comments. "Treacherous," was another trainer's description.

Which brings us to what should be one of Laurel's chief concerns for the International's future. Since 1972, when a soft spot on the course called "Boreen's Bog" took two casualties, Laurel's turf course has become an increasing worry to many owners and trainers. Rivo Ridge fell in the 1972 International, in that "soft spot" that confronted the field as it straightened into the backstretch.

Laurel's grass court, unfortunately, is built on a swamp over underground springs, in an area occasionally subjected to severe flooding. That infield lake, accordingly, usually looks like the Anacostia mudflats.

If, indeed, Laurel is to continue to attract the world's finest horses, it should (1) put much more effort into the maintenance of the grass strip or, preferably (2) rebuild the turf course completely.

The International also needs a corporate sponsor, preferably one with worldwide marketing interests that could be tied into national and satellite TV.

The purse could then be raised to $500,000, comparable with the Arc.

Finally, the International Village should be a showcase, not just another horse hang-up.

If such improvements and changes are not forthcoming, International will be dead five years from now.

Probable Odds

WASHINGTON, Nov. 5 (Reuters).—Ivanjica, with French jockey Freddie Head aboard, is rated a probable 8-to-5 favorite. Youth is 5-2. On My Way II 6-1, Rose Bowl 6-1, Effervescing also 6-1, Noble Dancer 10-1, Windwurf 15-1, Janus II 50-1 and Fujino Pahsia 50-1.

ele Plans to Retire t End of '77 Season

RIO DE JANEIRO, Nov. 5 PD.—Brazilian soccer star e said at a news conference terday that he does not in- d to extend his contract with New York Cosmos and will ire from the team at the end next year, when his $4.7-mil- n pact ends.

He said he would accept a tion as an adviser to the azilian national team.

Giants on Scoreless Stretch, 14 Cowboys on Injured List

By William N. Wallace

NEW YORK, Nov. 5 (NYT)—llowing is a preview of games at will be played in the Na- nal Football League.

NATIONAL CONFERENCE

Giants (6-2-0) at Dallas (7-1-0)—From his film studies, Tom ndry considers the Giants to "the best 0-8 team I ever saw." is former Giant has always n kind. How does he explain w York's 10 straight quarters thout scoring? The Cowboys ve 14 regulars on the injury , but all are expected to play. vorite: Dallas by 15.

Detroit (4-4-0) at Minnesota (7-1-1)—The Vikings always ke the playoffs because they mple their division rivals. y have won 15 of the last 17 m the Lions, nine of the last nine from Chicago. And their unded wide receivers, my White and Ahmad had, are fit again. Favorite: nnesota by 9.

Washington (5-2-0) at San ncisco (6-2-0)—All the im- tant statistics favor the 49ers, cially sacking quarterbacks. Redskins may be shut out in -scoring game. Favorite: San ncisco by 7.

Giants (2-5-0) at Seattle (1-7-0)—Whatever happened to John iam? He was caught just 12 es, which places him sixth in Falcons' passing statistics. Seahawks are averaging only rds a game rushing, which ains their problem. Favorite: nts by 5.

St. Louis (5-2-0) at Philadel- (3-5-0)—The Cardinals' Mel y is ready to play with a en nose. Jim Otis is No. 1 n at fullback and their of- e ought to blow the Eagles the Delaware River. Fav- : St. Louis by 7.

New Orleans (2-6-0) vs. Green (3-5-0) at Milwaukee—They d hold a Giant alumni meet- before the game because John Pete Athas, Chuck Crist and Herrmann are all starting the Saints and Dave Roller the Packers. But none of will be going to the Super or the Pro Bowl. Favorite: n Bay by 3.

INTERCONFERENCE

Miami (7-1-0) at Chicago (4-4-0)—The Raiders are not fav- by much because they don't by much. The key is the 's ability to run on the r defense and thus main- some ball control to keep Stabler, the dangerous Oak- quarterback, off the field. figures indicate the Bears do this, for awhile. Fav- Oakland by 3.

AMERICAN CONFERENCE

Jets (4-4-0) at Colts (2-6-0)—y Little has plugged the on the Dolphin offense by moving out to tackle, with Newman at guard. On de- , Bob Matheson is back at acker and things are defi- nitely looking up. As for the Jets, a year ago their running backs were John Riggins and Carl Garrett, and now they are Clark Gaines and Bob Gresham. It's not the same. Favorite: Miami by 11 points.

Baltimore (7-1-0) at San Diego (4-4-0)—The Colts, whose only loss was by three points to Dallas, can afford a letdown. Their secondary, weakest part of the team, will have to watch Charlie Joiner, the Charger receiver averaging a fat 23 yards a reception. That's extraordinary. The Colts are big favorites, but there is no specific point line.

Buffalo (2-6-0) at New England (5-3-0)—The Patriots have averaged 50,000 at home in winning three out of four, which is fabulous for them. Although the Bills are much weaker, O.J. Simpson is rolling again. He usually murders the Pats. Favorite: New England by 11.

Cleveland (4-4-0) at Houston (4-4-0)—Mike Phipps, out almost all season with an injury, will be the Browns' quarterback. Greg Pruitt is having a big year. The Oilers may be full of doubts after a horrible game against Baltimore. Favorite: No line.

Pittsburgh (4-4-0) at Kansas City (3-5-0)—Franco Harris and Terry Bradshaw will both start for the Steelers, which adds zip to the offense. The defense has registered two shutouts in a row. The Chiefs lead the conference in passing yardage and trail in defense. Favorite: Pittsburgh by 2.

Tampa Bay (0-8-0) at Denver (6-4-0)—Jim Turner, the old Jet, is enjoying banner campaign, having kicked 11 field goals in 12 tries for the Broncos. The Buccaneers scored three touchdowns last week. They had had just six in seven prior games. Favorite: Denver by 17.

MONDAY NIGHT

Los Angeles (6-1-1) at Cincinnati (6-2-0)—The Rams will start James Harris at quarterback. He is over his injuries and restored to No. 1. They'll tell him to get the ball to Ron Jessie, the receiver averaging 26 yards a catch. The game is a big test for the Bengals' defense, which has not been so hot. The Kenny Anderson-to-Isaac Curtis passing threat has diminished. Favorite: Cincinnati by 1.

NBA Results

Thursday's Games

Philadelphia 101, Golden State 96 (Collins 26, McGinnis 22; Barry 28, Wilkes 17).

Atlanta 97, Chicago 87 (Meriwether 24, Drew 21; Johnson 17, Gilmore 16).

Cleveland 96, Milwaukee 88 (Russell 22, Snyder 18; Winters 23, Trestman 16).

Two Bowl Prizes at Stake in College Football

NEW YORK, Nov. 5 (UPI).—It's still a little early to determine the representatives in the major postseason college football bowls, but the outcome of key matchups at Jacksonville, Fla., and Lincoln, Neb., tomorrow may put the picture in sharper focus.

The Southeastern Conference's representative in the Sugar Bowl will be determined at Jacksonville, where No. 8 Georgia takes on No. 10 Florida, and the Big Eight Conference logjam will be straightened out a bit when No. 9 Nebraska is host to No. 12 Oklahoma State.

The Florida-Georgia game has already created more pregame excitement than any previous contest in the 74-year-old series. The Gator Bowl has been sold out for this game since midsummer and the two clubs are treating it as if it were for the national championship.

"It's more like a bowl game than a regular season game," said Florida coach Doug Dickey. "We could sell 10,000 tickets each year with no problem."

The SEC title is the big prize at stake, but Florida, seeking its first SEC title in history, has an added reason for wanting to stop the bulldogs. A year ago, the Gators were deprived of the conference championship when they lost to Georgia, 10-7, on an 80-yard end-around pass with only 3:12 left to play.

"Last year, there was a feeling of total despair after the game," said Florida quarterback Jimmy Fisher, the current SEC total-offense leader. "We were so close to the championship, only to see it elude us on a single play.

"We want very badly to win the championship this time. Also, Florida has never finished in the top 10. We want to prove we belong."

Both teams are strong offensively, but Georgia appears to have a definite defensive edge. The Bulldogs have allowed only 10.1 points a game as compared to 22 a game for the Gators.

Georgia, though, is going to have its hands full containing Fisher. Last week, the Gators' quarterback threw three long touchdown bombs to defeat Auburn and he has averaged 162 yards a game in total offense.

"Georgia is better than we are, on offense and defense," Dickey said. "We have a tough job cut out for us. But our people have never quit. They get behind and keep coming back. The only thing that will defeat them is the clock."

Nebraska and Oklahoma State are currently in a three-way tie with Colorado for first place in the Big Eight, with 3-1 records. But another loss by either of the three teams would virtually eliminate it from the race. Colorado, which faces Missouri tomorrow, has beaten Oklahoma State but lost to Nebraska. So if the Cornhuskers can win theirr emaining three conference games they will be the conference representative in the Orange Bowl.

American Wins LPGA in Japan

OSAKA, Japan, Nov. 5 (UPI).—American Donna Caponi Young fired a two-under-par 72 to take a four-stroke victory with a five-under-par 217 in the Mizuno LPGA Classic Golf Tournament, the first official Ladies Professional Golf Association tournament played in Japan.

The victory earned Young a $15,000 first prize in the $100,000 tournament. A field of 49 foreign and 20 Japanese golfers competed in the final round of the competition on the Hanayashiki Country Club course.

Hisako Higuchi of Japan, who was in third place also shot a 72 to move into second with a 221 and the $11,000 second prize.

Final 1976 PGA List

1. Jack Nicklaus	$266,438
2. Ben Crenshaw	$257,759
3. Hale Irwin	$252,716
4. Hubert Green	$228,031
5. Al Geiberger	$194,331
6. J.C. Snead	$192,645
7. Ray Floyd	$178,318
8. David Graham	$176,174
9. Don January	$163,622
10. Jerry Pate	$153,102

Lyle Meeting Young

SAN FRANCISCO, Nov. 5 (Reuters).—Ranking heavyweights Ron Lyle and Jimmy Young meet in a 12-round bout here tomorrow, with Lyle aiming to reverse a loss to Young 21 months ago.

'Den of Thieves,' He Says

Finley's A's Most Popular in Re-Entry Draft

NEW YORK, Nov. 5 (WP).—Charles Finley called baseball's first re-entry draft a "den of thieves," then watched the talent-hungry club owners pick his three-time world champion Oakland A's apart yesterday by eagerly grabbing the negotiation rights to a half-dozen of his stars—Gene Tenace, Joe Rudi, Sal Bando, Don Baylor, Rollie Fingers and Bert Campaneris.

Each of the 24 players on the free agent list was allowed to be taken by only 12 teams, and Tenace, Rudi and Baylor were taken the allotted number of times after four rounds while Bando and Fingers were closed out by the end of round eight.

Shortstop Campaneris, 35, was selected by 11 clubs.

"This is the worst thing that ever happened to baseball," said Finley, who originally said he would not participate in the draft, then changed his mind. "Everyone is trying to cut one another's throats."

Others on Popular List

Outfielders Reggie Jackson and Garhy Matthews, pitchers Don Gullett, Wayne Garland, Bill Campbell and Doyle Alexander and second basemen Bobby Grich and Dave Cash were also drafted by 12 teams.

Aging Oakland veterans Willie McCovey and Nate Colbert were not taken by any team.

The teams with players on the free-agent list also were allowed, under the rules of the draft, to enter into negotiations for their former players and each club said it would exercise that privilege.

The world champion Cincinnati Reds were the only team that did not participate.

Teams will now compete with one another to sign players, but a team is allowed to sign only two unless it loses more than that number. Finley would be allowed to sign six free agents if all six of his players who were drafted sign with other clubs.

If a player fails to come to terms with any team, his name will go into a secondary draft in February.

$3-Million Price Tag

The first player selected was Jackson, but surprisingly, he was not pursued heavily in the early rounds. Jackson did not use up his 12-team allotment until the 14th round, and it was believed the $3-million price tag he put on himself scared away a lot of owners.

Expansion Draft

NEW YORK, Nov. 5 (UPI).Outfielder Ruppert Jones of Kansas City, described as a potentially great player by Royals manager Whitey Herzog, was selected today by the Seattle Mariners as the first player in the American League expansion draft.

The Toronto Bluejays took shortstop Bob Bailor of the Baltimore Orioles organization.

Both clubs went mainly for youth in the first six selections. The only exceptions were 37-year-old designated hitter Rico Carty, who was claimed fifth by Toronto from Cleveland, and 34-year-old left-handed reliever Grant Jackson, taken by Seattle.

Seattle's other early selections were Gary Wheelock, a right-handed pitcher from the California Angels; Bill Stein, a third baseman from the Chicago White Sox; right-hander Dick Pole from Boston, and outfielder Dan Meyer of Detroit.

Toronto's early choices included left-handed pitcher Ted Garvin from Minnesota; right-handed pitcher Jim Clancy from Texas; outfielder Gary Lee Woods from Oakland, and right-handed pitcher Claude Edge from Milwaukee.

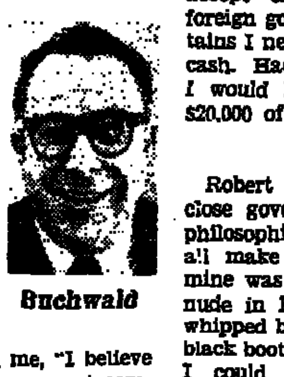
SEEK au-pair babysitter, 80 kms West Paris. Tel.: (37) 36 73 66

ENTRY LEVEL sales management. Demonstrated aggressiveness & desire to participate in a growing business in U.S. military & civilian travel market. Car essential. Frankfurt based, able to travel. Salary and expenses. Resumés to: Box 846, I.H.T., Gr. Eschenheimer Str. 43, Frankfurt, Germany.



USAREUR life insurance and mutual fund salesmen. Our people are quality—our products are quality—our contract is 95%. For more information tel.: (collect call) Bill Barker, Gigglewede U.K., 313405, or Sol King, Germany, 0631-59135.

TEACHERS elementary, high school. Needed immediately. American qualified only need apply. Resumés and recent photo to Mr. Kelly, P.O. Box 71, Sliema, Malta.

Art Buchwald

How to Go Wrong

WASHINGTON — After every election, the fickle media tend to interview the winners. No one seems to care about the losers. It has always been my policy to stay with the losers and find out why they blew it.

Buchwald

This year I talked to several of them.

The first was George Merchantile, an incumbent congressman who was defeated handily by Carter Crawfish in what many people said was an upset.

Merchantile told me, "I believe my biggest mistake was not communicating with the voters. Instead, I did most of my communicating with my press secretary, Lizzie Polvron, never suspecting that she would tape all our conversations at the Holiday Inn Motel. My opponent decided to use these private conversations against me, which I consider despicable. I should have been suspicious when I kissed Lizzie on the ear and discovered a small microphone stuck in it. But when you're in the heat of a campaign you don't think about those things. Besides, I promised Lizzie no more and no less than I promised the voters. Most of what the public heard about the tapes was taken out of context. All they read was what I promised Lizzie, and not what I promised the country."

* * *

Archibald Blandanna, who lost his seat in Congress, was another bitter loser. "I would have won it if my opponent had played fair. But he made capital out of the fact that I had accepted a $50,000 gift in cash from the South Korean government. The truth is that I turned down the gift. So Tong Pong Long, a very dear friend of ours, gave it to my wife without my knowledge. I had warned my wife never to accept expensive gifts from a foreign government, but she maintains I never said anything about cash. Had she told me about it I would have made her return $20,000 of it immediately."

* * *

Robert Quovadis, who lost a close governor's race, was more philosophical than bitter. "We all make mistakes. I imagine mine was posing chained in the nude in Hustler magazine being whipped by three women wearing black boots. I thought at the time I could reach the blue-collar workers who do not necessarily read the newspapers, but apparently I was wrong. If the same picture had appeared in Family Circle I'm certain there wouldn't have been an uproar. I'm not saying that this photograph made me lose the election, but it put me on the defensive in the final weeks, and no one was interested in what I had to say about the new school-bond issue I had proposed for the state."

Harlan Hathaway, who was running for attorney general of his state, blamed his defeat on his speechwriters. "When Earl Butz resigned," Hathaway told me, "I hired the fellow who wrote jokes for him. I thought they were very funny, and so did all the guys at the country club where I play golf. But when I started to tell them in ethnic neighborhoods the people just didn't laugh. So then I switched and came out for the death penalty. They didn't laugh at that either. I never saw so many uptight voters in my life as I did this year."

* * *

Probably one of the saddest losers was Floyd Harmoney, who ran for the school board in Dutchess County.

Floyd put up $3 million of his own money, most of it for television commercials. "The trouble was I saturated the state with the commercials, and everyone thought I was running for senator. I got one million votes for senator and only 30 for the school board. Mother is very angry with me, because I used up the entire family's trust fund and she had to go down today to apply for food stamps."

Onassis Foundation Funds Welfare Aid

ATHENS, Nov. 5 (Reuters).— The Alexandros Onassis Foundation plans to allocate $3.75 million for social welfare and charity projects in Greece and elsewhere, it has been announced.

The foundation was set up in 1975 in accordance with the will of the late Aristotle Onassis, whose only son, Alexandros, died in a plane crash in 1973.

Mary Blume

French Architecture—Neo Anything But New

PARIS (IHT).—This month the French Senate and Chamber of Deputies will be asked to vote on a new law concerning the status of architecture and architects. One of its provisions is that all public and commercial buildings must be architect-designed, although private home owners will no longer have to hire an architect in order to get a building permit.

It is a law likely to irritate everyone. When an early version was announced last winter, 3,500 architects demonstrated outside the offices of the then Minister of Culture, Michel Guy, claiming that there would be a terrible decline in French architecture if home owners were allowed to build as they choose. (There are architects who believe only an architect knows how to make a house. It is said that last year, when a Paris show was held on self-designed American architecture from the Shakers to Sausalito in the 1960s, French architects objected to the title, "Architecture Sans Architectes" on the grounds that architecture without architects cannot exist. The show was finally called Marginal Architecture.)

On the other hand, there are those who think that French architecture is too weak to assume wider responsibilities for all public building. A survey taken last summer by the Ministry of Culture showed that two Frenchmen out of three dislike modern architecture. French architect Emile Aillaud, who holds the flashy position of being both widely criticized and widely critical, writes in his memoirs, "At this point we must kill architecture... Real modernism consists of re-thinking all the so-called facts taught at the Beaux-Arts."

The Beaux-Arts may be taken to mean more an attitude than a place—an attitude that shows in French housing projects, rational on blueprints but hell to look at and to live in, an attitude that could be seen alarmingly among the young in the 1960s when Buckminster Fuller was hanging a show in the Tuileries and was available for conversation with anyone who happened by. Only a handful of architecture students came and then they left. "They spend all their time drawing Doric columns, they couldn't understand what's new," an American fellow student explained.

The Austerlitz Viaduct—from Parisian past.

Fuller's classic geodesic dome is one of the most widely reproduced structures in the world, but Fuller is an engineer, not an architect. Part of what might loosely be called the French Beaux-Arts attitude consists in a mandarin view toward engineering, a split that began in the 19th century when the French genius for engineering briefly changed French building. "Art and technique separated in the second half of the 19th century, and it was art that suffered," writes Bernard Marrey in his "Guide de l'Art Dans la Rue au XXe Siècle."

A recent exhibition in the Bon Marché department store in Paris showed the vitality and originality of engineer-inspired architecture, extraordinary glass and metal structures snubbed by tradition-minded architects who went right on building neo-Renaissance, neo-Early Christian, neo-Gothic, neo-Romanesque Byzantine, neo-everything but nothing new.

Iron had been used in supporting columns in Portugal in 1675; five years earlier, in Bordeaux, a new process produced sheets of glass much bigger than had been possible before. But it was England—and in particular Paxton's Crystal Palace for the Great Exhibition of 1851—that brought iron and glass to the public eye.

It was a form of building that was to flourish especially in France, accepted by the new public of middle-class businessmen (for the first time an *immeuble de rapport*—a building intended specifically to earn money—was built), and it has been suggested that it was a style that suited the social ideas of Saint-Simon, Fourier and Auguste Comte. It was a time of vast new public building—exhibition halls, markets, bridges, apartment houses, railroad stations—and for all these the new materials proved ideal.

The Bon Marché department store, built 100 years ago (architect Louis-Charles Boileau, metal frame by Armand Moisant and perhaps Gustave Eiffel) is a perfect example of the times, best seen from its upper floors. Aristide Boucicaut, its founder, introduced such ideas as fixed prices on merchandise, returning goods for exchange or credit, reducing the profit margin for higher turnover, and home delivery. His staff was given a share of the profits, fed two meat meals a day, and had its own brass band and library.

Obviously, a new style of building was needed—spacious, sober enough not to distract from merchandise, elegant but not intimidating. An important feature was a grand staircase comparable to that of the Opéra, where the newly rich and eagerly courted customer could display herself. Zola described the atmosphere in "Au Bonheur des Dames."

"Everywhere, space had been gained, air and light entered freely, the public moved about as it wished... It was the cathedral of modern commerce, solid and light, created for the client."

For contrast, at about the same time Paris was rebuilding its City Hall, a heavy pseudo-Renaissance pile. A painter wrote to offer some interesting ideas on possible murals and ceiling paintings but his letter was not even answered. His name was Edouard Manet.

Quite a few buildings in the new style remain. Those most easily seen include the reading room of the Bibliothèque Nationale (1858-68), the reptile room of the Jardin des Plantes (1870-74), the main branch of the Crédit Lyonnais (1878-1913), the Grand Palais (1899-1900), the Grande Cascade restaurant in the Bois de Boulogne (1889), Paris railroad stations and, of course, the Eiffel Tower (1887-89). Among the most interesting and unvisited metal structures are on the dreary Rue Réaumur, a street created in the 1860s of which number 124 (built 1904-5) is highly considered for its metal facade. The graceful apogee of the period came with Hector Guimard.

Most of Guimard's Métro entrances are gone now; many of the remaining metal structures, especially the covered markets, are threatened. And no amount of pressure could save Baltard's splendid shelters in Les Halles from being torn down in 1971.

No one quite knows how the gaping space left by Les Halles will be filled. Since President Valéry Giscard d'Estaing vetoed the dreadful plan to build a skyscraper there, enough new plans have been announced to dizzy the most hardened French functionary. After the publication of the latest—though not necessarily the final—project, a French daily approved and reassured its readers that the new Halles would be Napoleon III in style. Which is just when the old Halles were built.

PEOPLE: Woman, 64, Survives 3-Hour Dip in Atlantic

A 64-year-old woman who spent nearly three hours floating in the Atlantic off the Angolan coast after falling overboard from the liner Windsor Castle was described Friday as "not well." **Margaret Fuller**, a South African, is still in sick bay aboard the mail ship, which docked in Cape Town Friday after a trip from Britain. Mrs. Fuller fell overboard Monday morning, wearing a light dressing gown. She kept herself afloat in the 65o water by doing the dog paddle. In the meantime, her husband, **Leslie Fuller**, reported her missing. **Capt. Patrick Beadon** ordered the ship about and retraced the course. "When we turned round, I thought it unlikely we would find her ... It is hard to expect anybody to stay afloat in a sea of that temperature." Said Fuller: "It is a miracle that she is still alive. Pray God she will be all right." The Fullers are scheduled to disembark Saturday at Port Elizabeth, where they live.

* * *

East German author **Reiner Kunze**, 43, whose latest book, "Die Wunderbaren Jahre" (The Wonderful Years), is a best-seller in West Germany, has been expelled from the East German Writers' Union, according to friends. Kunze's works are not published in East Germany.

* * *

The Jerusalem District Court has ordered a retrial for the woman who was jailed for having sexual intercourse in the Church of the Holy Sepulchre. **Louisa Margaridi**, a 36-year-old Brazilian living on the West Bank, claimed in her appeal that she had been attacked in the church and was raped by her attacker, a Jordanian. A monk discovered them. Miss Margaridi and **Habas Muhammad Abdul Halim**, 33, were sentenced to six months in jail and fined $600 each after the incident. Miss Margaridi said that there was no Portuguese-speaking interpreter at the trial, that the judge had appointed her co-defendant as interpreter and he had mistranslated her testimony to imply that she had been a willing participant.

* * *

Jacqueline Onassis and **Princess Grace of Monaco** are sponsoring a tribute to a third woman of prominence this Sunday—the late **Josephine Baker**. Mrs. Onassis will be joined by other celebrities, including **Ingrid Bergman, Myrna Loy, Jeanne Moreau, Muhammad Ali, Jean-Pierre Aumont, Jean-Cl[...] Brialy** and **Ossie Davis** at [...] Metropolitan Opera House in [...] York to pay tribute to one [of] America's most famous [ex]patriates. The gala is a ben[efit] for the Variety Club Founda[tion] of New York, which, in turn [is] donating part of the proc[eeds] to charities in France [and] Monaco.

Josephine Baker ... a trib[ute]

* * *

Former Canadian Prime M[in]ister **John Diefenbaker**, 81, [says] he urged the late Presi[dent] **Dwight Eisenhower** to stop [the] 1960 presidential campaign [de]bates because he felt they w[ould] help elect **John F. Kenn[edy]** whom he opposed. In the se[cond] volume of his memoirs, "[One Canada:] Years of Achievement," Die[fen]baker portrays Kennedy as [ar]rogant, domineering and igno[rant] of Canadian affairs, yet [fre]quently trying to interfe[re with] them. He says that he ha[d to] explain to Kennedy on se[veral] occasions "that Canada wa[s not] Massachusetts, or even Bo[ston]" and that Kennedy mispron[ounc]ed "Canada" as "Canader."

* * *

"For this film to be show[n in] such a crude manner in this centennial year is, I think, [...] insensitive and very fool[ish,"] declared actress **Olivia [de] Havilland**. She was speakin[g of] plans to show "Gone With [the] Wind" on NBC, complete [with] commercials. Miss De Havil[land] said, in Los Angeles, that [she] turned down NBC's reques[t to] introduce the film on the [...]cast.

International mover seeks executives

no experience necessary

It's not quite a job we're offering. It's more like an opportunity to sit back and take it easy while we move you. We're Interdean-Interconex, the big gentle giant of the international moving industry. We've been moving executives around the world for over 18 years and frankly we're not tired of it. We'll take care of packing, shipping, customs, insurance and delivery problems, so you'll be able to take care of your business problems.

Call us up and we'll send a man right down to explain our company benefits in more precise detail.

...se in U.K. ...orrowing ...Hinted By Healey

LONDON, Nov. 7 (Reuters).—The British government may have to borrow more heavily than forecast next year to pay for its public spending, Chancellor of the Exchequer Denis Healey indicated yesterday.

But Mr. Healey, in a radio interview, was responding to a newspaper report that the country's borrowing requirement for 1977-1978 would be £11 billion (about $18 billion)—£2 billion more than he forecast in July. "I think it is likely to be more, but I think that the 2 billion figure is entirely speculative," he said.

Mr. Healey also said that the labor government might be forced to take more painful economic measures to hold down borrowing.

There have already been signals from the government that it is preparing austerity measures, probably including cuts in state expenditure and higher indirect taxes, to satisfy the conditions of the International Monetary Fund for a projected $3.9-billion loan.

A team of IMF inspectors is here discussing terms for the loan and is expected to seek a cut in the budget deficit and restraint in the growth of Britain's money supply. This has helped restore confidence in the pound, back up to nearly $1.63 from around $1.55 last month.

Mr. Healey explained that the pound's decline was adding to costs and depressing demand for goods. The economy is moving ahead more slowly than planned, saving the government with fewer revenues and higher costs than forecast, he said.

He had predicted in July, when he announced cuts in public spending, that borrowing to pay the difference between state income and expenditure would drop from about £11 billion at present to £9 billion.

A newspaper said yesterday the latest forecasts showed that borrowing would still be around £11 billion.

"Remember there are still five months to go before the next financial year even begins," Mr. Healey said. "There is a great deal of time, if the government feels the public sector borrowing requirement ought to be lower than it is likely to be, to take steps to reduce it."

Mr. Healey declined to elaborate on what these steps might be. Asked about the possibility of an interim budget before Christmas, he said that he would have to decide this in the light of the latest information and discussions with the IMF.

"There is a real possibility we will have to take further action, which would be painful and difficult," he said.

Resolution On Press Is Shelved By Unesco

NAIROBI, Nov. 7 (AP).—A United Nations commission voted overwhelmingly yesterday to shelve a Soviet-sponsored draft declaration that Western nations contended would muzzle press freedom around the world.

By a vote of 78 to 15, with six abstentions, a key commission at the UN Educational, Scientific and Cultural Organization conference moved to refer the proposal to a special negotiating committee. This is expected to defuse the issue for two more years.

George Beebe, chairman of the World Press Freedom Committee, which has been vigorously opposing the declaration, welcomed the decision.

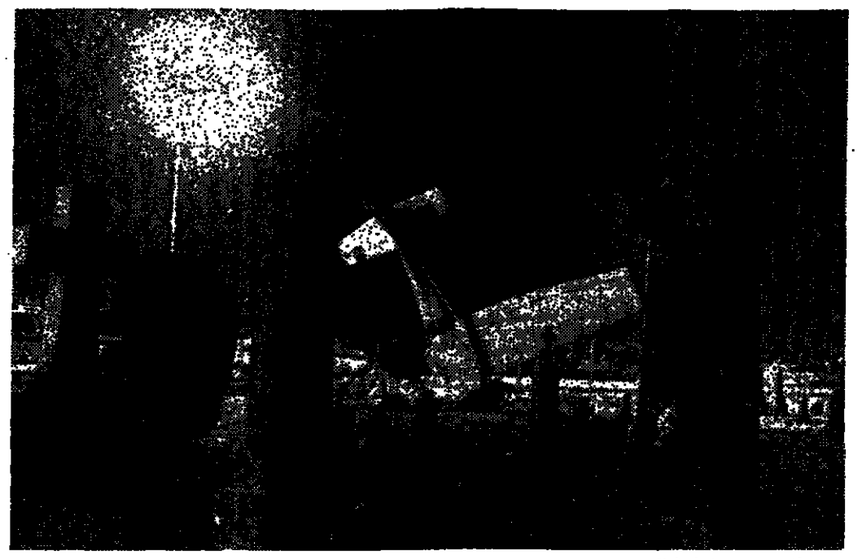
"We hope that future decisions of the conference [concerning news media] will avoid any implications of state control," he said. "Such restrictions would be contrary to the charter of Unesco and the universal declaration of human rights."

Mr. Beebe added that the committee—representing 17 national and international news organizations—still believes "this is only the first of many challenges by those nations who wish to use Unesco for their own political ends." Mr. Beebe is associate publisher of the Miami Herald.

A large number of Third World nations sided with the United States and other Western countries on the vote shelving the proposal.

During 13 hours of debate, many developing nations made it clear that they favored the concept of a declaration on the mass media. They expressed concern over what they consider to be a largely one-way flow of information from the developed to the developing nations.

The Third World countries favor establishing their own news pool to counterbalance existing international news organizations. This proposal has been endorsed by the Western countries.



The developing nations that sided with the West in yesterday's vote apparently did so because of a strong desire, especially among African states, to avoid a direct confrontation during the Unesco conference, which is being held for the first time on African soil.

The declaration's opponents objected most strenuously to a section that said: "States are responsible for activities in the international sphere of all mass media under their jurisdiction."

This was seen by the opponents as a call for state control over the news media and the international flow a news. Many said the proposal was incompatible with guarantees of press freedom incorporated within their national constitutions.

The Soviet Union contended that the West was misinterpreting the declaration and that it simply meant governments should be held responsible for news services and broadcast stations that they own.

The vote sent the media issue to a 25-member "special drafting and negotiating committee." Western representatives said the declaration probably would not be placed before Unesco again until its next general conference in 1978.

Black Presidents See War as Only Way in Rhodesia

By John F. Burns

DAR ES SALAAM, Nov. 7 (NYT).—The Presidents of the black states neighboring Rhodesia emerged from a two-hour meeting here yesterday with a strongly worded statement backing guerrilla war as the only means by which the territory's African nationalists can achieve independence under majority rule.

The black leaders, reacting angrily to recent Rhodesian raids on guerrilla camps in Mozambique, also called on the Communist bloc and other friendly nations to increase arms shipments and diplomatic support to the insurgents. The statement made no direct mention of the conference on Rhodesia in Geneva, where the territory's white minority government and black nationalist leaders are meeting in an attempt to negotiate a peaceful transition to majority rule within two years.

However, the document appeared to signal the Presidents' lack of support for the negotiations by describing efforts to find a peaceful solution as an imperialist plot to buy time for the government of Prime Minister Ian Smith.

The meeting, the first gathering of the five so-called "frontline" states since the Geneva discussions began two weeks ago, was attended by Presidents Julius Nyerere of Tanzania, Kenneth Kaunda of Zambia, Agostino Neto of Angola and Samora Machel of Mozambique. Botswana sent Vice-President Quett Kasumile Masire in place of its President, Sir Seretse Khama, who is ill.

The gathering, which was unusually brief, came as the Geneva negotiations appeared to be deadlocked over the issue of a date for the territory's independence under black rule. The issue was chosen by Britain, which is chairing the meeting, as the one that held out the best hope for compromise.

A U.S. diplomatic initiative, apparently aimed at breaking the impasse in Geneva, proceeded concurrently with the black Presidents' meeting here yesterday. John Reinhardt, assistant secretary of state for public affairs, met with President Nyerere before flying on to Geneva.

Mr. Reinhardt disclosed little about the meeting, other than to say that what Mr. Nyerere had told him was very similar to what the Presidents had said in their statement. He said that he and Mr. Nyerere had also spent time trying "to update each other" on developments related to the Rhodesian dispute.

Last Rhodesian Out

MAPUTO, Mozambique, Nov. 7 (UPI).—The last Rhodesian forces who took part in last week's operation against nationalist guerrilla camps in Mozambique have been expelled from the Tete province, the Mozambique Information Agency said today.

Mozambican forces "are now in complete control of the situation," the agency said.

During the fighting in Tete Province, eight Mozambican soldiers, two of them women, were killed, it said. As the Rhodesians retreated they "slaughtered the residents as they went, sowing destruction and stealing property," the agency added. It did not mention the number of casualties.

11 Deaths Reported

SALISBURY, Rhodesia, Nov. 7 (Reuters).—A white Rhodesian soldier, eight black nationalist guerrillas and two black civilians have died in the guerrilla war in the last 48 hours, an official communiqué said today.

His death brought security force losses so far this year to 94 and to 169 since the war started four years ago. The guerrilla deaths brought insurgent losses so far this year to 1,230 and to 1,933 since the war started.

Says He Commands Peace Force

Sarkis Appeals for End to Bloodshed

BEIRUT, Nov. 7 (NYT).—President Elias Sarkis called today for an end to "bloodshed and ruin" and appealed to the heavily armed warring factions in Lebanon to greet with "fraternity and love" the Syrian-dominated peace-keeping force that is being established in the country.

In his first major public declaration since he was inaugurated Sept. 23 in a Syrian-occupied town in Lebanon, Mr. Sarkis emphasized in his speech to a national television and radio audience that the peace-keepers—an estimated 30,000 troops, more than two-thirds of them Syrian—would be directly under his command.

He said that he hoped their stay as a deterrent force in Lebanon would be brief, and that he had the right to ask them to leave the country. But, while the President's remark seemed calculated to reassure Lebanese who resent the Syrian presence here, Mr. Sarkis gave no indication of how long their mission might last.

Mr. Sarkis did not say exactly when the troops would take up positions in Beirut and other areas of the country. But the force, which is to include a total of at least 20,000 Syrians plus 6,000 to 7,000 troops from Saudi Arabia, Sudan, Yemen, Southern Yemen, Libya and the United Arab Emirates, is expected to start functioning in the next few days.

Mr. Sarkis reminded the leftist Moslems and Palestinians, on one side, and Christian rightists on the other that the powerful Arab nations that approved the establishment of the force had also promised to help rebuild Lebanon once peace and order returned to national life.

But he avoided reminding the factions that under the Arab leaders' agreements, reached last month in Saudi Arabia and Egypt the combatants are to be deprived of heavy weapons and required to return to positions they held before the war began in April of last year.

Mr. Sarkis dealt gingerly with one of the most volatile issues in the Lebanese crisis: the future of the Palestinian guerrillas in the country. The President said that the peace-keeping troops, whom he called "the brotherly Arab force among us," would "preserve Lebanon's sovereignty without preventing the Palestine Liberation Organization from working for its legitimate national objectives."

While the new peace plan approved by the Arab leaders calls for a Palestinian presence in Lebanon, under a neglected six-year-old agreement, Palestinian leaders have made it clear in recent days that they do not intend to surrender substantial quantities of the heavy weapons they acquired during the civil war.

Palestinian refusal to be disarmed could thus become a major obstacle to the re-establishment of peace in the country. Mr. Sarkis did not elaborate on how the Palestinians and the other armed factions would be disarmed.

Nor did the President go into specifics on other tasks of the deterrent force: separating and dispersing the combatants in Beirut and reopening the nation's major highways.

Today's speech marked the second major initiative that the President, who is a Maronite Christian, has taken in recent days. The first was the appointment of a Moslem Lebanese officer as commander of the peace force. The naming of the officer, Col. Ahmed al-Hajj, who had remained neutral during the civil war, stirred criticism from the leftist Moslems and Palestinians, but he is expected to keep the post, reporting directly to Mr. Sarkis.

As the President spoke, the capital endured the 18th day of the cease-fire, which for the last four nights has been punctuated by exchanges of artillery and mortar rounds that begin after dinner time and end at about 2 a.m.

No Progress At Session In Geneva

All Parties Confer With U.K. Chairman

GENEVA, Nov. 7 (Reuters).—The Geneva conference on Rhodesia appeared stalemated today as black nationalist and white negotiators indicated no progress toward fixing a date for independence under black majority rule in the breakaway colony.

The conference chairman, Ivor Richard of Britain, met the four black delegations and the white Rhodesian negotiators separately to seek agreement on an independence date—regarded as a key to progress toward establishing an interim government in Rhodesia.

But the delegations reported scant progress.

"We have failed to agree," said Robert Mugabe, political spokesman of the biggest guerrilla faction fighting white minority rule in Rhodesia.

Alliance Forged

"I don't see any progress" was the verdict of Joshua Nkomo, who leads one faction of Rhodesia's African National Council. Mr. Nkomo and Mr. Mugabe have forged a loose alliance for the talks.

The nationalists have demanded independence within 12 months, Britain has suggested a 15-month transition period and the white Rhodesians, led here by Foreign Minister Pieter van der Byl, have said the preparations for independence could take 23 months.

Mr. Richard, who is the British ambassador to the United Nations, started his crowded day by conferring separately with Mr. van der Byl and one of the nationalist leaders, the Rev. Ndabaningi Sithole.

No Change

The chairman said his talks with Mr. Sithole resulted in some progress, but the nationalist leader himself said that, during the 75-minute meeting, he and Mr. Richard had not changed their positions.

Mr. van der Byl, asked if there had been any narrowing of the gap on the independence date issue, said: "No, no."

Further talks are scheduled for tomorrow.

...3 Nations Urged to Stimulate Economies to Avoid Downturn

By Hobart Rowen

WASHINGTON, Nov. 7 (WP).—An international group of private economists warned today that unless the United States, Japan and West Germany immediately shift their policies toward expansion the world may face a new economic downturn.

The American contingent in the group included a leading Republican expert, Prof. Paul McCracken of the University of Michigan, who was chairman of the President's Council of Economic Advisers in the administration of Richard Nixon.

Others in the panel come from Canada, Japan, West Germany, Britain, France and Italy.

In effect, the economists called on the major industrial countries to reverse the "slow growth" policy agreed upon by President Ford and six other heads of state at a summit conference last June in Puerto Rico.

At that time, the main worldwide fear was a resurgence of inflation. But an economic "pause" began in all leading industrial nations last summer and now threatens to get worse without corrective action, the economists said.

'Scaring Everybody'

"The slowdown is gaining so much momentum, it is scaring everybody," one of the group said after their meeting here at the Brookings Institution.

The three-day conference was sponsored by the Kiel Institute for World Economics, the Japan Economic Research Center and Brookings.

All of the economists at the meeting emphasized that their decision—the eighth in five years—was inspired by realization that both the recent inflation and recession were worsened by the failure of policy-makers to consider "the cumulative effects of developments and policies" in countries outside their own.

The economists avoided the word "recession," but that was clearly what they had in mind.

"Unemployment and unutilized capacity in most countries are at levels which, if continued long, would have serious implications for domestic social and political instability in some countries and for the maintenance of a liberal international economic order," their statement said.

Philip Trezise of the Brookings Institution, who served as chairman of the group of economists, said that the major countries "are in a position to move somewhat faster" because they all have unused capacity and "excessive" unemployment.

'Locomotive Nations'

And as major powers—in effect, "locomotive" countries that can pull the smaller ones along into a healthier climate—the United States, West Germany and Japan have an obligation to stimulate their economies at home, he said.

President-elect Jimmy Carter, after the publication of discouraging October reports on prices and unemployment, indicated last week that he and his advisers are considering a tax-cut proposal

Near Lebanon Frontier

Israelis Kill Arab, Capture 11 In Foiling Suspected Sea Raid

TEL AVIV, Nov. 7 (Reuters).—Eleven suspected Arab guerrillas were questioned today after an Israeli gunboat foiled what may have been planned as an attack on Israel from the sea.

One Arab was shot dead in the predawn encounter yesterday in international waters near the Israel-Lebanon frontier. Israeli naval vessels have been on 24-hour patrol in the waters since the civil war erupted in Lebanon last year.

Israeli officials said they believe that the 12 Arabs, stopped in three eight-meter fishing boats, were planning to raid Israel.

Last year, a group of guerrillas landed by night on a Tel Aviv beach and took hostages at a seafront hotel before being flushed out in fighting that killed 18 Arabs, Israelis and foreign tourists.

Daylight Capture

In September, another group landed in daylight on a Tel Aviv beach. At first they said they were seeking refuge in Israel, but the army reported that under interrogation they admitted their speedboat was launched from a freighter at sea on a guerrilla mission, and they threw their arms overboard when spotted near the Israeli coast.

A Defense Ministry spokesman said that in the latest incident, 15 miles off the Lebanese coast, the naval patrol vessel ordered the three boats to stop. The order was ignored and the patrol vessel opened fire, sinking one boat. A guerrilla killed in the craft was brought back here with his 11 companions.

Newsmen at Haifa, allowed to inspect the two captured vessels, said they were powered by diesel engines and carried extra fuel tanks, and one contained a collection of arms and ammunition, including Kalatchnikov rifles, grenades and packages of explosives.

In a recent incident, the Israeli Navy sank another boat and captured several crewmen, two of whom were in frogmen's suits with diving equipment.

High-Seas Checks

In the last few months, the Israelis have stopped several vessels of different flags on the high seas, in some cases escorting them to port for examination.

Meanwhile, military sources here denied reports that Israeli boats had attacked the southern Lebanese port of Sidon and the nearby Zaharani oil refinery.

A Lebanese Army spokesman in Beirut said several Israeli boats attacked Sidon but were driven off and that others approached the refinery.

Europeans Stall Over New U.S. Charter Rules

WASHINGTON, Nov. 7 (WP).—European nations have been dragging their feet in accepting new U.S. rules for low-cost charter flights from the United States, government sources said yesterday.

Approved in September by the Civil Aeronautics Board, the rules represent a liberalization of charter-flight regulations and could be expected to expand the availability of the flights and to lower their cost. But, in order for the flights to begin, the rules have to be accepted by foreign governments. Applications at CAB indicate that the charters may cut in half the cost of flights to many places.

U.S. sources said yesterday that the Europeans have not formally rejected the new "advance-booking charters" but informal soundings from Britain, France and West Germany were described as "not encouraging."

Representatives of the European Civil Aviation Conference, an informal coordinating group of 19 nations, will be in Washington this week for discussions on charters. Basically, they are said to be worried that the new charters will divert passenger traffic from their scheduled airlines.

CAB chairman John Robson yesterday said that while the U.S. charter rules themselves apply only to travel starting in this country, the government "made an effort to harmonize its proposals with European charter rules." Each government has its own regulations.

Arafat's Leadership Faces Challenge

PLO to Study Its Tactics and Goals in Lebanon

By James F. Clarity

BEIRUT, Nov. 7 (NYT).—The Palestine Liberation Organization, weakened by its setbacks in the Lebanese civil war and seriously divided by factional disputes, is beginning a period of painful self-reappraisal.

The reappraisal is expected to begin formally in the next few days at a meeting of the PLO's Executive Committee. To be decided is what the organization should do, immediately and in the long run.

The Executive Committee is expected to take up the special problems of existence under the close surveillance of Syria, which in effect will have virtually total control of Lebanon through its army's domination of the Arab peace-keeping force that will take up positions in the country in the next few days.

The PLO must also deal with serious Syrian pressure for replacement of Yassir Arafat as the organization's leader.

The importance and urgency of the Executive Committee session, according to Arab and Western analysts, stem from the official announcement that the Palestine National Council will meet next month for the first time since June, 1974. The council, which is a sort of parliament in exile of the Palestinian people and in theory controls Mr. Arafat's Executive Committee, but not in fact, is expected to try to coordinate efforts toward the immediate and eventual goals.

Various Issues

This involves, the analysts feel, a thorough re-examination of what would be acceptable to Palestinians as an independent state, the question of Mr. Arafat's leadership, and how the Palestinians should deal with expected moves to return the Arab-Israeli dispute to the negotiating tables of the Geneva conference sometime next spring.

And it would be at the council meeting, to be held in Cairo, that any serious challenge to Mr. Arafat's leadership could emerge.

At the Executive Committee meetings here in the coming days, Mr. Arafat and his supporters must consider restrictions of life under what in effect amount to Syrian occupation forces, although the peace-keeping troops are under the nominal command of President Elias Sarkis and Col. Ahmed al-Hajj, the Lebanese Moslem officer appointed by Mr. Sarkis to command the force.

Knowledgeable Palestinian officials say that they have no choice but to accept the Syrian occupation, but they insist that they will not surrender so much of their considerable weaponry as to weaken themselves even further. The Palestinians say also that they will accept units of the Arab force—now officially called the "deterrent force"—in areas of Beirut and Lebanon still controlled by armed Palestinian guerrillas. The Palestinians expect, but are not sure, that their areas will be patrolled not by Syrians but by troops of the force from Saudi Arabia, the Sudan, Yemen and South Yemen and the United Arab Emirates, the other nations that are to make up the minority of the 30,000-member peace-keeping force.

Staging Area

Palestinian officials, who now smile sarcastically at references to Syria's continuing claim it is still the principal protector and champion of the Palestinian movement, note with some satisfaction that their guerrillas are once again establishing themselves at camps in the Arkub, the Lebanese area on the Mount Hermon slope used in the past by the guerrillas as a staging area for raids into Israel.

The Palestinians also acknowledge that the supply line from Syria to the Arkub has been reopened. But some Palestinians here consider these events as Syrian gestures to serve the pur-

(Continued on Page 2, Col. 4)

...aris Bomb Wrecks ...Fuel Firm's Office

PARIS, Nov. 7 (UPI).—A powerful bomb wrecked the Paris offices of the National Company for Atomic Fuel Research today. The police said there were no injuries but that the explosion completely ruined the company's director offices and shattered windows throughout the building. A resulting fire was quickly brought under control by firemen. The police said the attack, which was not immediately claimed, was likely the work of militants opposed to the spread of nuclear technology.

Associated Press.

Supporters Question Policy

Italy Reds' Balancing Act Strained

By Alvin Shuster

ROME, Nov. 7 (NYT).—One Italian newspaper carried a cartoon last month of Enrico Berlinguer, the Communist party chief, standing on a stage ducking overripe tomatoes. Another suggested that the Communists had a foot in the door of government now but could not remove the foot and could not open the door.

The cartoon and the comment reflect some of the current problems of the Communist party, Italy's largest after the governing Christian Democrats. And Mr. Berlinguer, who has tried to keep his party on the path of moderation, has found himself under increasing criticism for a policy that helps keep the Christian Democrats in power.

There are no signs that Mr. Berlinguer and the other party leaders have lost control. They are handling the strains within the party and keeping the stresses under control, but they are undoubtedly concerned about so much unease among the rank and file.

"In the last few days we have held thousands of popular assemblies to explain the delicacy of the moment and our initiatives," Mr. Berlinguer said recently in a speech in southern Italy. "In doing so, we have consolidated and widened our links with the masses."

Masses Misunderstand

The problem with the masses is that they do not quite understand why the Communist party decided after the June elections to drop its formal opposition and abstain on crucial votes in Parliament, thus insuring the survival of the one-party government of Christian Democrats.

In short, many Communists feel that they are being asked to prop up an unpopular administration that is planning unpopular economic measures needed because of its own past mistakes.

The Berlinguer line is that there is no alternative to abstention because otherwise the government would fall and everyone would be worse off in the ensuing economic and political crisis. He adds that it represents merely a temporary phase that will lead in time to a reshaping of all of Italian society.

Whatever the extent of the internal problems of the Communists, they have been doing quite well since the elections. In recent weeks they have been consulted as never before by the Christian Democrats on an evolving economic package and, indeed, on other matters that have surprised some Christian Democrats on the right of the party as well as some diplomats.

More Consulting

"Much more consulting with the Communists is going on around here than many people realize," a diplomat said. "The Christian Democrats are becoming conditioned to talk just about everything over with the Communists."

Some politicians report, for example, that the government led by Premier Giulio Andreotti is now clearing some appointments with the Communists, including promotions for the police and the military. The politicians suggest that one or two of the promotions were delayed because of Communist hesitation.

Moreover, with their increased share of seats in Parliament as a result of the elections, the Communists are enjoying important power in the Chamber of Deputies, where for the first time they hold the speaker's job and the chairmanships of several committees. With most major cities, including Rome, now run by Communist mayors, the party appears to be moving inevitably toward seats in the Cabinet of the national government.

At some point the party will present its bill for what it regards as its good behavior toward the Christian Democrats. Officially, the party still argues for a government of national emergency that would include all democratic political forces, including themselves and the Christian Democrats, a theme repeated last week by Mr. Berlinguer.

Economic Efforts

The party's chances of obtaining that share of national power hinge in part on the outcome of the present efforts to achieve economic stability and curb an inflation rate now running at just under 20 per cent.

Success might slow the Communist advance, although the party would hope to reap benefits by claiming credit for its contributions. Failure might bring an invitation to the Communists from the beleaguered Christian Democrats to come into the government, or, barring that, it might translate into even more votes for Mr. Berlinguer next time.

Accordingly, there is no easy answer to the question many here are asking: Is abstention good or bad for the Communists? In the short run, given the internal troubles, the party's policy appears to have drawbacks to many of its followers. But in the longer term the policy could enhance the party's chances.

For the time being, Mr. Berlinguer is trying to calm his supporters, explain just what the party is doing and help shape the emerging economic program. As if to satisfy the internal demands for a little more aggression, he called recently for a conference of all parties on the economy.

Leftists in Agreement

ROME, Nov. 7 (UPI).—Italy's Communists and Socialists reported initial success yesterday in an effort to work out a common line that would enable them to dictate government economic policies.

"Our discussions gave us a chance to note a wide convergency of views and to identify issues on which further in-depth study is needed," economic experts from the two parties said in a statement at the end of a six-hour meeting.

The parties said they agreed in principle with the government's austerity measures but felt there are "corrections and choices to be made."

GREEK FLOODS—Ruins of the Temple of Artemis in eastern Attica, built in the 5th century BC, were flooded to a depth of more than a meter, following rains.

French Ambassador Is Killed In Yugoslav Hunting Mishap

By Malcolm W. Browne

BELGRADE, Nov. 7 (NYT).—Pierre Sebilleau, the French ambassador to Belgrade and dean of the diplomatic corps in Yugoslavia, was fatally wounded by a fellow diplomat while on a hunting trip yesterday morning.

Diplomatic sources said that Mr. Sebilleau, 64, was shot in the back at close range when Austrian Ambassador Alexander Otto's gun discharged accidentally.

[Judge Miss Popovic of Zrenjanin, who investigated the shooting, ruled it an accident, UPI reported. Diplomatic immunity would bar any punishment of Mr. Otto under Yugoslav law.

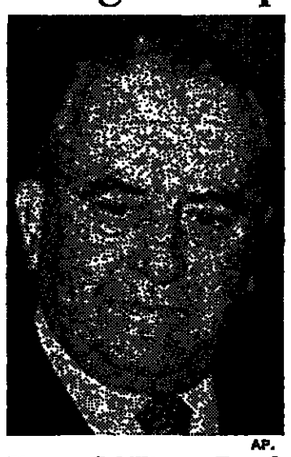
[Judge Popovic said in his ruling today that after the signal for the hunt to end was given, Mr. Otto, "incautiously handling his rifle, inadvertently fired a bullet, hitting another participant of the hunt in his back from very close quarters."]

Hunting Party

Mr. Sebilleau, other diplomats and high Yugoslav officials were hunting in the province of Vojvodina, north of here, on an outing organized and led by Milos Minic, Yugoslavia's foreign secretary. Mr. Minic and others accompanied the wounded ambassador to a hospital, where he died.

Mr. Minic sent a telegram of sympathy to the French Foreign Ministry, informing it of Mr. Sebilleau's "tragic death."

A diplomatic source said the French ambassador was shot from a distance of "two or three meters."



Mr. Sebilleau was also accompanied to the hospital at nearby Zrenjanin by Radovan Vlajkovic, head of the collective presidency of Vojvodina Province.

Encouraged by Tito

Diplomatic hunting trips in Yugoslavia have been encouraged over the years by President Tito, who is an ardent hunter. The President, who frequently entertains visiting foreign chiefs of state by taking them into the mountains to hunt bear or other game, did not participate in yesterday's hunt.

Mr. Sebilleau had served as his country's ambassador to Yugoslavia since June 2, 1970. He is survived by his widow and two daughters.

Mr. Sebilleau and his staff had been preparing for a visit to Yugoslavia scheduled next month by the French President, Valéry Giscard d'Estaing.

Israel Is Beset By Labor Unrest

TEL AVIV, Nov. 7 (UPI).—Civil engineers went on strike today and hospitals turned away patients during a day of labor unrest over pay claims that involved one out of every four workers in the public sector and threatened to idle much of the Israeli economy.

The ports of Haifa, Ashdod and Eliat were closed by a strike by marine pilots. Workers at the Dead Sea chemical plant refused to release truckloads of potash for export until their demands are met.

Other workers threatening strikes or slowdown action included gasmen, X-ray technicians, driver's license examiners, social workers, state attorneys, high school teachers, customs inspectors and officers in the merchant fleet.

Tito Back at Work

BELGRADE, Nov. 7 (UPI).—President Tito, 84, last week resumed his state activities, fully recovered after a liver ailment that forced him to cancel all official engagements Sept. 11.

800 Pro-Nazis At German Rally

MANNHEIM, West Germany, Nov. 7 (Reuters).—About 800 Nazi supporters, many dressed in black shirts and wearing the Nazi insignia, today held a six-hour rally to honor Germany's Nazi war heroes.

Hundreds of policemen protected the social club where the rightists gathered after 300 demonstrators paraded through Mannheim in protest against the rally.

In West Berlin, police said that they had seized a bust of Hitler and a machine-gun in a raid last night on an apartment where 13 persons were planning to set up a neo-Nazi party.

Business Booms but So Do Prices

Lebanese Influx on Cyprus Is a Mixed Blessing

By Steven V. Roberts

LIMASSOL, Cyprus, Nov. 7 (NYT).—A recent issue of the Cyprus Mail was full of notices, some in Arabic, about ships sailing between Cyprus and Lebanon. Other advertisements promoted restaurants, office buildings and hairdressers catering to Lebanese.

On the front page, the Mail reported that a Lebanese had been arrested with a suitcase full of hashish and the police were investigating a drug-smuggling ring.

Thousands of Lebanese have poured into Cyprus in recent months as the war in Lebanon got worse. The flow has slackened now in the wake of Arab peacemaking efforts, but as the Mail indicates, the Lebanese are making a sizable and somewhat contradictory impact on this island of 650,000 people.

Many Lebanese here are wealthy, with hard currency to spend, and they have given an enormous boost to hotels, restaurants and real estate brokers. The ports of Limassol and Larnaca are jammed with ships carrying freight and passengers to both sides of war-divided Lebanon.

Prices Skyrocket

At the same time, rents and prices have skyrocketed. The average Lebanese tends to be a more freewheeling character than the rather sober-sided Cypriot, and the cultural clash has produced some incidents.

Paradoxically, there has been little conflict between Christian and Moslem Lebanese, and they often drink, talk and do business together. Many Lebanese of both religions insist that their country's problems are caused by outsiders, primarily Palestinians, and not each other.

Cyprus is about 150 miles west of Beirut, and the first wave of Lebanese started arriving about a year ago. Many were Christians who could not reach the airport and were forced to travel by ship. Most left quickly for other destinations in Europe or the Middle East.

Many Motives

When the Beirut airport closed and the road to Damascus grew treacherous, Cyprus became the main exit from Lebanon. People came with many motives—to do business, to protect their families, to avoid conscription. Almost all came to the Greek-held sector, which has better port, hotel and communications facilities than the Turkish side.

As the total swelled to about 15,000 in September, the worried Cypriot government limited visas for Lebanese to about 30 days. "We don't want people to immigrate here," said a government official. "We can't find work for all of our own people."

Canada and Australia—the two countries willing to accept large-scale migration from Lebanon—set up special offices here to handle the demand. Since May, the Canadian office in Limassol has approved 4,500 applications for immigrant status, as opposed to 1,462 for all of last year.

Many Lebanese have business interests throughout Europe and the Middle East, and Cyprus attracted executives in such fields as shipping, tourism and insurance. Here, they can stay in touch with Beirut by boat and other cities by an efficient telecommunications system. Every week, it seems, the airport is adding flights to places like Benghazi, Libya; Jidda, Saudi Arabia and Kuwait.

Outside businessmen are generally barred from doing business within Cyprus. The Cypriots are still recovering from the war of 1974 and do not want competition.

One booming business is the shipment of goods into Lebanon. They are often unloaded here and switched to small craft for the run eastward. The main cargoes are food, fuel and such raw materials as cloth. And rumors persist that Cyprus is also a transit point for weapons.

3 Nations Urged to Stimulate Economies to Avoid Downturn

(Continued from Page 1)

as a stimulus for the U.S. economy next year.

Basically, this is the approach that the economists recommended for West Germany and Japan as well.

"Germany, Japan and the United States were singled out as appropriate engines of world economy recovery," the economists said, "because of their weight in the international economy, their relatively low inflation rates and their comparatively strong balance-of-payments positions. A similar shift in economic policy would appear to be appropriate for a number of other countries."

Ironically, this call for leadership by the three leading industrial nations to expand economic activity was exactly the prescription that heads of state adopted a year ago at a summit meeting in Rambouillet, France, and then abandoned at Puerto Rico in fear that inflation might become the dominant economic worry.

Mr. Treise made it clear that the group felt not only that the Puerto Rico call for slow growth needed to be modified, but that conferees at the annual meeting of the International Monetary Fund last month erred in stressing inflation's perils. The general feeling at that session in Manila was that economic growth goals had to be limited, even at the expense of delaying a return to full employment.

The economists meeting at Brookings said they were recommending an about-face in policy with full recognition that the rates of inflation remain "too high everywhere."

But they argued that greater rates of activity in the United States, West Germany and Japan would enable them to import more goods, and this would generate an export-led expansion in the smaller industrial countries and others now hard-pressed, such as Britain and Italy.

Kissinger Role Denied in Alleged Two-China Talks

WASHINGTON, Nov. 7 (UPI).—The State Department yesterday denied reports that Secretary of State Henri Kissinger arranged meetings in Peking recently between Nationalist and Communist Chinese officials.

But a department spokesman would not comment on whether or not such meetings had occured.

A Japanese newspaper, Asahi Shimbun, reported yesterday that three emissaries from Taiwan and top Peking officials conferred recently in a meeting arranged by Mr. Kissinger. The paper's Peking correspondent also said there were unconfirmed reports there that Mr. Kissinger and Nationalist Chinese Premier Chiang Ching-kuo had personally visited Peking in connection with the meeting, while other reports said Mr. Chiang went without Mr. Kissinger.

The State Department spokesman said Mr. Kissinger had not been in Peking recently.

The Japanese correspondent said the emissaries proposed a unification plan in which Taiwan maintained its military forces, retained its administrative personnel in principle and reserved its autonomy to some extent.

[In Taipei, the Nationalist government denied the reports, according to the Associated press.]

3 Arabs Receive 15-Year Terms for Attack in Rome

ROME, Nov. 7 (UPI).—A Rome court sentenced three Arabs to 15-year prison terms yesterday for staging a submachine-gun attack on the Syrian Embassy to protest killings of Palestinians in Lebanon.

One of the defendants, addressing the court in Arabic after the sentencing, challenged its competence and said Italy should not concern itself with the raid on the embassy.

Politicians predicted before the trial that the three would be convicted, then pardoned by President Giovanni Leone and expelled from Italy, as has been the case with other Arabs accused of terrorism in recent years.

Social Democratic parliamentary leader Luigi Preti, in a charge the government still has not answered, said last month "there is a widespread belief that a secret bilateral treaty exists between Italy and Palestinian organizations, leaving them free to operate on our territory against foreign missions in return for a promise not to attack Italian targets."

The three stormed the Syrian Embassy on Oct. 11, took two hostages and held them for an hour before surrendering to Italian police.

Foul Air Gets Guy Fawkes Execution Stay

BELLEVUE, Wash., Nov. 7 (AP).—In the best tradition, about 70 members of Seattle's Britannia Club gathered to burn Guy Fawkes in Bellevue's Killarney Glen Park. But the Puget Sound Air Pollution Authority had the last word—tradition or no tradition.

The agency, with air pollution readings at their highest levels in two years, banned all open burning Friday.

Myra Wright, the club's president, said members would be back next Friday, air quality permitting, to burn an effigy of Fawkes, a zealous Roman Catholic who nearly succeeded in blowing up Parliament during the reign of James I. Britain celebrates the occasion by burning Fawkes in effigy and shooting off fireworks every Nov. 5.

PLO to Review Tactics, Goals After Its Setbacks in Lebanon

(Continued from Page 1)

poses of Damascus at least as much as those of the Palestinians.

Arab and Western analysts note that Syria can control most Palestinian movement near the Israeli border and can use this control as a diplomatic weapon in seeking to force Israel to restore the Syrian territory it has occupied since the 1967 war.

Palestinian officials here say that the Syrian efforts—including calls for changes in the guerrilla leadership and the replacement of Mr. Arafat—will fail. Noting that Mr. Arafat was able to retain control of the PLO after it was severely pummeled and its guerrillas expelled from Jordan five years ago, the officials say that he will retain his power and title as chairman of the Executive Committee.

Move in Council

Palestinians here are also aware of what they see as a Syrian-encouraged move to enlarge the membership of the Palestine National Council at next month's meeting in Cairo. The enlargement is seen by Palestinians here, and by some interviewed recently in Damascus, as an attempt to dilute Mr. Arafat's strength in the organization.

Dissension in the PLO is another serious problem to be dealt with by Mr. Arafat at the Executive Committee meeting here and at the council meeting next month.

The former Executive Committee member groups that have long been at odds with Mr. Arafat, including the group headed by Dr. George Habash and the factions supported by Iraq and Syria, are not expected to attend the Executive Committee sessions.

So Mr. Arafat's task at the Executive Committee meeting, and the council session, remains one of persuading powerful Palestinians that while they have lost on the battlefield to Syria, they must continue under his leadership to seek the creation of an independent Palestinian state.

But his task is complicated by the fact that now more than ever, Syria and its anti-Palestinian ally, King Hussein of Jordan, are in a position to deal with Israel by offering guarantees of firmer Arab control over the Palestinians.

Riot-Control Tactics Endorsed

Head of Police Sees S. Africa Able to 'Handle' Urban Unrest

By Jim Hoagland

PRETORIA, Nov. 7 (WP).—South Africa will continue to experience "a certain amount of urban unrest in the future, but nothing that we cannot continue to handle," Police and Justice Minister James Kruger predicts.

"Efficient" police action and the loyalty of the country's black population have defeated "serious efforts to plant the seeds of revolution here through strikes and urban terrorism," Mr. Kruger asserted in an interview Friday.

Clashes between police and black demonstrators and rioters in segregated black townships near Johannesburg and in the Cape Province in the last five months have left about 370 persons dead, according to unofficial estimates. About two-thirds of the deaths resulted from gunshot wounds, according to a coroner's report.

Black groups accuse the police of having opened fire without provocation on peaceful gatherings such as funerals and of indiscriminate bloodshed when confronted with demonstrations. White liberals also have made these charges, while conservatives are demanding even stronger police action against the threat of black uprisings.

Mr. Kruger endorsed the riot tactics used so far and said they would continue to be used, with a few modifications. Without giving details, he said that South African police officials had visited the United States and Europe before the disorders to study riot control and had concluded that South Africa had to develop its own techniques.

The U.S. Embassy here said it could not comment on the reported South African police visit.

Confidently asserting that the problem had been reduced to "the nuisance of some students running around that we have to chase," Mr. Kruger added that "in the long term we must delve deeply to find the causes of this, and insofar as there are legitimate grievances, make an honest assessment of them."

Mr. Kruger's remarks went much further toward conceding that there may be underlying social, economic or political causes for the rioting than has any statement made by top officials for publication inside South Africa.

Communist Agitators

Government officials have consistently maintained that Communist agitators were solely responsible for the unrest, triggered by student demonstrations in June against the white minority government's apartheid policies.

Mr. Kruger emphasized at several points in the interview a need for "nonextremists on both sides to make contact with each other and thrash out any problems that arise together, to find solutions acceptable to both black and white," and his government's "commitment to end racial discrimination here."

While the country has been free of large-scale disturbances for the last six weeks, there have been isolated, almost daily arson attacks on schools, police stations or other institutions during that period. But Mr. Kruger pointed to the failure last week of a call by black student activists for a five-day work stoppage and economic boycott of white businesses in Johannesburg as proof that the back of the protest movement had been broken.

Documents captured by the police "show that the strike was to be the second phase of a revolutionary effort, with urban terrorism being the third phase," Mr. Kruger said. "But it's been a failure, because 70 to 75 per cent of the black people would have nothing to do with it. The local urban black man is fundamentally a law-abiding man."

'Civilised Country'

His forces "could have stopped this the way the Russians stopped it in Hungary—but a civilized country like ours must use minimum force, even if it takes longer to stop the trouble. We can't fight gangsterism with gangsterism."

Impartial and experienced foreign sources report that the police force, which has had almost no sophisticated riot-control training and which possesses little protective equipment or intermediate nonlethal weapons, resorted to gunfire almost immediately in all potentially threatening situations.

About half of those who die from gunshot wounds were shot from the back, a government pathologist told an official inquiry two weeks ago.

Pollution Peril To Taj Mahal

NEW DELHI, Nov. 7 (Reuters).—The Taj Mahal, India's 300-year-old white marble masterpiece, is in danger of turning yellow.

The monument is threatened by sulfur dioxide discharged by railway engines, factory chimneys and an oil refinery, an Indian news agency, Samachar, reported today.

It quoted experts as saying that rainwater could turn the sulfur dioxide into sulfuric acid, which would damage the monument.

But Samachar said the refinery, the main danger, had decided to lower the sulfur content of its furnaces, process low-sulfur oil from Bombay offshore wells and desulfurize fuel gases.

UN Urges West To End Flow of South Africa Aid

UNITED NATIONS, N.Y., Nov. 7 (UPI).—The General Assembly has called on Western powers to stop supplying South Africa with arms and nuclear know-how and to end any trade that helps South Africa retain power in Namibia (South-West Africa).

In the vote last week, the Assembly approved a resolution submitted by the decolonization committee to condemn "foreign and other economic interests" impeding the granting of independence to the black majorities of Rhodesia and Namibia.

The resolution particularly condemned the United States, Britain, France, Israel and West Germany for continuing to supply nuclear and military equipment to South Africa.

The resolution also called "once again upon all states to discontinue all economic, financial or trade relations with South Africa concerning Namibia and to refrain from entering into economic, financial or other relations with South Africa, acting on behalf of or concerning Namibia, which may lend support to the continued illegal occupation of that territory."

Spain Finds No Bribery By Lockheed

MADRID, Nov. 7 (UPI).—A government announced yesterday that the "Lockheed affair" in Spain—billed by the press as a major scandal—involves 73 million pesetas ($1.1 million) in regular commissions but no bribes.

Release of the findings of a Supreme Court probe after months of suspense over the affair the press said would produce a "payoff list" of as many as persons.

Five Spaniards, including senior air force officers, received the $1.1 million for representing Lockheed Aircraft Corp. in connection with a sale to the Spanish Air Force of 10 Hercules transport planes, the government report on the investigation said.

The two officers involved, Gen. Luis Rey and Col. Carlos Grandal, both 61, have already been relieved of their duties.

"Among the documents examined there is no 'list' except of the people who received Christmas gifts, about 12 gifts per year whose joint value did not exceed 90,000 pesetas [$1,225]," the report said. It did not say who received the gifts.

Swiss Accounts

The money for the commissions was brought into Spain clandestinely from numbered bank accounts in Switzerland and exchanged into pesetas on the black market, the report said.

It said that while Gen. Rey and Gen. Grandal were, in fact, managing the business of representing Lockheed in Spain, this was done "without the authorization or even the knowledge of their superiors."

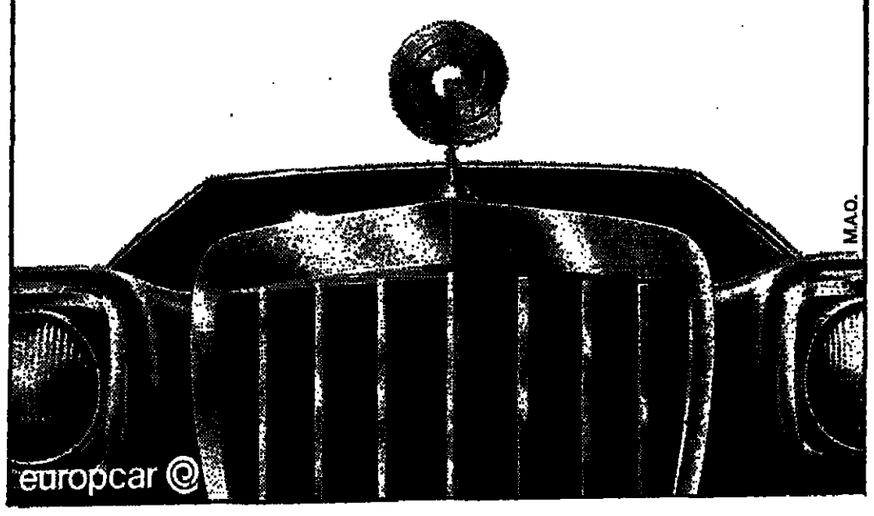
The basis for much of the investigation was 1,588 pages of photocopied material provided by the U.S. Justice Department. The probe covered dealings in the year 1971-1975.

"The conclusions are basically that there are no indications of bribes to favor commercial operations, whose evolution was completely correct," the 900-word statement said.

It went on, "However, the [Supreme Court] report shows that specific irregularities have been proved in the handling of Lockheed business in Spain and by representatives."

A corporation, Avionics, represented Lockheed. Two of the three men officially listed as the sole stockholders in Avionics actually had no investment or share in the company, the report said.

Coup in Burundi Laid to Injustice



NAIROBI, Nov. 7 (AP).—Burundi's ambassador in Uganda was quoted yesterday as saying the Burundi Army overthrew President Michel Micombero because he failed to implement economic policies and practice "injustices and other evils."

Uganda radio, monitored here, said Ambassador I. Kebenge in Uganda President Idi Amin in Kampala on Friday that General Micombero's government, split by conflicting factions, was overthrown Tuesday.

Mr. Kebenge said Burundi's new leader, Lt. Col. Jean-Baptiste Bagaza, suspended the constitution. "The new ruling Supreme Revolutionary Council of 20 officers would reorganize government institutions and the ruling party, the envoy said. The envoy was quoted by the radio as saying the security of foreigners and their property in Burundi was guaranteed.

Ford Utilized Device to See If Carter Lied

Voice Stress Analysis Used for 2 Debates

By Morton Mintz

WASHINGTON, Nov. 7 (WP).—The Ford campaign used a controversial machine called a "voice stress analyzer" to try to audit Jimmy Carter's truthfulness in the first two presidential debates, a Republican National Committee official said yesterday.

In the process, the machine's manufacturer told a reporter, he found that President Ford's voice registered "heavy stress" each time he mentioned the word "Congress."

For undisclosed reasons, the President Ford Committee chose not to publicize the result of either the Carter or Ford analysis. "Obviously, whatever they found in those recordings was not used," Peter Teeley, a committee spokesman, said.

Eddie Mahe jr., executive director of the Republican National Committee, said that he and Stuart Spencer, the deputy campaign director, were reluctant to publicize the Carter result because "this was the kind of thing that can whip around on you and blow up on you 14 ways from Sunday."

Change the Outcome

The maker of the device, Rick Bennett of the Seattle suburb of Issaquah, said he had hoped to have the Carter result publicized before the election, claiming it would have changed the outcome.

He refused to detail the finding, saying that in the post-election period, 51 per cent of the voters—those who voted for the President-elect—have "a vested interest" in Mr. Carter and the disclosure might lead to the ruination of his fledgling manufacturing enterprise.

Asked why Mr. Ford showed heavy stress whenever he said the word "Congress" during the Sept. 23 and Oct. 6 debates, Mr. Bennett said he believed the President's tension reflected the difficulty of dealing with a House and Senate dominated by Democrats. For that reason, he said, he urged publicizing the finding.

Mr. Spencer feared, however, that voters would view Mr. Ford's stress as meaning that, if elected, he could not work with a Congress certain to be Democratic again, and for that reason Mr. Spencer preferred silence, Mr. Bennett said in a telephone interview.

Voice analyzers are supposed to measure modulations when a lie is told.

United Press International.

SUNDAY STROLL—President Ford and wife Betty heading back to White House after walking to Lafayette Square to check building he will be using after leaving office.

USIA Employees Ask Carter To Retain Policies of Keogh

By David Binder

WASHINGTON, Nov. 7 (NYT).—A group of 148 middle-level and lower-grade employees of the U.S. Information Agency has petitioned President-elect Jimmy Carter to continue the policies of their outgoing director, James Keogh.

Mr. Keogh, one of the few senior holdovers from the last Nixon administration, last week submitted his resignation to President Ford, effective at the end of the month.

Mr. Keogh had strongly opposed recent proposals to reform the information agency by bringing its cultural and informational activities into closer consonance with the State Department while creating a completely separate Voice of America.

The information agency has been largely autonomous for many years.

In March of last year, an independent, 21-member panel headed by Frank Stanton, former president of CBS, proposed that the USIA be abolished and most of its operations transferred to the State Department.

The reorganization plan submitted to Mr. Ford by the Panel on International Information, Education and Cultural Relations also recommended that the Voice of America be re-established as a federal agency under a board of overseers, similar to the British Broadcasting Corp. and West Germany's Deutsche Welle.

The Stanton panel's proposal was endorsed by a number of senators and congressmen, but strongly contested by Mr. Keogh, who succeeded in rallying Capitol Hill conservatives to block legislative reform of his agency.

The petition sent to Mr. Carter accuses the Stanton panel of attempting to "compound the fragmentation" of U.S. information and cultural activities.

It proposes instead that the USIA be given the cultural affairs functions presently conducted by the State Department's Bureau of Educational and Cultural Affairs, and that it retain control over the Voice of America.

The petition was "by committee" and "with the knowledge" of Mr. Keogh, according to Alan Carter, his public relations officers, Mr. Carter also participated in the drafting. Agency officials acknowledged that the group's proposals largely reflected those of Mr. Keogh on a need to keep the USIA independent from the State Department.

Voter Approval On Taxes Loses In Colorado Poll

WASHINGTON, Nov. 7 (IHT).—Colorado voters have defeated by a 3-to-1 margin a referendum that would have required special voter balloting to approve any new state or local taxes, or any increase in existing taxes.

The National Conference of State Legislatures had said the measure, if approved, would have been the first of its kind in the nation.

A group called Stop Tax Increases worked to have the referendum entered on the state ballot. The group was founded by a Denver electrical engineer, Thomas Morroni, 36, a member of the John Birch Society.

A countergroup called Coloradans Against [referendum] No. 10, largely made up of state and local government officials, raised $50,000 for a court fight aimed at keeping the question off the ballot. Unable to do so, the group fought for a "no" vote with newspaper ads.

After the voters rejected the referendum in last week's elections, many officials said this showed Coloradans' confidence in representative government.

2 Italians Fined Over Currency

GENOA, Nov. 7 (AP).—Francesco Ravano, one of Italy's wealthiest businessmen, and an aide were fined a total of $6 million on fraud charges yesterday, but they were released from jail.

Ravano and Enrico Zenoglio were originally jailed in the first major case under Italy's tough new currency regulations that went into effect in March. They were accused of opening foreign bank accounts worth $1.2 million without notifying the government. Ravano is president and Zenoglio general manager of the international insurance company Comitas.

Ravano was fined $4.2 million and Zenoglio $1.8 million. The court also ordered the seizure of the $1.2 million in foreign accounts. The two men still face sentencing under the old currency law involving $8.4 million found in Swiss accounts.

Police Have No Clues In German Kidnapping

MUENSTER, West Germany, Nov. 7 (UPI).—The police said yesterday that they had no concrete clues as to the whereabouts of two persons who got away with 5 million marks ($2 million) ransom money after kidnapping horse show jumper Hendrik Snoek, son of a millionaire.

"We have received some tips from the population, but we are not in possession of any concrete clues on the kidnappers' whereabouts," a spokesman said. The police found Mr. Snoek chained in a shaft of a highway bridge Friday, 80 hours after his abduction.

Despite Aides' Assurance of Victory

Carter Barred Nixon-Pardon Issue

By David S. Broder

WASHINGTON, Nov. 7 (WP).—Jimmy Carter was told by his campaign strategists in the middle of last month that the Nixon-pardon issue could "blow the election wide open" and guarantee his victory over President Ford, Mr. Carter's pollster, Patrick Caddell, has said.

But Mr. Carter declined to use the issue because "he thought he would be elected president and he didn't want blood all over the floor."

Mr. Caddell told that story Friday in the course of confirming the view of the Ford campaign pollster, Robert Teeter, that Mr. Carter's failure to develop a strong answer to the Ford campaign's attack on his credibility as governor of Georgia almost gave the election to the Republicans.

Mr. Teeter said that the effectiveness of the anti-Carter ads was heightened by the fact that voters who saw them still believed that it was Mr. Carter, not Mr. Ford, who was running "a negative campaign."

The rival pollsters conducted their first public postmortem on the election Friday at a joint appearance before the Public Affairs Council and the American Association of Political Consultants. Later, they expanded on their comments in separate interviews.

They agreed that Mr. Carter's 33-point lead at the time of his nomination in July was artificially inflated, that it was hard to find issues that mattered to the voters and that the highly publicized presidential debates did not influence many voters' decision.

However, Mr. Teeter said, the second debate—during which Mr. Ford made his mistake on Soviet domination of Eastern Europe—"left us dead in the water for about 10 days."

Mr. Caddell called Mr. Carter's response to the second debate "a terrible mistake" on the part of the Georgian. "The governor has a mild instinct for the jugular," he said, "and for three days we couldn't stop him" from criticizing Mr. Ford in very strong terms. "He was terribly abrasive," Mr. Caddell said, "and he cost us what we had gained by Ford's mistake in the debate."

On the other hand, Mr. Caddell said, it was Mr. Carter who decided—against the recommendations of his political advisers—not to use the issue of Mr. Ford's pardon of former President Richard Nixon.

Mr. Carter had ruled out the pardon issue at the time of his nomination—a decision that Sen. Walter Mondale of Minnesota, his running mate, publicly rejected and ignored.

Mr. Caddell said that, in the closing days of the campaign, "an emotional appeal" to Southerners to support a Southern-born candidate, a rise in concern about unemployment in the Midwest industrial states and a movement by previously undecided women voters to join their husbands in backing Mr. Carter gave the Georgian his narrow victory.

Meanwhile, aides to President Ford Friday held their first meeting with a representative of Mr. Carter, shortly after Mr. Ford had instructed his Cabinet to continue "the same philosophy, the same programs and the same policies" until Mr. Carter takes over on Jan. 20.

Jack Watson, 38, an Atlanta lawyer who has been planning the transition for Mr. Carter for months, met for an hour with White House chief of staff Richard Cheney and presidential assistant John Marsh, whom Mr. Ford has designated to head the White House transition team. Mr. Watson described the meeting as "splendid."

At the session, Mr. Watson said, he suggested that Mr. Carter and Mr. Ford hold their first post-election meeting near the end of this month. He said the matter "was left with Cheney" to discuss with Mr. Ford.

Mr. Carter has made it clear he does not plan to spend a great deal of time in Washington between now and his inauguration, Mr. Watson said he expects to work closely with Sen. Mondale during the transition period.

Vacation Continues

ST. SIMONS ISLAND, Ga., Nov 7 (AP).—Mr. Carter continued his working vacation today on this south Georgia island.

He said that he and other family members had "a good fishing afternoon" yesterday and caught 17 sea trout in the waters off Musgrove Plantation, the secluded estate where they are staying.

Mr. Carter arrived here yesterday aboard an Air Force Boeing 707. The plantation is owned by Smith Bagley, the grandson of tobacco magnate R. J. Reynolds, and Mr. Carter intends to pay Mr. Bagley, a friend and supporter, between $1,000 and $2,000 for the use of the estate.

Ford Is Resting

WASHINGTON, Nov. 7 (UPI).—President Ford and his family flew to Palm Springs, Calif., today for an eight-day vacation at the desert resort.

U.S. Pledge to UN Fund

UNITED NATIONS, N.Y., Nov. 7 (UPI).—The United States pledged $20 million to the 1977 budget of the UN Children's Fund at a special session of the General Assembly.

U.S. Embassy in London Warns Of Forged State Dept. Document

LONDON, Nov. 7 (Reuters).—The U.S. Embassy here has issued a warning about what it described as a phony State Department document, signed with the name of Henry Kissinger, seeking ways by which the United States can eliminate foreign trade competition.

The Sunday Times, invited by the embassy to view the fake, said in a front-page story that the forged document, of a type known in the State Department as "key intelligence questions," also asked U.S. Embassy officials to provide names of corruptible ministers and officials in several nations, and ways of bribing them.

A U.S. Embassy spokesman verified the story tonight, adding that the document was thought to have been in circulation abroad for some time, but had not got into the press. He said he had no knowledge as to its origins.

The forged document is a rewrite of an original issued by the State Department in November, 1974, seeking economic information.

The real document requests "information as to the likely content and timing of projected domestic and foreign economic policy decisions by government or actions by major economic groups such as unions or producer associations and the sources of uncertainty as to timing or content," the Sunday Times said.

To this the false document adds: "Current and forecasted development of their trade with the U.S.S.R., China and other Eastern-bloc countries and timely, detailed information of possibilities to eliminate their competition and protect important U.S. commercial interests in this area," the newspaper said.

Korean CIA Reportedly Linked to 1974 Pro-Nixon Rallies

By Scott Armstrong and Maxine Cheshire

WASHINGTON, Nov. 7 (WP).—The South Korean Central Intelligence Agency requested the massive demonstrations that followers of South Korean evangelist Sun Myung Moon staged on Capitol Hill in 1974 opposing the congressional impeachment investigation of President Richard Nixon, according to information received by Justice Department investigators.

According to informed sources in both the Justice and the State Departments, the FBI recently learned of two-to-three-year-old secret intelligence reports that the Korean agency asked Pak Bo Hi, a South Korean frequently in residence here who has been Mr. Moon's chief aide and translator, to arrange for the fervent pro-Nixon demonstrations at the Capitol by Mr. Moon's followers.

The information is being used by Justice Department investigators to help determine Mr. Pak's role in an extensive effort by agents of the South Korean government to manipulate public opinion here and influence U.S. congressmen with cash, gifts and campaign contributions, according to informed sources. The investigators are not now directly interested in other activities of Sun Myung Moon and his Unification Church, according to the sources.

Seoul Meeting

According to U.S. intelligence information, Mr. Pak met in the Blue House presidential mansion in Seoul with South Korean President Park Chung Hee, Washington-based South Korean businessman Tongsun Park and Korean CIA officials in late 1970 to discuss plans for the influence-buying here. In a recent statement he gave to reporters without allowing them to ask questions Mr. Pak categorically denied that he had any role in this scheme or any connections to the Korean CIA.

According to an informed source in the South Korean Embassy here, embassy personnel believed that Mr. Pak's activities were directed from Seoul where he was purportedly close to both Park Chung Hee and high ranking Korean CIA officials.

The sources said that the South Korean ambassador to the United States, Hahm Pyong-Choon, was reluctant to get involved publicly with the Unification Church or contact Mr. Pak and Mr. Moon for fear of embarrassment.

As a result of Mr. Hahm's aloof attitude, according to the source, Mr. Pak dealt directly with Seoul. Mr. Hahm deeply resented both Mr. Pak's use of the Unification Church for political activities here and Mr. Pak's ability to use Korean CIA communication lines to Seoul, the source said.

The Korean CIA probably chose to use Mr. Pak and the Unification Church to support Mr. Nixon, the source said, because they were sufficiently removed from the embassy to avoid embarrassment to the South Korean government.

Another reason for using Mr. Pak, the source added, was that Mr. Hahm was very optimistic until the very end about Mr. Nixon's chances of surviving the impeachment inquiry.

The South Korean diplomatic source also said that 1974 attempts by South Korean National Assemblyman Ro Chin Hwan to offer campaign contributions to U.S. congressmen friendly to Mr. Nixon were also part of a broad strategy to try to keep Mr. Nixon in the presidency. Mr. Nixon was generally believed to support South Korean requests for economic and military aid.

Nonprofit Group Cited

According to Neil Salonen, president of the U.S. branch of the Unification Church, the demonstrations all took place under the auspices of a nonprofit corporation, the National Prayer and Fast Committee. All of the committee's incorporators are members of Unification Church, according to Mr. Salonen, although persons who were not church members also took part in the demonstrations.

Mr. Salonen denied any knowledge of Korean CIA involvement in inspiring the demonstrations.

Mr. Salonen said his committee was formed to promote a declaration on Watergate made by Mr. Moon in November, 1973, which called for a commitment to "forgive, love, unite." Mr. Salonen had said at the time that Mr. Moon's declaration came from a direct revelation from God that "we ought to forgive this man [Nixon]."

Mr. Salonen said the Moon movement actions were not a pro or anti-impeachment declaration, but rather "emphasized the importance of prayer before" deciding the impeachment question. He acknowledged, however, that the majority of the demonstrators were clearly opposed to impeachment.

It was reported at the time that demonstrators chanted such slogans as "God needs Nixon," "God supports Nixon," and "We support Nixon."

The demonstrations occurred periodically from December, 1973, until Mr. Nixon's resignation in August, 1974. One vigil lasted 27 hours.

Fraser Confirms Gifts

WASHINGTON, Nov. 7 (NYT).—Rep. Donald Fraser, the Minnesota Democrat who sponsored hearings last year that uncovered material now being used in the federal investigation of South Korean influence on U.S. politicians acknowledged yesterday that he had been a recipient of Korean gifts. But he said that "anything of substantial value" had been turned over to the State Department.

His comments came in response to a statement by a Korean assemblyman who said he had given Mr. Fraser a collection of reproductions of Korean paintings during Mr. Fraser's trip to that country last year.

Ex-Aide of ITT Accused of Hiding Chile Information

WASHINGTON, Nov. 7 (WP).—The Justice Department has charged the former Latin American public relations director of International Telephone and Telegraph Corp. with failing to tell a Senate committee that he exchanged information with Central Intelligence Agency employees in Chile and elsewhere.

The criminal charges were filed Friday in U.S. District Court against Harold Hendrix, a former newspaper reporter. He allegedly withheld the information from a Senate subcommittee that was investigating ITT's activities against the Salvador Allende government and ITT's relationship with the CIA there.

Informed sources said Mr. Hendrix had agreed to plead guilty to the misdemeanor charges. His attorney refused to comment on the case.

Other sources familiar with the investigation said the Justice Department had been examining the testimony of several witnesses before the Senate subcommittee on multinational corporations, including that of ITT chairman Harold Geneen and former CIA director Richard Helms. Mr. Hendrix testified before the subcommittee on March 21, 1973, as it was hearing allegations that ITT had interfered with the Chilean presidential campaign in 1970.

UAW to Pick Deadline For a Walkout at GM

DETROIT, Nov. 7 (AP).—The United Auto Workers will set a strike deadline at General Motors Corp. this week after reaching a last-minute tentative agreement for hourly employees at Chrysler.

UAW and Chrysler negotiators reached an agreement for 109,000 U.S. and Canadian hourly employees Friday. In negotiations with GM, the union will be trying to win a pact for 390,000 workers.

BP Strike Is Over

GRANGEMOUTH, Scotland, Nov. 7 (Reuters).—A strike at British Petroleum's giant petrochemical plant here ended today.

Algerians to Vote On a Constitution

ALGIERS, Nov. 7 (UPI).—President Houari Boumedienne's government announced today that a national referendum will be held Nov. 19 to approve a constitution.

The constitution would maintain Algeria as a single-party Socialist state. Mr. Boumedienne is expected to run for re-election in a vote to be held within two months of adoption of the constitution.

Since Mr. Boumedienne came to power in June, 1965, Algeria has had no constitution and has been ruled by the President, a Revolutionary Council and a Council of Ministers. The constitution establishes a national assembly, elected for five years.

Bonjour Paris.

With the opening of our new representative office in Paris on November 4 of this year, we of the Industrial Bank of Japan would like to take this opportunity to thank all those distinguished members of the French government and financial community who were so helpful in assisting in the establishment of this office.

As a new member of your financial community, we pledge to utilize the extensive knowledge we have accumulated as Japan's oldest and largest long-term credit bank to help French and other European corporate entities communicate in an atmosphere of goodwill with our many clients and associates in Japan.

If we can be of service, please contact: Mr. Naotake Suzuki, Chief Representative, Paris Representative Office, 7, Place Vendôme, 75001 Paris, Tel: 261-55-13, Telex: 211414.

Japan's oldest and largest long-term credit bank. Assets US$30-billion.

News Analysis

Carter, Hua Pose Task for Russia

By Peter Osnos

MOSCOW, Nov. 7 (WP).—The Soviet Union started the 60th year of its existence this weekend confronted by an extraordinary challenge: new leadership in both of its principal adversaries in the world, the United States and China.

The multiple uncertainties posed by the election of Jimmy Carter as President and the ascendancy of Chairman Hua Kuo-feng are scarcely present in the bold and optimistic statements that have, as always, marked the state's anniversary celebrations here. Still, concern in the Kremlin's aged ruling councils must be considerable.

For some time now, Moscow's relations with the United States and China have been more or less predictable—a tenuous détente with Washington that did not preclude rivalry yet limited hostility, and an outright feud with Peking, stopping just short of a complete break. Conceivably the basic shape of those relationships will ultimately remain the same, but that is by no means sure.

In a telegram sent Friday to President-elect Carter and an earlier speech by Communist party leader Leonid Brezhnev, the Soviet Union declared its unequivocal intention to go on seeking better ties with the United States. Still, the relative stability achieved in eight years of dealing with the Nixon-Ford administrations, symbolized by the constant role of Secretary of State Henry Kissinger, are clearly at an end. New links are necessary.

Change in Message

Significantly, the one major alteration in the Kremlin message to Mr. Carter, compared with one sent to Mr. Nixon four years ago, is that the word "confidence" in assessing prospects for future relations has been changed to "hope."

Nominally at least, relations with China are also on the same unveering course that they have been in recent years. Many times before the death of Mao Tse-tung, the Soviet Union had said that it had no grievances against Peking that could not be resolved in a spirit of "good neighborly relations and friendship"—given, of course, some willingess in China to do so.

That position still holds. "It must be said," declared Politburo member Fyodor Kulakov in the Kremlin's main anniversary speech Friday night, "that we regard as unjustified and unnatural the fact that friendly relations between the Soviet Union and the People's Republic of China have been disrupted through no fault of our own."

But there is a major difference now in that the demise of Mao and the apparent victory of the moderate Mr. Hua over more radical elments offers Moscow an opportunity to turn blatantly self-serving bids for rapprochement with Peking into reality. By far the most important occurrence at the big Kremlin holiday festival Friday was the fact that Chinese diplomats did not walk out, as they often do.

Indeed, as regards Peking, Kremlin strategy in the changed circumstances is absolutely plain: Woo the Chinese in every way.

Within a matter of hours of Mao's death Sept. 9, the Soviet Union's mammoth propaganda apparatus was retooled and the anti-Chinese polemics that had dominated the Soviet media for so long disappeared. The Kremlin even found it possible to express "deep condolences" over the death of Mao, who only a day earlier had been reviled.

While many Western analysts profess to see no signs of substantive Soviet concessions in the stream of public statements, telegrams (thus far all rejected in Peking) and commentaries, there is no dispute that Moscow—and Mr. Brezhnev personally—has an objective in mind. The Kremlin wants in the worst of circumstances to rightfully claim that the Soviet Union did not obstruct peace with Peking.

And there is always the chance that the new leadership in China might accept one of those overtures from Moscow.

A fascinating parallel in the Chinese and U.S. situations is that as far as Moscow is concerned, both Mr. Hua and Mr. Carter were virtual unknowns six months ago. Both emerged the winners after hard-fought power struggles and the precise nature of their views about Kremlin ties is still obscure. Hence, almost anything is worth trying.

Diplomatic Protocol

On U.S.-Soviet relations, the likelihood is for a period of suspended activity while a Carter administration takes shape. Moscow has been so cautious in recent months that it has even violated diplomatic protocol by withholding acceptance of the U.S. proposal of Malcolm Toon, currently ambassador in Israel, as the envoy here.

Some senior U.S. officials are known to feel that the Strategic Arms Limitation Talks that have been frozen throughout the peak U.S. election period might now move ahead if consent from Mr. Carter and his advisers on U.S. negotiating positions is forthcoming. While that obviously would be desirable, it seems a very long shot.

Instead the prospect is that the Kremlin will go on waiting for the transition in Washington to take place before making any meaningful moves, reserving judgment on Mr. Carter and wiping the slate clean of its criticism of his positions during the campaign.

Then, perhaps, the Soviet Union will put out feelers for a Brezhnev-Carter meeting somewhere, much like the Ford-Brezhnev encounter at Vladivostok several months after Mr. Ford succeeded Mr. Nixon. Moscow puts considerable stock in the value of personal contacts between superpower leaders. For the moment, there are none.

Small Military Parade

MOSCOW, Nov. 7 (AP).—The Soviet Union staged today one of the smallest of its annual military parades marking the anniversary of the Communist revolution. No new military equipment was presented.

"The Soviet Army and Navy are reliably guarding the cause of revolution, socialism and peace," Defense Minister Dmitri Ustinov announced to the marchers from his place with the rest of the Soviet leadership atop Lenin's mausoleum.

But the collection of armored personnel carriers, artillery pieces, surface-to-air and surface-to-surface missiles that rolled for six minutes through Red Square included no weapons that were not shown last year. For the second year, all tanks and other tracked vehicles were absent.

There was no official explanation for the toned-down nature of the parade.

Mr. Brezhnev, 69, led party and government dignitaries in the Lenin mausoleum's reviewing box just outside the Kremlin walls. Foreign observers included the ambassadors of most countries and defense attachés from foreign embassies.

Associated Press.

AT THE TOP—President Nikolai Podgorny and party leader Leonid Brezhnev wave to marchers from atop Lenin's Tomb, during Revolution Day Parade in Red Square.

Firewomen to Join Pompiers in France

PARIS, Nov. 7 (UPI).—French women now can become municipal firefighters, according to a government decree.

The decree, published today, will enable at least one woman, Françoise Mabille, to get a job. She successfully passed tests in 1973 but was not allowed to enter the *pompier* service because of a law forbidding women to do so.

Says Blast Killed Hundreds

Exiled Soviet Scientist Tells Of Nuclear, Rocket Accidents

LONDON, Nov. 7 (UPI).—A dissident Soviet scientist revealed today what he said were details of a Soviet nuclear accident that killed hundreds of people and a moon-rocket explosion that "wiped out the best brains in Soviet space technology."

Dr. Zhores Medvedev, who now lives in exile in London, said an explosion of a nuclear waste dump in 1958 caused hundreds of deaths and tens of thousands of cases of radiation sickness.

The area was so contaminated, he said, that it "is still considered dangerous and roads passing through it are closed."

Two years later, he said, a Soviet moon rocket blew up on its launching pad and "everyone in the area was killed. The disaster cost the best brains in Soviet space technology."

Western experts said there was little reason to doubt Dr. Medvedev's account, contained in an article on the conflict between scientists and politicians in the Soviet Union for the current issue of the magazine New Scientist.

In fact, one expert on Soviet military affairs said, there have been two other "major accidents" in Soviet nuclear science that proved deadly.

"There have been at least three major accidents in the nuclear field," said the expert, Prof. John Erickson of Edinburgh University.

"We know nuclear scientists and engineers have been killed together, from the obituaries," Prof. Erickson said. "We do not know exactly how they died."

Dr. Medvedev's account of the 1960 Soviet moon-rocket disaster paralleled the one given in 1961 by Oleg Penkovsky, a defector and double agent. The disaster occurred because Soviet scientists were trying to provide a propaganda triumph for Nikita Khrushchev, then Communist party leader, Dr. Medvedev said.

Khrushchev wanted a moon rocket launch to coincide with his arrival in New York for a fall session of the UN General Assembly, Dr. Medvedev reported.

When the moon rocket failed to ignite in front of the city of Soviet space scientists, the rocket commander, Marshal Mitrofan Nedelin, overruled safety procedures to get the rocket launched in time. Scientists swarmed over the rocket to see why it did not fire.

Ignition Began to Work

"While this was taking place the ignition started to function," Dr. Medvedev wrote. "The rocket lifted briefly off its launching pad but was caught by the inspection ladders" and exploded, killing "everyone in the area." Marshal Nedelin was one of the dead.

The 1958 nuclear explosion came in atomic wastes buried near Blagoveshensk in the Ural Mountains, he said.

Politicians ignored warnings from nuclear scientists that the waste was not safe, he said, because alternative disposal methods were "considered too expensive."

"Suddenly there was a huge explosion like that of a volcano," Dr. Medvedev wrote. "The buried material had overheated through nuclear reactions.

"The explosion threw radioactive dust and materials high up into the sky. Strong winds blew the radioactive cloud hundreds of miles away."

No evacuation was ordered until radiation sickness symptoms appeared, but by that time there were "tens of thousands" of cases of radiation sickness and "hundreds died," Dr. Medvedev said.

But the British Atomic Energy Authority chairman, Sir John Hill, today dismissed as pure science fiction Dr. Medvedev's claims that nuclear waste caused a disastrous explosion, Reuter reported.

Sir John told the Press Association, the domestic British news agency, that the allegations were "rubbish" and added, "I think this is a figment of the imagination."

Jews Living in Hungary Find A Secure Oasis in East Bloc

By Michael Getler

BUDAPEST (WP).—In the back rooms of a dilapidated tenement here, Rabbi Alexander Scheiber presides over the only rabbinical seminary left in all of Eastern Europe, once a thriving center of world Jewry.

The elderly rabbi has 15 students—12 Hungarians and 3 Russians—who study in the ramshackle suite of rooms just a few blocks from the slightly run-down 100-year-old Central Synagogue, the largest in the world.

Within the Communist bloc, such Jewish places of worship are fast becoming relics.

The fact that the Hungarian government allows this training school for rabbis to continue operating tends to confirm that this country's remaining Jewish population—nearly 100,000—is one of the few relatively secure pockets of Judaism in the region.

Ironically, the Hungarian government feels it is being discriminated against by a controversial U.S. trade law with portions drafted primarily to force the Soviet Union to allow freer emigration, especially for Jews.

Throughout Eastern Europe, Hungary is widely viewed as the most liberal state, and its Communist party chief of 20 years, Janos Kadar, is credited by both Hungarians and Western diplomats with consistently rejecting pressures to remove Jews from many of the high positions they hold within the government and in the country's cultural life.

Mr. Kadar's success with his own brand of liberalism while living under Moscow's domain also demands that he maintain strict foreign policy loyalty to the Kremlin. Thus, Mr. Kadar, like Moscow, rejects the terms of the Jackson-Vanik Trade Act of 1974 as an interference in internal affairs. Hungary, therefore, still does not have most-favored-nation trade status with the United States and the lower tariffs that go with such status.

Other Communist countries, such as Poland, which now has only a small Jewish minority, and where anti-Semitism is considered much more common, were granted most-favored-nation status long before the new law. Yugoslavia, Communist but independent of Moscow, also has it.

The only Communist country to accept the terms of the Jackson-Vanik law since it was passed is Romania, and the irony here, in the view of U.S. diplomats, is that Romania also has strong currents of anti-Semitism and was planning to let some Jews emigrate even before the law was passed.

"The law is an insult," said a Hungarian official. "Imagine Brezhnev telling Washington they must do such and such for the Negroes or they won't sign a certain agreement."

"What is better," another asks, "that you treat your Jewish population well and are forced to send them to Israel or that you don't treat them well and allow them to emigrate?"

Foreign diplomats in Eastern Europe and many non-Jewish intellectuals here and in neighboring countries all say there are strains of anti-Semitism throughout Central and Eastern Europe. In Hungary, one said, "it is more primitive than wicked and not as bad as elsewhere."

Hungary had almost a million Jews before World War II. About 90,000 of those that are left live in Budapest, probably the largest single community in the region.

Rabbi Scheiber is a cautious man. He wants to talk only about the seminary and not anti-Semitism. "All professions are open to us here," he said. "Anti-Semitism is forbidden by law. We cannot see into people's hearts, but there is no sign of it outside."

The emigration law is one of two religious matters that continue to indirectly irritate unofficial U.S.-Hungarian relations at a time when official relations between the two countries are improving.

In churches, as well as in the Foreign Ministry here, there is lingering bitterness over the unwillingness of the United States to return the crown jewels of St. Stephen, Hungary's patron saint.

Legend has it that these ancient relics—a crown, scepter, orb and robe—were given to King Stephen almost 1,000 years ago by the Pope in gratitude for the king's conversion of his country to Christianity. They fell into U.S. hands after World War II.

Rickover Seeks $130 Million for Another Minisub

WASHINGTON, Nov. 7 (WP).—Adm. Hyman Rickover is seeking $130 million to build another minisubmarine like the NR-1, which found the Navy's Phoenix missile on the ocean bottom.

His request, which could end up on the desk of one of Adm. Rickover's former nuclear submarine officers—President-elect Jimmy Carter—has already drawn fire from budget officials.

They are questioning whether it is worth spending $130 million on a second NR-1, which is designed to explore the ocean depths rather than fulfill any military function, when the Navy is already strapped for money to build fighting ships.

Navy backers of another NR-1—which at 136 feet is less than half the length of nuclear attack submarines now at sea—are arguing in the closed Pentagon budget meetings that a new minisubmarine would provide an opportunity to try out a stronger type of steel.

The NR-1 turned out to be the star of an otherwise embarrassing performance by the Navy to find and retrieve the missile and an F-14 Tomcat fighter that rolled off the aircraft carrier John F. Kennedy on Sept. 14 and sank in 1,960 feet of water about 75 miles northwest of Scapa Flow in the Orkney Islands.

Air Collision in Russia Reportedly Killed 90

MOSCOW, Nov. 7 (UPI).—At least 90 persons were killed in a collision between two Soviet airliners two months ago, according to reports reaching Moscow yesterday.

The unofficial reports were brought to the capital from the Ukrainian mining city of Donetsk, where many of the passengers aboard one of the airplanes were said to have lived. The reports, which have not been confirmed in the Soviet press, said the airliners collided near the southern city of Sochi, a holiday resort where one plane was headed.

DEATH NOTICE

Mrs. BEYEN-SALLY (born BRUNET) Our so beloved wife and mother on October 27, 1976. Memorial Services were held at Laren on November 1, 1976.
R.H. BEYEN, STEENBERGEN 6, LAREN (N.H.), THE NETHERLANDS.

Europe Liberals Near Accord on Parliament Vote

THE HAGUE, Nov. 7 (Reuters).—Leading officials of European liberal parties meeting here today took their first steps toward a common program for direct elections to the European Parliament in 1978, but failed to agree on some other issues.

Liberal leaders from eight of the nine Common Market countries today ended the first Congress of the Federation of EEC Liberal and Democratic Parties since it was established in March.

The federation's chairman, Luxembourg Premier Gaston Thorn, said that the 230 or so delegates were between 80 and 90 per cent agreed on the major points of a combined platform. He added that a definitive program would be ready well before the elections.

Differences of opinion concerned the powers of a European Parliament, the regional policy of the EEC and some aspects of foreign and defense policy, he said.

The federation comprises liberal parties in Belgium, France, Britain, Denmark, Italy, Luxembourg, West Germany and the Netherlands.

Trudeau Apology In Japan Draws Protest in Canada

OTTAWA, Nov. 7 (NYT).—A wave of protest has been set off in Canada by the apology Prime Minister Pierre Elliott Trudeau made last month in Japan for the wartime treatment of Canadian residents of Japanese ancestry.

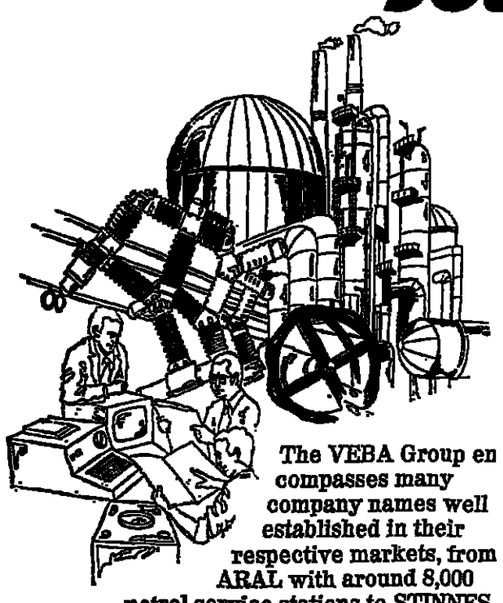
In letters to newspapers, Canadians of Japanese ancestry who were interned early in the war and lost all their property as a result have contended that Mr. Trudeau's apology should be to them, not to the Japanese in Japan.

Several letter writers also declared that an apology by Japan for wartime atrocities against Allied soldiers would have been an appropriate exchange for Mr. Trudeau's gesture, made at an official dinner in Tokyo on Oct. 25.

The controversy has also revived bitter memories among victims of racial intolerance here not only during the war but also in earlier times when immigrants from Asia encountered widespread discrimination, especially in British Columbia, where the Asians were most numerous.

Mr. Trudeau apologised for "the decision taken by the federal government in the heat and fright of World War II to evacuate Japanese-Canadians inland from coastal communities and to deprive many of their civil rights."

Romania Moves On Job Shirkers



VIENNA, Nov. 7 (Reuters).—Work-shy Romanians have been officially labeled anti-social, and the government has said persistently unemployed persons will be drafted to do compulsory labor.

The Romanian parliament voted a new law that decrees that all able-bodied persons, other than students and housewives, "must carry out work that is useful for society."

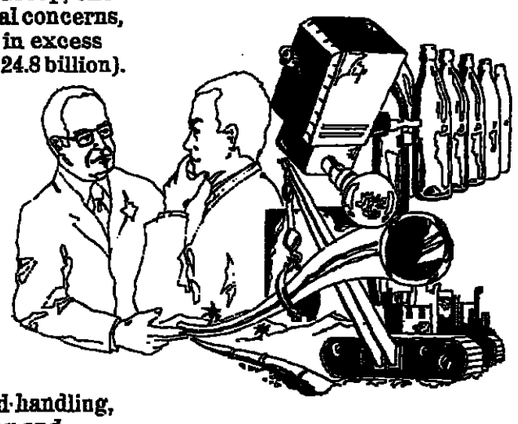
The law applies to everyone between the ages of 16 and retirement, the Agerpres news agency said. Persons classified as "parasites" face up to a year of compulsory labor, but first they will be urged to take jobs voluntarily.

VEBA

Our Group's Sources of Strength – Energy, Manufacturing, Trading and Transportation.

The VEBA Group encompasses many company names well established in their respective markets, from ARAL with around 8,000 petrol service stations to STINNES, specialists in world-wide trading and transportation, from DEMINEX active in global oil exploration to PREUSSENELEKTRA, a leader in nuclear power plants. All in all, there are several hundred companies that make up the VEBA Group, one of Germany's top industrial concerns, with an annual turnover in excess of DM 25 billion (1975 DM 24.8 billion).

During the first six months of 1976 turnover of production increased by 16.6%. This includes among others petro-chemicals and organic products, plastics, fertilizers and hollow glass.



The turnover of the service sector comprising trading and transportation as well as freight forwarding and handling, ocean and inland shipping and the pioneering of new markets was up by 11.8%.

VEBA's paramount activity, electricity generating and supply which regularly absorbs more than 70% of total group investments, achieved a 19.2% increase in output during the first six months of this year. In this sector, VEBA's more than 70 years of experience in power station planning and construction play a major role and its traditional energy sources coal, oil and gas are ideally complemented by its advanced technology in nuclear power generation.

Overall the Group achieved a profit increase of 104% in the first half, reaching a total of DM 96 million.

The Group's immensely broad base makes it an ideal partner for joint-venture projects on a national and international scale and its engineering know-how in specialized fields can be of invaluable benefit to its business partners.

Here, experience in uranium enrichment, manufacture of fuel elements, recycling of atomic fuels, and transport of radioactive material as well as the development of disposal methods for nuclear waste, are of specific importance.

With 1.2 million shareholders, more than any other European company, the VEBA Group draws its financial strength from the full spectrum of German economic life, and as one of the foremost energy concerns in the country, it is particularly responsive to the needs of progress.

Patrick Dennis. UPI.

Patrick Dennis, 55, Dies; Author Of 'Auntie Mame'

NEW YORK, Nov. 7 (NYT).—Patrick Dennis, 55, the writer who hit the jackpot with his best-selling novel "Auntie Mame," the wild-eyed terror of Beekman Place, died yesterday of cancer at his home here.

Mr. Dennis was promotion manager for Foreign Affairs magazine when "Auntie Mame" was published by Vanguard Press in 1955. For more than two years the book was on the best-seller lists and sold over two million copies in the original, translations and paperback editions, making the writer a millionaire.

After ghost-writing four books, he published his first novel, "Oh Hell's a Wonderful Wedding" in 1952. "Auntie Mame" was written the following year, and Mr. Dennis's wife, Louise, recalled yesterday that it was rejected by 10 publishers before its acceptance by Vanguard. Mr. Dennis pretended that "Auntie Mame" was a real aunt, but his wife said that the character was almost entirely fictional." It became a play, film and musical.

The writer's real name was Edward Everett Tanner 3d.

From 1951 to 1971, he wrote 12 novels under the Patrick Dennis name and four novels under a Virginia Rowans pseudonym. For 40 weeks in 1956 he had three novels on the New York Times best-seller list at one time. That record has not been broken.

Iran Quake Kills 16

TEHRAN, Nov. 7 (UPI).—The severest earthquake in Iran in 10 years rocked northeastern Khorassan province today, causing undetermined damage and at least 16 deaths, government officials said.

Joined by Leftists, Students

Thai Insurgents Stepping Up Activity Since Military Coup

By Lewis M. Simons

NA KAE, Thailand, Nov. 7 (WP).—Here in the center of Thailand's Communist insurgency and throughout the troubled northeast of the country, guerrillas have been stepping up the intensity and scale of their attacks on government outposts since military leaders seized power in Bangkok a month ago.

Government and military officials in several provincial towns are convinced that the increased activity is being carried out in direct response to the toppling of Thailand's short-lived democratic government.

Most officials in the impoverished northeast, which is bordered by the Communist-governed states of Laos and Cambodia, anticipate that the insurgency will become steadily more difficult to cope with as dissident students and other leftists, who have joined the guerrillas in recent weeks, become trained jungle fighters.

They expect that Laos and its major ally, Vietnam, which began upgrading the quality of their support to the Thai insurgency more than a year ago, will increase their aid further now that they are faced with an anti-Communist regime here.

Major Proportions

Although most local officials seem pleased by the Oct. 6 coup because it has freed them to take strong action against the insurgents and their supporters, there is general agreement that the struggle will take on major proportions within six months.

"In five or six months, those students who have the nerve to remain in the jungle will be trained combat troops and that's when we'll really have to worry," said Pisal Mooisartsathorn, the governor of Nakhon Phanom Province on the Mekong River border with Laos.

Mr. Pisal, like civilian and military officials throughout the northeast, cited intelligence reports of an undetermined number of students linking up with insurgent units and at least 200 others crossing the Mekong into Laos.

Authorities have monitored Communist radio broadcasts advising students how to survive in the jungles, what sort of clothes to wear, how to make contact with guerrilla groups and, if necessary, "to be prepared to sacrifice your lives" if captured by police or military units.

There are thought to be some armed guerrillas in the northeast, bolstered by active Communist supporters raising the overall strength to 10,000.

Several regional officials expressed concern that even if the majority of students did not stay in the jungle, those who did could add a new level of intelligence and leadership ability to the insurgents, some of whom have been at war with the government for more than a decade.

Last week, in an extraordinary broadcast on the clandestine Voice of the People of Thailand radio, a group of six top former leaders of the now illegal National Student Council of Thailand declared the beginning of a "people's war" against the military-backed regime in Bangkok.

"We have unequivocally drawn the conclusion that because the enemy has guns, we also must have guns. Our people must also have their revolutionary armed forces to overthrow the reactionary administrative power," the students said.

The broadcast called on farmers and workers to cooperate in a basic Maoist program of "using the rural areas to encircle and finally seize the cities."

At the moment, the insurgency is limited to a number of fairly well defined rural pockets in the northeast.

Dominated by Phupan Noi, a heavily forested hill constantly patrolled by troops of the Thai Army's 3d Regimental Combat Team, the area is one of those parts of the country described recently by Premier Thanin Kraivichien as "Communist-infested."

The few roads crossing Na Kae are intercepted every mile or so by barricades manned by heavily armed police. Local police stations, favorite targets of the insurgents, are ringed by sandbags.

The thrust of the government's efforts, which began even before the military take-over, is to locate what authorities term "village hard cores," that is, those villagers who supply guerrillas with information, food and medical supplies, and to "re-educate" them.

In the four months he has been district chief in Na Kae, Virat Rasmites said that he has stressed "re-education and played down violence." Mr. Virat saw no irony in the government employing the same "re-education" technique as the new Communist regimes in the neighboring Indochinese states.

Bangkok Alert Eased

BANGKOK, Nov. 7 (UPI).—Bangkok's military commanders today reduced the city's full-scale military alert. Troops dismantled the last of the street bunkers and generally moved off the streets.

Delayed U.S. Swine Flu Program Is Falling Far Short of Its Target

By Harold M. Schmeck Jr.

WASHINGTON, Nov. 7 (NYT).—One-third of the way through its planned time period, the national swine flu program has vaccinated less than one-tenth of the people it was intended to reach.

The early performance has raised serious doubts among some experts that the delayed effort can achieve its goal of protecting most adult Americans before the onset of the 1976-77 flu season.

In New York City, for example, the head of the program said the turnout has been poor.

"As it's going now," Dr. Pascal Imperato, first deputy health commissioner, said yesterday, "it will probably reach somewhere between 15 and 20 per cent of the target population."

In California, Dr. James Chin said he had hoped the flu vaccine program would reach about half of the adult population. As things are going now, he said, "if we get 30 to 40 per cent we'll be lucky." Dr. Chin is chief of the state Health Department's Infectious Disease Section.

After delays that put the program behind schedule by at least six weeks, the nationwide immunization program began Oct. 1. But vaccine shortages delayed the program in many communities by up to three more weeks.

The federal government's Center for Disease Control in Atlanta, which is coordinating the national program, has reported that 9,613,029 persons were vaccinated last month. The CDC estimates that this is slightly more than 7 per cent of the "target population," which consists of almost all U.S. adults and "high risk" persons under 18.

The national figures show that almost half of the total vaccinations during October were done during the last week of the month, an indication that the program is gathering momentum. Nevertheless, with more than 120 million adults still unvaccinated, the effort would have to speed up to more than 2 million inoculations a day, and keep that pace, to get the job done by the end of the year.

Swine flu has not been detected anywhere in the world since an outbreak early last year at Fort Dix, N.J. Because of this, many public health officers are becoming increasingly doubtful that it will reappear this winter.

Liberal Launches Publication Attacking Echeverria

Ousted Mexican Editor Defies Regime

MEXICO CITY, Nov. 7 (NYT).—Despite strong pressure from the government not to publish, the liberal editor and reporters who four months ago were ousted from the newspaper Excelsior issued a new political weekly yesterday that is highly critical of outgoing President Luis Echeverria.

In its first issue, the magazine, Proceso, makes a harsh analysis of the performance of Mr. Echeverria, who leaves office next month, and details the role of the government in ousting Julio Scherer Garcia from the editorship of Excelsior on July 8.

Last week, Mr. Echeverria again insisted that the government played no part in promoting the rebellion of conservative members of the Excelsior cooperative that led to Mr. Scherer's dismissal and the walkout of over 100 of his supporters.

Since then, however, Excelsior has abandoned the independent and left-leaning editorial policy that was the trademark of Mr. Scherer's leadership. And his determination to publish an independent political weekly before the end of the Echeverria administration has once again brought him into conflict with the government.

Refused Money

According to his close aides, he was first offered a large sum of money by government officials in return for a promise to treat Mr. Echeverria "cordially" in his opening issues. When this offer was refused, the aides said, senior government officials then approached Mr. Scherer and warned him not to begin the magazine.

In addition, the district attorney general's office suddenly decided to investigate a charge made three months ago by Excelsior's new editors that Mr. Scherer embezzled $650,000 from the newspaper.

Finally, the state-owned paper-importing monopoly, Pipsa, refused to sell newsprint to Proceso, which in turn was forced to borrow paper from friendly newspapers or to buy it at an inflated cost on the black market.

Huge Deficit Denied

MEXICO CITY, Nov. 7 (UPI).—President Echeverria yesterday denied charges his six-year administration, which ends Nov. 30, will leave behind a record $11-billion public deficit.

Commenting on a report Friday by the Mexican Institute of Financial Executives, Mr. Echeverria said, "The statements are totally wrong. There has been high investment in oil, electrical, steel and fertilizer industries, made to improve the nation's economy."

Saudi Troops Set To Leave Jordan

AMMAN, Nov. 7 (UPI).—Some 7,000 Saudi Arabian troops marched in a farewell parade in southern Jordan today before pulling out of the area, where they had been stationed since the 1967 Arab-Israeli war.

Officials said the troops would leave for Saudi Arabia tomorrow for training with new weaponry. They did not say whether the troops would return to Jordan.

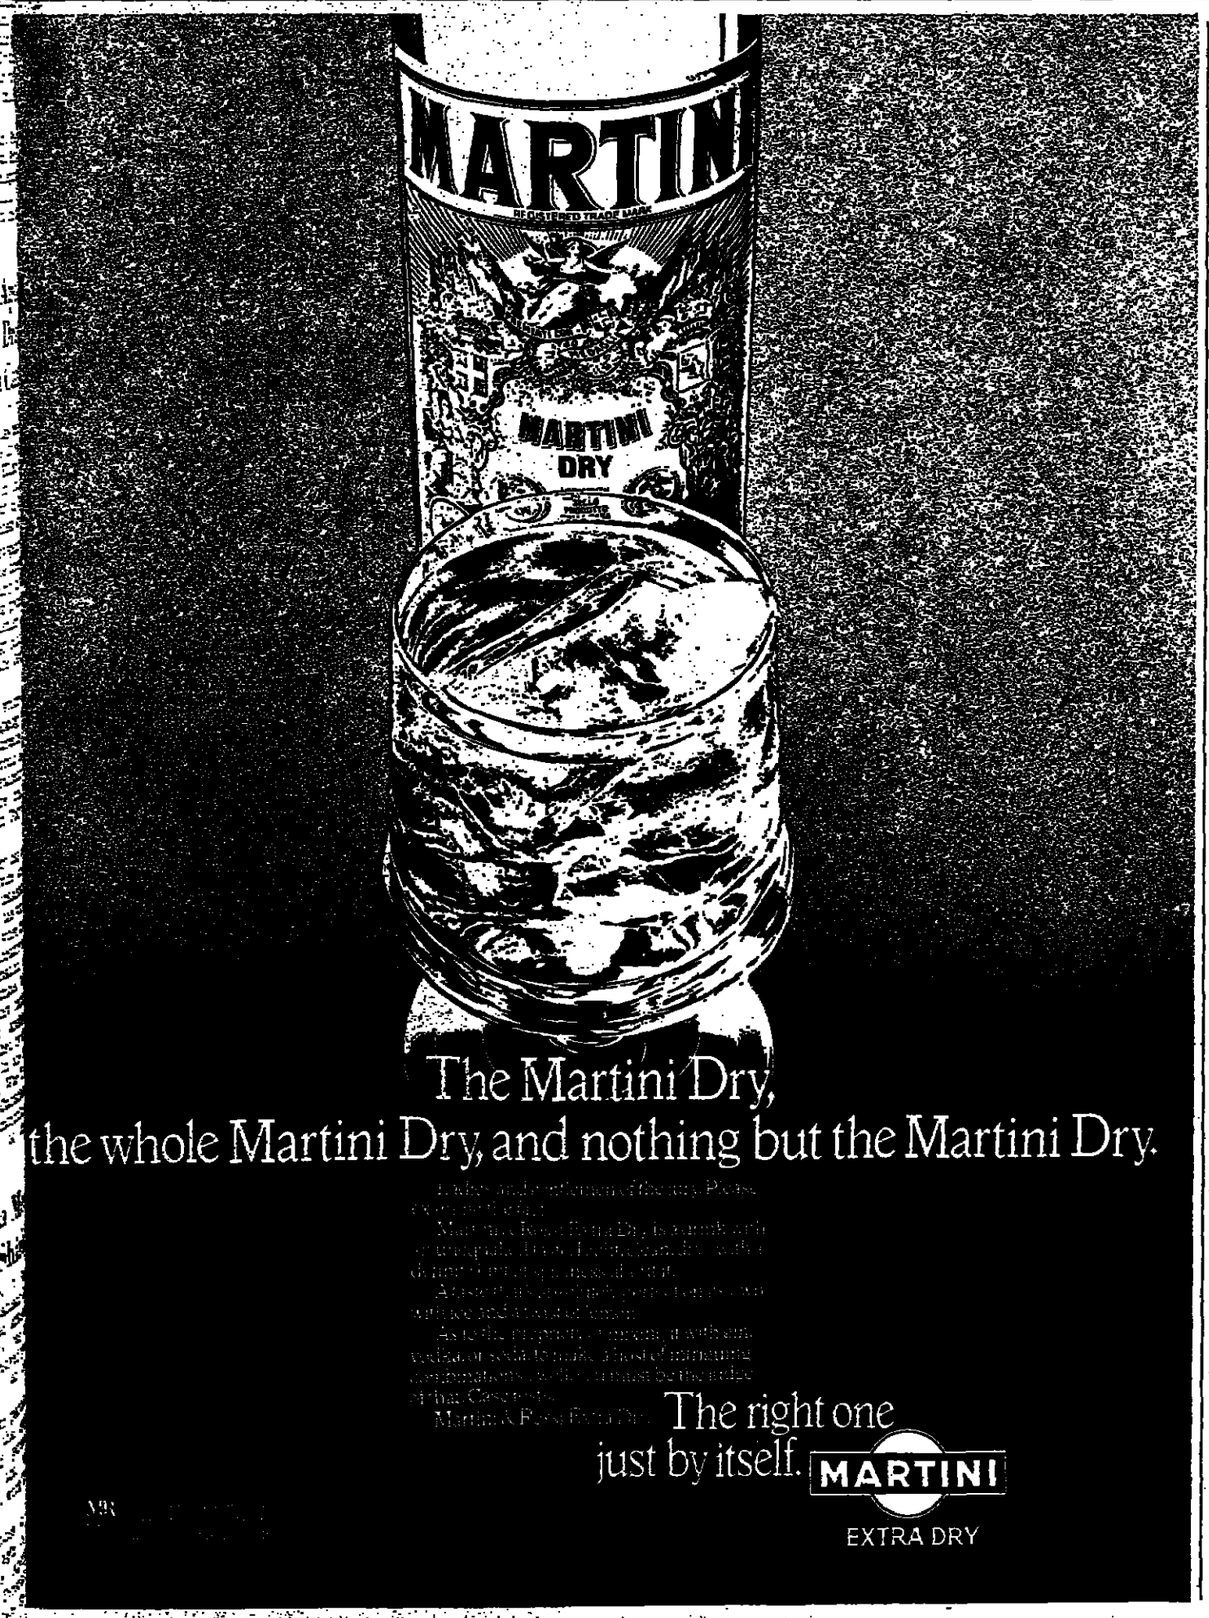
King Hussein and Prince Sultan Ibn Abdul Aziz, Saudi Arabia's air and defense minister, attended the farewell ceremony near Kerak, about 150 miles south of the capital. A Saudi contingent stationed on Syria's Golan Heights frontier returned home last month.

Business consultancy reports on world bank

When businessmen in Europe want to know what's happening in the world, they consult the Financial Times – Europe's business newspaper.

It provides editorially 32%* more international, political, economic and commercial information than any other English language daily newspaper printed in Europe.

Regular features include technical developments, management methods, the money market, labour news, mining, commodities and more–everything that's of special interest to European companies.



If you would like to find out for yourself how useful the Financial Times is as an on-going reference for business information, fill in the coupon and we will send you a copy every day for two weeks – free of charge.

View From St. Simons Island

The President-elect is resting after his long and successful campaign, surrounded by the peace and quiet of St. Simons Island, off Georgia, and by stacks of briefing papers that contain anything but peace and quiet. For Jimmy Carter is not only making the transition from private citizen to President, but from the campaign to the power it won and the responsibilities that power entails.

Mr. Carter, like nearly all candidates, had a tendency in public to reduce problems to phrases. Now he must reconcile his opposition to inflation with his opposition to unemployment and try to decrease the latter without increasing the former. He spoke of cultivating friends of the United States, rather than its potential enemies; of reducing the dangers of nuclear proliferation; of expressing moral views without interfering in the internal affairs of other states. And as he culls through the papers his staff has prepared, it is to be hoped that he also gets full daily reports on what is happening overseas.

This may be seen in many areas today. Greece and Turkey are both allies of the United States; both may be considered friends, certainly in the diplomatic sense. So what will Washington's stand be on the Aegean? And which of the friends of the United States (both have been highly critical of U.S. policy for some time) will be most offended by such a stand?

Then there is South Korea, where the United States maintains a protective garrison and which fought hard on the U.S. side in two wars. Whatever President Carter might think of President Park, the South Korean relationship has long been close. Now there is the question that Mr. Carter raised about reducing U.S. forces in South Korea, as well as the other question—of South Korean bribery of U.S. officials.

It could be argued that these nations are not as close friends of the United States as, say, its European allies or Israel. But the Middle East question cannot be resolved merely by goodwill to Israel (especially while Lebanon is still in turmoil, and Israeli vessels have engaged Palestinian craft off that country's coasts).

Mr. Carter, in the warm sunshine of St. Simons, must disentangle some of his campaign concepts and take another look at what international friendship means and the complications it can breed in applying moral values to a world which has many conflicting systems of morality. There is no reason to doubt that he will face up to his dilemmas—many new presidents have done the same. But the United States, and the world, are waiting for clues to his choices. Much depends on what the President-elect thinks, and decides, in this time of transition.

Oil Prices, Again

The oil-exporting nations' meeting next month is being preceded, as usual, by sharp waves of international anxiety. The issue at that meeting will not be whether to raise prices but how much. Higher oil costs come at a bad time for the industrial countries, which are OPEC's largest customers. Their unemployment is already high, and their production is not rising as strongly as their governments had expected. A further increase in oil deficits has the effect of a tax—it tends to slow down the economies on which it is imposed. We have been through this oil price sequence before. Now we have arrived at the stage of the cycle at which people rush about asking each other what can be done to restrain OPEC's appetite.

There is not much that anyone can do in the few weeks before OPEC meets, because the United States has done so little in the three years since the revolution in oil prices and the embargo.

* * *

In 1973, this country imported 36 per cent of its oil. Over the next two years oil consumption dropped in the United States and around the world, because of an industrial recession that the jolting increases in oil prices had helped to cause. But now consumption is rising again quite rapidly, and this year the United States will import 42 per cent of the oil that it uses. Next year, the Federal Energy Administration estimates, it will be 46 per cent.

But that's only the beginning. In 1973, our largest supplier of foreign oil was Canada, and Canada is now cutting exports severely. If you compare our imports for the first half of this year with the 1973 level, you will find that the total volume is up only by a modest 8 per cent. But the sources of those imports have shifted drastically. Because Canadian shipments are down, OPEC shipments are up 28 per cent. Shipments from the Arab OPEC countries are up a walloping 35 per cent. It has most rapidly increased its dependence on precisely those governments that have already demonstrated their determination to use their oil to pursue their political interests.

When the oil revolution was followed by the worldwide recession of 1973-75, OPEC grew apprehensive that it might have overplayed its strength and permanently damaged its market. As industrial production fell from Japan to Europe to the United States, demand for oil fell with it. OPEC decided, just over a year ago, to stand pat for a while; it announced a nine-month freeze on prices. When the freeze expired last June, the future demand for oil was still unclear and the cartel extended present prices for six more months. That six months expire at the December meeting.

And what has happened to world demand in the meantime? It is rising in nearly all of the rich countries, but it is rising most rapidly in the United States. That is why OPEC is now preparing to raise prices again. For all of their talk about conservation, Americans are once more using as much oil as they did in 1973 and their demand is rising steeply enough to keep markets satisfactorily tight—from a seller's point of view—throughout the world.

But that pattern may not hold up indefinitely. While the American tradition in using resources has been grossly wasteful in the past, it is possible to hope that things are changing. The oil revolution genuinely took this country by surprise, at a time when it was preoccupied first with an unprecedented political scandal and then with a long and closely fought presidential election. Now another President is about to take office, and Jimmy Carter has made it clear that he has energy policy very much on his mind.

The choice for Americans is an unpleasant but simple one. Either we can pay higher taxes here, to ourselves, on oil products—including the most sacred one, gasoline—or we can pay higher taxes to OPEC. The only effective answer to OPEC requires a slow but steady rise in American gasoline and oil taxes. The sooner we begin, the better.

THE WASHINGTON POST.

Impasse on Rhodesia

Prospects were never very favorable for the Geneva conference on Rhodesia's future, but now the negotiations are threatened with the possibility of complete collapse. The end of this effort to negotiate a peaceful transition to majority rule for a country where blacks outnumber whites 24 to 1 would please only the extremists in both camps who are prepared to resolve the issue by force, even at the risk of a racial war whose repercussions would be felt far beyond the southern African subcontinent.

The delegations at Geneva had already deadlocked on the first specific item taken up: the fixing of a date for Rhodesia's legal independence under majority rule. Then the unfavorable negotiating climate was poisoned by news that Rhodesia's white government had sent its troops deep into Mozambique, killed hundreds of black Rhodesian guerrillas and destroyed seven of their bases.

Rhodesian Prime Minister Ian Smith has gone home to Salisbury in a huff, calling the black delegates "stupid," reviving a threat to bypass them and negotiate a form of "majority rule" with the docile and discredited tribal chiefs on his government's payroll. On the black side there are increasing doubts that any of the delegates have enough influence with the black guerrillas to end the attacks on Rhodesia from Mozambique even if a Geneva settlement were to be concluded.

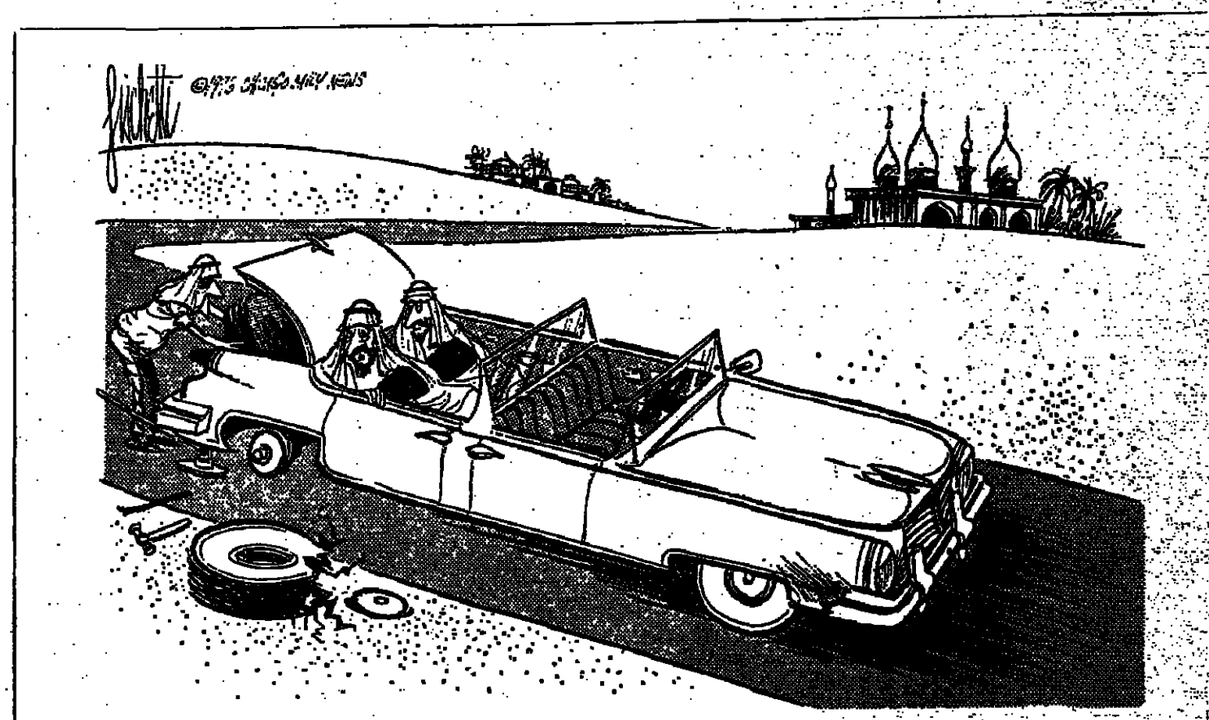
Some guerrilla leaders unquestionably would prefer to take over Zimbabwe—the African name for Rhodesia—by military conquest rather than negotiation. Die-hard Rhodesian whites believe that if they can hold out long enough, the United States and its allies will be forced for geopolitical reasons to come to their assistance and counter Soviet and Cuban involvement on the side of the blacks. To assess the views of the two extremes is to appreciate the hazards involved in the bold Kissinger initiative that brought about the Geneva negotiations.

Despite official disclaimers, there is little doubt that the United States hopes Britain will agree to play a much greater role in Rhodesia during the transition period than Prime Minister Callaghan is ready to contemplate. But it was on American initiative that the reluctant British agreed to call the Geneva conference. It may require a further American effort merely to salvage it.

THE NEW YORK TIMES.

In the International Edition

Seventy-Five Years Ago



November 8, 1901

PARIS.—Yesterday the French capital, and indeed all of France, resembled London in no uncertain terms, as a heavy, thick fog settled over the country from Calais to Menton. It was almost impossible to see across the Champs Elysees in the afternoon. In the provinces it was just as bad, with railway, river, tramway and omnibus lines all very seriously disorganized.

Fifty Years Ago

November 8, 1926

NEW YORK.—A new "talking film" is expected to make its appearance on the market shortly, having been perfected after experiments along a line somewhat different from that used in the Vitaphone according to sources in Wall Street. Officials of RCA admitted that they had been working on such a development and said that the General Electric Company and Fox Films had expressed interest.

Greece and Turkey: Cutting the Gordian Knot

By C. L. Sulzberger

GORDION, Turkey.—Legend has it that when Alexander the Great led his army up to the walls of this famous ancient capital of Phrygia in 333 B.C. on his march toward India, he was told he would be allowed free entry if he could untie the knot bound together by its first king, Gordios, which had hitherto proved impossible to unravel. The Greek conqueror simply drew his sword, sliced it open, and was permitted to march unhampered through the formidable fortifications.

The symbol of the Gordian Knot—an insoluble complexity which can, nevertheless, be opened by unexpected means—is one of the two tales of Phrygia bequeathed to eternity; the other being the fabulous wealth of Midas, one of its renowned rulers. And the neat, hitherto untried approach of Alexander is required to solve a contemporary regional problem that has until now perplexed the Western world's best diplomatic minds. This is to settle the quarrel between the heirs of Alexander and Gordios, modern Greece and Turkey.

A Formula

It is apparent to both governments involved in this dangerous dispute, which threatens to weaken each of them and NATO, that a formula must be found to bring peace before the continuing game of "chicken" between them produces the disastrous alternative of war. And now that the American elections are over, removing a temptation to play Washington's great lobby game in hopes of a better deal, both parties have gotten down to serious business.

Bilateral negotiations concerning an agreed definition of how to handle rival claims on the Aegean Sea's continental shelf, which both hope to prospect for oil, are now taking place at Berne. Similar bilateral talks on defining rival claims of national air space are taking place in Paris. If these move in the direction of accord between the technicians who started meeting on U.S. election day, the two foreign ministers will get together soon to seek formal understanding.

This is a sensible way of cutting the new knot of Gordion. Each side recognizes that both will be penalized if they can't settle this argument. Neither could benefit from war, both can profit from peace. They will mutually gain from pooling subsurface petroleum in the Aegean and from reopening the civilian air traffic between Greece and Turkey that has been blocked for two years.

Moreover, the real atmosphere as between governments is a good deal more level-headed than one might assume from the inflamed atmosphere as between mass public opinions excited by inflammatory newspapers. Foreign Minister Caglayangil of Turkey told me that Greek Prime Minister Caramanlis "deserves full credit for two major decisions" he took during times of stress.

To the UN

He referred to Caramanlis's refusal to contemplate war after this country's second military landing in Cyprus in 1974 and his similar refusal to fire at the Turkish oil exploration ship Sismik I last summer when Greek jingoes were demanding such action. "He took it to UN instead," said Caglayangil. "No Turkish leader would have had enough prestige to take two such decisions under such circumstances," he acknowledged.

This doesn't mean that all of a sudden the atmosphere is easing. The talks in Berne and Paris are complex and political repercussions are potentially violent. Caramanlis has a strong parliamentary majority but he is being hammered by the opposition. Turkey has a curious coalition government of minority parties which share no common ideology and it is even harder for sensible men like Caglayangil and Prime Minister Demirel to swing a sensible deal.

Nevertheless, the present approach is saner than anything in the past two years. The problems being tackled in Berne and Paris are of primary importance to Greece and Turkey, to their relations with the USA, and to NATO. Cyprus is another matter. It is more complex and more difficult to settle because it involves a third government—that of President Makarios, a neutral, not in NATO—and also involves Britain, a treaty guarantor of Cyprus.

However, if the atmosphere can be eased by working out an agreed formula for the continental shelf and air space, enabling partnership in crucial economic areas, tension is bound to lessen. This should in turn reduce pressures on the U.S. Congress to frustrate arms and bases accords already negotiated and the air will be cleared for a new approach to Cyprus. Cutting halfway through the Gordian Knot is better than leaving the whole thing in a hopeless tangle.

The Memories of Transition

By James Reston

WASHINGTON.—The pause between one administration and another brings back strong memories for those of us who have been around this beautiful city for a while: The shock of Roosevelt's death, the transition from Truman to Eisenhower after 20 years of Democratic power, the theatrical and triumphant arrival of the young Kennedy followed by his murder and the melancholy succession of Lyndon Johnson, and finally the comeback, victory and disgrace of Richard Nixon and Gerald Ford's announcement that "our long national nightmare is over."

This time the transition is dominated by the astonishing personal achievement of Gov. Carter and his family, by the flexibility of a political and constitutional system that has seen us through the resignation of a President and the stewardship of both an unelected President and an unelected Vice-President. Finally by the decision of a narrow majority to accept, after all these years since Appomattox, a President from the aggrieved and rejected South.

If

The changing of the guard in Washington is always attended by the poignant might-have-beens of life. ("If" is the shortest and saddest word in the dictionary.) What if it had rained on Election Tuesday, or Ford had picked a different running mate, or refused to debate Carter on national television?

The result was so close, particularly in the big industrial Northern states, that many individuals and organizations are now claiming that their political exertions made all the difference between victory and defeat: the labor unions, the League of Women Voters, Mayor Beame of New York, even Mayor Rizzo of Philadelphia, of all people, rather than Mayor Daley of Chicago, all of whom had a decisive role. You can make your choice. Mine would be Lyndon Johnson and the Voting Rights Act of 1965, which finally enfranchised the Southern Negroes. This election was won primarily by the black voters of the South, who believed in Carter and were finally given *an equal chance to vote by the* political skill and timing of Johnson.

Again the element of accident. After the assassination of President Kennedy and his brother Robert, Johnson moved quickly to push through the Civil Rights Act of 1964. I saw him fairly often in those days, and he always insisted, at interminable length, that specific questions like busing and school integration were complicated, highly controversial, and secondary.

He wouldn't live long enough to hear out all the arguments, he said. The Northern, Eastern press was against him, he said, and even wanted to make him look like a "hick," but "voting is everything," he insisted. He had to choose, he said. Give the Negroes the vote in the South, and eventually they would work out their problems, but still be held back in 1965 until the battle in the streets of Selma, Ala., led by Martin Luther King jr., and then he acted very quickly and went before a joint session of the Congress in prime evening television time to present the critical Voting Rights Act.

It was one of the most memorable speeches of our time. As Doris Kearns described it, Johnson at his best—"homely, compassionate, audacious, and noble."

"I speak tonight," Johnson began, "for the dignity of man and the destiny of democracy . . . at times history and fate meet at a single time and in a single place to shape a turning point in man's unending search for freedom.

"So it was a century ago at Appomattox. So it was," he said, "last week in Alabama.

"There is no constitutional issue here. The command of the Constitution is plain. There is no moral issue. It is wrong to deny any of your fellow Americans the right to vote . . . this time, on this issue, there must be no delay, and no compromise with our purpose . . ."

Here Johnson stopped and identified himself with the three words from the old Baptist hymn and the battle cry of the Negro revolt: "We shall overcome." There seldom have been more dramatic moments in the Congress of the United States than this.

Johnson not only won the support in the Congress for his Voting Rights bill, but signed it in the President's room adjoining the Senate chamber where Abraham Lincoln had signed the Emancipation Proclamation in 1863.

The effect of that struggle was clearly seen in the decisive outpouring of black votes for Gov. Carter in every Southern state except Virginia. Without the electoral votes in the Old Confederacy, he could not have won the presidency. Without the Voting Rights Act of 1965, there would have been no effective, decisive Negro vote.

Transition

And one other thing: Without the intelligence and patient love of Ladybird Johnson, always appealing under stress to the better side of Lyndon Johnson's political nature, everything might have been quite different, then and now.

So the transition period raises questions beyond the statistics of the states and the electoral votes. Odd things happen, most of them sensitively human. They won't come out of our computers. The accidents and imponderables interfere. Watching it all for a while, I have to pay attention to the element of luck. Ike was a lucky man. Adlai Stevenson was an unlucky man. There is the tragedy of fate on the Kennedys, and the tragedy of success, which he couldn't manage, on Nixon.

And Carter? He is clearly a determined man, intelligent, well-rooted in the history of the South, well-favored in a loyal family, and beyond everything else, probably pretty lucky.

Letters

A Breath of the Past

Apropos of Alfred Friendly's very funny parody of my food articles (IHT, Nov. 2), on the subject of garlic, I will spot him a double-barreled anecdote (more or less authentic) in case he should desire to enlarge upon this topic later.

The Latin poet Horace, who must be listed as one of the founding members of the commandery of anti-garlickers *(incredulus odi)*, is reported to have developed his dislike for this vegetable as a result of the rivalry between Maecenas and himself for the same young lady. Knowing that Horace had a date with her one night, and knowing also that she detested garlic, Maecenas invited Horace to dinner just before his rendezvous and served him a repast reeking with garlic. This ended Horace's affair and initiated his hatred for garlic. A less romantic version attributes Horace's dislike of garlic to the fact that on his arrival in Rome he ate heavily of sheep's head strongly flavored with garlic, became ill, and couldn't stomach it thereafter.

About the same thing happened to me when I first arrived in Paris, but in my case it wasn't garlic, it was *pastis*.

WAVERLEY ROOT.

Paris.

'Nuclear OPEC'

I would like to set the record straight on the inaccuracies in C.L. Sulzberger's article, "A Leak in the 'Nuclear OPEC'" (IHT, Oct. 30-31).

Mr. Sulzberger has attributed to Pakistan the intention of "accumulating plutonium and secretly manufacturing nuclear weapons," and in support of this conjecture, he has stated that the Franco-Pakistan agreement does not carry any clauses which safeguard "copied" reprocessing plants, and that Pakistan had spurned all efforts to plug this loophole.

These assumptions, on which Mr. Sulzberger has based his article, are totally unfounded. In fact, copied reprocessing plants, and even parts of such a plant, are specifically listed among other items in Article II of the relevant Safeguards Agreement signed by France and Pakistan with the International Atomic Energy Agency, which sets out the undertakings of the government of Pakistan, and which states that these items shall not be used for the manufacture of "any nuclear weapon or to further any other military purpose or for the manufacture of any other nuclear explosive device." Article III of the same agreement further sets out the undertaking of the international agency to apply its safeguards system to all listed items, including copied plants.

The government of Pakistan has repeatedly given categorical assurances about the peaceful intent of its nuclear energy program, and has taken a consistent stand on this issue in international forums. Nor have these pledges been merely verbal, as iron-clad safeguards have been accepted both in our nuclear agreements with France as well as with the IAEA, some of which even go beyond the normal provisions of the IAEA safeguards system. These facts speak for themselves.

NAWAB QIZILBASH,
Ambassador, Pakistan Embassy,
Paris.

Treasury: Who Will Carter Pick?

By Evans and Novak

WASHINGTON — When Presi[dent-elect] Carter returns from vacation, he will confron[t] divided counsel from friends and staff on this question: Should he reassure the business community at the risk of alienating liberals by naming a sound-money financier as secretary of the Treasury?

Surprisingly, the preponderant answer from those with access to Carter is an insistent yes—[but] tent because of apprehension about the economy. But liberal Democrats, including some of Carter's own staff, are pushing for somebody at Treasury who will adhere more closely to the promises of the 1976 Democratic National Convention than to the axioms of Adam Smith.

Thus, the economic ideology Jimmy Carter never quite established during two years of campaigning will soon become clearer. His fateful choice for the portfolio at Treasury will carry its own momentum, influencing policy for months and perhaps years to come.

The conversation in Plains never got around to specifics on the Treasury appointment.

Lawyer Charles Kirbo and banker Bert Lance, two of Carter's oldest advisers from Atlanta, feel the business community must be reassured by the Treasury selection. The same word comes from Democratic National Chairman Robert Strauss.

Such advice from relatively conservative Democrats is expected. The surprise is almost identical language from one Carter insider considered a gilt-edged liberal. Eyeing tough economic times ahead, he told us that a reassuring signal is vital to avert the freeze in capital investment that Republican businessmen warned would follow President Ford's defeat.

The name most frequently mentioned to give this signal is Wall Street financier Peter Peterson, a Republican bounced by the White House palace guard as secretary of commerce after Richard Nixon's 1972 reelection. As a free enterprise conservative, Peterson still has a good reputation and excellent connections in liberal circles—one reason for his purge in 1973.

Considering Carter's populist pretensions, however, some advisers feel a non-Wall Street man would be preferable—perhaps Dallas banker Robert Stewart, who turned down an offer to become Nixon's secretary of commerce. Stewart, considered a Republican, though his political credentials are vague, would be even more reassuring to orthodox businessmen than Peterson.

Businessman?

One Carter adviser would like to see a younger businessman with a less obviously orthodox pedigree and more iconoclastic views. He specifically talks about 47-year-old John Sheehan, a former member of the Federal Reserve Board (though Sheehan's prestige is probably inadequate to reassure businessmen).

But *any* businessman would dissatisfy liberals who expect Carter to live up to the letter of Hubert and Mondale's spending promises. "I don't think the secretary of the Treasury has to be or ought to be a businessman," counters one Carter insider who is pushing a liberal economic professor whose nomination would assuredly cause a one-day panic in the stock market.

Carter faces similar choices between right and left in selecting his secretary of state and secretary of defense. Ever since Election Day, the party's left wing has been laboriously launching secretary of state rumors for one of its darlings: Sen. Dick Clark of Iowa, a vigorous champion of the Third World. But Carter will rely heavily on advice from his fellow Georgian, former Secretary of State Dean Rusk, who is not apt to recommend Dick Clark or anybody close to him.

Taking James Schlesinger, fired by Mr. Ford as secretary of defense for advocating too much defense spending, back to the Pentagon is unacceptable to Democratic liberals. But his recommendations will be closely studied by Carter. Furthermore, insiders believe Carter is seeking a non-doctrinaire new face at defense who will bring an open mind and fresh outlook to the new President's first big defense decision, on the B-1 bomber.

Selections at state and defense may be so anonymous that Carter's well-deserved reputation for ambiguity will be enhanced. But not so at the Treasury. By his nomination there, the President-elect will finally answer whether professions of populism really amount to anti-business bias, setting a tone difficult to change in his administration.

THE EUROMARKET

A Multibillion-Dollar Pool of Funds Outside Control of Any Authority

By Carl Gewirtz

PARIS (IHT).—International outlaw or world bank?

The Euromarket is many things to different people. To the "man on the street," it is mostly incomprehensible, although the uninitiated in financial affairs would not hesitate to say that it killed the Bretton Woods system of fixed exchange rates.

Years of newspaper headlines saying "Euromarket Controls Urged" have no doubt reinforced the market's public image as an evil force, especially since the news stories seldom failed to mention that it is outside the control of any official monetary authority.

The recurrent calls for controls bear witness to the fact that even the specialists hold conflicting views of this market. Monetarists believe that the market's ability to create credit outside the supervision and regulation of financial authorities has been a major contributor to the worldwide surge in inflation while other academics maintain there is insufficient evidence to back up that assertion.

Instability

To those who complain that the market has been a major source of international instability—as it is the base from which massive speculative raids have been made on foreign exchange markets—others retort that the speculation would have occurred even if the Euromarket had not existed.

Of late, however, even the complaints of diehard critics have been stilled as the market has become a major force in recycling the surpluses of the oil-producing states to the importers, enabling the latter to run deficits in their international accounts and giving them the time to spread the necessary adjustment to meet the higher oil payments over years rather than months.

What, then, is the Euromarket? Is it a curse or a blessing?

In fact, it is neither. In the view of most economists, it is the thermometer of the international monetary system—with heavy flows of capital indicating sickness in one part of that system, but definitely not the cause of that upset.

The Extent

At latest count, it is a pool of funds estimated to total more than $470 billion in its widest definition—that is, including all the "offshore" centers and international bank lending out of the United States, Canada and Japan. At present, this is the fastest-growing sector of the international market due to the stepped up rate of lending being done directly out of the United States.

By the so-called narrow definition—measuring the external liabilities of banks in nine European countries (the EEC, minus Ireland and Denmark, and Switzerland and Sweden)—it is a $270-billion pool of funds growing at an annual rate of about $15 billion a year. After eliminating the double counting arising from banks borrowing from and lending to each other, the Euromarket's net size is estimated at around $215 billion.

Overall, the Euromarket is the second largest marketplace in the world, after the United States, and is ahead of its time in that the world is treated as one interdependent unit. Whereas domestic markets lack international horizons, the Euromarket deals in an array of currencies, with lenders and borrowers worldwide.

The bulk of the funds are Eurodollars, which make up close to 80 per cent of the gross market. Eurodeutsche marks are the second largest component, followed by Swiss and French francs, guilders and pounds sterling. These moneys are on deposit with banks—so-called Eurobanks—outside the country of origin. In fact, the prefix "Euro" is a misnomer, dating from the market's beginning, when the banks accepting such foreign-currency deposits were located in Europe.

Today, the market is not only in Western Europe but extends east to Bahrain, Singapore and Hong Kong and west to the Bahamas, the Netherlands Antilles and Panama. Its "capital" is London because in the early days only the City had the international expertise to cope with the business and the necessary supply of the "tools of the trade"—the telex machine and telephone, by which all business is transacted.

The market got started in the 1950s, the product of the cold war, as East European governments decided to transfer their dollar accounts from New York to Europe out of fear that the deteriorating political relations with Washington could result in their accounts being blocked.

Britain's restrictions in 1957, severely limiting the use of sterling to finance trade between countries outside the sterling area, was all that was needed to enthrone the dollar as the key currency in international trade. And by 1958, when the major European countries liberalized their foreign exchange controls to allow easy cross-border transactions, the boom was on.

From a mere $500 million in 1959, the Euromarket has grown to 540 times that size in less than two decades. And, in the wake of this growth, international banking was revolutionized, becoming the most dynamic sector of the banking market. The most telling proof of this is the profits that banks earn from their international operations—70 per cent of Citicorp's total 1975 earnings, 64 per cent for Chase Manhattan, 60 per cent for Morgan Guaranty Trust, almost 40 per cent for Deutsche Bank.

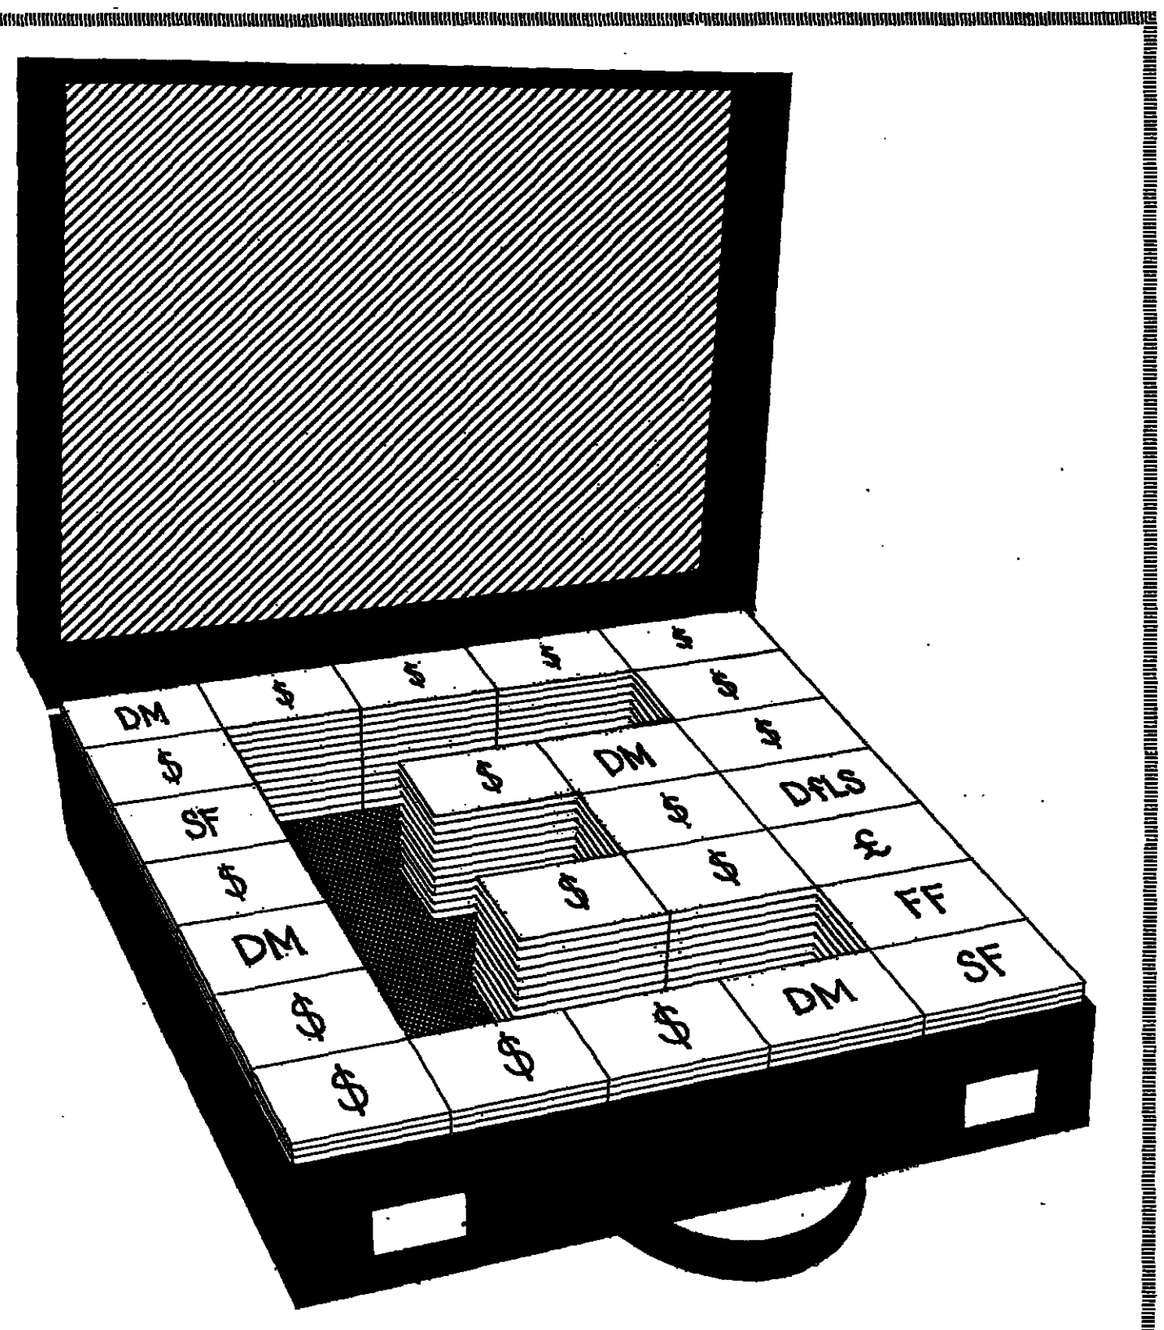
The phenomenal expansion of the Euromarket was the product of the continuing and in some years massive deficits in the U.S. balance of payments—deficits which spread dollars to every corner of the globe.

The impetus to keeping these dollars outside the United States was the system of controls Washington began imposing in 1964 to halt the outflow of dollars—controls which fostered the demand for dollars abroad. The first of these was the Interest Equalization Tax, which penalized American investors who purchased foreign securities. With few exceptions, foreign countries and companies were effectively shut out of the New York capital market and were forced to look elsewhere for funds.

A Limit

In 1965, the Voluntary Foreign Credit Restraint Program limited the amount of foreign credit that U.S. banks could extend abroad. And in 1968, the Foreign Direct Investment Program, instituted in 1965 on a voluntary basis, became mandatory. This restricted U.S. companies from taking internally generated or borrowed funds out of the country, above a certain limit—forcing them to finance their overseas investment needs through the Eurodollar market.

The last of these restrictions were removed in January, 1974, but by then the market was estimated to have a gross size of some $189 billion and a life of its own. As the latest figures indicate, the abolition of the U.S. restrictions had little impact on the Euromarket.



There are a number of reasons why the market continues to exist. One of the most important is that it is the only place where dollar deposits of under 30 days can earn interest.

In addition, Eurobanks are able to offer slightly higher interest rates on deposits or offer loans at lower rates than domestic banks because there are no reserve requirements on Euromarket transactions.

Reserve requirements are in-

(Continued on Page 8.)

U.S. Congress Concerned

Banks Now Govern Creation of Reserves

PARIS (IHT).—Commercial banks, mostly American, operating primarily through the Euromarket, have quietly taken over the role as banker to the world.

By supplying credit and creating international liquidity without constraint and with fleeting regard to caution, they have usurped the functions that formerly were the province of official international institutions such as the International Monetary Fund.

From a rather modest $6.86 billion of syndicated bank loans in 1972, the Euromarket arranged $21.85 billion of loans in 1973 and staggering $29.26 billion in 1974. The total last year dipped to just under $21 billion but it is clearly on the rise again, with some $9.44 billion worth of credits announced so far this year.

Eurobank lending to Communist countries leaped almost tenfold in three years—from $274 million in 1972 to $2.6 billion last year. Loans to the developing nations outside the Organization of Petroleum Exporting Countries (OPEC) expanded more than fivefold, from $1.5 billion in 1972 to $8.26 billion last year.

A Contrast

Loans to industrial countries last year, at $7.23 billion, were nearly double the 1972 level of $4 billion while credits for the OPEC countries almost tripled, from $933 million to $2.9 billion in 1975.

In the wake of this pell-mell expansion of credit, the banks have permitted a number of countries—notably among the developing states and in the Communist bloc—to run up debts that appear to be beyond their ability to repay.

And what, at best, were well-intended loans to help needy countries over what were thought to be temporary balance-of-payments problems have turned out to be mixed blessings—allowing some of them to adopt profligate domestic policies that have worsened their economic woes.

At the latest count, according to Morgan Guaranty Trust of New York, the total external debt of the non-OPEC developing countries totaled $150 billion at the end of last year, of which $100 billion was lent to or guaranteed by the public sector. An estimated $59.3 billion of the total was owed to commercial banks and $38.5 billion—or 65 per cent of this bank debt—is owed to banks in the United States or their foreign branches.

Fed's Report

In fact, the six largest U.S. banks account for about two-thirds of all the loans made by the nation's banks to developing countries, the Federal Reserve Board reported to Congress last March. Although the Fed did not identify them, the six largest banks are: Bank of America, Citicorp, Chase Manhattan, Manufacturers Hanover Trust, Chemical Bank and Morgan Guaranty Trust.

The Fed, seeking to assuage a concerned Congress about the exposure of the U.S. banking system in the event of a default by the borrowers, noted that loans to Mexico and Brazil—which account for about half of the big banks' lending—each represented "about 1.5 per cent of the total assets" of the six banks and that "no other developing country accounted for as much as 0.4 per cent of the total assets."

Along with South Korea, Brazil

Some Fear an Overextension In Loans to the Third World

PARIS (IHT).—The sizable involvement of commercial banks in financing the balance-of-payments deficits of the non-oil-producing less-developed countries (LDCs), already a sensitive political issue, will undoubtedly long remain one of the major stumbling blocks to establishing smooth relations between the poor developing states of the Southern Hemisphere and the rich industrialized states of the North.

The size of the debt—an estimated $70 billion will be owed to commercial banks around the world by the end of this year—is already staggering and the financial needs of these states is not expected to diminish significantly in the immediate future.

While the rhetoric about a collective default on the outstanding debt has abated, the lenders are clearly looking for ways to reduce their exposure without inflicting undue hardship. Requests for large refinancing facilities by countries such as Argentina and Peru, which are facing difficulties meeting their repayments, and the uncertainty about Zaire's ability to repay its debt have questionably had an impact on the willingness of the banks to go on extending credits to countries which might soon be in a similar position.

Rescheduling or a moratorium on debts does not, to be sure, imply an actual loss to the banks. It means that the terms of the loan are lengthened with repayments spread over a longer period or that an extended holiday is granted on paying back the principal. But the interest payments often remain the same and continue to be made. What the banks "lose" is the opportunity to redeploy the capital committed to such loans—with the redeployment at what might have been even more favorable terms for the banks. If the interest payments are rescheduled, there would be some loss to the banks.

The basic fear among bankers is that while the talk today is about rescheduling or a moratorium, what the developing countries really have in mind is either outright default or some kind of "forgiveness," with the industrialized countries picking up the bill owed the banks.

Default means the banks would

The Problems Presented by the Rising Debt of East Bloc Countries

PARIS (IHT).—Yesterday it was tanker loans that worried Eurobankers. Today it is the less developed non-oil exporting countries. And tomorrow it will no doubt be loans to the East Europeans.

At present, nobody knows for sure how much they owe Western banks. An unofficial estimate prepared for the U.S. government puts the total at the end of last year at $26.5 billion. The Bundesbank estimates it was between $30 billion and $35 billion. Morgan Guaranty puts the figure at $32.25 billion and Chase Manhattan says it totaled $38 billion.

The one point on which there is no dispute is that it is still growing.

Growing Concern

But increasingly, Western bankers and economists are questioning how much faster such lending should be permitted to continue. The political questions aside, there is growing concern that some of the East-bloc countries have already borrowed more than they can comfortably pay back.

The example most often cited by bankers and economists is Poland. Richard Portes, a professor of economics at the University of London and a specialist on socialist economies, estimates that "Poland is already using 30 per cent of its hard currency export earnings to refinance its outstanding debt"—a very high percentage. But the "real problem won't be felt until the end of the decade, when they will be in an insupportable situation."

At that time, the Poles will be faced with paying not only the interest on their loans but also with repaying the principal amount. Most loans have "grace periods" of two or three years during which time only the interest is paid. At the end of that period the principal is repaid in equal annual installments.

"The overall question," Prof. Portes says, "is whether they can generate enough hard currency export earnings from the technology they have imported to repay their debts."

"Hard currency" is any money that can be used to buy dollars to repay the loans. The Polish zloty is not a hard currency, it is not freely convertible into dollars and the dollar value the Poles attach to the zloty has no relation to what Western bankers deem it is worth.

This is true for all the East European members of the Council for Mutual Economic Assistance (Comecon), which groups the Soviet Union, Bulgaria, Czechoslovakia, East Germany, Hungary, Romania and Poland.

Almost all of them are heavily in debt to the West. The reliance on capitalist finance did not really get started until the early 1970s, when Poland launched an ambitious program of industrial reconstruction that relied heavily on purchases of capital goods from the West. The trend gathered momentum throughout the bloc and the debt began to pile up. The wheat harvest failures in the Soviet Union, forcing it to buy enormous amounts of grain in North America, added significantly to the debt totals.

Statistics compiled by the United Nations show that the East Europeans were selling more abroad than they were importing in the early 1970s, registering trade surpluses of about $1 billion in both 1970 and 1971. By 1972, imports began to exceed exports and the trade balance slipped into a modest deficit which widened to almost $1 billion in 1973. It doubled to $2 billion in 1974 and swelled to $10 billion by the end of last year.

The UN data shows the Soviet Union having the biggest short-

(Continued on Page 17.)

The Eurobond Market Rides High, but a Fall Is Foreseen

PARIS (IHT).—The Eurobond market has never had it so good.

The volume of business done so far this year is a record $10.4 billion, dwarfing the $7.1 billion worth of bonds floated in the 12 months of 1975, the previous record.

The volume of transactions on the secondary market is a staggering $47.86 billion.

Traders report that they are making profits as never before, attracting new firms to the secondary market and adding liquidity to a market that has always suffered from the lack of it.

But amid this euphoria lurks another crisis for this fledgling market.

"One of these days, billions of dollars of Eurobonds are going to be looking for a home," said Stanley Ross, managing director of Kidder, Peabody Securities in London.

Like all the professionals operating in the secondary market, Mr. Ross is convinced that the bond market's revival owes as much to legitimate investor demand as it does to banks playing the money-market game.

The money-market game is deceptively simple. Dollar-denominated bonds currently pay interest of between 8 1/2 and 9 1/4 per cent. Meanwhile, banks can borrow dollars for, say, six months at around 6 per cent. So they borrow the dollars to buy bonds and pocket the difference of 2 1/2 to 3 1/4 points as their profit for sitting on the bonds.

Good Return

That is a pretty hefty return for doing nothing, particularly in a period when loan demand worldwide is very low and banks everywhere are seeking ways to deploy their assets to earn some money.

Exactly how much of this year's record activity on the bond market is due to such artificial demand is anybody's guess. There is not a banker to be found who does not believe that this is going on. But virtually all say "Oh no, not us!" when asked how many bonds their banks have taken into their own portfolios.

Armin Mattle, head of the London-based underwriting department of Union Bank of Switzerland, says that "hopefully, it's not more than 20 to 25 per cent" of this year's volume but admits to having heard estimates of as much as 40 per cent. Even if it is only 20 per cent, he adds, "that is still substantial."

Sooner or later the banks are going to unload their bond holdings. After all, they are not in business to buy bonds but to finance the needs of their clients. And at some point in the current economic recovery, weak though it may be at present, such commercial demand will pick up. The great wave of selling probably will begin even before then—when short-term interest rates begin to move up, erasing the profitable gap that now exists between them and the rates offered on bonds.

This turnabout had originally been expected to start in the au-

(Continued from Page 7.)

struments of monetary control and are applied by central banks to domestic banking operations. The requirements are high when banking authorities want to curtail the banks' ability to make loans and low when they are seeking to encourage the expansion of credit.

Reserves

The absence of reserve requirements in the Euromarket is probably one of the sorest points among its critics. There are no such requirements because there is no authority sitting over the market to impose them. And calls for central banks in individual countries to impose such restrictions on Eurobanks operating within their jurisdiction have failed on two counts.

While conceivably the major European countries could agree to impose such restrictions uniformly it is hard to imagine that every country in the world would do so. Thus, Eurobanks would simply shift their operation to those areas free of such controls.

On a more technical level, it is hard to imagine how such requirements would be determined. Should the reserve requirements on Eurobanks be the same as banks in the country of issue of the currency or in the country of origin of the funds?

To be sure, individual banks do set aside reserves as a precautionary measure, but the amount is at the discretion of each Eurobank. This flexibility goes to the heart of the major controversy surrounding the market: Can it, does it, might it generate excessive credit expansion and add to inflationary pressures?

In national economies, economists can identify with some precision what the "multiplier" effect is—that is, how much credit can be generated by the deposit of one dollar, or deutsche mark or franc with a domestic bank. But in the absence of official reserve requirements, it is anybody's guess what the multiplier effect is in the Euromarket. Economists are still writing erudite papers on the subject, which other economists promptly shoot down as being incomplete or faulty.

"Some commentators believe that the Eurocurrency multiplier is quite large," C.W. McMahon, executive director of the Bank of England, wrote in the bank's Quarterly Bulletin in March. "Others, with whom I associate myself, are impressed by the scope for leakages from the Euromarkets into domestic banking systems. Such leakages occur, for example, when a final borrower from the Euromarket, or the eventual recipient of the funds, makes payments directly to the country of issue of the currency in question.

"Or the borrower, or eventual recipient of, say, a Eurocurrency credit, may convert the funds for use in a local currency and it would then require a deliberate decision on the part of whoever had acquired the dollars to return them to the Euromarkets (typically as time deposits) rather than to hold them, or use them, in the United States. To the extent that one can properly regard such decisions as part of a process of endogenous credit creation at all, they would certainly suggest that the leakages are likely to be larger than would typically apply within a domestic banking system, and hence would imply a pretty small Eurocredit multiplier."

Credit

In addition, academic opinion today holds that credit raised in the Euromarket tends to be a substitute for domestic credit rather than a net addition to total credit. Thus, it is argued, the market is not the wild money machine spawning credit and fueling inflation that many of its critics charge.

"Inflation," says Milton Gilbert, the retired head economist of the Bank for International Settlements (BIS), the central bankers' central bank and unofficial watchdog of the Euromarkets, "has not come about by excessive bank lending. The source of inflation is not monetary" but rather the mismanagement of national economic policies.

"What is inflationary," says Prof. Alexander Swoboda of the Graduate Institute of International Studies in Geneva, "is really domestic credit creation which —via the Euromarket—will tend to spread more rapidly into the rest of the world"

But the fine tuning of domestic policies has admittedly been rendered more difficult by the ability to circumvent tight credit policies at home by borrowing in the Euromarket. In 1966 and again in 1969, U.S. domestic banks were the largest borrowers of Eurodollars as they sought to escape the credit squeeze being applied at home by the Federal Reserve. The same has been true for banks in other countries. To prevent the same thing happening in West Germany, authorities there resorted to the Bardepot in the 1970s to limit Euromarket financing by the country's residents.

But academics argue that such alternate financing would have been found even if the Euromarket did not exist. They do acknowledge that the market's presence facilitated the search for offshore funds. But, they add, the resolution to this problem is for the domestic authorities to take steps, along the lines of the Bardepot, to isolate themselves from the Euromarket if that is what is needed.

No doubt one of the main reasons why many people, including some monetary officials, view the market as a force needing to be controlled is its role in financing the waves of speculation that have periodically swamped foreign-exchange markets since the late 1960s.

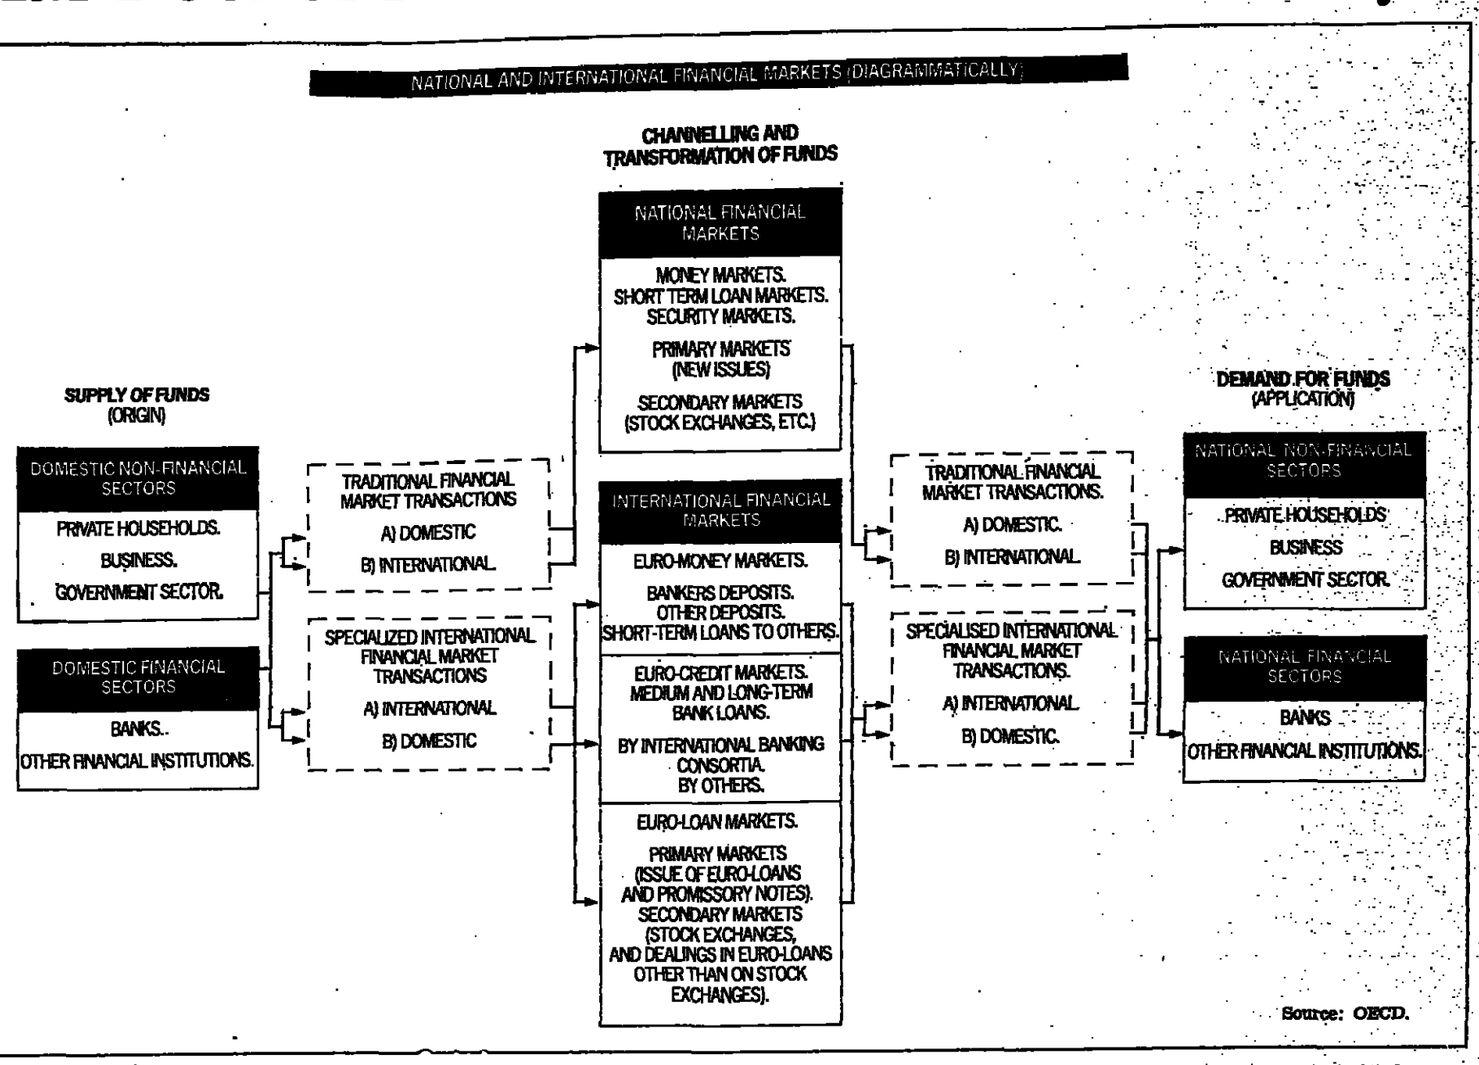
To this criticism, economists argue again that the speculation would have occurred in any event and that at worst the Euromarket was guilty of speeding up the process. It seems to be agreed that the mobility of capital has increased due to the fact that the Euromarket exists. The transmission of funds—primarily dollars—is quicker and cheaper than if the business had to be done via New York.

This increased mobility of capital has unquestionably been a catalyst in transforming the international monetary system from a fixed-rate to a floating-rate orientation.

Essentially, these capital flows were triggered by the attempt of central banks to maintain currencies at either undervalued or overvalued levels. The stability of the exchange rate became a matter of national honor and what was supposed to have been a system of fixed but adjustable rates became, instead, rigid. To succeed in this stabilization, governments would have had to agree to coordinate economic and monetary policies in order to maintain a constant equilibrium of one currency against another. But that was not the case.

Disturbances

The central bank attempts to offset what now appear to have been obviously irreversible disturbances added fuel to the fire and as the fixed-rate system moved relentlessly toward eventual breakdown the speculation and floating it gathered momentum. In many cases, the speculation was motivated by a desire to be protected against such a breakdown.



In effect, operators in the Euromarket viewed the world as a unit. Trade surpluses or deficits, balance-of-payments positions, levels of inflation, interest rates and the expansion of domestic money supply of one country were weighed against the performance in other countries. National officials, on the other hand, established policies that failed to take into account the high degree of economic interdependence that had evolved and that had changed the rules of the game.

"Bits and pieces of world economic integration are running ahead of a broad range of political and public opinion as well as the scope of public policy," says Peter Oppenheimer, a Fellow of Christ Church, Oxford.

"And it's not only a problem for the Euromarket," he continues. Another example, he says, is the way multinational companies, mainly U.S. firms, have spread

EUROMARKET SPECIAL REPORT

A New Emphasis in Calls to Impose Control on Euromarkets

Given the dramatic changes in the international monetary system—the shift to floating exchange rates, the petrodollar recycling and the attendant heavy borrowing by almost all other countries to finance their balance-of-payments deficits—the accent on calls to control the Euromarket has shifted.

PARIS (IHT).—For investors, the Euromarket is a source of interest income free of taxes and, for very short-term investments, often the only way such interest can be earned.

For borrowers, the market has been a no-questions-asked source of funds frequently used to circumvent the tight credit policies which made it impossible to borrow money in their home markets.

And for central bankers, who regulate banking within their borders and who control the creation of money through the credit levers at their disposal, the Euromarket has been a vexing, frustrating Frankenstein capable of creating unlimited amounts of money outside the control of any authority.

But try as they may, the gray-beards themselves were unable to agree on how to regulate the market. Italian and French urgings for controls were deflected by Britain and Luxembourg who argued that the banks would "book" their Euromarket dealings from banks located in areas where restrictions were not imposed.

The best the central bankers could come up with was an agreement among themselves to try to limit the growth of the market by not depositing their own dollar reserves in the Euromarket.

In the past, with the dollar under severe attack, European central banks were forced to issue vast amounts of their own currencies to buy dollars being sold and thus maintain the then fixed exchange rates.

Interest-Bearing

The dollars the central banks bought were not stuffed into vaults and left to sit idle, but were put out to earn interest. Sometimes the dollars were used to buy short-term U.S. government securities, such as short-dated Treasury bills. And other times, because the interest to be earned was greater, the dollars were deposited in the Eurodollar market.

In mid-1971, the central banks suddenly realized that these Eurodollar deposits were feeding the supply of funds used to mount the speculative attacks on the foreign exchange markets. Accordingly, they decided "for the time being not to place additional official funds in the market and even to withdraw funds when such action is prudent in the light of market conditions," an official communiqué on June 14 of that year declared.

The restriction applied only to dollars, by far the biggest segment of the Euromarket.

Without any fanfare, this agreement was terminated late in the summer of 1974 as the Euromarket was writhing through its worst crisis to date.

In June of that year, Bankhaus Herstatt of West Germany collapsed after having run up losses of some 500 million deutsche marks speculating in the foreign exchange market. The bank's crash had nothing to do with the Euromarket. But the impact there was immediate.

The bank had borrowed short-term funds from a number of other banks, so-called inter-bank loans. Inter-bank transactions account for almost half of the gross size of the Euromarket. Until Herstatt's failure almost any bank could tap this market, borrowing at the same terms as the biggest banks in the world.

Caution

But after its collapse, great caution swept the market. Banks began cutting credit lines they were willing to extend to others and as rumors swept the market that this or that bank was in difficulty some banks found it almost impossible to borrow funds.

As the borrowed funds were almost invariably U.S. dollars, the real damage was to the smaller European banks. They have no "natural" source of dollar inflow as U.S. banks do and are totally dependent on the inter-bank market to refinance their own dollar-denominated engagements.

The usual practice in a $100-million, five-year syndicated Eurologn, for example, is for the banks to finance their portion of this loan by borrowing dollars for six months and "roll over" the loan every six months for the next five years. Suddenly, access to these roll-overs, which until then had always been taken for granted, was restricted. The 30 to 40 biggest European banks were unscathed, but the hundreds of smaller banks found that if they could borrow funds at all the cost of funds was considerably more than what the biggest banks had to pay.

As it was, the cost of money was already at fantastic levels. The United States was in the midst of a tight credit policy that had pushed the cost of overnight money there to almost 13 per cent in July and the quoted cost of three and six-month Eurodollars was almost 14 per cent.

Scuttling

Amidst this liquidity squeeze and crisis of confidence among Eurobanks, the European central banks are reliably reported to have scuttled their agreement not to place their dollar reserves in the Euromarket.

In September, after a regularly scheduled meeting at the Bank for International Settlements in Basel, the central bankers reported that "they recognized that it would not be practical to lay down in advance detailed rules and procedures for the provision of temporary liquidity (to the the Euromarket). But they were satisfied that means are available for that purpose and will be used if and when necessary."

Today, some of the European central banks—led by the Bundesbank—voluntarily refrain from depositing their dollars in the Euromarket. But others, including the BIS itself, do use the Eurodollar market.

The main factor in this changed attitude is the realization that the amounts of dollars these central banks have to recycle through the market are minuscule relative to the inflow from other central banks, particularly the newly-rich oil-exporting states—an estimated one-tenth out of a total $60 billion.

Given the dramatic changes in the international monetary system—the shift to floating exchange rates, the petrodollar recycling and the attendant heavy borrowing by almost all other countries to finance their balance-of-payments deficits — the accent on calls to control the Euromarket has shifted.

The emphasis, instead of being on ways to check the market's growth and alleged inflationary impact, is now on means to safeguard the market's stability and its fundamental health.

The prime tool is the Committee on Banking Regulations and Supervisory Practices established at the end of 1974 by the governors of the major central banks: Belgium - Luxembourg, Britain, France, Italy, the Netherlands, Sweden, Switzerland, West Germany, the United States, Canada and Japan.

Main Function

The basic function of the committee is to attempt to bridge the gap between the close supervision that exists in domestic banking operations and the less regulated international exposure of banks which falls outside the range of most supervisory systems.

In explaining how the committee works, chairman George Blunden, an executive director of the Bank of England, told a recent conference that it was instructed "not to make far-fetched attempts to harmonize the 12 countries' individual system of supervision" but rather "to learn from each other and to apply the knowledge to improving their own systems of supervision."

The committee, he said, does not concern itself with individual banks or try to reach agreement on classification of the degree of risk involved in lending to individual countries or companies.

The emphasis, he added, is on "mutual education" to enable members to learn about the supervisory techniques used in other countries and about new developments in them.

'Attitudes'

"We have compared notes on techniques of support and rescue operations," he said, "and we are currently studying the various attitudes adopted among member countries to the role of loan capital in a bank's balance sheet, to requirements for endowment capital of foreign branches, to arrangements for bank audits and to control over potential clashes of interest arising from involvement of banks or bank directors and managers in non-banking activities.

"It is too soon to say whether these studies will all be merely of a mutual educational nature or whether some of them may lead to recommendations to the governors for the adoption of agreed principles."

In addition, he noted, the committee, in fostering the establishment of confidential relationships among national supervisory authorities, permits the "passing of sensitive information" from official to official.

One of the major goals of the group has been to establish guidelines for cooperation between national authorities in the supervision of banks' foreign establishments. The acceptance that supervisory agencies are responsible for banks within their territory does "not preclude there being gaps in the supervision of such establishments," he noted.

"Owing to differences in definition, a particular foreign establishment may be classified as a bank by its parent but not by its host supervisory authority," he stated. In addition, it is important that the supervision meet the standards of parent authorities as well as host supervisors. Differences can arise, he explained, "because host authorities are interested in the foreign banks operating in their territories as individual institutions and from the point of view of what happens in their own markets, while parent authorities are interested in them as parts of larger institutions."

So far, the committee has drawn up general guidelines regarding liquidity, solvency and foreign exchange operations.

"Responsibility for supervising liquidity must rest with the host supervisory authority." But, he noted, "not all host authorities accept the same degree of responsibility for supervising liquidity in foreign currencies as they do for supervising liquidity in the local currency. As a result, parent authorities may again feel the need to concern themselves with this aspect of their banks' foreign branches.

"Parent supervisory authorities may also be concerned about the liquidity of foreign subsidiaries or joint ventures" which may have standby facilities from their parent banks.

Noting that the legal position of foreign subsidiaries and joint ventures is different from that of foreign branches, he said that supervisory authorities "cannot be indifferent to the moral responsibilities of the parent (banking) institutions for seeing that they do not default on their commitments.

"It is now generally accepted that it is expedient that their banks should protect their reputations in this way," he stated.

Solvency

On the question of solvency, he said that the primary responsibility rests with the host supervisors in the case of foreign subsidiaries and joint ventures.

On the other hand, "the solvency of foreign branches is indistinguishable from, and integral to, that of the parent bank" and "is therefore essentially a matter for parent supervisory authorities."

Turning to the foreign exchange operations of banks, he noted that supervision has three aims—partly prudential, partly for balance-of-payments reasons and partly to assist the maintenance of orderly market conditions.

"Prudential supervision is a matter for both host and parent authorities since foreign exchange operations bear on both liquidity and solvency" while balance-of-payments and market conditions "are clearly the concerns of host supervisory authorities."

To assure more effective supervision, the committee is recommending that banking authorities have the power to exchange reports. Such transfers, Mr. Blanden remarked, are at present "often impossible because of banking secrecy laws." The committee would also like to see direct inspections by parent supervisory authorities of their domestic banks' foreign operations. While this is widely practiced, not all countries allow it.

The committee, which meets three to four times a year, has also established contact with supervisory authorities in some 60 other countries which also participate in international banking.

Offshore

As matters stand, banks based in Britain operating in the Euromarket enjoy a high degree of freedom as far as their "offshore" operations—that is, foreign currency operations with foreign borrowers and lenders are concerned. The same degree of freedom applies to domestic interbank operations in foreign currencies, which greatly facilitates "offshore" operations by the banking system taken as a whole.

The banks are entirely free to take foreign-currency deposits or to raise foreign-currency credits from non-resident banks and non-banks for the purpose of re-employing these funds in foreign-currency banking transactions abroad or in the domestic foreign-currency interbank market.

There are no obstacles, either in the form of minimum reserve requirements or special deposit requirements on foreign-currency assets or liabilities, though the maturity structure of the Euro-operations of individual banks is supervised.

However, links between the domestic economy and the Euromarket are closely controlled to prevent the outflow of capital via the Euromarket and to regulate the inflow of capital.

In addition, links to the Euro-sterling market are severely controlled, with neither banks nor non-banks allowed to supply funds to that market.

France, which accounts for about 15 per cent of the European share of the Euromarket's activity, is the second most important center after Britain (about 50 per cent)—enhanced by the fact that there is a relatively important domestic inter-bank market in foreign currencies. While banks engaged in Euromarket operations in France also enjoy a high degree of freedom regarding their "offshore" operations, links with the domestic economy are closely controlled.

France imposes no reserve requirements, interest-rate controls or withholding taxes on Euromarket operations and imposes no maturity constraints on foreign-currency assets held abroad.

However, there are tight controls on operations that could result in capital outflows from the domestic economy. In addition, neither banks nor non-banks are allowed to supply funds to the Euro-franc market.

Switzerland, which is the third most important center—about 10 per cent of the activity, including trust accounts—has over the years become more restrictive as the authorities attempted to shield the domestic economy from excessive capital inflows which have pushed the value of the franc through the roof.

Swiss Tax

The thrust of the defensive actions fell on operations involving the Swiss franc. But the banks' foreign-currency business was also affected, which no doubt explains why Switzerland's growth as a Euromarket center has not kept pace with the expansion of the overall market.

This, however, does not mean that Swiss banks have reduced their activity in the market since they can participate via their foreign branches, subsidiaries and joint ventures based in other Euromarket centers.

The "offshore" banking—foreign currency borrowing for lending abroad—has been adversely affected in Switzerland by a 35 per cent withholding tax which non-residents, as well as residents, have to pay on interest received from holdings of bank deposits, whether in domestic or foreign currency. However, banks are exempt from this tax if the deposits do not exceed one year. Thus, to the extent that the banks' lending is refinanced in the international market for short-term interbank funds, the banks' foreign-currency lending business with non-residents is not impeded.

Although the Swiss have minimum reserve requirements on nonresident deposits, these are operated in such a way by the central bank that offshore banking operations in foreign currencies are virtually unaffected.

All of this said, foreign-currency deposit and lending remains a very important part of total Swiss banking business, witnessed by the fact that the foreign-currency assets and liabilities of the big Swiss banks account for almost 40 per cent of their balance-sheet totals.

Data

Belgium-Luxembourg, listed in the statistics compiled by the Bank for International Settlements as one unit, are in fact two separate centers. The combined BIS data shows that they account for some 15 per cent of total external foreign currency liabilities of the nine major European countries.

The Euromarket operations of Belgian residents with their own banks is subject to a 20-per-cent withholding tax and as a result most of their business is done through Luxembourg or other centers. However, non-residents have no such problems operating directly through Belgian banks.

Belgian banking regulations also encourage banks there to concentrate their activities in the inter-bank market, lending to other banks, rather than participating in syndicated loans.

Granting Eurodollar roll-over loans to non-banks falls under an equity ratio of 5-to-1, which means a Belgian bank with a capital of $1 billion would theoretically be limited to making total loan commitments not exceeding $20 billion. However, bank-to-bank loans involve a ratio of only 1-to-1, which in theory means the bank could grant credits of up to $100 billion.

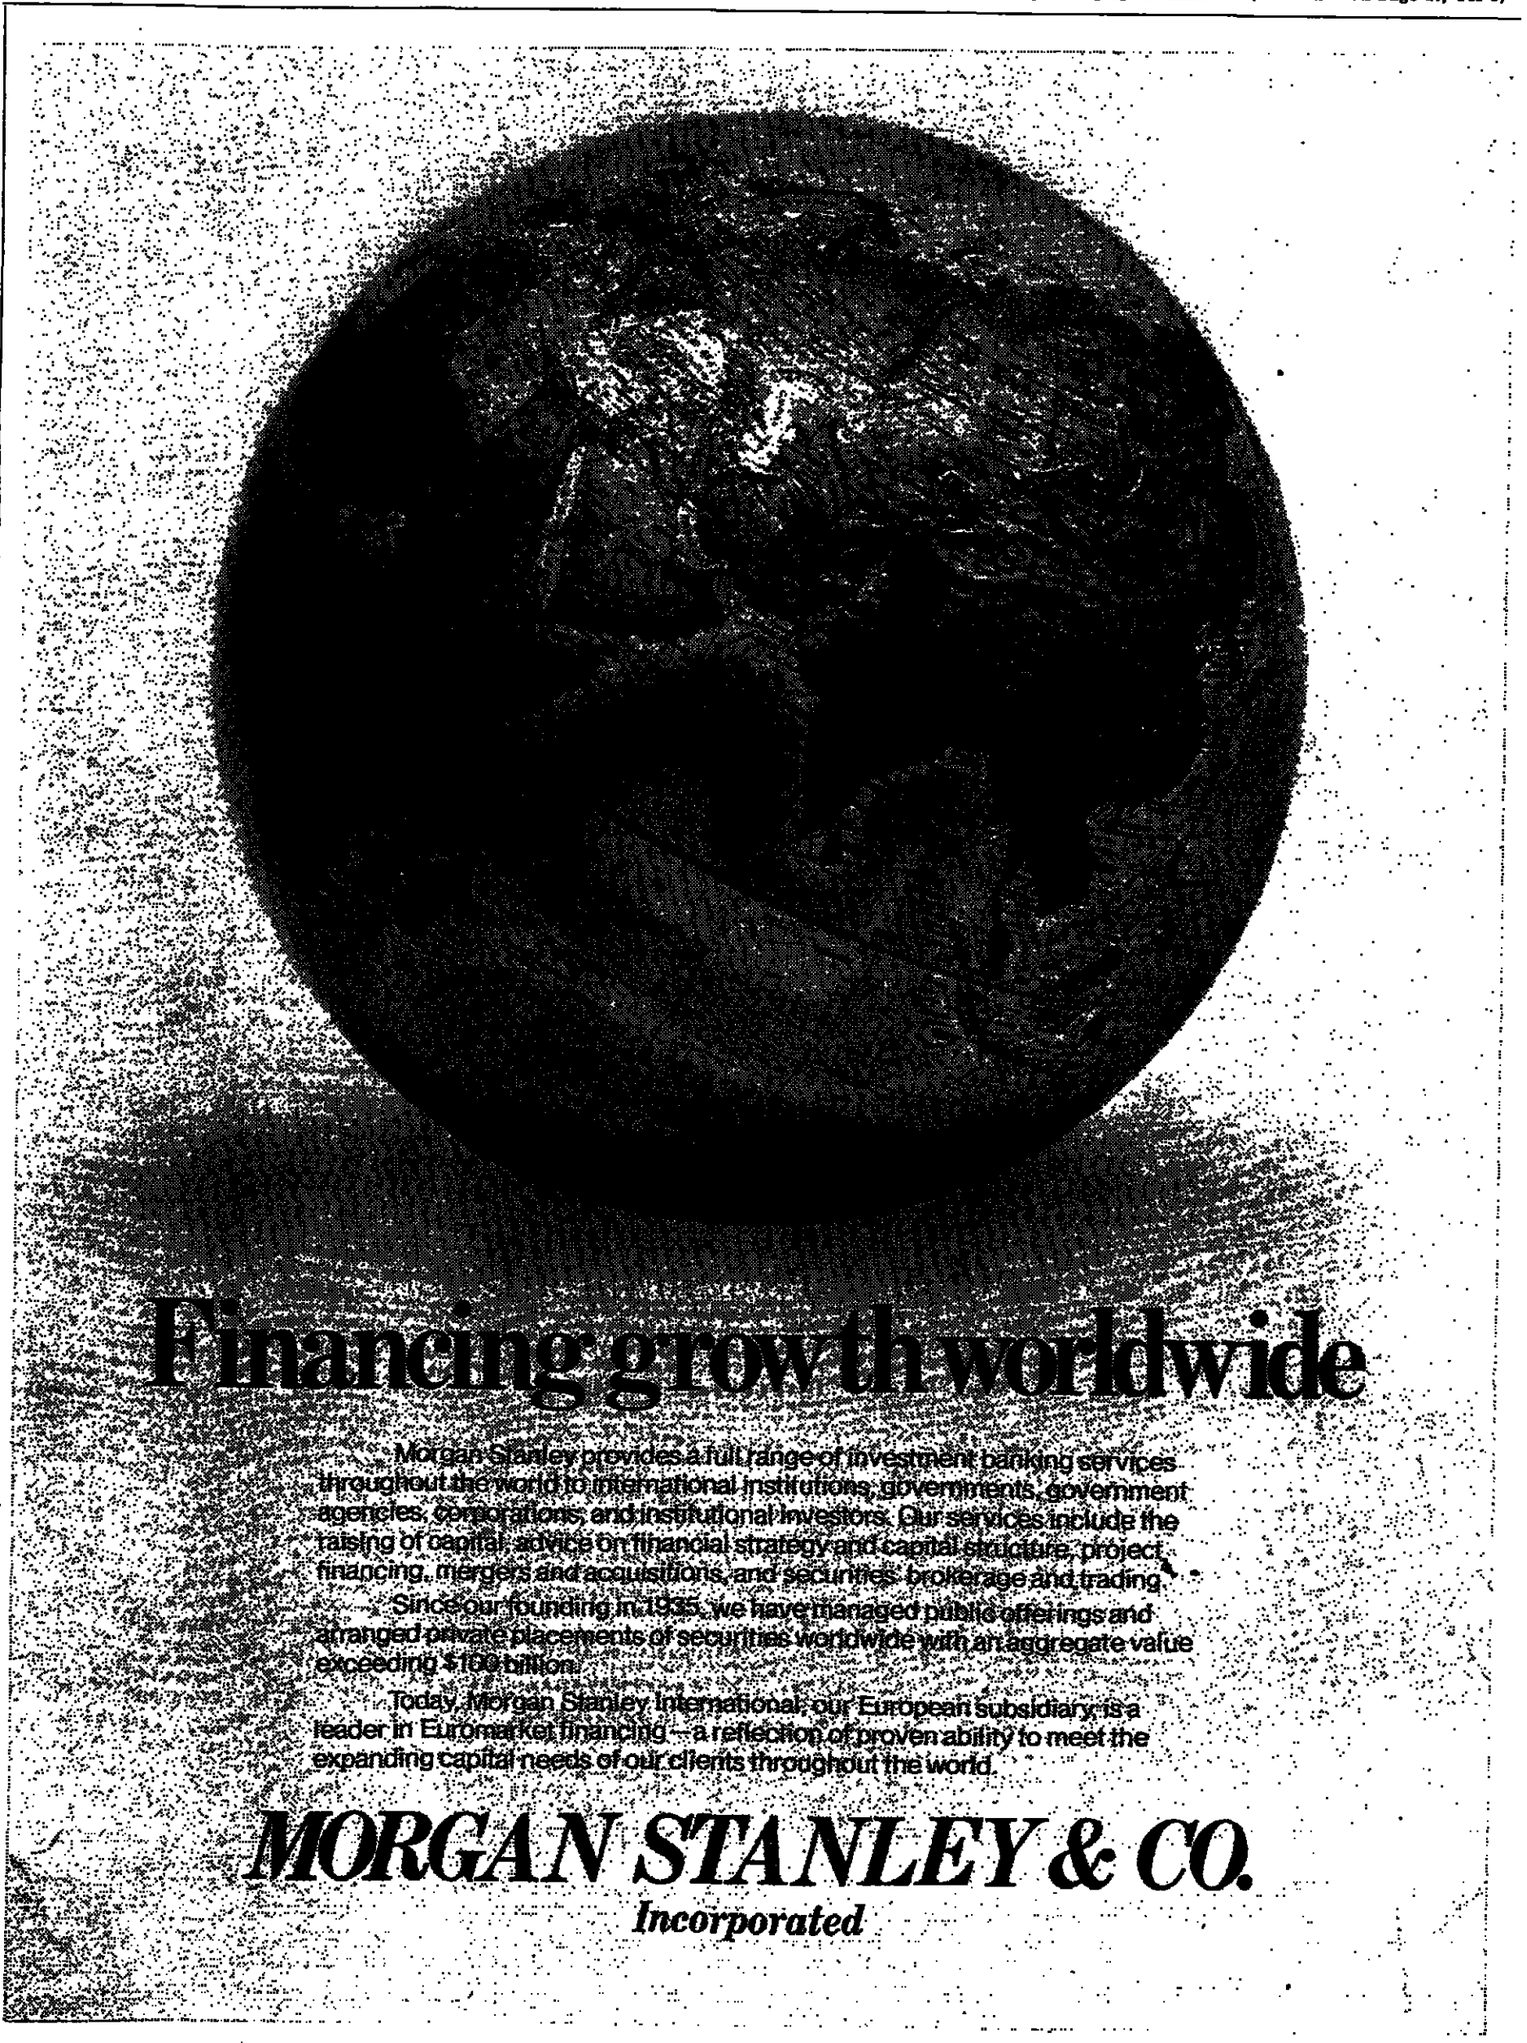
Tax Free

Operations in Luxembourg are entirely free of tax or other obstacles and banks there enjoy what analysts label "an enormous degree of freedom."

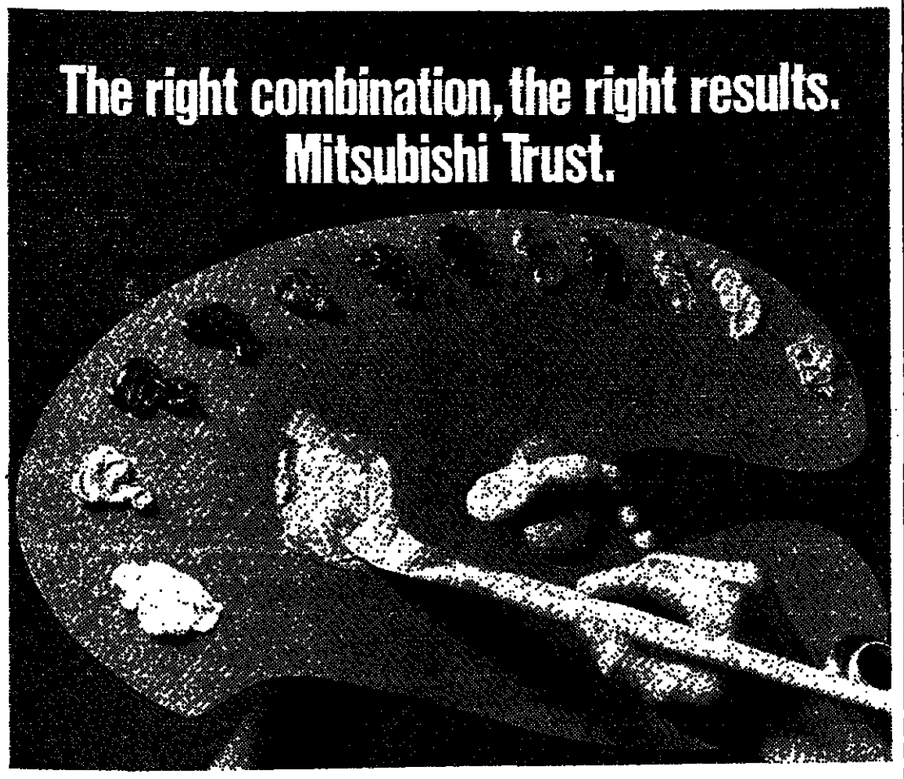
The Netherlands ranks as the sixth largest European center in the Euromarket. Foreign transactions form a very important part of the activities of commercial banks there, with external assets—mainly foreign currencies—accounting for almost 44 per cent of balance sheet totals at the end of last year.

There are no obstacles in the form of foreign exchange controls, minimum reserve requirements, tax regulations or otherwise. The guilder plays a minor role in the Eurocurrency pool—about the same size as the Euro-French franc and Euro-sterling—accounting for about $3.6 billion at the end of last year. Each of these currencies accounts for about 2 per cent of the total Euromarket pool of funds.

The domestic economy is to a large extent shielded from unwanted capital inflows, whether originating in the Euromarket or in foreign national financial markets. The net external position of the banks in foreign and domestic currency taken together is controlled via a ceiling on net liabilities which, according to a gentlemen's agreement, must not exceed 5 million guilders (about $2 million) per individual bank.



Loans exceeding 100 million guilders to any one foreign borrower in one calendar year require government permission and loans raised abroad are permitted only if the proceeds are not used for the financing of domestic operations.



Although the Eurodeutsche mark is the second most important currency after the Eurodollar—accounting for almost 16 per cent of the Euromarket—West Germany itself ranks as one of the smallest market centers.

No Ban

This is mainly due to a long history of defense measures taken to ward off undesirable capital inflows. It also reflects the general opinion of officials that German banks should not contribute

EUROMARKET SPECIAL REPORT

Multibillion-Dollar Pool Outside Control

(Continued from Page 8.)

throughout the world, viewing it as a single production base while national authorities try to grapple with individual units.

In theory, floating exchange rates are supposed to overcome the inherent conflict between interdependent world and independent national economic policies. As the dollars generated by an expanding U.S. economy and easy money policy spill abroad into other currencies, for example, there need not be any increase in the reserves or the money supply of the receiving country—as under the fixed-rate system—since the value of the dollar ought to depreciate while the value of the desired currency appreciates. This shift in values will ultimately make it too expensive to sell dollars and the pressure will abate as a new equilibrium is found.

In fact, however, official intervention in the foreign-exchange markets picked up this year and was "perhaps the largest since the generalization of floating in early 1973," the Organization for Economic Cooperation and Development observed in its midyear Economic Outlook. While the amounts involved have not reached the proportions of the pre-floating era—when in one week as much as $6 billion flowed into West Germany for conversion into deutsche marks—it is apparent that as the inflation-feeding effect of a downward float becomes apparent, governments are becoming more defensive.

The recycling of the oil exporters' surplus—virtually all in dollars, a large part of which is deposited with Eurobanks—has allowed states from southern Africa to northern Europe and from Southeast Asia to Latin America to run balance-of-payments deficits financed by Eurocurrency borrowings.

These deficits represent the amount by which a country is spending more abroad than it earns. The borrowings, in effect, permit these countries to live beyond their present means—traditionally a cardinal economic sin.

The BIS, in its annual report in June, described the problem this way:

"Forceful action to combat inflation may be expected to have not only direct effects on domestic prices and wages but also an indirect effect via the exchange rate. The policy actions themselves, together with the expectations they engender, tend to strengthen the rate by more than is warranted on immediate purchasing-power-parity grounds. In this way, by lowering import costs and holding down export profits, exchange appreciation reinforces the direct effects of anti-inflationary policies and helps to make them self-fulfilling. Whenever, on the other hand, domestic inflation leads to exchange depreciation, this will tend to feed inflation—and such a 'vicious circle' can then be broken only through drastic policy action."

The irony of this is that neither extreme is useful. Switzerland, for example, whose inflation rate has been cut to almost nothing thanks to the massive appreciation of its franc, is screaming that its export industry is being ruined while Britain is trying desperately to brake sterling's erosion as one way to reduce the level of inflation fed by rising import prices.

Intervention

One of the main obstacles in overcoming this vicious cycle is the attitude of the United States strongly favoring floating rates. To begin with, foreign trade represents only a small portion of America's gross national product—something less than 15 per cent—whereas in Europe the figure ranges up to 60 per cent.

A change in the value of the Swiss franc, for example, affects only a minute portion of U.S. trade. For the Swiss, however, an appreciation of the franc against the dollar affects a large portion of their trade, since the currency of many countries moves in tandem to the dollar.

As a result of these factors, intervention by European monetary authorities has been on the rise as government officials try to juggle exchange rates against inflation rates. But the presence of the Euromarket makes it difficult to do both, for attempting to fix exchange rates in the absence of a coordinated economic policy with other countries invites the same kind of speculation that was manifest in the years before floating rates were established.

But unlike those years, there is little public clamor nowadays for the need to muzzle this aspect of the Euromarket. Perhaps this reflects the growing awareness that the speculation would occur in any event. But the more likely answer is that the market is currently engaged in financing the balance-of-payments deficits of many oil-importing states, industrialized countries as well as the developing states, and no official wants to upset this process.

The recycling of the oil exporters' surpluses—virtually all in dollars, a large part of which is deposited with Eurobanks—has allowed states from southern Africa to northern Europe and from Southeast Asia to Latin America to run balance-of-payments deficits financed by Eurocurrency borrowings.

Depression

These deficits represent the amount by which a country is spending more abroad than it earns. The borrowings, in effect, permit these countries to live beyond their present means—traditionally a cardinal economic sin. But without recourse to such loans, the importing states would have been forced to institute drastic domestic deflationary measures in an attempt to bring their international accounts into balance. And if all the oil-importing states embarked on such programs at the same time, it surely would have triggered a worldwide depression.

Recycling, then, has given the oil importers the breathing space to spread over years their adjustment to the price increases.

Of course, the task need not have been left to private markets to handle. Official transfers from the oil states themselves or to the big recipients of these "petrodollars"—such as the United States, Switzerland and West Germany—could theoretically have also done the job. But it would never have been done quickly enough to avert severe dislocation, many experts believe.

In any event, the major industrialized states agreed that this need not and should not be an immediate adjustment to the deficits. And they agreed further that the private markets should handle as much of the recycling as they were willing to, since the vast majority of the early surpluses went into short-term bank deposits.

Flexibility

In the view of Mr. McMahon, Number the Bank of England, "It is very difficult to imagine how the system could have stood up to the stresses and strains of the last few years without the underpinning of robustness and flexibility that the Euromarkets have provided."

Amid such cheers, however, is a growing awareness that commercial banks cannot and should not do the entire job themselves. The massive accumulation of debt is now an active worry to bankers who extended the loans and to borrowers who now must come to grips with how to repay them.

The banks, of course, have not been the only source of finance. The so-called "oil facility" at the International Monetary Fund lent some $7.8 billion to needy states, and the oil-exporting states themselves have granted billions in loans. But the IMF facility has now ended and the scale of oil-exporter loans is likely to be more restricted as a result of the recent downturn in world demand for oil as well as the massive spending programs of the exporters to develop and diversify their own economies.

The "breathing space" provided by the official and private recycling thus appears to be drawing to a close. And the next phase—of coming to terms with the fundamental adjustments that need to be made in each country—is likely to be a much more difficult period for the banks as well as the borrowers.

The financial strength of Merrill Lynch

How it can help you meet your financial needs worldwide

As of June 25, 1976, Merrill Lynch had *equity* capital of over $½ billion. That's more than twice the capital of the next largest U.S. securities firm. But Merrill Lynch is a lot more than a securities firm.

We're also bankers to the world's bankers - and to many of the world's largest corporations. In 1975, we managed over $26 billion of public and private financing worldwide.

In the United States, we're investment bankers to six of the nation's 10 largest banks - including the three largest.

Last year, we managed the largest international underwriting in history for a Japanese firm - a $100,000,000 issue. We were a leader in raising capital in the U.S. for all kinds of international issuers.

In Europe, we recently managed a Eurobond issue that raised $50,000,000 for Britain's largest bank and we were a leader in Eurobond financing for U.S. and international issuers.

Well managed assets

We have the capability to manage financing of this magnitude in part because we have well-managed and extensive resources.

For example, Merrill Lynch has no long-term debt. And our working capital is invested to facilitate normal business - not to speculate for our own account.

Along with this financial stability, we offer unmatched international placing power.

Our network of branches, subsidiaries and affiliates gives us access to literally thousands of institutions and to millions of investors.

We also offer impressive trading capabilities in stocks, corporate bonds and government issues. And we offer the assistance of a $6 million a year securities research operation.

Contact Merrill Lynch

There's still more to the story of Merrill Lynch's financial strength and international trading capabilities. In merchant banking. In financing. In commodities. In research.

For details, contact the principal of your nearest Merrill Lynch office.

Merrill Lynch International & Co., Merrill Lynch Pierce Fenner & Smith Inc., Merrill Lynch Government Securities Inc., and Merrill Lynch International Bank Ltd., are members of the Merrill Lynch & Co., Inc. group of companies.
Branches and subsidiaries and affiliates in: Abu Dhabi, Amsterdam, Athens, Bahrain, Barcelona, Brussels, Buenos Aires, Caracas, Caracas, Dubai, Dusseldorf, Frankfurt, Geneva, Hamburg, Hong Kong, Kuwait, London, Lugano, Madrid, Manila, Milan, Montevideo, Panama City, Paris, Rome, Rotterdam, Sao Paulo, Seoul, Singapore, Sydney, Taipei, Tokyo, Vienna, Zurich. Joint venture in Tehran - Iran Financial Services Co.

LDCs' Access to the Bond Market

PARIS (IHT).—The non-oil-exporting developing countries have been big borrowers in the international market, averaging over $6 billion a year in Eurocurrency credits and accounting for some 27 per cent of all loans announced between 1973-75.

But their access to the public bond market has been almost nil.

Bond issues during the same period totaled an average of $450 million, or about 3 per cent of the total volume. In addition, three countries have accounted for the bulk of this borrowing—Israel, Mexico and Brazil.

Specialists at international aid agencies as well as officials in the less-developed countries would like to see more bonds sold to the public. Bonds are a more stable source of funds and usually can be arranged for longer periods than syndicated bank loans.

Least Risky

The difficulty, of course, is getting investors—either professional institutions like insurance companies and pension and bond funds as well as individuals—to accept such securities. Bonds, by their very nature, are the least risky securities that investors can buy and a high premium is put on "creditworthiness."

A special committee of the World Bank is currently studying what can be done to open the public bond market to developing states, particularly the so-called "threshold countries" which are deemed the most creditworthy of this group of states and which are the closest to standing on their own feet in the public markets.

Among the possibilities under consideration are World Bank guarantees for such loans. The bank itself enjoys one of the highest credit ratings on world bond markets and its imprimatur, it is assumed, would entice investors to buy bonds that it guarantees. The bank, however, is reluctant to have to set aside assets to back up such guarantees until its own capital base has been increased.

Also under study is the use of multilateral guarantees, from groups of industrialized countries, or guarantees from other institutions such as the International Monetary Fund.

The World Bank's committee which reported on its discussions at the IMF-World Bank annual meeting in Manila early in October, is scheduled to meet again in January.

A Bar

In the meantime, it was also to report that countries with highly developed capital markets—such as the United States, Switzerland, West Germany and Japan—agreed to "afford favorable treatment to developing countries with regard to permissions to make an issue" and that those countries which set limits on the amount of foreign issues "would endeavor to keep developing-country borrowers outside these limits."

The report also noted that "since the Eurobond market presents potential opportunities for developing countries to raise finance, countries whose currencies are in strong demand and which maintain restrictions on international issues denominated in their currencies would endeavor to give favorable treatment, as among foreign borrowers, to developing countries."

A New Emphasis on Imposing Control

(Continued from Page 9.)

in an uncontrolled manner to the expansion of the Euromarket since it is felt this would add to its inflationary potential which could inhibit the Bundesbank's monetary policy.

Late last year, the Bundesbank dropped its ban on interest payments on non-resident deposits both in domestic and foreign currencies—a ban which had forced German banks to conduct almost all of their Euromarket business through subsidiaries and branches based in Luxembourg. Since the removal in September 1975, non-residents' deposits in domestic and foreign currency, especially from foreign non-banks, have shown a clear tendency to rise.

However, non-resident deposits and borrowings in general continue to be affected by minimum reserve requirements and this impairs the "offshore" banking role of West German banks.

By contrast, there are no obstacles for German banks and non-banks to act as suppliers of funds to the Euromark sector of the market. Interest rate and liquidity differentials are the main determining factors of capital flows.

In fact, it is frequently cheaper for Germans to borrow Euromarks than to seek domestic funds because of the cost effect of minimum reserve requirements on DM liabilities of banks operating in Germany. But the minimum reserve requirements for Euromarks in Germany induce those doing business in this market to pass their orders through centers outside Germany, where no such requirements are imposed. Analysts believe that this has contributed to the strong expansion of the Euromark sector of the market.

EUROMARKET SPECIAL REPORT

The 'Offshore' Banking Centers: Myth and Reality

The Asian dollar market (or Asian currency market, as it is termed locally) is in fact an extension of the Euromarket. Only the subtleties of geography distinguish an Asian dollar from a Eurodollar . . .

PARIS (IHT). — "Offshore" banking centers come in varying sizes and reputations, are found throughout the world, and are equal parts myth and reality. Similarly, they go by a number of somewhat misflattering names, including tax gimmick, tax plate, mailbox and bookkeeping fiction. These centers usually operate in a kind of legal flight zone, where normal controls and regulations, if they exist at all, are seldom rigorously enforced.

An "offshore" activity is basically one that, through formal agreement, lies outside the jurisdiction of the particular political entity where it takes place. Thus offshore banking generally refers to operations in foreign currencies by foreign banks, usually though not always) with nonresidents. As a single global phenomenon, offshore banking institutes a series of often highly sophisticated symbiotic relationships between host countries and international banks that go far beyond, for example, the normal interaction between borrower and lender. They are also relationships where mutual advantages rely to a very great degree on secrecy, thus making it a world difficult to penetrate and to portray with any statistical precision.

The Number

Depending on who is doing the counting, there are anywhere from twelve to twenty such centers, ranging from the tiny French tax haven of Port Vila in the New Hebrides to the $10-billion Asian currency market in Singapore, with its 66 banks licensed to do foreign currency operations. The most important, however, are concentrated in the Caribbean, Panama and the Far East (chiefly Singapore and Hong Kong). A third important center has emerged since the fall of 1975 in Bahrain, which to date has granted 27 offshore banking licenses and where already operating offshore units a year ago reported nearly $1.5 billion in assets.

Offshore banking centers fall into two basic categories. By far the most numerous are those that exist primarily as a technical device for overcoming inconveniences caused by time differences and taxes. This can be a simple foreign exchange operation in Bahrain, for example, which lies in a time zone between those of Europe and the Far East. But the key function of these centers is to provide an address for registering business generated elsewhere. Given the liberal banking regulations in these areas, which normally include little or no income tax on interest earned by commercial banks on offshore loans and exemptions from withholding taxes on foreign currency deposits, the advantages of such "booking addresses" are not inconsiderable and explain why New York banks book a certain number of loans through the Bahamas or Cayman Islands.

These "name plate" branches also have an obvious cosmetic value. "Commercial banks just like to open offices," concedes one American banker, who also notes that when banks initially opened offshore branches they were simply following the expansion of their multinational customers. (Although spiraling operating costs all but ended such new banking ventures abroad by mid-1974, they appear to be again in vogue in the Middle East and elsewhere.) In addition to natural competitive forces that compel banks to open offices in new offshore centers, even small branches can serve as important links between local monetary authorities and the home office.

If a bank were to participate in a loan to a country where it had a branch, suggests a banker in Paris, one way to maintain good relations with authorities in that country would be to use the name of its local subsidiary on the loan rather than that of the headquarters office.

Offshore Centers

Of far more importance, however, is that group of offshore banks that operate in genuine commercial centers. Here banks generate their own business which is usually drawn from a large regional base. These offshore centers offer the same advantages found in the more narrowly bookkeeping outposts—central location and proximity to transportation, communication and trade routes; benevolent attitude of monetary officials; more direct access to the local market. The most highly developed of these regional financial centers is Singapore, generally regarded as the capital of the Asian dollar market. Panama plays a similar role in Latin America, while authorities in Bahrain hope to make that state an Arab financial center and to create in the Persian Gulf region a market capable of handling investment of surplus oil revenue.

The Asian dollar market (or Asian currency market, as it is termed locally) is in fact an extension of the Euromarket. Only the subtleties of geography distinguish an Asian dollar from a Eurodollar, and when commercial banks in Asia lend dollars locally, they normally transfer matching deposits from their European branches. And the three-month SIBOR—Singapore interbank offered rate—has since 1971 shadowed LIBOR with no significant deviation. The size of the entire pool of Asian dollars is estimated at over $12 billion.

The Asian dollar market is primarily an interbank market and its chief mechanism in Singapore is the Asian Currency (ACU)—administrative sections within individual banks that are authorized to lend and to accept deposits in currencies other than Singapore dollars. ACUs serve for the most part an offshore clientele; it is estimated that as much as 90 per cent of all ACU non-bank lending is to non-residents. The policy of the Monetary Authority of Singapore of steadily relaxing exchange control regulations, of reducing or eliminating a wide range of taxes and duties on offshore operations and of abolishing the 20 per cent liquidity ratio for commercial banks appears to have secured for Singapore the position as center for this market.

Dynamism

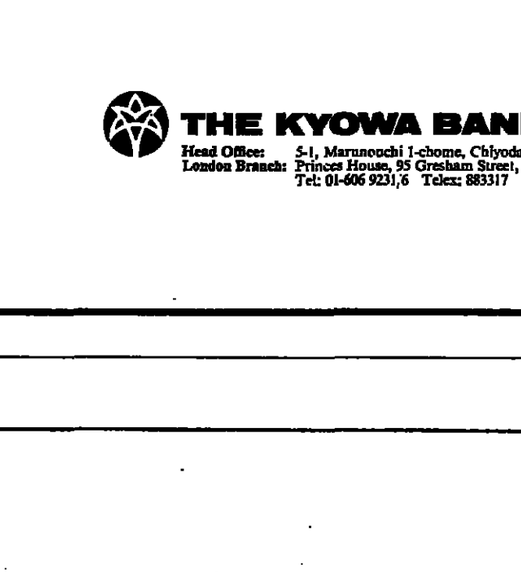
The dynamism of the non-banking sector of the Asian dollar market is of special interest. According to a First National Bank of Chicago report, "the deposits of businesses, individuals and other non-banking customers . . . have grown at an average rate of over 50 per cent per year, from $144 million in 1970 to some $2 billion in 1975." This in part represents an important shift away from traditional patterns of reinvestment in family business and an attempt by investors to diversify assets. The development, says First Chicago, "will encourage the mobilization of capital for long-term, relatively secure investments," a crucial first step toward the creation of an Asian bond market.

Panama, on a somewhat smaller scale, is an offshore center in much the same commercial tradition. The center is ideally located between North and South America and at the crossroads of Atlantic-Pacific trade. The supervisory role of the Comision Bancaria Nacional is limited to general surveillance and offshore banks are not subject to legal reserve requirements, interest ceilings or taxes. Over 80 per cent of the estimated $2.5 billion in foreign currency deposits in 1973 were in interbank time deposits.

But instead of promoting itself as a world or regional lending center, on the Singapore model, Panama has courted international banking in order to gain access to the Eurocurrency market to secure development funds and to help finance government deficits. Thus Panama's bank haven status is not unrelated to the country's long history of Eurocredits, which dates from 1969.

Relationship

In addition to Panama's quid pro quo relationship with the Euromarket, host countries derive other benefits from welcoming offshore banking. Through their efforts to create a major offshore center monetary authorities in Bahrain hope to bring needed banking and financial expertise to the region and to create local liquid investment opportunities. Offshore banking supports a surplus in Singapore's services account which in turn helps to offset the country's trade deficit. And the institutionalization of funds in these offshore centers makes funds more immediately accessible to local borrowers.



Offshore centers do have certain drawbacks, not the least of which are their often remote and unattractive locations. Facilities in such areas are usually limited and rents are always high. If regional branches often have a better understanding of local markets and customers, they normally lack the authority to arrange large loans, and some borrowers find it ultimately more convenient to deal directly with New York, London or Paris. Although fly-by-night operations are discouraged by the requirement in most offshore centers that foreign operations have full branch status rather than local incorporation, there is still a lingering doubt among some borrowers as to whether or not the home office will fully cover its subsidiaries. And there is finally the largely unanswered question of the advisability of lowering credit requirements for countries like Panama in consideration for favors done offshore.

The precise impact of offshore centers on the Euromarket is almost impossible to determine.

Funding

Most offshore lending is funded by banks headquartered in other countries and this often leads to double-counting of the loans. Monetary authorities that loosely monitor offshore centers publish no geographical breakdown of the origin of foreign currencies. And for obvious reasons, the banks themselves discuss the subject in the vaguest generalities. Nonetheless, the Bank for International Settlements estimates that in March, 1976, offshore centers as sources of funds accounted for $24.1 billion or 11 per cent of Eurocurrency funds—this compared with almost 40 per cent for the BIS's reporting European area banks and 16 per cent for the oil-exporting countries. While the share from Western Europe and the oil exporters has remained the same over the last three years, offshore contributions have increased by 20 per cent.

Successful business with Japan depends on the company you keep.

Especially when your business activities require flexible and imaginative banking services.

Kyowa Bank is organised to provide all the help you need.

We give you direct access to Japan. Through offices in all the world's financial centres, including London, New York, Frankfurt, Los Angeles, Hong Kong, Singapore, São Paulo, Amsterdam and Tokyo. And, of course, numerous correspondent banks.

At home, we provide a comprehensive network of 223 branch offices to put our services right where you need them. And with assets of US$17,000 million, we can arrange a custom-built financial package suited exactly to your needs.

Which makes us good company to keep.
In Japan.
And anywhere in the world.

When planning a Euromarket operation it pays to consult Deutsche Bank.

The rapidly expanding, flexible Euromarket offers many financing opportunities but equally it demands intimate knowledge of the market mechanisms and their limits. Deutsche Bank not only has the necessary in-depth know-how but also vast independent financial strength guaranteeing a smooth execution of any money raising operation whatever its size, whatever the required debt instrument.

We offer easy access to one of the most unrestricted capital markets in the world. Loans in any Eurocurrency at fixed or floating rates, money dealing, institutional services, deposit operations and market making in Eurobond securities help to realize our clients' varied financial needs.

Our record speaks for itself. You can rely on the expertise and sound advice of Germany's foremost international underwriter and one of the big ten banks in the world.

So, when you plan your next Euromarket operation talk to us first.

Deutsche Bank
We turn Problems into Opportunities

Headquarters: Frankfurt (Main)/Düsseldorf

We know your part of the world.

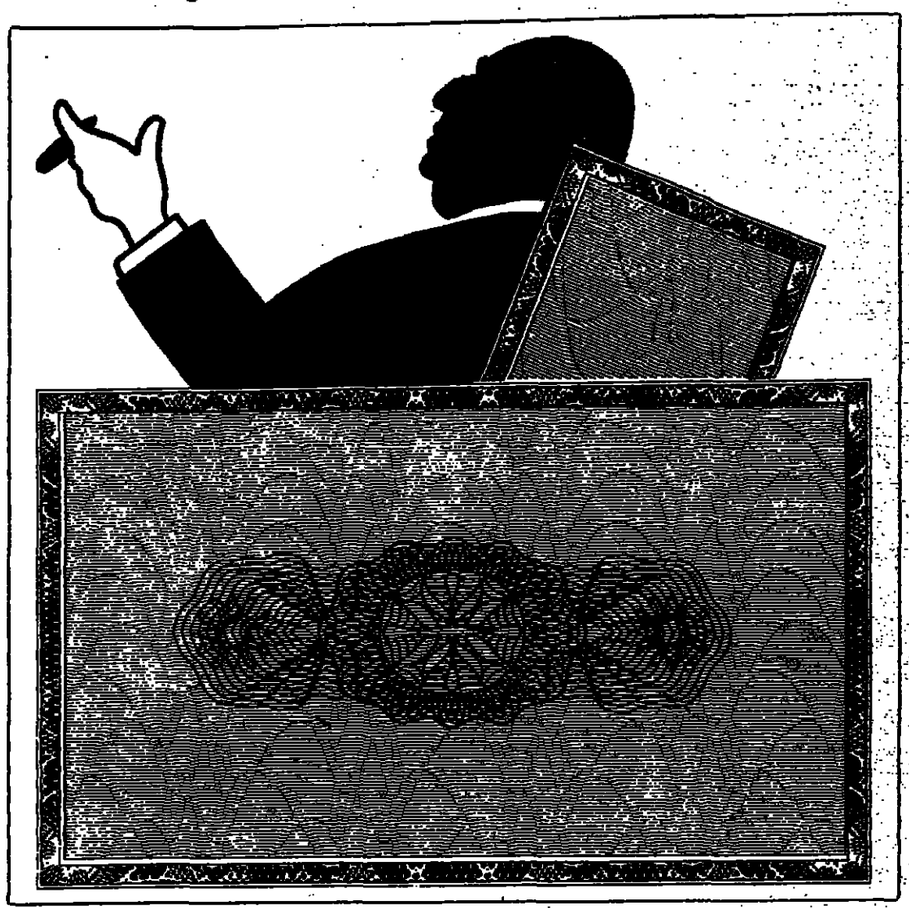
Paris: 20, place Vendôme
London: 21, Aldermanbury
New York: Republic National Bank, 452 Fifth Avenue

Head offices of Trade Development Bank, Geneva.

EUROMARKET SPECIAL REPORT



Instruments of Investment in the Euromarket

PARIS (IHT). — Banks, corporations and institutional and private investors participate in the Euromarket in the following ways:

• **Deposits:** Money can be placed with banks for any period from overnight to five years. In actual practice, the bulk of the deposits is in maturities of one year or under. Interest to be paid on deposits of more than one year is usually negotiated between banker and client; rates for one year and under, which vary from day to day according to market conditions, are uniform from bank to bank.

The normal minimum deposit is $100,000. Many banks will accept deposits starting at $25,000, but the interest paid will be less than that offered on the normal minimum. The daily Eurocurrency interest rates published by the International Herald Tribune, for example, are the bid and offered rate for deposits of $100,000. A deposit is for a fixed period and can be withdrawn prematurely only with great difficulty and then after a penalty has been paid.

• **Certificate of Deposit (CD):** This is exactly what the title means, a piece of paper showing that a deposit has been made with a certain bank. It differs from a normal deposit in that a CD is negotiable and transferable. An active secondary market exists in London, which means a CD is a liquid instrument that can be cashed in at any time. In return for this liquidity, investors earn slightly less interest than if they had made a deposit with the same bank. Depending on market conditions, the interest offered on CDs varies from 1/8 to 1/2 of a percentage point below the rates in the deposit market.

Outstanding CDs now total more than $14 billion, or more than 7 per cent of the total Eurodollar pool of funds, and because there is an active secondary market, annual turnover approaches $40 billion. CDs can be purchased for almost any period of from one week to five years.

There are two types of CDs—tranche and tap. A tap, as the name implies, is turned on or off (available or not available) from a particular bank according to its own need for cash. The minimum tap is for $25,000, but the usual transaction is for $100,000.

Tranche CDs are initially sold for two to five years in relatively large amounts of $20 million to $40 million. But these are sold in denominations of $5,000 to $25,000—an amount more likely to appeal to individual investors.

The interest offered is a function of rates in the deposit market as well as the standing of the bank. In normal market conditions, CDs from the 10 biggest U.S. banks will yield investors some 10 basis points (one-tenth of a percentage point) below the large U.S. regional banks and some 15 basis points below the smaller U. S. regional banks, leading U.K. and Canadian banks and the bigger Continental banks. CDs issued by Japanese banks typically yield investors 20 to 50 basis points more than what the top U.S. banks offer.

• **Floating-Rate Notes:** These are five to seven-year notes sold by banks in denominations of $1,000 and designed to appeal to small investors. Depending on the conditions of each issue, the notes may legally be equal to deposits or may be subordinated to them. In other cases, they may be capital notes, in which case they become part of the capital of the bank along with the stock and long-term debt it has sold.

The interest paid on the notes is tied to the six-month deposit market. The typical issue offers small investors a quarter of a point over the six-month rate and the rate is adjusted twice a year. As the six-month deposit rate itself is a reflection of economic conditions and the rate of inflation, floating-rate notes are perceived to be inflation-indexed securities.

An active secondary market in floating-rate notes also exists, which makes these notes a highly liquid investment.

• **Notes:** These are five- to seven-year debt instruments sold by banks, corporations or state agencies with a fixed rate of interest. They are sold in minimum amounts of $1,000 and an active secondary market exists. As with any fixed-rate investment, the price of these securities fluctuates as interest rates change. The price goes down as interest rates go up, and the price goes up as interest rates go down, bringing the yield (the interest income divided by the current price) into line with the changing interest-rate environment.

• **Debentures:** These are 10- to 15-year debt instruments, usually sold in $1,000 denominations, whose marketability has been severely hampered by the years of inflation. Convertible bonds offer investors the option to convert their bonds to buy common stock of the same firm. In all there are some $50 billion in bonds and notes outstanding, but the volume of new issues coming to the market is now running at an annual rate of more than $14 million a year.

If you're looking for a transnational bank, come to the Pyramid.

The Bankers Trust Pyramid is virtually everywhere. We have offices in 47 key cities on 6 continents and a network of 1,700 correspondents in 119 countries.

But being transnational—that is, able to conduct business beyond national boundaries—is not as important as *how well* we conduct business. We pride ourselves on being skilled professionals, with over 60 years of experience in international banking to draw from.

It would be fairly difficult to exhaust our international services. They range from complicated loan syndications, overseas private placements and trade financings, through foreign exchange and cash and Eurocurrency management, to routine remittances via air freight.

Our bankers are prepared for the most intricate and demanding projects. (A case in point might be one involving a transnational company, a developing country, several government agencies and multiple currencies.)

This is why so many companies come to us for so many different types of financing—a Yugoslavian nickel mine, for example, or an American company building tractors in Germany for Turkish farmers, or a North Sea oil exploration project, or an American company exporting grain throughout the world.

Wherever you see the Bankers Trust Pyramid, you're dealing with a full service bank in the fullest sense of the word, with the capacity to raise, lend and manage money worldwide.

Whatever your needs, a visit to the Pyramid can be a rewarding experience.

EUROMARKET SPECIAL REPORT

Measuring the Banks Leading in Eurobonds

In all, 231 issues were marketed during the first three quarters of the year, totaling the equivalent of $10.3 billion.

U.S. dollars accounted for 61 per cent of the total. DM-denominated bonds accounted for 22 per cent of the volume, and Canadian dollars took an 11-per-cent share of the market.

PARIS (IHT).—The two measures of establishing which banks are the leaders of the Eurobond market (see tables) show very different results.

The first table gives credit to only the lead manager while the second table gives full credit to both lead managers and all co-managers. Thus banks like Swiss Bank Corp. and Kredietbank, which were lead managers of very few issues so far this year, make the top 10 of managers and co-managers because of their heavy participation in the syndicates managing banks put together to market a loan.

It is exactly the opposite story for Morgan Stanley, which retained its second-place standing of 1975 among lead managers. Its position this year was due largely to the emergence of the Canadian-dollar market, which accounted for eight of the 18 issues Morgan brought to market. By contrast, Morgan participated as a co-manager in only two issues, dropping it to 36th place on the combined manager and co-manager list. Morgan's explanation for this is that it invites banks to co-manage its issues only on the insistence of the borrower and that it therefore has no reciprocity to offer banks who invite it into their issues. The opinion of its competitors is that if Morgan is not invited to lead manage an issue it would prefer not to be involved in it at all.

The Leader

Deutsche Bank was the leader by both measures, due primarily to its dominance in the deutsche mark sector of the bond market and the particularly heavy flow of large issues for international bodies such as the World Bank.

Credit Suisse White Weld, establishing a near monopoly on the floating-rate loan market, and accounting for about 12 per cent of total volume in the dollar sector, jumped three places from last year's standing, displacing Westdeutsche Landesbank and Kredietbank Luxembourgeoise.

Kredietbank's absence from this year's managers' list reflects the sharp decline in investor demand for issues denominated in Units of Account, the bank's specialty, as well as the paucity of Scandinavian borrowers, its traditional clients. The bank maintains that its position as fifth leading bank among managers and co-managers (down from the No. 1 spot a year ago) shows it is still very active in the market. But it says that its investors have not increased the volume of their purchases in proportion to the enormous expansion of the market.

The bank's credit for co-managing $2.84 billion worth of issues is almost equal to the $2.6 billion it co-managed in last year's first place.

Moving Up

Warburg moved up sharply from last year to fourth place from No. 15, an advance it attributes both to the increased institutional demand for Eurobonds and a continuing drive to expand its placing power. Its standing in the managers' and co-managers' table is the first time since 1973 that it cracked the top 10.

Wood Gundy jumped to eighth spot from 16 last year, thanks to the Canadian-dollar sector. Of the 32 Canadian-dollar issues floated so far this year, Wood Gundy managed six. Orion Bank also owed its addition to the league table to its activity in the Canadian sector.

Hambros, in 11th spot among lead managers, makes its first appearance in the top 15 since the late 1960s. Acknowledging "a strong connection" to Mideast money, Hamish Melville, a director of the bank, attributes its resurgence to a reorganization in the last two years of its banking and new-issues department and a "beefing up" of its placing power. He says the bank is "concentrating harder on traditional clients and is becoming more aggressive."

Hambros does not run "huge secondary market positions," Mr. Melville says, "but we do trade in our own issues and those we co-manage. It's not necessary to have a large secondary-market operation to succeed in the primary market," he adds.

The only other significant changes among managers and co-managers — the advance of Amsterdam-Rotterdam Bank to eighth place from 12 a year ago and the decline of Dresdner Bank and Sté. Générale de Banque out of the top 10 (sixth and eighth, respectively, last year).

In all, 231 issues were marketed during the first three quarters of the year, totaling the equivalent of $10.3 billion.

U.S. dollars accounted for 61 per cent of the total. DM-denominated bonds accounted for 22 per cent of the volume, and Canadian dollars took an 11-per-cent share of the market.

The only new currencies to make a debut so far this year were the Australian dollar and the United Arab Emirates dirham.

ISSUES - IN MILLIONS

BV can help you put the Euromarket into clearer focus

Bayerische Vereinsbank, one of Germany's major banks with group assets of DM 55 billion, is an established force in the Euromarket with a wholly-owned subsidiary in Luxembourg, offices in the main financial centers of the world and participations in Europe and overseas.

Bayerische Vereinsbank International S.A., Luxembourg, specializes in self-liquidating short-term commercial credits in all major Eurocurrencies and its medium and long-term credits are carefully balanced against the Bank's considerable refinancing capacity.

Representative offices in Caracas, Johannesburg, Paris, Rio de Janeiro, Tehran, Tokyo and shortly to be opened in London, connect the international Headquarters in Munich with other financial capitals of the world. In New York, Union Bank of Bavaria, –UBB– (Bayerische Vereinsbank) New York Branch is at your service with a full range of commercial banking services. Further UBB-offices are in Chicago, Los Angeles and Grand Cayman.

Bayerische Vereinsbank also benefits from its special status, dating back to the nineteenth century, both as a commercial bank as well as a long-term finance house. This dual function gives the Bank added flexibility and financial backbone which is of great value to its corporate clients, particularly in the field of capital investments in Germany, foreign trade and international financing.

You should get to know us better. We'll put the advantages of the Euromarket to work for you.

EUROMARKET SPECIAL REPORT

On Mounting Loans to the Third World

(Continued from Page 7.)

have to write off as a total loss the entire loan. This would create problems for the banks, many of which already have their hands full of doubtful loans to real estate investment trusts at home and significant holdings of municipal bonds on which the city of New York has declared a moratorium.

Although the pace of lending to the LDCs has slowed, the banks are, in fact, continuing to arrange credits because they have plenty of cash and little loan demand from their traditional commercial clients.

So far this year, these countries have borrowed some $7.1 billion in the Eurocredit market —34 per cent of the total loans arranged during the first nine months. This is down from the 39-per-cent share of the market these countries accounted for in all of last year but well over the 26.5-per-cent market share in 1973 through 1975.

Nevertheless, it is clear that the banks are less and less eager to make unattached loans to finance a balance-of-payments deficit. The current fashion is to try to tie a loan to a project, one whose income can be estimated and against which the banks can secure their loan.

In addition, the commercial banks are eager to try to latch onto the coattails of the World Bank as a security for their loans. To date, no borrower has ever defaulted on a loan to the World Bank—the damage from doing so would far outweigh the gains, since all credit from that institution to the defaulting country would be halted.

A First

The first such co-financing with the World Bank was arranged last December in Brazil. The private banks put up two loans totaling $55 million—one for five years and the second for eight years—while the World Bank lent the steel industry project $95 million for 15 years.

The payment of interest and amortization on the commercial bank loans are channeled through the World Bank.

Another idea that bankers are eager to see developed is a proposal that capital flows be guaranteed by international institutions such as the World Bank or the International Monetary Fund. The World Bank has, in fact, the authority in its statutes to make such guarantees. But officials of the bank fear that using this authority would reduce the funds available for direct lending. That is, assets of the bank which might otherwise be deployed in supporting a specific project would be unemployable if they had to be set aside as reserves backing up a guarantee.

The current view at the World Bank is that such an arrangement is feasible but must await an increase in its own capital base—one of sufficient scale to give it the "elbow room" to use its assets in this way. The bank is seeking such an increase from its member governments, but the United States has said that it strongly opposes it. The dispute, insiders hope, is nothing more than a personality clash between bank president Robert McNamara and U.S. Treasury Secretary William Simon which will disappear when the Carter administration takes over in January.

Meanwhile, the Development Committee of the bank is studying the subject of multilateral guarantees and the proposal for an international investment trust that would work alongside commercial banks in making loans to developing countries.

The developing countries are expected to be running current-account deficits of at least $20 billion a year through 1980—an amount far exceeding the capacity of official financing sources such as the World Bank, the IMF and the regional development agencies. Thus, the commercial banks will have to go on playing an important role if these needs are to be met. But the bankers are saying that they need greater security.

Co-financing alongside the World Bank is an important development in finding a solution to the security problem. The commercial banks benefit from the project-assessment resources of the World Bank and the volume of credit available to finance World Bank projects is increased.

The bank reported that in fiscal 1976 co-financing in eastern Africa amounted to about $148 million for 13 projects. The bank itself put up $254 million. The bank noted: "The greatest part of this [private financing] was provided by Arab oil-exporting countries, which are becoming increasingly active in project lending, and are making use of bank-project identification and appraisals as they expand their institutional capabilities for development assistance."

In western Africa, the bank reported that private co-financers from Britain, Canada, France, West Germany, Kuwait and Saudi Arabia were involved in 16 projects. These private lenders put up $407 million, 1 1/2 times more than the $260 million put up by official institutions.

However, commercial banks were involved in only one such operation, in Brazil. World Bank officials say several others are "in the works" with "one or two nearing completion."

For the commercial banks, there are several problems involved in working alongside the World Bank. Among these is the long delay between the time the World Bank begins to study a proposed project and the time actual work begins. (In addition, the concept barely advances what the commercial banks are already doing through their project finance packages. Thus, it is open to question whether such a program would actually increase the flow of funds to needy states.)

Another difficulty is that if a co-financing loan with the World Bank were to have a legal security superior to other Euroloans commercial banks had made to a particular government, these other Euroloans could automatically fall into default. It is standard practice when arranging a Euroloan to insert wording which basically says that the loan is in default if if security is made inferior to an other debt of the same nature.

Lacking official guarantee banks are eager to make projec loans. But there is considerabl ambiguity if not misunderstand ing over the definition of wha such a loan is. The term "projec loan" is often used to cover loan to a government when th agreement merely says that th proceeds will finance the goverm ment's economic programs.

Embarrassed

One particularly embarrassin "project loan" was the $150 mil lion that Zambia arranged in 197 in two parts. Neither loan agree ment named a specific purpos for the use of the funds, al though bankers understood tha the money would be used to de velop the country's mineral re sources. In fact, immediatel after the borrowing, Zambia re tired bonds it had issued whe it partially nationalized the cop per industry—freeing its hands i managing this key industry. Thi embarrassment to the banks wa acute, as the multinational cor porations operating the coppe

EUROCURRENCY SPECIAL REPORT

Some Bankers Have a Serious Fear of Being Overextended

Continued fro.. preceding page

dustry were also clients of the nks.

A true project loan is one in hich payment is tied to the oject's performance, disburse- nts are made as the project gresses and repayment is gear- to the revenues the project ll earn.

A number of such project loans ve been concentrated in the ex- ctive and processing industries ile others focus on financing port substitutes such as fertil- r plants or ships.

But many so-called project ns are for infrastructure— nsportation and utilities— ich do not directly earn the reign exchange needed to repay loan.

Given the uncertainty bankers e about continuing to make ns to developing countries, it not surprising that the condi- ns imposed on such loans have ntened significantly.

Through 1973, the Eurocurrency ns to developing countries car- d maturities of up to 15 years, d grace periods extending up to e years, during which time only terest was paid and there was amortization of the debt. The terest rate in many cases was ss than 1 percentage point over e London interbank offered rate LIBOR).

Alteration

But the oil-price rise at the end f 1973 and the mid-1974 Euro- nking crisis following the col- pse of Herstatt dramatically al- red the credit standing of the veloping countries and the abil- y of many banks to stay in the siness of making syndicated ns.

In the wake of the multifaceted risis that engulfed the Euro- arkets in 1974, the average ma- urity of loans to developing coun- ies shrank to five years and preads climbed dramatically to ore than 2 points over LIBOR. hen this did not reflect the true ost of the loans, as commissions nd participating fees, paid when he loan was signed, raised the ffective charge to more than 3 er cent.

Legal practices changed, too. here earlier loan agreements ere fairly simple 10 to 20-page ontracts, greater complexity was mposed by new conditions in the uromarket, such as the multi- ered LIBOR and the danger that short-term funds might not be available to allow banks to "roll over" their loan commit- ments.

European bankers express dis- may that the practice of U.S. lawyers to anticipate and resolve every contingency in writing loan agreements has resulted in these agreements now running to over 100 pages.

For the lending banks, the question of security—that the loan will be repaid and interest payments be made on time—is only one of their problems

Roll-Over

Another major concern is their own exposure in making medium- term commitments to finance a loan based on deposits of uncer tain duration or deposits they buy for periods of 3, 6 or 9 months. While the loan itself is for a fixed period, the banks funding of the loan is usually periodically renewed, or "rolled over." To cover themselves in the likely event that their own cost of funds at the roll-over date will be different from the cost at the time the loan was entered into, the interest on the loan is adjusted at regular intervals.

In a typical loan, the basic in terest charge is adjusted every six months. It is based on the LIBOR as determined by several reference banks. The only thing that remains constant is the spread the borrower pays over LIBOR, which is agreed to at the outset. The use of several reference banks came into use following the Herstatt crisis, when LIBOR, which until then had been a single rate for almost all banks, became a multi-tiered rate. The 30 to 40 largest banks in the world borrowed at what was a "prime" LIBOR rate and the other banks, depending on size and nationality, borrowed at rates scaled up from that level.

The smaller banks thus had to refinance their loans at a rate over the LIBOR quoted to the borrower and saw their profit margins on the loans erode.

Today, fixing of the LIBOR has virtually ceased. But the trauma of that experience re mains and several banks of dif ferent size and nationality are still often written into the loan agreement as determining what the LIBOR is

Withdrawal

In addition, the typical loan agreement today allows a partici- pating bank to switch the cur- rency of the loan if it cannot refinance itself in the original currency at the roll-over date, or it allows the bank to withdraw from the loan—and be repaid forthwith—if, at the extreme, the bank cannot refund itself in the interbank market.

A major problem for the banks is determining how much money they want to lend to borrowers in a particular country. Assessing the bankers. In what is obviously a much more arbitrary manner, banks try to determine the politi- cal, social and economic factors likely to affect the country's ability to service its debt and repay the loan.

Having done this, a bank then sets a limit on its exposure—how much it is willing to lend to a particular nation, combining loans to both the public and the private sector. This is subject to regular review and is not necessarily as rigid as it might sound.

But self-imposed country limits can become political dynamite when the word begins to spread that banks are no longer willing to lend to a particular country.

Guido Carli, former governor of the Bank of Italy, said in a recent speech that "the rating of credits according to the coun- try of the borrower and their al- location according to the presum- ed degree of solvency has caused controversy in my country. The first news of this practice be- came public in September, 1974; the rating given to Italy oc- casioned considerable alarm both in the country itself and abroad and it cannot be ruled out that this added momentum to the wave of deposit withdrawals from Italian banks which broke out in the summer of that year."

country risk is a very touchy subject.

For one thing, unlike the situa- tion when a bank is ascertaining how much it is willing to lend to a commercial client, there are no books, no profit and loss state- ment, no cash-flow charts to guide

There have been a few Changes in Banking since their Time - for instance, the Development of the Euromarket.

The world of finance is getting more complex by the day with floating currencies, new debt instruments and an increasing demand for international funding being only some of the newer developments calling for ever greater professional banking expertise.

With Bayerische Landesbank as your banker, you can rest assured that you'll get all the necessary financial experience you'll need and more – you'll have a partner who combines personal friendliness, the type Bavarians are known for, with professional drive.

As one of the largest "universal banks" in West Germany, bankers to the state of Bavaria, and with a balance sheet total of over DM 47 billion, you'll know that we have the financial capacity whatever the size of your project. Our refinancing ability for DM loans is strengthened by our authority to issue own bearer bonds. In addition, we have the management capacity to put together world-wide syndicates. For Euromarket lendings, be it for short- term trade financing or medium and long- term capital investments, our subsidiary, Bayerische Landesbank International S.A., Bayernlux for short, is at your service. As in Munich, in Luxembourg too you'll find the same high professional standards seasoned with Bavarian friendliness and that this rare combination is appreciated by a demanding clientele is best reflected in the fact that Bayernlux's balance sheet total increased from over Lfr. 46 billion to close on Lfr. 60 billion during the last financial year ending September 30, 1976. Our invest- ment advisory services in Luxembourg have also gained recognition particularly in the field of fixed interest securities and other investment certificates. And our money market and foreign exchange operations complement our Euro- market facilities.

When you are looking for a partner in the Euromarket you can't do better than Bayerische Landesbank.

EUROMARKET SPECIAL REPORT

Switzerland's Attitude—Conservatism

PARIS (IHT).—Conservatism, for the Swiss, is a badge of courage.

They would prefer to be late—and right—when moving into new areas rather than be first to jump on a bandwagon—and risk being wrong.

One of the best examples of this attitude is their cautious approach to the Eurocurrency market, participating in syndicated bank loans, which they disdained until very recently.

Admittedly, there were occasional participations in roll-over credits when an important client of one of the banks was looking for funds. But basically, says Guido Condrau, a vice-president of Swiss Bank Corp., "we didn't like roll-overs."

"The resources of the bank are based on Swiss francs and roll-overs are mostly in dollars. We had a fear of undertaking an engagement for five years or more" and were repelled by "having refinancing for sure for only six months" via the inter-bank market, he explains.

The change in attitude, he says, was a result of the crisis that followed the collapse of Bankhaus Herstatt in mid-1974. Investors suddenly became very quality conscious about which banks they placed their money with and the dollars deposited with the big Swiss banks "increased tremendously."

This swell in dollar deposits propelled the bank "to look for new possibilities to invest these deposits. We didn't want to simply lend to other banks and we certainly didn't want to turn down accepting new deposits."

Moves Slowly

The bank moved slowly, however, only after lengthy study showed that "part of these short-term deposits did not leave the bank" but were continuously renewed, or rolled over.

Based on that knowledge, the bank early this year decided that it could safely commit itself to the syndicated loan market without having to worry about its access to dollars.

"We became more involved in 1975," says Claude Lüthi, a UBS vice-president. Before then, he notes, "the margins weren't very high."

The "margin" or "spread" is set at the outset of a loan at a fixed amount over the inter-bank rate. In the early years, margins were as low as 3/8 of a percentage point. Today, they start at 1 1/4 points and go up to over 2, depending on the credit standing of the borrower.

The London inter-bank rate (LIBOR) is the base over which the margin is set and in typical loans the base rate is reset every six months. This means that banks participating in a loan can *refinance* their own portion every six months at the inter-bank rate and the spread gives them an assured profit over their own cost of funds.

'A Link'

Like most banks operating in the market, the Swiss admit to looking for "a link" before deciding to participate in a loan syndication. The typical link is that the borrowed funds will be used, at least in part, to finance the purchase of Swiss goods. (French and West German banks usually insist on such a link before they syndicate a loan.)

Another link might be to lend money to a country which could offer a lot of business either through potential export orders or directly to the bank itself. Commenting on the participation of UBS in the recent $1 billion Euroloan arranged for Venezuela, Mr. Lüthi said that "we think it is a country where a bank such as ours can profit from being seen as a co-manager of their first loan."

This is also the attitude of the U.S. banks. In many cases, the link for them, if not tied to U.S. exports or the "politics" of the bank, is that the dollar reserves of the borrowing countries are deposited in their banks.

In any case, Mr. Lüthi insists that his bank "never participates in a loan just because the margin is good."

Adolf Brandle, a senior vice-president at UBS, says that the bank takes a very conservative approach to the Eurocredit market. The loans on the bank's books "are a very small percentage of total loans."

Assets in Loans

At the end of last year, some 40 per cent of the bank's assets were in loans, about 13.6 billion Swiss francs (about $7.6 billion). Of this, 5.5 billion francs was [illegible] term loans and the Eurocurrency roll-overs represented the smaller portion, he said without breaking down the figure.

Bankers elsewhere report that when the Swiss join a syndicate they usually underwrite a substantial portion—$50 million is frequently cited. Of course, this is not necessarily the amount they take on their books as they can find other banks wanting to buy such assets.

Without putting a figure on how much money they are committing to the market, Mr. Condrau says that SBC expects to participate in 30 to 50 loan syndications a year.

Fixed Rates

He comments that "an increasing number" of SBC's participations are on a fixed-rate basis. This suits the bank, he explains, because it does not want to speculate on where interest rates are headed and it suits the borrower who prefers to know at the outset what the cost of the loan will be.

The fixed-rate financings are usually for five years and the margin on this portion of the loan is identical to the amount the borrower has agreed to pay for the floating portion.

"Lots of our customers want to buy certificates of deposit (CDs)," Mr. Condrau notes, "and we realized we could offer these to customers and use the funds to take fixed-rate participations."

CDs are sold in minimum amounts of $25,000 and can run from three months to five years. They are negotiable and investors seeking their cash before the stated maturity can sell them in the secondary market. Based in London, the CD market is estimated to be a $14-billion pool of funds.

On occasion, Mr. Condrau says, SBC will invite very large investors to participate directly in a syndicated loan. The minimum individual participation, he says, would be the same as that required of participating banks, usually $1 million, sometimes $5 million or more. This is usually offered to very sophisticated investors and SBC is under no obligation to buy this paper back from the investor if he should want his cash before maturity.

There is no secondary market in this paper and even then it would be hard put to find another bank willing to buy an SBC participation.

London bankers, of course, welcome the increasing participation of the Swiss banks in the syndicated loan market. "It is a very positive sign," says one, "and gives us another place to lay off."

Another comments that "it shows how short of loans the Swiss are. But it also is a sign of confidence, reflecting the belief the market is here to stay and that it is an orderly market."

Among the Swiss, only SBC is active in doing fixed-rate placements. Other banks looking for this kind of financing include National Westminster and Westdeutsche Landesbank.

Mr. Brandle of UBS says that his bank "hasn't pushed this side of the business."

Crédit Suisse, which appears to be the least active of the three Swiss banks in this sector of the market, says that "obviously there is a tendency for all Swiss banks to participate increasingly as the demand for loans from traditional clients is weak."

But a spokesman says that while UBS, Crédit Suisse does not like fixed-rate participations. "As long as borrowers are still hoping for a further decline in interest rates, I don't see them ready to borrow at fixed rates."

Unease in Euromarkets

PARIS (IHT).—"There's a general feeling of unease," says a senior international economist commenting on the state of the Euromarket.

"We've moved into a world where liquidity is created by the private sector at the demand of the borrowers. If a country needs foreign exchange it can get it." The only constraint on borrowing, he means, is the creditworthiness of the borrower.

But he, as well as numerous private bankers, worry about a sudden change in perception by commercial bankers about the credit standing of many nations now tapping the Euromarket. A sudden cutoff of credit availability could create the crisis that lenders and borrowers want to avoid.

Given the lack of up-to-date data about most borrowing nations, particularly the developing countries and the East European Communist states—many experts worry that banks could be panicked into making wrong credit moves on the basis of rumor or other misinformation.

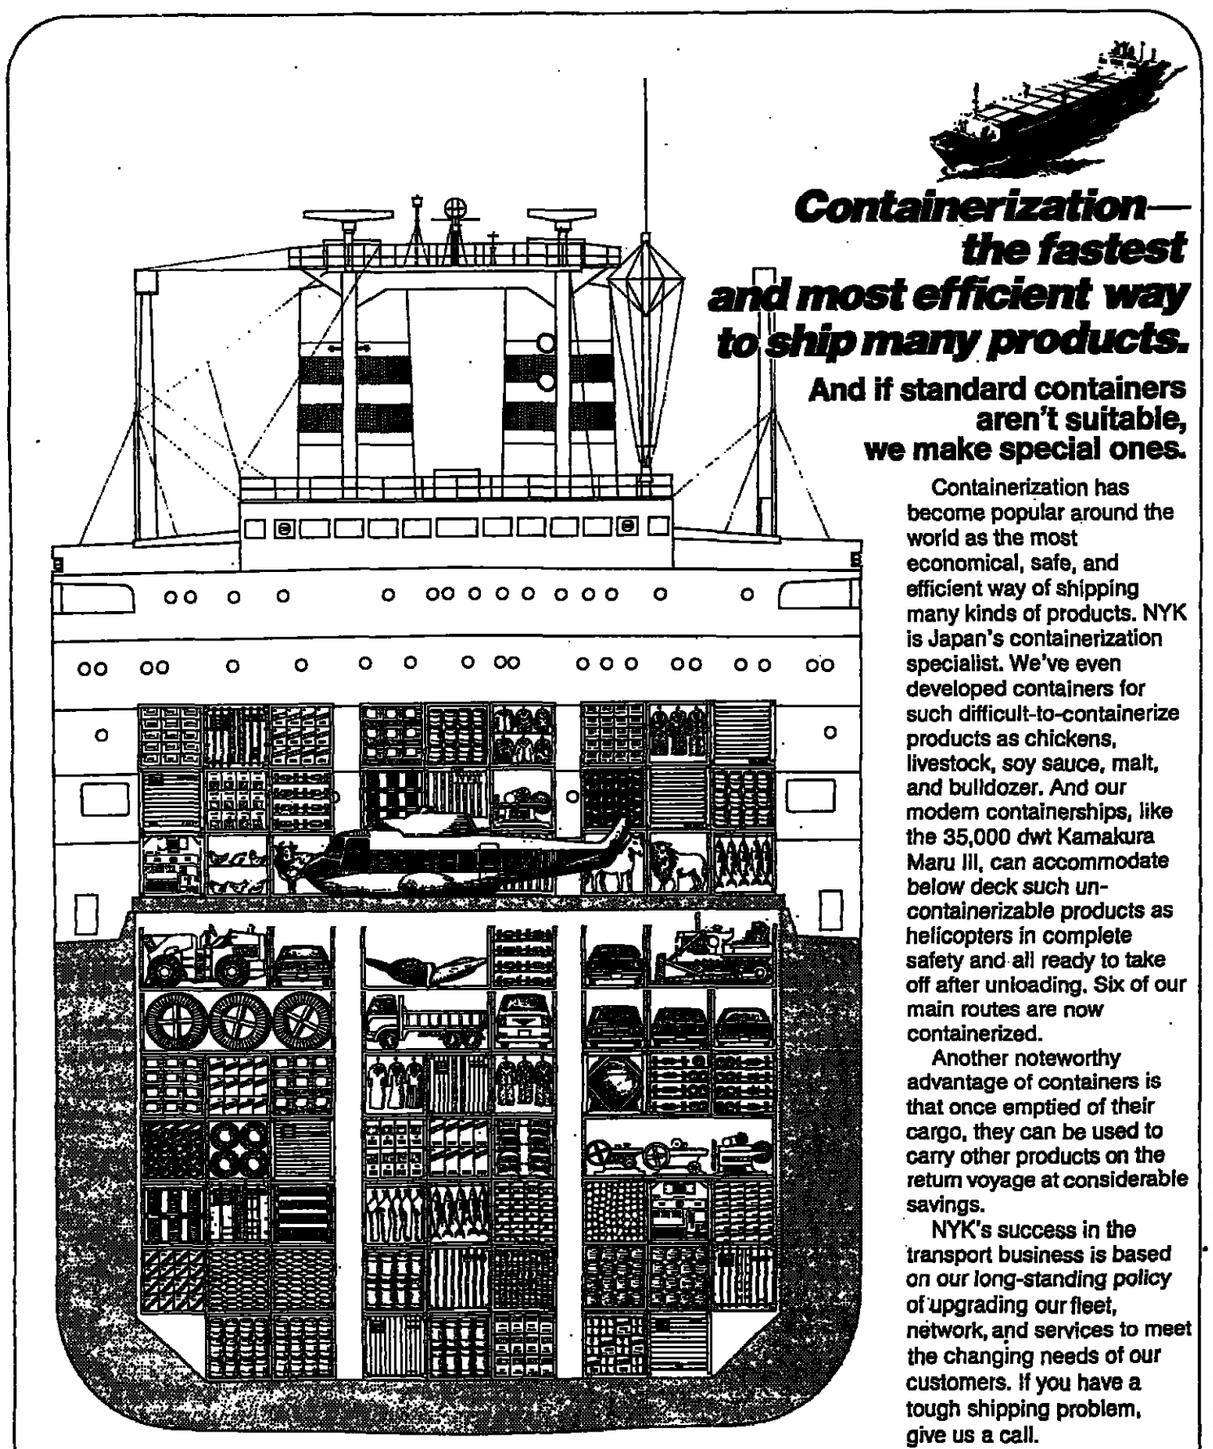
The Communists give virtually no financial information to Western bankers and data on the developing states is woefully late. The just-published annual report of the World Bank, for example, which publishes the most complete information on the outstanding debt of these countries—relating total debt to foreign currency income—only goes through 1974.

Statistics

While the World Bank says it is working to speed up publication of these vital statistics, an expert on developing countries at one international organization maintains that "the figures are purposely late, so as not to panic the market." If the bank published current data, he added, it would open itself to accusations that it was ruining the credit access of its member states.

Amidst all this uncertainty, the Bank for International Settlements is now trying to create a central clearing house for debt information.

The aim is not to collect information on individual debtors but to try to put together the best possible figures on the debts individual countries have with commercial banks. At present, the BIS has figures from banks in nine reporting countries in Europe as well as Japan, Canada and the United States. But U.S. authorities are the only ones who collect data from their banks in other "offshore" centers such as Panama, the Bahamas, Hong Kong and Singapore.



"We don't have the faintest idea what the 'offshore' lending of non-U.S. banks is," an official at the BIS admits.

Thus, it is seeking to collect, on a voluntary basis, consolidated lending figures to countries from all major commercial banks and to get some maturity breakdown for each country to ascertain when the repayment of outstanding debt begins to get bunched up.

The central banks of the Group of Ten—Belgium-Luxembourg, Britain, Canada, France, Italy, Japan, the Netherlands, Sweden, the United States and West Germany—as well as Switzerland have agreed in principle to request this information from banks in their countries. A meeting scheduled for this month is expected to put the finishing touches on the terminology.

Still to be worked out, for example, is how to avoid double counting. One problem concerns reporting the loans of consortia, such as London-based Orion Bank, which is owned by Chase Manhattan, Royal Bank of Canada, National Westminster and Westdeutsche Landesbank. Which parent reports the figures, or do they report a total divided equally among them?

Compliance by the commercial banks will be voluntary, but officials expect that the banks' own desire to receive current data will prompt full cooperation. The first questionnaires are expected to go out to banks in December and the BIS expects to be able to circulate the results by March or April.

Containerization—
the fastest
and most efficient way
to ship many products.

And if standard containers
aren't suitable,
we make special ones.

Containerization has become popular around the world as the most economical, safe, and efficient way of shipping many kinds of products. NYK is Japan's containerization specialist. We've even developed containers for such difficult-to-containerize products as chickens, livestock, soy sauce, malt, and bulldozer. And our modern containerships, like the 35,000 dwt Kamakura Maru III, can accommodate below deck such un-containerizable products as helicopters in complete safety and all ready to take off after unloading. Six of our main routes are now containerized.

Another noteworthy advantage of containers is that once emptied of their cargo, they can be used to carry other products on the return voyage at considerable savings.

NYK's success in the transport business is based on our long-standing policy of upgrading our fleet, network, and services to meet the changing needs of our customers. If you have a tough shipping problem, give us a call.

last year of $3.6 billion, Poland second with a deficit of $2.7 ion followed by East Germany Hungary with about $1.1 billion each. Czechoslovakia and garia were both about $700 ion in the red and Romania a deficit of some $500 million. Organization for Economic peration and Development, h groups the largest industrialized states outside the Comist bloc, reports that its 24 ember states accounted for the of the East European Com- deficit—$7.93 billion. ore than half of last year's trade deficit and some 66 cent of the deficit with the D area was with two coun- West Germany, which ed a $3.25-billion surplus Eastern Europe, and the ited States, with a surplus of billion.

is estimated that about half the total indebtedness of the ecom group is in Western ernment-guaranteed export dits. The repayment of these is guaranteed by such bodies the U.K. Export Credit Guarantee Department, Cie. Francaise Assurances pour le Commerce rieur and the Export-Import anks of Japan and the United tates.

The terms on these loans are usually quite favorable, with the overnment agencies in effect subsidizing export sales. Some of hese credits are arranged directly by the Western companies aking the sale, which would arrow in the own name from he banks.

Owed to Banks

The remainder is owed directly commercial banks, mostly hrough borrowings in the Euroarket. Exactly how much is ifficult to estimate. Loans and edits in domestic and foreign urrencies held by private Westn bank's are currently estimato total $25 billion. But some these loans fall under the exort guarantee programs, so it not possible to know how much posure banks have themselves. The latest total indicates a se of $1.5 billion from the Bank f International Settlements' rth quarter figure, which itself s up billion from the end of 1975.

Included in this gross amount is the $5.9 billion that banks have lent to Eastern Europe in the form of syndicated medium-term redits since 1972.

The biggest single chunk of the debt belongs to the Soviet Union, an estimated $18 billion, of which some $13 billion is said to have actually been drawn and around $5 billion in credits committed but as yet unused.

This is the least worrisome aspect of Comecon debt. Bankers estimate about one-third of the debt is "self-liquidating." That is the borrowed money was used to develop goods, particularly raw materials, whose sales abroad assure the hard-currency income needed to pay off the loans.

For Sale

In addition, the Soviet Union has vast quantities of primary products that can be sold abroad, including industrial diamonds and gold. The Bank for International Settlements in Basel estimates that gold sales by Communist countries (mostly the Soviet Union) totaled 150 tons in both 1974 and 1975, fetching between 700 million and $900 million in each year. However, the sharp decline in the metal's value on world bullion markets—from $166 an ounce in 1974 to around $120 an ounce currently—is considered to be an impediment to future sales. Not only is the metal worth less than it was, but heavy Russian sales coming amid the regularly scheduled gold auctions by the International Monetary Fund could depress the price further.

But basically, there are few experts who seriously question at present the ability and willingness of Moscow to pay its bills. The Russians have established themselves as top-class borrowers, paying what is considered a "prime" rate whenever they go to the market.

Given the scale of their needs to develop their natural resources as well as the consumer goods industries, they are expected to remain big borrowers in the West for some time.

The outlook for the other European members of Comecon, however, is less rosy.

Poland

Poland, for example, has used most of its borrowed funds to renew and develop its industry, expecting to be able to sell its manufactured goods abroad for the hard currency needed to pay the debts. But the prolonged recession coupled now with the outlook for a very slow recovery in most of Western Europe raises serious questions about how much the Poles will be able to sell abroad.

Given the current poor outlook for exports, the Poles will have to step up their hard-currency earnings from elsewhere. And that means cutting back on their trade deficit, particularly by curbing the deficit arising from consumer demand—food as well as manufactured products presumably to finance their balance-of-payments deficits, are not what the banks are looking for.

On the other hand, he notes that Comecon trade lines with Western banks are not being fully utilized. These credits, given for periods of up to three years depending on the nature of the goods being bought, cost between three-quarters and 1 1/4 percentage points over the interbank rate, depending on the maturity. But by borrowing in the interbank market, Comecon banks can arrange credits for three to six months at 1/16 to 1/8 over the interbank rate.

In addition, such interbank borrowing is less public and the Comecon banks can tap smaller Western banks which are less active in East-West finance and which are therefore more likely to be willing to increase their exposure to Comecon.

Another Estimate

Although there are no hard facts on how the Comecon debt is divided among Western banks, the Bundesbank estimated in June that West German banks held about 25 per cent of the total.

The Federal Reserve reports that U.S. banks and their foreign branches held $3 billion of East bloc debt at the end of June.

Banks in Britain are believed to hold substantial amounts, with the remainder divided among

SOURCE: MORGAN GUARANTY.

IN MILLIONS OF DOLLARS

This is the point at which the optimists in the West separate from the pessimists. The former believe that Poland will succeed in cutting domestic demand; the latter, pointing to the mid-June riots when the government tried to raise food prices, believe that there is much less room for maneuver than the optimists see in the government's ability to cut consumer demand.

The typical view of bankers, as expressed by a U.K.-based executive at a large U.S. bank, is: "Never underestimate the ability of Comecon countries to reallocate resources with the stroke of a pen."

What is critical from the bankers' point of view, says Lawrence Brainard, a vice-president at Chase Manhattan Bank, "is not a number like the debt-service ratio but the creditworthiness of the borrower."

A Consensus

Pointing out that Italy was effectively shut out of the Euromarkets in 1974 when 10 per cent of its total foreign-exchange income was used to repay the principal and interest on outstanding debt, Mr. Brainard notes that the consensus estimates for Poland's debt-service ratio of 20 to 22 per cent are not worrisome. "What you look for are what the prospects for growth are and the ability to service debt.

"Eastern Europe's borrowings have largely gone into capital investments. By contrast, Italy and Britain used a lot of their Euromarket borrowings to support their currencies and have no capital assets to show for that borrowing."

In addition, he says, the debt totals for almost all countries is "sky high. Brazil owed $22 billion, Mexico about $17 billion and all of Latin America some $65 billion at the end of last year. We really don't know what this means, there is no historic yardstick. We have been thinking in terms of $1 billion, that that was high. But with inflation, the rise in oil prices and the size of the balance-of-payments deficits there's no meaningful way to know what is high or what is low. My impression is that the East European debt is not too high."

As for Poland, he says that "the Poles themselves feel they have gone as far as possible. The focus there is to finish what has been started and to postpone new projects. I see slower growth for imports in 1977 and a dramatic slowing of domestic growth. But there is nothing to suggest that the problem is out of hand or that they face a credit crunch.

The Danger

"The real danger," he adds, "is that they will cut too much and we'll see a sharp slowdown in Western imports" that will retard the recovery in Western Europe.

(Indeed, one of the main reasons Comecon debt has grown so fast is that East-bloc demand for capital goods has been one of the strongest components keeping this industry working during the recession, particularly in West Germany.)

Others like Prof. Portes disagree. He seriously questions the government's ability to effect the necessary cutbacks without triggering new riots. And he argues that the standard response, that at worst Poland can finance whatever credit crunch it finds itself in by turning to aid from the Soviet Union, is an outdated assumption.

$7 Billion

"The numbers are too large," he says. "Poland's debt is already over $7 billion" and by 1980, when the grace periods on loans have elapsed, Poland will be needing "around $2 billion a year to service its debt. That's too big for the Soviet Union, which has its own debt to finance."

More to the point, "the Soviet Union is already concerned with Poland's increased relations with the West and its attempt to maintain an independent stand vis-à-vis Moscow. One way to make sure the Poles don't go too far is to let them get into trouble. Then Russia won't have to impose any constraints on Poland's relations with the West, the Western bankers will do that for them," he explains.

"If the Soviet Union were really concerned, it would be more gracious on oil prices" it charges its allies. Although still below the world level, the price of Soviet oil to Comecon is set at a three-year moving average, which means the cost in 1977 will be the average of the world price in the years 1975-76.

The other members of Comecon also have substantial debts. Chase Manhattan estimates that East Germany's debts total $4.9 billion, Hungary is said to owe $3.3 billion, Romania $2.8 billion, Bulgaria $3.4 billion, Czechoslovakia $1.8 billion and various Comecon institutions about $2.6 billion.

Chase Estimate

After subtracting deposits these countries have with Western banks, Chase estimates that Bulgaria's debt is 3.1 times the volume of its hard-currency export earnings last year. That is, it would take three years' export earnings to pay the debt. The ratio for Poland is 2, East Germany is 1.9, Hungary is 1.7, the Soviet Union is 1.3 and Romania is 1.1. Czechoslovakia at 0.8 is the only country whose debt does not yet exceed its annual level of hard-currency earnings.

By contrast, Chase notes that the total debt for Latin America is $65 billion, also 1.5 times the area's export earnings. Within that grouping, Mexico has debts estimated at $16.6 billion, or 5.7 times its export earnings and Brazil, with debts of $22 billion, has a ratio of 2.5.

"The point is that we have no standard" to evaluate what is excessive debt "because the context of world borrowing has changed."

Prof. Portes considers that in addition to Poland, Romania and Bulgaria "are in serious trouble. Hungary," he adds, "has a considerable problem." East Germany, he said, is less worrisome. "If they weren't Germans people would be concerned."

Prof. Portes believes that the Soviet Union is probably likely to bail out Bulgaria if it comes to that. While the debt is large relative to Bulgaria's resources, the actual numbers are small. In addition, Bulgaria is the most closely tied member of Comecon to the Soviet Union, politically and economically, and the Russians do not have to worry about Bulgaria seeking to forge closer ties to the West, he says.

He puts Romania and Hungary in the same league as Poland regarding the likelihood of the Soviet Union coming to their assistance.

Noting that bankers are "terribly sanguine" about lending to Eastern Europe, Prof. Portes observes that "either they don't know what they're doing or the individual (exposure) limits are so low that it doesn't matter.

"But in the aggregate, the amounts are absurdly large. There is no justification for it unless you can argue that there are political advantages for the West, which I don't see."

He estimates that the banks go on lending because "they didn't realize until too late how large the aggregate numbers were. And once they realized, they saw they were on the hook and had to keep on lending" to keep the borrowers afloat.

No Validity

"The reason banks got started in the first place is no longer valid," he says. "It was assumed that the Communists were conservative bankers and that officials could control domestic economies come what may to generate enough hard-currency exports to keep up their payments."

He notes that with gross bank loans totaling around $25 billion and the average interest rate on loans probably in the area of 8 per cent, the East Europeans are paying close to $2 billion a year in interest to Western banks.

"Meanwhile, they are running substantial deficits" in their international trade.

At the same time, their indebtedness continues to climb. He estimates an increase of about $10 billion this year. According to the BIS figures, the debt was increasing at an annual rate of $8 billion in the first quarter and [illegible] for the second quarter is expected to show a slowdown to an annual rate of $6 billion.

But since midyear, when the Bundesbank and the U.S. State Department started calling attention to the rapidly increasing debt of Comecon, there have been few attempts to organize syndi-

Experience

WestLB has the solid foundation to get the job done better

When choosing your international banking partner you have to ask yourself some very serious questions. One, invariably, is: "Does the bank have the depth of experience I am going to need?"

WestLB has some impressive credentials to give you a complete answer.

With a tradition in German banking dating back to 1832, it has certainly had enough time to acquire know-how. However, age alone is no guarantee. Of much greater importance is the competitive framework in which the business has always been conducted. Here WestLB has few peers. Located in the heart of the industrial Ruhr in Germany's State of North Rhine Westphalia, which accounts for close on one third of the country's total industrial production.

WestLB is one of Europe's largest banks, ranking among the top twenty in the world with a balance sheet total of close on DM 64,000 million.

Its daily activities cover all universal services both in the fields of commercial and investment banking, and this broadly based financial expertise is readily available – in all areas of direct interest to you.

For instance, in long-term finance WestLB specializes in providing loans for major projects in the public and private sector. As banker to the State of North Rhine Westphalia it has developed great flexibility in raising large funds. And it is authorized to issue its own securities such as mortgage bonds, municipal bonds and other debentures.

Substantial deposits from domestic and foreign corporations and institutional investors, as well as the regional universal banks (Sparkassen) provide WestLB with balanced sources for funds.

In the sophisticated field of new issues, which is greatly influenced by interbank relationships and mutual trust, WestLB enjoys a leading position in Europe. It often acts as lead manager or co-manager in first-class issues and is regularly to be found in the international and domestic underwriting syndicates.

Its vast placement capacity is second to none and its international experience guarantees a highly professional approach to initiate and organize an international or domestic issue. The Bank is also a leader in the secondary market.

Stock exchange listings on the major German exchanges, import and export financing, syndicated loans, international finance leasing, stockbroking and advice on mergers and acquisitions; in each of these specialized areas, WestLB is one of the leading names in Germany – with the solid foundation of experience to get the job done right.

But experience alone is not enough. There are other important questions you must ask yourself before making a final choice about your international banker. "Is the bank absolutely secure?" "Is it efficient?" "Is it truly international?"

Get the full answers to these questions and find out about our specialized services. Contact us directly or ask your local bankers to put you in touch with us.

EUROMARKET SPECIAL REPORT

In Shipping: 'It's the Year of the Titanic'

In some cases, banks are continuing to collect interest on the mortgage payments of laid-up tankers and have agreed to moratoria of up to three years on the amortization. In other cases, interest is not even being paid.

PARIS (IHT).—According to the Chinese 1976 is the Year of the Dragon—not far from how Eurobankers might label it, although they would probably prefer something more dramatic such as the Year of the Titanic.

That conveys not only the sinking feeling regarding repayment of large but as yet unestimated loans extended to real estate firms and the outlook on repayment from some of the less developed countries, but also the exposure to the shipping industry.

According to Norwegian shipbrokers Fearnley & Egers, the mortgage debt on world shipping totaled some $25 billion as of July. More than half—an estimated $12.8 billion—is out on very-large and ultra-large tankers, the most depressed sector of the shipping industry. And an estimated $4.3 billion was mortgage carried on tankers that are laid up earning no income.

This last figure is expected to grow considerably through the rest of this decade as charters expire and more independent tankers become unemployed. It is also the most meaningful figure for the Euromarket, where much of the tanker finance was arranged, as it represents the most vulnerable area of mortgage debt—tankers which are not earning the money to pay interest or repay principal.

Although it is widely assumed that banks hold about half of the total mortgage debt, Intertanko, a trade organization of independent tanker owners, said in a recent report that "attempts to obtain an accurate assessment of the proportion of tanker mortgage debt which is guaranteed or insured by governments have so far been unsuccessful."

Intertanko describes the crisis in the tanker market as "an appalling coincidence of factors. The oil embargo and the sudden steep increase in the price of oil merely brought out dramatically an underlying and growing structural imbalance, for which governments, shipbuilders, banks, oil companies and shipowners must all bear some responsibility."

The report blames the overordering of tonnage to the economic "euphoria" of the early 1970s, the "excessive" forecasts by the oil companies of future needs and the subsidized government credits to builders and buyers of ships.

"The final, crucial factor in this extraordinary situation," Intertanko said, "was the eagerness of some commercial banks to lend against inflated hull values without adequate guaranteed employment. The ship finance market had attracted a surfeit of banks, some of which did not properly understand the shipping industry and were ready to lend a high percentage of the delivered price of new buildings in the belief that hull values would go on rising.

"Since the tanker market was booming, these banks assumed that the ships they financed would as a matter of course obtain high quality employment from the major oil companies. By combining government-backed and commercial credit, owners were therefore in a position to obtain financing for 100 per cent and more of the cost of their vessels."

In some cases, banks are continuing to collect interest on the mortgage payments of laid-up tankers and have agreed to moratoria of up to three years on the amortization. In other cases, interest is not even being paid.

In some cases the banks have taken over the ships and have either sold them or found work for them.

"You do the relatively easy ones first," says one weary banker, "those where the asset of the ship is in excess of the debt. The problems arise where the assets are worth less than the debt on them."

Weakness

But this strategy has its weakness, he goes on. By selling the most valuable asset, one with presumably the greatest earning power, the chances are reduced that mortgage holders of the less valuable ships will ever get back the money they originally laid out. "Those who have protected themselves," the banker says, "limit the scope for the others."

However, each vessel is a separate entity treated as a separate company. And the mortgage holders on each vessel within one fleet are not the same. Thus, there is great temptation by the creditors of a tanker that can be sold to sell it and get out rather than try to use its earning power to pay not only its own debt but also the debt of other ships under the same flag.

The banks that put together the loan syndicates that financed the tankers' mortages are trying to keep the banks that put up the cash from bolting and selling what can be sold for whatever can be had. The dumping of saleable ships would depress the overall price for vessels and worsen the plight of other mortgage holders. But this obviously is not always possible, particularly with banks new to ship financing.

Some of them, in fact, have begun a legal battle in the United States that could have wide ramifications for the way all medium-term loans are syndicated in the Euromarket. The banks, rather small regional banks new to the Euromarket, had participated in loan syndications organized by European-American Banking Corp. for ships owned by the Colocotronis group.

The Suits

The suits charge that European-American concealed the true financial position of Colocotronis from the banks and misrepresented the arrangements for securing repayment of the principal amount.

United Virginia Bank, suing for $2.5 million, alleged that the charter income from the ship it financed was used to secure other loans made by European-American and that the income was overstated. City National Bank of Detroit, seeking the return of $3.6 million, claimed that the charter income in some of the ships it financed was "diverted" to pay other expenses and debts and that two tankers had no prospect of income at all when the loan was arranged.

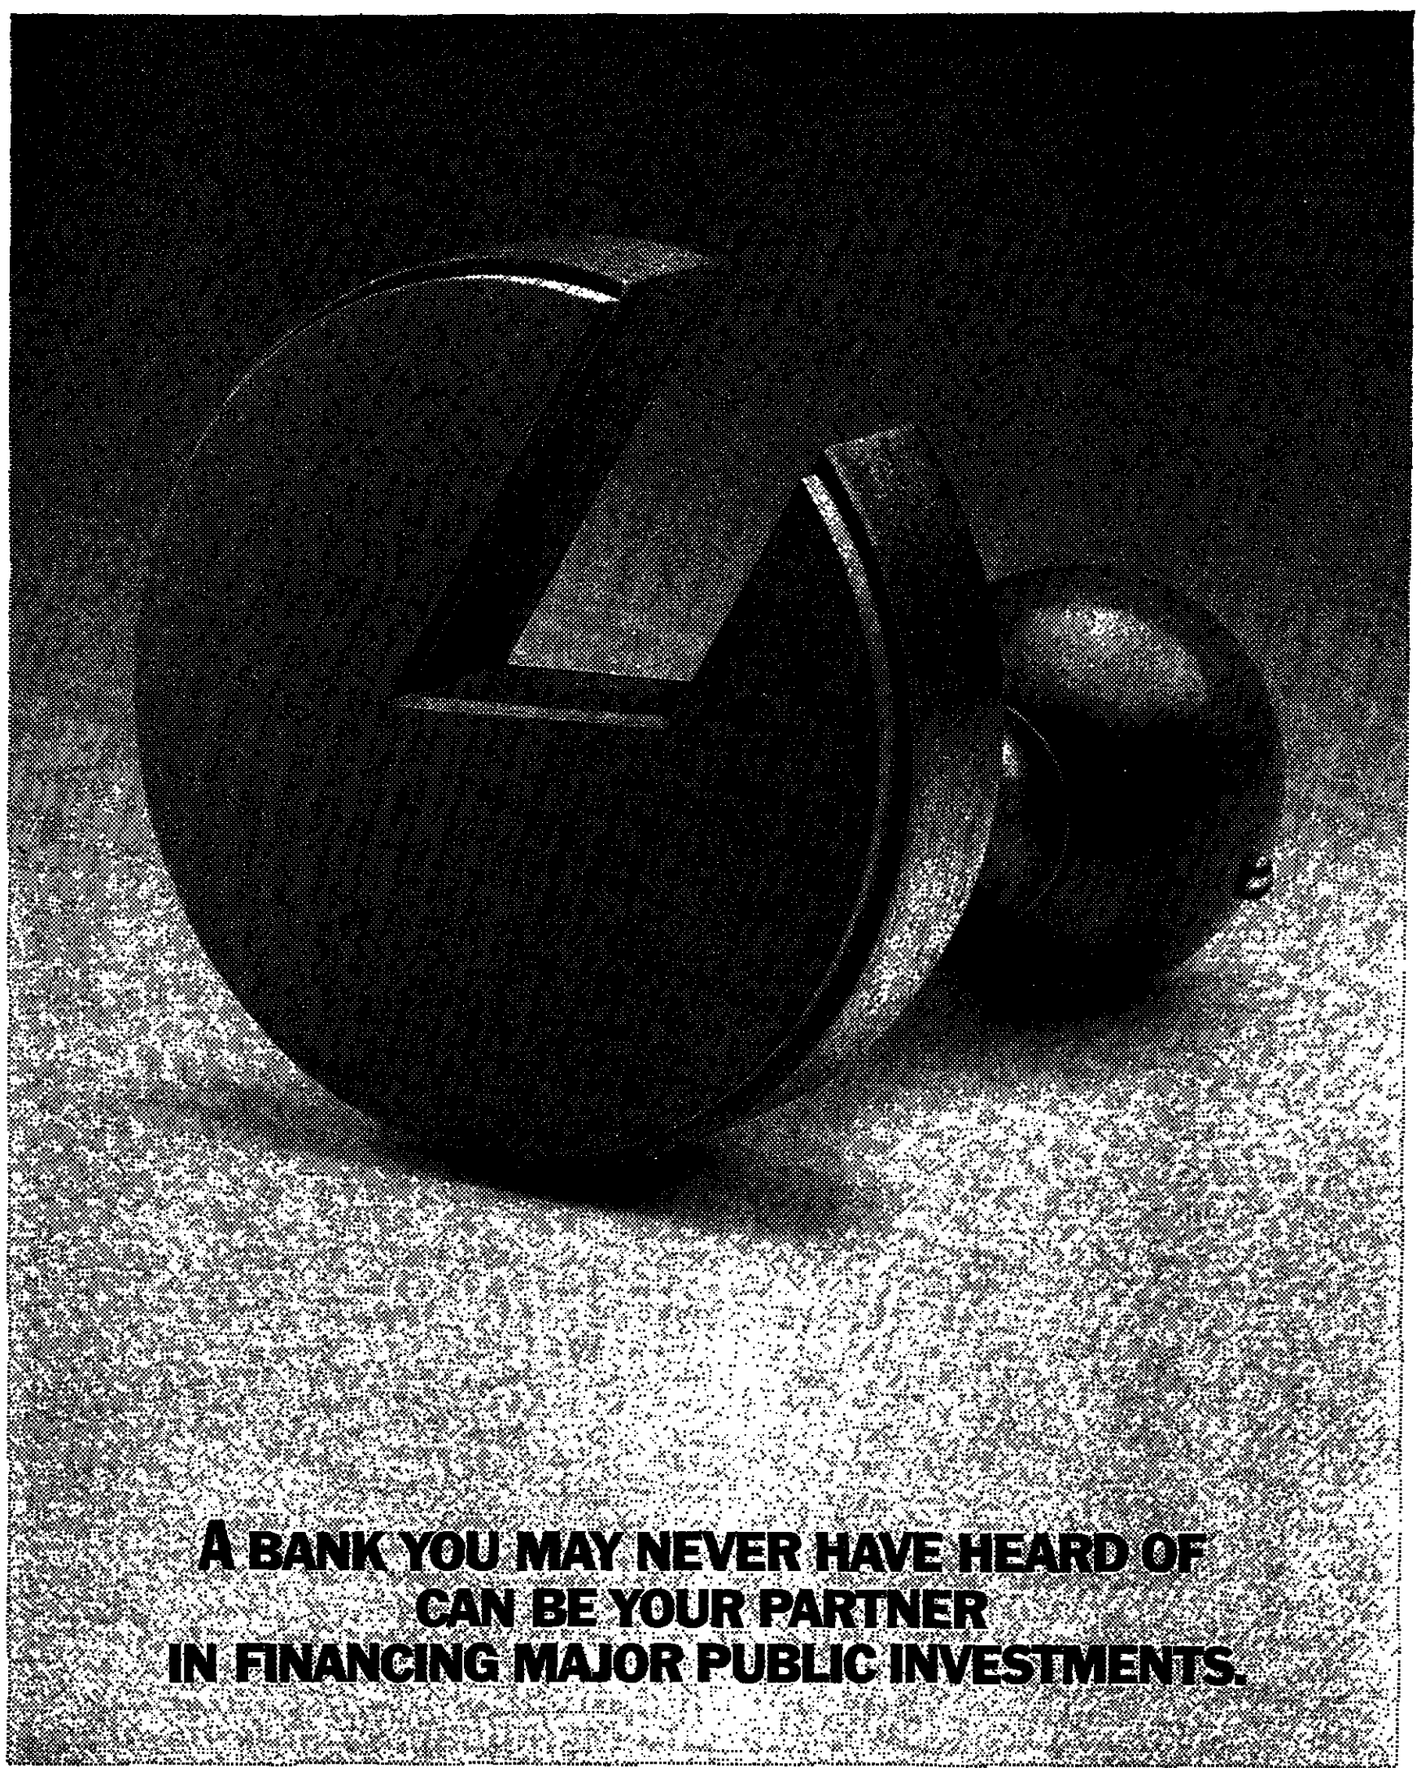
Other banks are seeking equally small amounts: American National Bank & Trust Co. is suing for $1.5 million, First Pennsylvania for $2.5 million, Fidelity Bank for $1.5 million, Republic National Bank for $5.6 million and Texas Commerce Bank for $1.8 million.

The significance of the contest goes far beyond the sums involved and challenges the method by which loan syndications are put together. Basically, the banks claim that the lead bank in soliciting the participation of other banks and circulating the "placement memorandum" detailing the significant financial data, is responsible for the accuracy of the information.

In fact, the typical placement memorandum disavows such responsibility, stating that the lead bank does not vouch for the accuracy and completeness of the document.

The widespread market fiction is that the large banks which regularly lead manage loan syndications are sharing certain pertinent data but that each bank invited to participate in the loan will do its own credit analysis before deciding to join in. But the well-known truth of how loans are syndicated is that a major bank announces that it is syndicating a loan and that hundreds of smaller banks, anxious to put profit-earning assets on their books, jump in simply on the basis of the reputation of the bank leading the loan.

The major banks decry this practice but they also know that the smaller banks do not have the technical staff to do a thorough analysis of all the loan proposals that get circulated.



What the court case will test is whether in fact the lead bank is responsible for the accuracy of the data and whether, in fact, the "memorandum" is a solicitation to buy securities subject to the securities laws of the countries where the banks are domiciled.

European bankers tend to view the issue cynically, asserting that the small banks got caught in a bad loan and are trying to "wriggle out" rather than "swallow their medicine." In addition, Europeans tend to view Americans as "court addicts" always ready to jump into a lawsuit.

But a banker at one of the top U.S. banks admits privately that "the banks have been laying off a lot of stuff with grossly inadequate credit investigation."

"In a highly competitive situation," he says, "banks appear to win business (of lead managing syndicated loans) on the basis of which bank asks the least awkward questions."

Whatever the outcome of the lawsuits, bankers already have the knowledge that they are "using sharper pencils on the documentation."

Not too many people know our name. DG BANK. But we are one of the biggest in West Germany. We're the central bank of a group with more than 19,500 offices. So we cover the Federal Republic like no other banking system.

Those thousands of offices with their millions of depositors put thousands of millions of marks at our disposal. We also raise long-term funds by issuing our own bearer bonds.

As a world-wide commercial bank, we have borrowers in eighty countries. In addition, we offer a wide range of investment banking services, including syndication and Eurobond trading. With international subsidiaries, affiliated banks and representative offices we're a growing force in the world's important financial centers.

There's hardly any project we can't handle. So get in touch with us if you're involved with major public investments.

Profitable, Reliable and Stable

Report from the Sumitomo Bank

Despite the continuing economic pressures in 1975 as Japan began its slow, and still selective, progress toward recovery, the Sumitomo Bank completed its 80th anniversary year with further expanded deposits and increased financial strength.

Expanded Deposits and Loans

Deposits during fiscal 1975 grew 18.6% to ¥7,097,750 million ($23,687 million); loans rose by 11.6% to ¥5,832,381 million ($19,464 million), notwithstanding stricter regulations on the loan volume set by the Bank of Japan. The securities portfolio expanded by 19.9% to ¥1,127,062 million ($3,761 million). Earnings were adversely affected by reduced profit margins, but this was largely compensated by the effectiveness of global operations and the additional funds generated by increased deposits. Net income during fiscal 1975 was ¥23,818 million ($79 million), giving the Sumitomo Bank the highest after-tax profits and earnings per share of any Japanese bank, for the 10th consecutive year.

Improved Banking Services

The bank's emphasis on consumer banking was maintained, resulting in a heartening increase in deposits by individual customers. Housing loans grew by 32.4%. On-line cash deposit machines have been installed in 155 of the 188 domestic branches, providing a complete "automatic teller" system together with the on-line cash dispensers and change makers already in use in all branches.

Worldwide Network

The bank's worldwide network was further improved by the addition of new representative offices in Tehran and Cairo. It now includes eight overseas agencies and branches, seven representative offices, and 15 subsidiaries and affiliates.

Outlook for 1976

While the coming year will be marked by continuing domestic fluctuations and increasing complexity in overseas operations, Sumitomo Bank is determined to remain Japan's most profitable and progressive financial institution, on a basis of full commitment to the interests of society as a whole, and to its shareholders and customers.

The banks can also ...ke into their own investment ...folio portions of the loans ...y arranged. In addition, their ...mercial links give them a ...ferside access to all kinds of ...utional customers who are ...yers of bonds.

...The aim is to offer a one-...p financial services operation, ...ich can offer borrowers not ...ly the widest possible geogra...ical choice of where to float ...an, but also the widest op...s of debt instruments. This ...ans operating not only in the ...d markets, but also in the ...ding sector, arranging short-...m loans if market conditions ...not warrant floating bonds or ...dicating loans among other ...nks if the amount of money ...ded dwarfs what can be rais...in the public bond market.

Major Income

...This is bad news for the investment-merchant banks, whose ...jor income, in addition to ar...nging mergers and acquisitions ...d selling advice, comes from ...e financial deals they structure.

These banks have already been squeezed out of the Eurocredit market, where they once earned big fees for finding the commercial banks willing to participate in loan syndications. The commercial banks figured that as they were the ones to put up the money they should also be the ones to earn the commissions. And now, the commercial banks are threatening to take over the commission-generating end of the Eurobond market.

Clearly, if the investment banks lose this last foothold in the Euromarket, they risk losing credibility with their corporate clients. The Continental banks have already won business away from the investment banks by offering to arrange bigger loans at better terms than the investment banks were willing or able to do.

Investment bankers believe that a lot of the muscle of the Continentals is temporary—due to the high amounts of cash deposits and low demand for short-term bank loans—and as the economic recovery widens they will have less cash disposable to make long-term commitments.

But they also realise they have to compete more forcefully where they can. This comes down to developing "placing power"—finding customers to buy the bonds they manage.

The stakes actually go beyond finding customers for Eurobonds. At some point, the domestic U.S bond market is going to be opened to foreign investors and it is still up for grabs whether the billions of dollars expected to then flow to New York will be channeled through U.S. securities firms or those already set up in New York by the Continental giants.

Up for Grabs

The appetite of European investors for U.S. corporate bonds is estimated to be enormous: They like the companies, they like the economic environment in the United States—and thus the outlook for these firms—and they like the liquidity of the New York market, where buying or selling large holdings can be effected more easily than in the Eurobond market. The rub, of course, is that the interest paid on such domestic issues is subject to a 30-per-cent withholding tax, keeping foreign investors out of the market.

The giant U.S. bond market is partially open to foreign investors in that they can buy tax-free "Yankee" bonds. These bonds, issued by foreign entities, are exempt from the tax. But for the most part, the same issuers sell paper in Europe, where coupons tend to be higher and maturities shorter than in the New York market.

On the other hand, since the removal of the U.S. restrictions on capital outflows in 1974, there have been very few U.S. firms selling paper in the Eurobond market. (Maturities are longer at home, rates are lower and, very importantly, it is now more difficult than in the past for a U.S. firm to sell bonds abroad that are free of the withholding tax.)

But one day the impediments to the free flow of capital will be completely removed, most bankers believe, and securities firms around the world are going to knock on the door of the same 500 top corporations in Europe and the United States seeking to win their business.

"The competition in the coming decade is going to be won by well capitalized, aggressive firms. And it's going to be more of a hardball game," says Arthur Urcinoli, director of international finance at Merrill Lynch.

The surviving firms are going to have to commit big sums to win business and they are going to have the means to sell these commitments to investors.

It is no doubt significant that Merrill Lynch, a powerhouse in the domestic U.S. market, and Union Bank of Switzerland, a rising power in the Eurobond market, see their operations developing the same way. Officials of both firms described in almost identical terms how soundings with several large investors permit them to assess the likely public response to the terms of a new offering. And this, in turn, guides them in determining how much capital to commit to a new issue.

Both see their legions of private clients giving them an edge over the competition in being able to sell off the commitments thus taken.

While investment banks cannot and do not aspire to servicing hordes of individual investors, they clearly are seeking to widen their client base and thus their placing power. One of the keys to forging such a base appears to be a secondary-market capability.

This means "providing liquidity to institutional investors so they can sell existing investments to make room for new issues," says John Hyland, head of the Morgan Stanley Paris office.

"We have to do in the Euromarket what Morgan Stanley did in the United States—convince institutions we could buy existing issues and provide them with the liquidity to buy new issues."

In the trade, this is called a "swap." It means an intimate knowledge of an institution's portfolio, enabling the banker to recommend the sale of old XYZ bonds for a just-issued bond of equal or better quality. The new issue, which is being offered by many banks, is sold and the middleman now has XYZ bonds to sell. These, issued years ago, are not so readily available and finding a buyer for them should, in principle, not be difficult.

"The big orders," Mr. Hyland observes, "go to those who make a market."

Major Brackets

Making a market clearly helps to get ahead in the Eurobond market. Citicorp, for example, started operating in the bond market in 1972 using what is called the "Merrill Lynch approach." This means, in the words of one Citicorper, becoming "such a major force in the distribution of bonds that you are pulled up into the major brackets."

In fact, Citicorp now is a major bracket underwriter. By last year, it had co-managed 18 issues and this year it moved up a notch, becoming a lead manager for three issues to date.

Salomon Brothers is probably the best example of how to succeed fast via a strong secondary-market operation. The big New York firm opened trading here only last March, but it has already co-managed 13 issues and last month emerged as a lead manager—a very fast rise in a short time.

The key to its success is no secret. The firm is willing to take major commitments in new issues, keeping them in inventory if necessary until it can find a buyer. The firm is rumored to have committed between $15 million and $20 million to its London-based trading operations. The buying power of such a commitment is even bigger as Euroclear, one of the market's two clearing systems, offers trading firms up to 90-per-cent credit against bonds placed in the system that are trading at not less than 90 per cent of their face value.

Logical Way

The way one U.S. banker explains it, "Having a role in the secondary market is a logical way to contact the same institutional investors day after day," establishing a working relationship and becoming familiar with the institution's portfolio.

"To distribute in the primary market, you have got to have clients with whom you deal," says Paul Goldschmidt, vice-president of Goldman Sachs. "You have got to commit capital to facilitate transactions . . . and hopefully bring in business." He admits that investment-merchant banks will never have the kind of placing power the universals currently enjoy thanks to their slack loan demand, but, he adds, the universals "have a long way to go to meet the expertise of investment banks."

He believes the natural edge in expertise coupled with an increase in placing power due to secondary market operations should allow the investment-merchant banks to survive the competition with the universals.

The aim, stresses Tim Mortimer, managing director of Blyth Eastman Dillion, "is not making a market, but providing a service to clients."

The "natural" clients of the U.S. banks are the offshore—Bermuda, Cayman Islands, Netherlands Antilles—tax-haven affiliates of U.S. corporations.

Among these are the cash-rich insurance companies that many large U.S. firms have set up. To recapture the huge insurance premiums they pay out annually, many companies have set up insurance vehicles which are run like ordinary insurance companies. All of the corporation's subsidiaries pay insurance premiums to the offshore firm and it lays off part of the risk by re-insuring with established insurance companies. Meanwhile, the premium income is used to build a portfolio and because it is based offshore its operations escape U.S. taxes and restrictions on buying securities not registered with the Securities and Exchange Commission (such as Eurobonds).

A number of U.S. bankers also talk about forging a network with smaller European banks which, it is claimed, have never been served adequately because individually their business appeared to be not enough to merit the effort.

Evidence that there may indeed be a need here is shown by the fact that the smaller private banks of Zurich and Geneva as well as the Swiss cantonal banks have each formed separate groups which are powerful enough to be invited to underwrite new issues whereas previously these individual banks were lucky to be offered bonds to sell.

Beyond these prospective clients are the giant U.S. institutional investors. Their legal limitations to participating in the Eurobond market are twofold: As the bonds are not registered with the SEC, they cannot buy new issues. But they can buy in the secondary market after an issue "has come to rest," which many banks consider to be 90 days after the initial offering.

The second restriction, a self-imposed precaution in some cases and state legislation in others, limits the portion of foreign bond holdings to a fixed percentage of the overall bond portfolio.

Except for Kidder Peabody and White, Weld, which make markets in a very broad array of issues, the U.S. houses in the market and those about to enter focus on the issues in which they participated as underwriters. More broadly, the strategy is to take a view either in types of issues or currency or guarantors.

Bankers Trust International, for example, has carved a niche for itself as a trading specialist in floating rate notes. First Chicago specializes in paper issued by U.K. municipalities. Continental Illinois concentrates its energy on issues denominated in Canadian dollars.

Whatever the specialty, the entry of the Americans into the secondary market is welcomed all around. This end of the market has always been the weakest link, virtually closing up when conditions soured. Today, however, dealers see the increased participation as adding liquidity and a hopeful sign for the future.

One-Way Street

As a Salomon Brothers executive commented, "For really professional dealers, building liquidity in a down market needn't be only a one-way street."

Stanley Ross, managing director of Kidder, Peabody Securities, suggests that "perhaps, with the increased liquidity they will bring to the market, the big upsets will be a thing of the past" and trading will be possible in even a down market.

One immediate result of the stepped-up trading activities is that London's claim to be the capital of the bond market will be enhanced as most of the new trading operations will be based there.

Morgan Stanley, based in Paris, will set up its trading operations in London and shift its four-man syndication team and half of a beefed-up corporate finance department there also. Merrill Lynch, which recently shifted its trading desk from Geneva to London, has already moved most of its corporate finance base from Paris to London. Blyth Eastman Dillon, also based in Paris, also sees London as the logical place to base their trading operations.

Smith Barney, by contrast, will do its trading out of Paris. "We want to keep all of our corporate finance, investment banking, syndication and trading operations under one roof and we want to stay in Paris," a spokesman says. "We'd prefer to be one of a few houses in Paris rather than one of 60 in London."

In addition, he says, "it makes sense to stay away from the London dealers. Being located there would probably encourage a lot of inter-professional dealing, which is not what we want to do. We are not going to become a major factor in the market. We're going to start by making a market in our own issues and then specialize in a sector which makes sense to us." What sector that will be still has not been decided, he adds.

Yamaichi

A leader in Japan.

A growing force in world finance.

EUROMARKET SPECIAL REPORT

Banks Now Govern Creation of International Liquidity,

(Continued from Page 7.)

and Mexico currently account for about half the total outstanding debt that non-oil-exporting developing countries owe the banks—*$31.6 billion out of $59.3 billion.*

In a report to Congress last January, the Treasury said that these countries "should be able to finance their projected deficits and avoid debt-servicing difficulties in 1976. If, however, [these countries] are not able to raise the necessary external finance to cover their current-account deficits, they are capable of adjusting their policies to close balance-of-payments gaps—mainly by lowering growth rates."

But, the report continued, these countries warrant "continued attention since they have large private debts and any debt-management problems could have an adverse impact on private capital markets."

Bond Issues

Brazil has sold almost $300 million worth of bonds to the public since 1973 while Mexico has issued $720 million in the domestic U.S. market as well as in the Eurobond market.

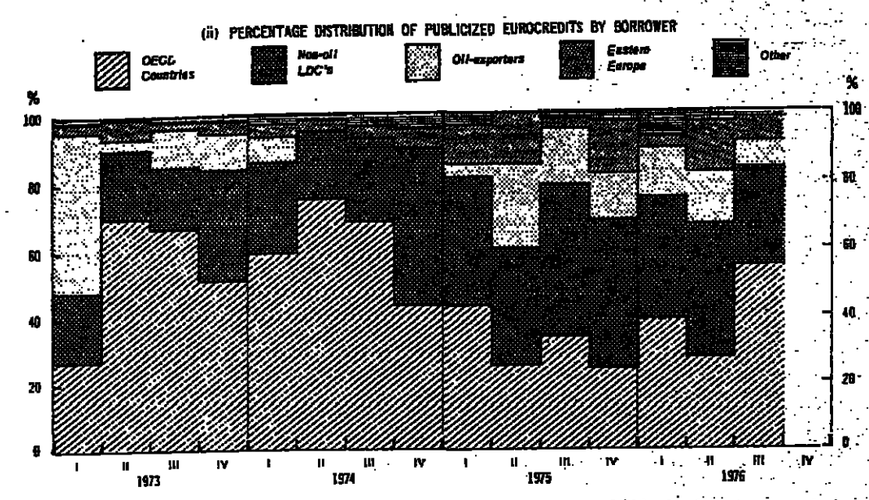
Eight other countries, the report went on, "need to be watched very closely." Argentina, Bolivia, Chile, Peru, Uruguay, Zaire, Zambia and the Philippines—together accounting for about 15 per cent of the outstanding bank debt—"have high debt-service ratios and some have special problems. Some are dependent on a single export product like copper . . . Some face internal problems that limit their policy options. Others are feeling the effects of unwise economic policy decisions."

Eight other countries account for the remaining bulk of the total bank debt of the less-developed countries (LDCs), Thailand, Taiwan, Singapore, Malaysia, Colombia and Morocco, the Treasury says, have low debt-service ratios, a solid cushion of reserves and a continuing inflow of direct foreign investment—which means that they should not have any problems meeting outstanding debts.

Egypt and Israel fall into a special category, since both are big receivers of bilateral official aid enabling them to finance their deficits.

By the end of this year, Morgan Guaranty estimates, the total debt of the non-oil LDCs will have risen to $170 billion and some $70 billion will be owed to the banks. Of an estimated $20-billion increase in bank loans this year, some $12 billion will be used to repay outstanding debt. Another $8 billion or so will go for interest payments.

Morgan projects that in 1977 amortization of existing debt will run at about $14.5 billion and that some $9 billion will be spent on interest payments. Bankers estimate the crunch will start to be felt around the time that the repayment schedules of the older, 10-year debts begin to get bunched up with those of the recent five-year loans, creating a very heavy financial burden in the final years of the decade and the early 1980s.



The debt problem becomes particularly onerous when measured against the expected trade deficits of these countries as a group. In 1973, in the midst of the worldwide commodity boom they ran a deficit of $4.5 billion. But the recession in 1974 cut the demand and the price for these goods and the deficit soared to $22 billion and in 1975 totaled $29 billion.

The projected deficit for this year is $20.5 billion and for next year $18 billion. However, the sputtering economic recovery in the major industrialized states and the prospect for yet another increase in the price of oil make these figures look optimistic. But taken at face value, when the interest payments and amortization of outstanding loans are added in, the less developed countries will have an expected total shortfall of around $42 billion both this year and next. More than half of this financing is expected to be provided through official bilateral and multilateral grants and loans.

The remainder—close to $20 billion this year and next year—will have to come from commercial banks.

To cope with the accelerating debt-service burdens in the next three to five years, the U.S. Treasury says that these countries may "have to accept lower growth rates unless they secure large increases in export earnings and internal savings so as to reduce their reliance on external finance."

But accepting a lower rate of growth, when the growth rate has already been impaired by the worldwide recession, would entail severe economic hardship for the

developing countries and would negate the whole purpose of having started on the debt cycle. The object of the heavy borrowing was to mitigate the impact of the recession and to permit these states to continue to expand and diversify their economies to become self-sufficient.

Therein lies the basis of the frequent calls by officials in these countries for a moratorium on the debt or some kind of rescheduling to give them breathing space.

In private, commercial bankers worry that these states may get together to prepare a collective default. In public, however, bankers and Western government officials insist that this will not happen.

"It is highly unlikely that major borrowers would default on their obligations entirely since a default could well preclude them from future access to international capital markets," Fed chairman Arthur Burns reported to Congress. "In the postwar period there have been a number of occasions in which developing countries have not been able to meet all external debt obligations on schedule. On such occasions there has been some rescheduling of external debts... In such a situation banks have experienced some loss in income, but actual loan losses have been a small fraction of the credits extended to countries rescheduling their debts, since in virtually all cases the borrowing countries have repaid their debts."

The recourse to bank loans was an unfortunate choice because most of these countries could not afford to borrow money at commercial terms. The interest payments were too high and the duration of the loans was too short.

Significantly, there has been only very limited borrowing at the International Monetary Fund beyond what could be tapped automatically. This included some $2.9 billion borrowed under the special "oil facility" and smaller amounts from the buffer stock facility and the fund's compensatory financing of export fluctuations. Few LDCs have sought to draw beyond these because subsequent borrowings would entail increasing supervision by the fund over the direction of domestic economic policy.

The fund itself, in its recently published annual report for 1976, commented:

"In Africa and the Middle East, a high proportion of the non-oil countries attempted throughout 1974 and most of 1975 to maintain the momentum of development programs in the face of adverse shifts in export earnings or to protect domestic consumers against the impact of higher import costs on living standards. With these aims, they followed policies that brought enlarged fiscal deficits, rapid increases in domestic liquidity and aggravation of existing or emerging pressure on prices and external-payments positions."

The Euromarket provided most of the finance to support these policies.

"The figures suggest," said former Bank of Italy governor Guido Carli in a speech to the Bank for International Settlements in June, that "the private banking system took over the functions proper to an official institution possessed of the power to finance balance-of-payments disequilibria."

Noting that the developing countries will need to finance a deficit of some $42.5 billion this year (a $30-billion current-account deficit and $12.5 billion to repay outstanding debts), he said that "if all IMF facilities were activated, international agencies would contribute up to $28 billion towards financing this deficit. Part of the remainder would be covered by export credits; but this would still leave a substantial amount to be met by the international banking system."

The commercial banks, he added, "have shown a greater ability than the official institutions not only to create the necessary liquidity for the development of trade but also to organize its efficient distribution. As a result, the IMF's ability to enforce observance of rules of conduct has diminished. It should be remembered," he said, "that the fund's prescriptive powers derived from its ability to exclude refractory countries from access to conditional credit. As almost all credit is now drawn from other than official sources, the fund's ability to lay down conditions has been correspondingly reduced."

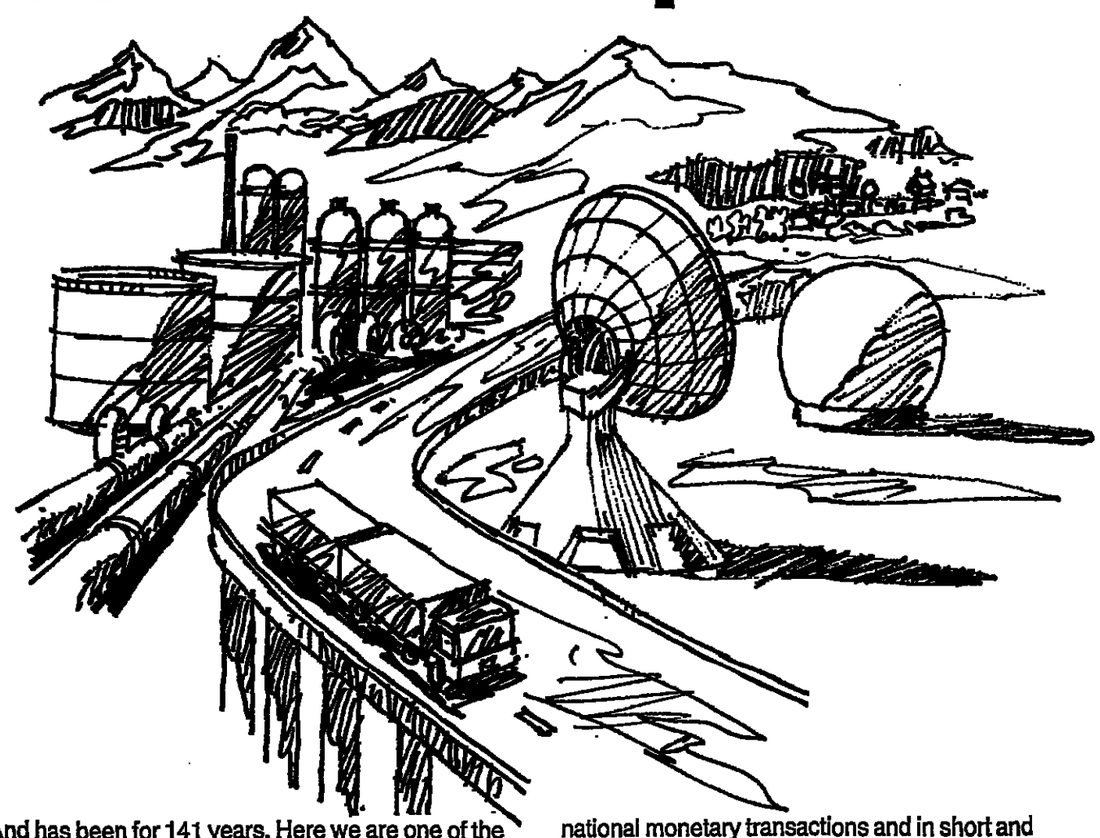
The dilemma that emerges from this situation is that the developing states are loath to deflate their economies in order to finance their debts and w seek to stay outside the gr the IMF.

Commercial banks, on other hand, are afraid of ha become overextended but that to *suddenly* turn on screws would create fina hardship likely to result in defaults they do not want to happen.

This was clearly the situa in the recently negotiated million loan to Peru, when banks, putting up half the t tied their participation to pledge by the government take drastic measures to stab the economy. The loan ag ment calls for a continuous m itoring of the nation's econ policies by the banks—the time that private bankers police a borrower's monetary fiscal policies, a role usu reserved for the IMF.

Unfavorable reactions in and elsewhere to private bank "dictating" policy measu prompted Citicorp vice-chair G.A. Costanzo to remark in interview in Institutional vestor that "I want no par deals with that kind of d pline in the future."

The commercial banks too different tack with Argen whose public sector external is estimated at some $3.5 bil Much of this reportedly falls between now and the end of year. In what bankers priv admit is a "bail out" opera the banks agreed to lend Ar tina $850 million to refinanc debts provided it first applie a loan from the Internati Monetary Fund.



The $300 million IMF obliges Argentina to adhere to austerity plan recommended the IMF experts.

The message bankers say are trying to communicate other developing countries is if they submit to IMF surveill of their economic policies banks will provide the financ help get these countries over hump.

U.S. banks are providing largest single portion of the to Argentina—$500 million—of $850 million coming from b around the world. The la part of the European portio $90 million from West Germ followed by $60 million from banks, $30 million from French, $20 million from bank the Netherlands and $15 mi

Southern Germany is our base of operations.

And has been for 141 years. Here we are one of the largest private commercial banks, with consolitated assets of more than 42 billion DM.
Our 500 branches and our staff of over 10.000 are waiting to serve you in all banking transactions offered by a fullservice bank. And we will introduce you to our market: the suppliers, the buyers, the sellers—the entire market. And if it's partners you are looking for, we have 1,5 million business customers. We will be happy to bring you together with the right one for you and your business.
The HYPO-BANK is a German bank, but it is more than just that: Our subsidiary HYPO-BANK International S.A. in Luxembourg is specialized in international monetary transactions and in short and medium term financing.
We are member of ABECOR, a group formed by seven major European banks in Belgium, England, France, Germany, Netherlands, and Italy, with associated members in Austria and Luxembourg. We have affiliated banks in London, representative offices in Madrid, Teheran, Johannesburg, Sydney, Mexico City, Rio de Janeiro, and—since September 15—in New York. And we maintain a closely connected network of correspondent banks all over the world.
So, consider using HYPO-BANK's services for your German and international business.

EUROMARKET SPECIAL REPORT

A Role Which Was Once the Unique Province of Central Banks

(Continued from preceding page.)

...om the Belgians. The rest is ...ning from banks in Canada ...d Japan.

The terms on all these loans are ...nical: four years at 1 7/8 over ...interbank rate. Participation ...s and other commissions raise ...net cost to Argentina to just ...r 2 1/4 points over the inter...nk rate.

...At present, the banks are ...th willing and eager to lend ...ney. Conditions in the Euro...dit market today are rather ...ilar to those of 1971-72, when ...e Eurobanks first discovered ...ere were credit-worthy borrow...s in developing countries that ...re good risks. Then, as now, ...nks were awash with cash but ...w few loan applications from ...ditional borrowers. The fact ...t the newcomers were willing ...y pay high interest made them ...en more attractive to the banks. ...In 1972, the cost of six-month ...rodollars ranged from a low ...5.3 per cent to a high of 7.6 per ...nt, the lowest these rates had ...en since 1967. Today, the rate ...hovering at just under 6 per ...nt.

LDC Credits

The amount of Eurocurrency ...edits extended to LDCs jumped ...om $300 million in 1970 to $946 ...illion in 1971 to $1.5 billion in ...972 and $4.53 billion in 1973. ...The 14-per-cent increase in ...ans extended in 1974 was a ...action of the 196-per-cent ex...nsion of the previous year. The ...mp was the result of both the ...adrupling of oil prices in late ...73, which cast profound doubts ...the ability of these nations to ...ay their loan , and the li...idity crisis of 1974 following ...e collapse of Bankhaus Herstatt ...West Germany.

But by 1975 Eurobanks had a ...posit inflow of some $20 billion ...om the oil-exporting states ...ed, with the recession in full ...rce and traditional clients not ...eking loans, turned to the only ...stomers they could find. Loans ...LDCs rose 32 per cent that ...ar to $8.3 billion, while credit to ...mmunist countries rose 109 ...r cent, to $2.6 billion.

The developing states were not only the biggest seekers of money, they were also willing to pay a lot more for their loans than other borrowers. While the Soviet Union paid 1 percentage point over the London interbank offered rate (LIBOR) for a $100-million loan, Bolivia and the Philippines paid spreads of up to 2 1/4 points and Gabon, South Korea, Peru and Zambia paid around 2 points over LIBOR for amounts that were mostly significantly below $100 million.

With the banks themselves seeing profits at home squeesed by the recession, the high returns offered on loans to LDCs were unquestionably a major attraction.

Zaire, which has failed to keep up its debt payments to the banks, is a good example of what was happening. According to the World Bank, the copper-rich African nation, with a per-capita income of $140 a year, owed banks $1.27 billion at the end of 1974—almost half of its total outstanding debt of $2.56 billion.

"If there was one international bank network at work here, it was that of First National City Bank" and its affiliates, says a soon-to-be-published report by the Organization for Economic Cooperation and Development on "Borrowing by Developing Countries on the Eurocurrency Market."

The report indicates that questions about Zaire's creditworthiness go beyond the impact of the worldwide recession and the rise in oil prices. It cites lack of control over the budget, overextended external debt, poor performance in meeting its credit obligations and inefficiencies in the system. It quotes bankers as questioning the wisdom of using foreign credits to build a sports stadium or other non-economic projects and reports that bankers "speak of extensive corruption that pervades almost every transaction."

Bluntly Stated

"Given the persistence of the problems outlined," the report asks, "could any [loan] participants have been unaware of them?" Answering its own question, the report states bluntly that "many participating banks have relied on the FNCB (Citibank) evaluation of Zaire's credit-worthiness..."

The report's concluding comments on Zaire are telling and go beyond the specific case at hand:

"There exists a fundamental difference in the attitudes of bankers and of economists in aid agencies toward the role of commercial loans in a country like Zaire. Aggressive bankers find such economists overly cautious, concerned about softening the terms of foreign credit to exclude, almost as a matter of principle, private bank loans. If the country's planners are in a hurry, the international banks, when they are liquid, will be there with the finance.

"Economists are appalled by the short-term view of the bankers that can do more harm than good by funneling funds into a country not organized to manage them well."

"It is a bit hard," the report states, "to sympathize with bankers who by their lending knowingly helped the government ignore the advice of technicians from such institutions as the World Bank or the IMF, yet who later objected when they themselves were harmed by the consequences of Zaire's failure to heed advice, and who then called on those very institutions to bear the burden of recycling petrodollars into countries like Zaire."

For its part, Citibank avers that it is "scaremongers" who have been "hinting darkly that the LDCs' creditors—especially the large banks of the West—faced wholesale rescheduling of debts at best and a frightening default rate at worst" which would result in a financial collapse. In its July issue of Money International, the bank states that "the likelihood of a massive rescheduling of LDC indebtedness is very small, but even if it happened, it would no more trigger another worldwide depression than did the shock of the oil embargo and ensuing price hikes . .

"Today no major country will permit a severe and prolonged contraction of its money stock. Central banks would respond . by increasing the reserves of private banks."

Debt Piling

As for the "persistent pessimist" who argues that avoiding breakdown does not eliminate the possibility of default, the bank says it is unlikely that there will be defaults on a scale "that would be very painful" for particular bank lenders.

As long as the commercial banks go on extending new loans to cover the amortization and interest due on outstanding loans, there will be no risk of default. The question, of course, is how long the banks will go on piling debt on top of debt. The recent scramble by banks to participate in an $800-million loan to Mexico indicates that the time has not yet arrived. "Mexico's recent massive devaluation of the peso has yet to be followed up by the budget and wage policies needed to make the cut a success.)

Nevertheless, the signals are that the time is approaching. Syndicated loans to developing countries in the third quarter were running at an annual rate of less than $6.5 billion, two-thirds of the level recorded in the second quarter. And while maturities and spreads for prime borrowers have moved in their favor, the cost of funds to LDCs has actually gone up.

Although the spread over LIBOR has remained at over 2 points, higher front-end fees (commissions and participation fees) have jacked the effective rates on these loans to between 3 and 3.5 points over the interbank rate.

As long as the banks are liquid, they will continue making loans. The crunch clearly will come when loan demand from the bank's traditional customers picks up, crowding out the developing countries.

To avoid a crisis, says Morgan Guaranty's chief economist, Rimmer de Vries, the developing countries have to work to restore the confidence of lenders. "The only way to bring this about is to force discipline," he says. "These countries have got to work more closely with the IMF" to come up with workable long-term plans to overcome their problems and thereby restore the willingness of bankers to continue making loans.

The burden, he admits, is as much on the banks as on the borrowers. "The banks are preventing the fund from fulfilling its proper role" by providing a too ready access to cash, according to Mr. de Vries.

Beyond that, he says, the United States, West Germany and Japan have "a heavy burden" to stimulate their economies and reduce their current-account surpluses. This would suck in imports of raw materials from the developing states.

Oil Pricing

In addition, "there is a heavy burden on OPEC to be considerate in its pricing of oil." An 8-per-cent increase at the end of this year, he warns, "will have a depressive effect and aggravate financial problems." He maintains that there is no justification for an increase because "the government take of oil has risen faster than the index of world manufactured goods in dollar terms."

"In short," he said, "there has been no erosion in their purchasing power. They can buy more food and manufactured goods, on average, than a year ago."

As for the LDCs, he insists that there is no way they can escape having to make adjustments in the wake of the oil price increase and the world economic slowdown.

"The banks are going to have to provide a lot of dough, and it is in the interest of all that this be done smoothly and that it diminish gradually. The greatest danger," he says, "is that some sudden scare in the market will lead to abrupt termination of bank lending."

IN MILLIONS OF DOLLARS

Debts of East Bloc Countries Worrisome

(Continued from Page 17.)

French, Italian and Japanese banks.

Meanwhile, as the debt continues to grow, Western governments are trying to adopt a systematic approach to their economic relations with Comecon and to answer some of the questions Secretary of State Henry Kissinger raised at the end-June ministerial meeting at the OECD. Among the questions he asked:

- What are the implications of the growing external debt of the Communist countries?
- How can the industrial democracies deal with possible efforts to misuse economic relations for political purposes inimical to their interests?
- How can we ensure reciprocity in trade between market and non-market countries?
- How do we deal with the problem of dumping and other unfair trade practices by countries in which prices need not bear a relation to costs or market forces?

Discussions within the OECD on these questions "have not gone very far, and it's unclear where we go from here," an official says.

Most experts agree that so long as Comecon demand for Western goods remains strong and at least until the recovery in the West gets under way there is not likely to be any harmonization of trade policies among the major industrialized states regarding East European trade or credits.

mezzogiorno

Area: more than 130.000 sq. km.
Population: about 20 million with a
per capita income in 1975 of 2,200 dollars.
Private consumption in the same year: 32 billion dollars.
These are the vital statistics of the Mezzogiorno,
as Southern Italy is called.
The region is an economic and productive reality
that no business interested in locating in Europe
can afford to overlook.
In fact, as an evidence of the interest shown by
the international business community,
the Mezzogiorno counts 277 manufacturing plants set up
with the participation of foreign investors.
Expanding markets, availability and trainability
of labour, incentives, infrastructures;
these are the main inducements
to choosing the Mezzogiorno, as well, of course,
as its ideal geographical position between
the Mediterranean and the European countries.

The Mezzogiorno offers prospective investors
cash grants up to 40 % of fixed investment,
soft loans, corporate tax wavers and
a reduction in the cost of labor.

Further information is available
on request from IASM — Institute for the Assistance
in the Development of Southern Italy —
a non-profit organization set up to promote
industry and tourism in the Mezzogiorno
and to provide consulting aid to companies
already operating there or planning to do so.

If you think big,
no doubt you are already
familiar with one of world's
most potent markets:
Europe.
If so, you should know
Dresdner Bank.

But international trade today is not confined, of course, to any one market or group of markets. It cuts across frontiers in all directions all over the globe – east, west, north and south.
Anywhere in the world where there are markets requiring large scale financing and sophisticated international banking skills, Dresdner Bank is active with a professional team of highly trained and experienced specialists, solidly backed by the vast financing capacity of one of the world's largest and most respected international financial institutions.
With a time tested tradition of successful banking in more than 50 countries dating back over 100 years, Dresdner Bank is well equipped to serve the needs of growing markets worldwide. Dresdner Bank is among the very top banks in Germany, one of the world's most stable and progressive economies whose industrial strength and ability to export form the solid base of Dresdner's international financial capacity. Putting your confidence in Dresdner Bank means putting it in strong, reliable hands. Worldwide.

Branches in Chicago, London, Los Angeles, New York, Singapore, Tokyo, Panama (Deutsch-Südamerikanische Bank).

Representative offices in Asunción, Bahrain, Beirut, Bogotá, Buenos Aires, Cairo, Caracas Istanbul, Johannesburg, La Paz, Lima, Madrid, Mexico, Montevideo, Moscow, Panama, Paris, Quito, Rio de Janeiro, Santiago de Chile, São Paulo, Sidney, Tehran.

EUROMARKET SPECIAL REPORT

The Eurobond Market...

Continued from Page 1.)

tumn or, at latest, by year-end. The accepted wisdom now is that the upturn will occur by the second quarter of next year or, at the latest, by summer. When that happens, of course, the coupons offered on new bonds will also rise. But the shift will not be harmonious. Short-term interest rates have dropped much more sharply than have bond coupons.

The three-month Eurodollar rate, for example, dropped from 10 3/8 per cent in January 1975, to just under 7 per cent by September o around 5 1/2 per cent at present. At the same time, coupons on seven-year bonds fell from 9 1/2 per cent in January to 9 1/4 per cent by September to just under 8 per cent at present.

The expectation, therefore, is that short-term rates will move up further and faster than bond coupons. As the gap closes and the rate structure shifts upward, the price of outstanding bonds will drop. Such an adjustment is the mechanism by which the yields on this paper are brought into line with current rates.

Thus, there will be a double pressure on the banks to dump their bond holdings. On the one hand they will see the cost of future financing climb and on the other the value of their bonds decline.

But the selling pressure may begin even before then. Many banks may not be eager to show such holdings in their year-end financial reports and may get out of the market to avoid having to do so.

Inundation

Regardless of the timing, there seems no doubt that the market at some point will be inundated by a great wave of selling. If past performance is any indicator of future behavior, the market will seize up. New-issue activity will halt amid confusion over where the true market rate lies and the record number of firms now listing themselves as market makers will shrivel as traders withdraw from the secondary market.

Then the prices of outstanding bonds will fall so low as to discourage further selling and to begin attracting bargain-hunting investors. Slowly a newly established rate structure will begin to emerge and activity will begin to pick up.

"But the damage," says one experienced trader, "could be enormous."

Exactly how the coming crunch will alter the structure of the bond market is anybody's guess. But there is no doubt that it will play an important role in deciding the current struggle now going on between the Continental "universal" banks—giant institutions which combine under one roof the functions of commercial and investment bankers—and the U.S. and U.K. investment-merchant banks, which until recently dominated the Eurobond market.

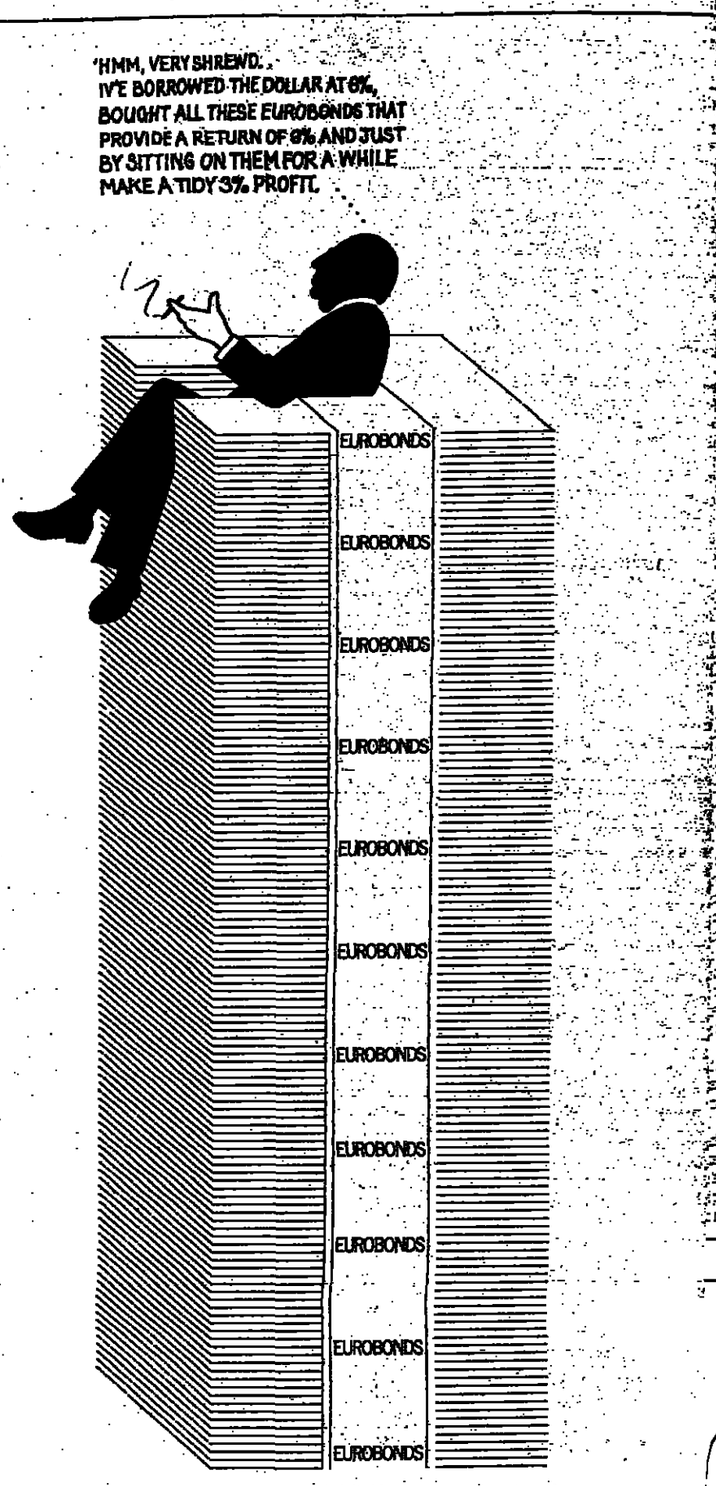
The evidence of the struggle lies in the rankings of banks most active in the market. These so-called "league" tables—of managers and co-managers of new issues—which measure the muscle a bank has with both corporate clients and individual investors, have produced a kaleidoscope of power shifts within the banking community.

Until the beginning of the decade, for example, the tables were dominated by Americans. Morgan was the No. 1 bank and three other U.S. houses were among the top 10 managers and co-managers of new issues.

By 1970, however, the power of the "universals" began to erode the position of the investment-merchant banks and Deutsche Bank moved to the No. 1 slot. By 1973, not a single U.S. bank was among the top 10 issuing houses.

Since then, Deutsche and Kredietbank Luxembourgeoise have vied for the top slot, with Kredietbank on top in 1974 and 1975.

But the preliminary indications for this year show that a new shift is taking place, with the top three Swiss banks now threatening to dominate the list of leading managers and co-managers. (It should be noted that Credit Suisse White Weld objects to being ranked as a Swiss bank, noting that it is a U.K.-based merchant bank of which Credit Suisse owns 40 percent. However, it is a fact that in the year preceding the link with the Swiss bank, White Weld had lost its place among the list of top 10 managers and co-managers.)



The Swiss have always been big sellers of Eurobonds, but they were slow to use this placing power to muscle their way into managing issues. In 1973, only Union Bank of Switzerland was among the top 10 managers as co-managers but by last year the Swiss had moved up to occupy the third through fifth positions.

An Exception

S.G. Warburg has the distinction of being the only merchant bank to hang in among the top 10, demonstrating its expertise in developing its placing power and attracting high-quality borrowers to seek its imprimatur, and all demonstrating the ineffectiveness of the Arab attempt to force other banks to boycott Warburg (and additional institutions).

Long gone from the league tables are the other investment-merchant banks that once dominated the market: Lehman Brothers, Kuhn Loeb, Smith Barney, N.M. Rothschild, First Boston, Goldman Sachs, Hambros, Hill Samuel and Kleinwort Benson. Some were forced out by their reputation for consistently mis-pricing new issues or for having sponsored issues for com-

EUROMARKET SPECIAL REPORT

...Continues to Ride High, With a Record Volume, but a Fall Is Foreseen

(Continued from preceding page)

...nies that went bust. But ...stly they failed to develop ...e placing power necessary to ...ain their position in an ex...anding market.

Until recently, the competition ...r make or stay in the top ...igue was a quiet struggle. But ...w it is quite open. Managing ...issue and putting together a ...dicate of co-managers is a ...ther delicate business. Tradi...n weighs very heavily, in that ...rowers normally use the same ...nk to be lead manager. And ...ce a syndicate has been put ...gether it is rare to see changes ...later issues. The banks form...g the syndicate are mostly ...sen for their placing power ...for their close links to the bor...wer. And changes usually make ...ankers' eyes pop and tongues ...g over the ins and outs of any ...erations.

...ately, there has been a lot of ...e-popping and tongue-wagging ...ng.

Agreement

The recent $300-million loan for ...stralia was the most notable ...ample, if only because the ...anks involved are two of the ...ost important in the market: ...organ Stanley and Deutsche ...ank.

Before the deal, the orderly be...avior in this highly competitive ...arket was extraordinary.

Bankers in private conversation ...gree that Morgan is the premier ...suing house—despite its ranking ...n the league table. The compe...tion speaks enviously of Mor...an's "stable" of clients—a Who's ...ho of the coveted triple-A-rated ...orrowers, mostly American. And ...ey speak admiringly of Mor...an's reputation for setting the ...rms—coupon and issue price—...actly where they should be (as ...idenced by the fact that the ...ice almost never collapses when ...ading starts in the secondary ...arket).

The secret of Morgan's success, ...ys one competitor, is that "they ...n't have a single dummy work...g for them."

Deutsche Bank, by the sheer ...eight of its position in the ...ond ...arket, is the leading contestant ...r the title of premier European ...nk—a claim reinforced by its role as lead manager early this year for the European Economic Community's maiden entry into the market. That issue—$500 million of 3.7-year, 7 1/2-per-cent notes; $300 million of six-year, 8 1/4-per-cent notes, and 500 million DM of seven-year paper carrying a coupon of 7 1/4 per cent—was the largest single financing yet floated on the Eurobond market.

When a new borrower, such as the EEC, comes to the market, there is a fierce scramble among banks for the glory of being lead manager and equally fierce jockeying among banks to be invited as co-managers.

But until this year there was relatively little effort put into winning business away from banks which by tradition were lead managers to particular borrowers. The notable exception to this "gentlemanly" approach was the periodic scavenging of the client lists of banks, like Lehman or N.M. Rothschild, which for one reason or another appeared to be dropping out of the market.

In the eyes of many bankers, however, the Australian business opened a new chapter in competition between banks. Until this issue was floated in September, Morgan had been lead manager for Australia's dollar-denominated Eurobonds—four issues totaling $100 million marketed between 1965 and 1967 here and in the United States simultaneously. Deutsche Bank had managed eight issues denominated in marks totaling just over 1 billion DM (about $325 million) and Morgan had been a co-manager in most of them.

Thus, Deutsche Bank could argue that it had raised more money for Australia in the Eurobond market than Morgan had and that Deutsche Bank, therefore, was Australia's lead bank in Europe.

The deal Deutsche Bank proposed was "aggressive" in that it was for $300 million—about triple the amount of what is considered a large issue in this market—at terms that at the time appeared to be overly generous to the borrower and not so advantageous to investors.

The bank also made it a firm offer—that the deal would be carried out at the conditions it proposed. Normally, banks commit themselves only to make a "best efforts" attempt to market a loan. This leaves them an out to alter the conditions—lowering the principal amount, the coupon or the issue price, or at worst canceling the issue—in case market conditions change during the offering period and investors show no interest in buying the paper.

At present, the universals see themselves as the wave of the future, winning borrowers away from the investment-merchant banks, which are seen becoming 'boutiques' and 'specialists' initiating new concepts such as currency cocktails of one kind or another or grooming new borrowers to tap the public market.

The Division

To make a firm offer, Deutsche Bank committed itself to underwrite nearly $50 million. The three big Swiss banks—Credit Suisse White Weld, Union Bank of Switzerland and Swiss Bank Corp.—were given around $25 million each to underwrite and Amsterdam-Rotterdam Bank and Banque Nationale de Paris agreed to underwrite close to $12 million.

Morgan was offered an underwriting of $12 million and second place on the "tombstones" advertising the placement—that is, ahead of the order dictated by underwriting commitments. But it turned the offer down.

Normally, in a "best efforts" syndication of a bond issue, managers commit themselves to underwrite between 5 and 10 per cent. Considering that issues are rarely for more than $100 million, the figure would normally run between $5 million and $10 million. And the risk here is considerably less, since managers are reasonably certain that the terms will be set at a level designed to attract investors to buy the bonds.

But in Morgan's view, the Australian loan was too big for the market to absorb and the coupons offered on the three-part package of 7, 10 and 15-year paper were too skimp. In its view, the underwriters risked having to sit on bonds that the public would not buy.

As matters turned out, short-term interest rates declined by almost a quarter of a point during the 15-day offering period, making the terms more attractive to investors.

But the episode demonstrated the basic difference between the approach of the "universals" such as Deutsche Bank and investment banks like Morgan. The "universals" can and are willing to take a view about where the market is headed and put their cash on the line.

Investment banks, by contrast, do not take views. They sound out the market to determine what the going terms are and aim to find buyers for all of the bonds.

Obviously, the universals want to find buyers also. But they have a cushion to work against, knowing that they can take the unsold portion onto their trading books while awaiting the opportunity to find buyers.

This gives such banks the power to go out and win business by offering borrowers terms that investment-merchant banks cannot match. Thus, the Kingdom of Denmark dropped Kuhn Loeb and gave the mandate for its business to Union Bank of Switzerland and Norsk Hydro left Hambros for Swiss Bank Corp. because they were offered terms that the investment-merchant banks could not meet. (Hambros maintains that the switch to SBC was not significant in that the loan was really a Swiss placement in dollars.)

At present, the universals see themselves as the wave of the future, winning borrowers away from the investment-merchant banks, which are seen becoming "boutiques" and "specialists" initiating new concepts such as currency cocktails of one kind or another or grooming new borrowers to tap the public market.

"There's no reason for the investment-merchant banks to stop being active," says a banker at one of the universals. "They should be encouraged to find their own specialization tuned to their inventiveness and flexibility and make the most of it."

While happily acknowledging that they are inventive and flexible, the view of their limited role is rejected by the investment-merchant banks still in the market.

Temporary

They view the current domination by the universals as a temporary phenomenon made possible by the low level of short-term interest rates and the weak demand for commercial bank loans. When rates climb and commercial loan demand picks up, they say, the universals will have neither the stomach nor the spare cash to outbid the investment-merchant banks for new business.

"The universals," says one merchant banker, "are due for a bath." He confidently asserts that they are too big and move too slowly to stay in touch with changes in market temperament (the way, he adds, that investment-merchant banks do) and he predicts that they will get caught with big losses on their inventory of bonds when conditions change. "It will have a chastising effect," he adds.

The big mystery is just how much the universals are sitting on.

As an indication of the order of magnitude, Deutsche Bank was carrying on its own books at the end of August 3.11 billion deutsche marks (about $1.3 billion) of bonds and other debt instruments. The overwhelming majority of this amount is unquestionably in domestic German paper issued by the federal government and the states.

Karl Miesel, senior vice-president and syndicate manager at Deutsche Bank, insists that the only paper his bank has taken onto its books as an investment was a portion of the $500 million worth of 3.7-year notes floated for the EEC. "This was the only exception," he says, and "was regarded as a substitute for a bank loan." Without disclosing the amount that the bank took, he adds that Deutsche Bank "was prepared to take more than it did but it wasn't necessary."

But a knowledgeable competitor retorts: "Without any question, Deutsche Bank has substantial sums on its own books. Not only of the three parts of the EEC loan, but also of the Australia and Ontario loans they managed this year."

"The bank," he continues, "made statements in meetings with managers about what it was prepared to do to get an issue completed. It's no secret."

Another bank that is the subject of much rumor is Union Bank of Switzerland.

Competitors allege that it and other Swiss banks owe their placing power to their ability to "stuff" undesirable bonds into the discretionary accounts that the banks manage for clients in far-away places, clients who do not pay close attention to their portfolios. (The really bitter critics go further, saying that the money is often illegally earned and the clients are just happy to have their money in Switzerland and do not worry about how it is invested.)

Swiss bankers, of course, dismiss such comments as "jealous fantasies" of their competitors.

(It should probably be noted for the record that the most reliable banking sources do not hesitate to occasionally bend the truth to score a point against the competition in talking with journalists.)

Armin Mattle, head of securities at Union Bank of Switzerland, acknowledges that his bank runs a "special" portfolio that "can be used to take positions because a contract had to be honored." While refusing to divulge the amount of this portfolio, he says that "out of 10 issues UBS managed in the last year, the portfolio was used only once—and then to a small extent."

Extremes

The portfolio, he adds, is used for all markets, for all currencies and for all types of securities—"but only in extreme circumstances" where, for example, the bank might participate in a transaction "for purely political reasons, or when customers' men say 'no' for their clients but the bank can't say 'no' to the transaction."

As for UBS's own customer's man and his ability to say "no" for his client to a loan managed by UBS, Mr. Mattle insists that the bank's investment department is run independently of the syndication section.

As for loading clients' portfolios with slow-moving bonds, another banker observes: "You stuff at your own peril. You may get away with it once, but you may also lose a customer."

The other reputed source of UBS's placing power is its trading portfolio. The bank, says Mr. Mattle, "has a large trading portfolio. It holds substantial positions, more than the average investment-merchant bank, but it is a trading portfolio and not an investment portfolio."

The strength of UBS, he asserts, is its base of retail customers. "Some banks have unlimited access to funds but not that many customers. And when money gets tight and short-term rates move up closer to long-term rates the banks with customers will ultimately be the strong ones."

Caught in the middle of the competition between banks vying for position as lead manager are the hundreds of smaller banks which make up the underwriting group. Underwriting bonds is a profitable business and assures these banks of getting securities to sell to their clients.

For them, the dominance of the universals is a mixed blessing. They dare not risk refusing to accept an invitation to underwrite an issue—even if the terms are overly aggressive—for they fear that they may never be invited again. They also complain that when the universals have a "hot issue," allotments to the underwriters are small but when the issue is a "dog," allotments are large.

The benefits they see are better prices in the secondary market as the universals use their powerful trading rooms to support the price in deals they have managed (although this is not always the case).

They also see the commitment to support issues in the secondary market as leading to better-quality borrowers tapping the market. The investment-merchant banks, the small banks say, could afford to bring second-rate borrowers to the market because those banks had no commitment to stand by the issue in the after-market.

And a final, perhaps optimistic point, the small banks believe that after the current competition with the investment-merchant banks ends, the universals will set terms more favorable to investors than borrowers because the borrowers will then have less of a choice.

EUROMARKET SPECIAL REPORT

Zaire—The Most Troublesome Debtor in Bankers' Portfolios

PARIS (IHT).—Of all the developing states to have tapped the Euromarket, Zaire is by far the most troublesome to bankers.

According to the latest World Bank data, Zaire's external debt at the end of 1974 totaled $2.56 billion, of which only $1.31 billion had actually been disbursed.

Of the total debt almost half —$1.27 billion—is owed to commercial banks. The bulk of the bank loans was extended to cover exports from the industrialized countries and is secured by guarantees from export-finance agencies such as the Export-Import Bank.

Commercial bankers close to the situation estimate that the unguaranteed portion of the bank debt does not exceed $500 million.

Zaire's problem in repaying this debt is tied to the dramatic swing in the price of copper. Exports of the metal account for more than two-thirds of Zaire's foreign-exchange earnings. After touching an all-time high of $1.50 a pound in late 1973—around the height of Zaire's borrowing—the price of copper collapsed to 54 cents and is now selling at around 57 cents, reflecting the impact of the worldwide recession on industrial demand for primary products.

The price-bust was devastating because Zaire had put all its efforts into developing the mining industry, neglecting such key sectors as agriculture. As a result, the nation which was once a net exporter of agricultural commodities now spends an estimated one-third of its foreign-exchange earnings to import basic foodstuffs.

In June, the major governmental creditors of Zaire laid out the framework for a rescheduling of their loans. According to these guidelines, the debt due in 1975, 1976 and 1977 is to be repaid over the next 10 years. Bilateral negotiations between Zaire and individual countries are now going on to fix specific terms within these guidelines. Early next year, the major creditors will hold another meeting aimed at setting the framework for the rescheduling of the debt falling due in later years.

"There has been no permanent solution," a banker said, "because no one yet has all the data. The government agreement is a stop-gap measure and it will probably be rehaggled every year as more debt comes up for payment."

The portion of the commercial bank loans guaranteed by these governments is automatically rescheduled at the same time. Interest will continue to be paid and the only inconvenience to the banks is that the principal amount will not be repaid according to original expectations.

The banks have been left to their own resources to settle the dispute over the roughly $500 million due them that is not guaranteed. Neither interest nor principal has been paid for many months.

The banks are loath to reschedule the debt. First, they fear the "domino theory" that once one country reschedules many others will immediately follow. Second, they see rescheduling tantamount to default. "Who knows where Zaire is going to be in 10 years time?" asks a commercial banker.

Zaire, he says, is currently earning close to $1 billion a year in foreign exchange—enough to pay its private debt.

At present, bankers are hopeful that this will be done.

In London, last week, they held what an official communiqué called a "final" meeting with officials from Zaire at which a "memorandum of understanding" was signed regarding the service of Zaire's syndicated bank debt. "Its implementation should permit the re-establishment of Zaire's credit in international financial markets," the statement said.

It reportedly spells out a "rigorous" re-ordering of domestic priorities that Zaire is undertaking to put its finances in order. A banker who attended the meeting said that "Zaire has a 50-50 chance of pulling it off."

"They're going to put the technocrats back in power and establish basic financial discipline," he said.

That means, among other things, that "there won't be any more imports of Mercedes or French wine," less spending on arms purchases and some delay in certain development plans.

The 13 banks at the meeting, representing the 106 banks that have participated in Zaire's 18 syndicated loans, agreed to cease pressing Zaire to service its debt and "let it have a chance to carry out its program," the banker said.

He said that the banks expect interest payments on the outstanding debt to start "fairly quickly" and implied that this meant within six months. The arrears on principal repayments are expected to be settled very soon after.

"They have worked out a program where they think they can repay the debt. The program does not involve any new bank credits. It is a continuing policy of in-

ternal reforms." He said that bankers were "surprised" at "rigorous" a policy Zaire prop to follow. "It involves a he a lot of discipline," he ad "They have established a me for other countries to follow."

If it works, he said, commer banks, which provide the s term trade credits that country needs to finance its ports, will be resumed. At pres Zaire has to pay cash on the

If Zaire succeeds, he comm ed, "banks will feel freer to m loans to the developing wo

Just how touchy the banks about the situation in Zaire demonstrated by the laws initiated by Citibank and Be ers Trust against the U.S. Ex Bank and Manufacturers Ha ver Trust Co., which were ning to lend Zaire $88 mi to expand its copper-produ capacity.

The exports proceeds from production were to be used repay the Ex-Im Bank and M ufacturers Hanover as well the $230 million in loans the Ex-Im Bank had previ extended to Zaire.

The suits charged that the Im Bank, a U.S. governm agency, was trying to establi preferential position in the q of leaders—violating Zaire's agreements with the banks no credit would be arranged would rank higher than the loans.

"When a government le uses its power to obtain pr ential treatment for itself a expense of private lenders, lenders will be reluctant to tend further credit to for government borrowers," a bank spokesman said. He s that "such action by one gov ment invites other governm to adopt a similar approach

The suit was settled out court with the Ex-Im B agreeing that it would not to include its outstanding under the agreement.

But bankers insist that does not mean they are willin waive their rights on all loans. A waiver will have sought in each case that inv a superior security.

Arab Banks Are Less Visible, But Money Flow Continues

PARIS (IHT).—"A year ago the bond market was less good and they needed us, today the market is booming and they don't need us," an Arab banker comments in explaining why the Mideast institutions have virtually disappeared from the list of Eurobond co-managers.

"Who wants an extra co-manager when you know a deal is going to go well?" he asks, noting that whatever invitations do come to participate in an issue are never "for any of the hot deals."

He admits, however, that the attempt to force Western banks to apply the Arab boycott against so-called Zionist banks is "an important part of the problem" and that banks prefer to avoid such politics by not inviting Arabs into the management group.

But the Arab money "is there, in increasing amounts, despite the low visibility of Arab institutions."

Another reason for the low visibility, a U.K. banker with close ties to the Mideast says, is that "private investors prefer to deal with Western banks rather than with each other. Many are placing their investments through the big Swiss banks as well as some of the London houses."

Better Spread

The money this banker sees is going "increasingly into floating-rate notes because they offer a better spread than deposits."

The coupons on floating-rate Eurobonds are tied to the six-month deposit rate and are reset twice a year, often at a fixed percentage over the deposit rate. Some $735 million worth of such notes have been sold, accounting for almost 12 per cent of the total volume of dollar-denominated paper sold so far this year.

Another reason for using European banks is that Mideast investors are increasingly drawn to U.S. securities, the U.K. banker observes. "They perceive the United States to be the one country that over the next three generations is likely to honor the rights of private property. And they want to take steps to disguise their ownership through European banks" in case there is ever a war and Arab property is confiscated.

A number of bankers believe that the civil war in Lebanon made the Arabs more aware of the need to diversify their investments. "Enormous sums initially went into Middle East real estate," one banker commented, "but the bloom is off the rose. There is an increased willingness to look for investments outside the Middle East now."

According to the U.S. Treasury, investment of the oil-exporting countries in U.S. stocks and bonds totaled $8 billion in the first eight months of the year—of which $7.2 billion came from Saudi Arabia, Kuwait, the United Arab Emirates and Iran.

The Treasury also reports that it has seen an increasing shift toward common stocks and longer-term debt maturities. In 1974, by contrast, more than 85 per cent of their investments were for maturities of less than one year.

The figures also show that an increasingly larger portion of the investable surplus is going to the United States—35 per cent of the total so far this year compared to 26 per cent for all of 1975 and 20 per cent in 1974.

The Treasury statistics also reveal that a smaller proportion of the overall surplus of the oil-exporting states is going into the Euromarket—18.9 per cent of the total during the first six months of the year compared to 20.7 per cent during all of last year.

But bankers maintain this is not a true reflection of money flows out of the Mideast. The U.S. statistics represent investment of official surpluses whereas an increasing amount of wealth is now in the hands of private individuals, they say, and their money is increasingly coming into the Eurobond market. Even the official investments, they add, are increasing in the bond market as increasingly more money is shifted out of the deposit market into longer-term investments.

Arab bankers are still hopeful that an "Arab-dollar" bond market can be created. There have been about 10 such issues —mostly for Japanese borrowers —already floated but almost all of this paper has bounced back to the Eurobond market. In addition, there have been a number of issues floated that were denominated in Kuwaiti dinar. Arab bankers believe that as a secondary market for these KD issues develops a dollar-bond market will also evolve.

"A lot of things can be done in the Mideast that can't be done in Europe," comments one enthusiast. Noting that South Korean, Turkish and Yugoslav borrowers have tapped the KD market, he estimates that developing countries such as Mexico, Brazil, Singapore and Malaysia would find a ready market for their bonds denominated in dollars.

One indication that a bond market may be emerging is the just completed $50-million, five-year issue floated by the European Investment Bank which was managed by an all-Arab syndicate. Among the co-managers were two institutions which never before participated in bond issues—Qatar National Bank and Riyad Bank Ltd., in which the Saudi Arabian Monetary Authority holds a large stake.

Rothschild Seeks Comeback in the Bond Market

PARIS (IHT).—The last Eurobond N.M. Rothschild & Sons brought to market as lead manager was in November 1974.

The combination of the Arab boycott against the so-called Zionist banks coupled with the unenviable reputation of mispricing the issues it had managed, appeared to kill whatever hope the merchant bank had of recapturing its former leading role in the market.

But two years, three chairmen and many middle-level heads later, Rothschild is now "consciously trying to re-establish our position."

"The demise" of Rothschild was only "in visibility," says John Loudon, director of the international division. "There was no demise at all in profits." (Asked for figures, he says that "the bank is a private bank, we never disclose profit figures.")

Nevertheless, he says that "in retrospect, it was a mistake" to pull out of the Eurobond market. "We thought the boycott problems would be greater than they were and in 1974-75 changed emphasis.

"We built up our international business, boosted our operations in New York and the Far East, opened offices in South America to get more funds under management. And we were extremely successful. We have more funds under management today than in the heyday of the early 1970s when we were in top place" among managers of Eurobonds.

At the same time the bank built up its trade investments and moved into North Sea financing. And now, Mr. Loudon says, "we are actively going out to get back into the bond market—and we will get back in.

"In retrospect, what we should have done was to keep on the road when no new issues were being done. The anticipated effects of the boycott on our ability to lead and co-manage issues was wrong—Warburg proved it was a wrong decision.

"We're a new team now," he says alluding to the re-organizations begun by Lord Rothschild when he took over chairmanship of the bank in April 1974 and completed by Evelyn de Rothschild, who took over last April.

We have little to do with retail banking... but we surely know international finance.

This is not so difficult to understand when you realize that Deutsche Girozentrale -Deutsche Kommunalbank- is unlike most other banks.

Headquartered in Frankfurt/Main and in Berlin, DGZ is one of Germany's largest banks, yet has no outside branches. Free from the heavy day-to-day demands of retail banking, DGZ's teams of financial engineers are free to concentrate their energies on the specific and large-scale needs of the public sector and industrial clientele.

DGZ is a Banker's Bank within the German Savings Banks Organization, the sole member institute on a federal level.

It is this central role which enables DGZ to play such a pre-eminent part in wholesale lending with particular emphasis on syndication of DM fixed rate loans under its lead management.

Supplementing its traditional leading role in the domestic issue business, the Bank has in recent years asserted its importance as lead manager and co-manager of international Euro-issues, having already established its position as underwriter of practically all Eurobond issues.

Add to this a wholly-owned subsidiary in Luxembourg, the Deutsche Girozentrale International S.A., which – complemented by expert foreign exchange dealers – plays a key role in the Euro-DM market, and is active in the Eurocredit sector.

Along With Republican Defections

lios Old Democratic Coalition Was Key for Carter

By Robert Reinhold

NEW YORK (NYT).—Jimmy Carter, in the final analysis, won the presidency by holding together the basic elements of the old Democratic coalition, bringing back many of those who had strayed in recent years and stopping away at enough independent-minded Republicans to compile a slim margin over President Ford.

Fundamentally, the result reflected the classic partisan and social-class divisions known to U.S. voters of a generation ago. The volatile election boiled down to a contest between incumbency and partisanship, and ultimately party loyalty prevailed to the Democrat's advantage.

But Mr. Carter was apparently able to retain enough of his base as an iconoclastic independent to make substantial gains in some traditionally Republican segments of the electorate—such as the white Protestants—as well as draw back many of those who have strayed from the Democratic party in recent years, including Southerners and conservative Democrats. Surveys suggest that had Hubert Humphrey of Minnesota run instead of Mr. Carter, President Ford probably would have won last Tuesday.

From interviews with tens of thousands of voters sampled by CBS News as they emerged from the voting booths across the country, the following are some of the major factors that contributed to Mr. Carter's edge in the popular vote:

• The major effort for the Democratic ticket by organized labor apparently succeeded. President Ford led by 52 to 48 per cent among the three-quarters of the voters in the survey who come from nonunion households. But the Democrat's 61-to-38 margin among those from union backgrounds was enough to tip the balance.

• Mr. Carter's 5-to-1 advantage among blacks may well have been crucial. Mr. Ford probably would have won in an all-white United States, by 51 to 48. Although Mr. Carter's margin among blacks, a group he carefully courted, was a little higher than average for a Democratic candidate, he did not do as well as Sen. George McGovern of South Dakota did four years ago or Sen. Humphrey in 1968.

• The presence of Sen. Walter Mondale of Minnesota on the ticket as the vice-presidential candidate, along with Mr. Carter's performance in the debates, seems to have helped offset voter doubts and misgivings about Mr. Carter as a person. The many voters who cited the vice-presidential choice as a major factor in casting their votes went overwhelmingly for the Democratic ticket.

Independent Vote

• Mr. Ford was unable to pile up enough of a lead among the growing independent segment of the electorate, which is crucial to any Republican because Democrats outnumber Republicans by 2 to 1. The President won only 51 per cent of the independent vote, while previous Republican candidates have received an average of 61 per cent since 1952. Republicans have needed about two-thirds of the independents to win in recent years.

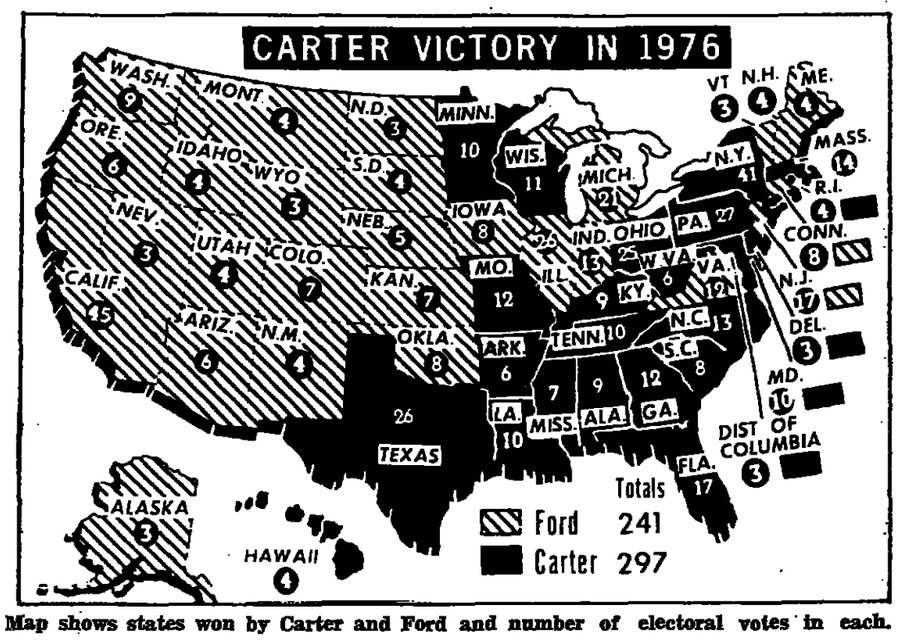
• Mr. Ford, who campaigned on the assertion that he had restored faith in government, clearly managed to snatch that issue from Mr. Carter. Half of all voters said it was a major issue in their minds, and Mr. Ford won, 51 to 49, among them.

However, a survey conducted by The New York Times and CBS News in the final days of the campaign found that the electorate was dividing sharply along partisan issue lines, and this may have overcome Mr. Ford's slight advantage on the "trust" issue.

• The Democrats who defected to Richard Nixon in 1972 returned in droves. Six of every ten such Democrats voted for Mr. Carter, along with 90 per cent of the McGovern Democrats. At the same time, one-quarter of the Republicans who said they had voted for former Gov. Ronald Reagan of California in the primaries defected to Mr. Carter.

• Mr. Carter did extraordinarily well, 55 to 44 per cent, among voters between the ages of 22 and 29, while losing the 18-to-21-year-old vote. Just why this should be so is not clear, but a possibility is that the younger voters' political attitudes were shaped during the years of protest against the Vietnam War.

While a Democratic presidential candidate can normally expect to do well among such traditionally Democratic groups as blue-collar workers, liberals, Catholics and the like, the real question is how well, because the old Franklin Roosevelt coalition has been shrinking in recent years with growing affluence and suburbanization.



The answer is that Mr. Carter did about average with regular Democrats—not spectacularly well, not badly. He won 79 per cent of the Democratic vote, the average performance of Democrats since 1952. But he won 48 per cent of the independents, 10 points higher than average.

The return to old partisan alignments, forecast in pre-election polls by The New York Times and CBS News, emerged clearly in the union vote. Mr. Carter won 61 per cent of that vote, about average for Democrats over the years but much better than the 46 per cent won by Sen. McGovern four years ago.

The power of organized labor is illustrated by the fact that Mr. Carter won 63 per cent of the blue-collar workers' vote if they were unionized, but only 54 per cent if they were not. Overall, the Georgian won 59 per cent of the blue-collar vote, about average, but much better than the 43 per cent captured by Sen. McGovern.

Among Catholics, another basic pillar of Democratic strength but a matter of special worry to Mr. Carter during the campaign because of his own Southern Baptist religion and the abortion issue, there was some evidence of weakness. Fifty-four per cent of Catholics voted for him, about 4 points lower than average even if the vote for John Kennedy, the only Catholic president, is excluded.

Mr. Carter succeeded in gaining support in groups that normally tend to vote Republican. For example, he did better among professional and managerial people than any Democrat in the last quarter century except Lyndon Johnson. He won 43 per cent of this vote, still a minority but better than the 38-per-cent average for Democrats over the years. Similarly, he won 50 per cent of the vote of other white-collar workers, as compared with a 43-per-cent average in past years.

Map shows states won by Carter and Ford and number of electoral votes in each.

Retiring Majority Leader

Just Plain Mike' Bids Farewell to Montanans

By Grace Lichtenstein

MISSOULA, Mont. (NYT).—"It was 45 years ago that a girl from Butte married a miner from here and since that time we've had a very eventful life," the lean, 73-year-old man said in typical matter-of-fact manner at a Democratic dinner the other night.

The former miner is known in Washington and around the world as Sen. Mike Mansfield, the majority leader of the United States Senate. But in Billings and Butte, Great Falls, Helena and here, he is "Senator Mike," just plain Mike, the man who did more to put the vast empty spaces of Montana on the map than perhaps anyone since Lewis and Clark.

In a touching yet dry-eyed series of pre-election dinners and recently, Sen. Mansfield, now retiring after 34 years in office, said farewell to his constituents around the state. Even when it was all over, one had the feeling he was relieved that everyone would finally stop making such a fuss.

Everyone claimed to know Sen. Mansfield intimately. His face looks like a preliminary study for Charles Russell sculpture but reveals little. He is a man of few sentences, of emotions kept carefully in check, of quiet dignity, few pretentions. That is probably why Montana residents adore him. He is very much a mirror of his people.

Hearty Handshake

And so, on each stop of his journey, they turned out to give him a hearty handshake, but not that mushy sentimental stuff. Thank you.

"We're sure you won't change your mind."

"Nope."

"We'll miss you."

"Thanks."

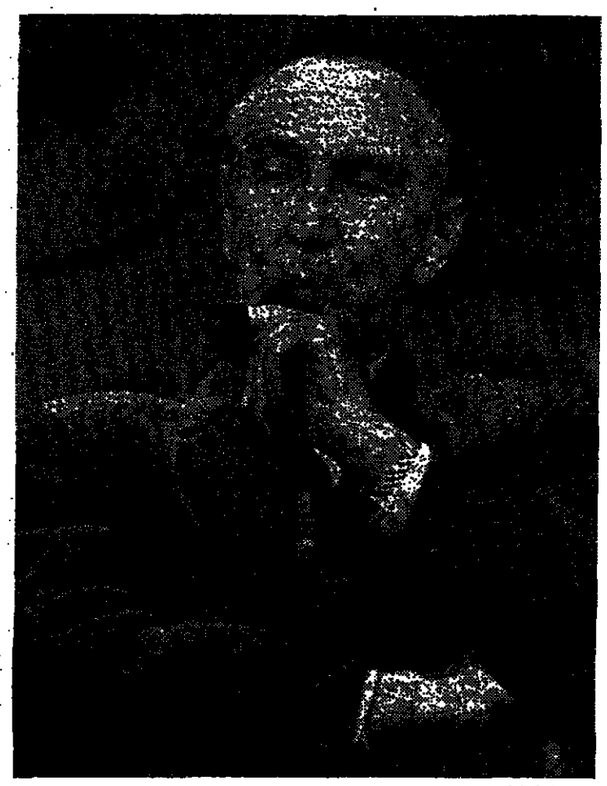
"Enjoy your retirement."

"We will."

Nevertheless, like the copper baron who once made Butte "the richest hill on earth," there were deep complex feelings lying below the surface.

Maureen, the senator's wife, talked a little about those feelings between puffs of a cigarette in the cavernous Finlen Hotel in Butte, her home town. "Butte is very sad," she said of the city where once 10,000 miners worked underground on each shift, but where unemployment now hovers around 14 per cent. "It's all gone now. They used to call it the two hits town because you couldn't buy anything for less than 25 cents. It was a real man's town. They had a redlight district, dozens of bars, open gambling, but there are also too many widows because of the mine accidents."

At a breakfast, the senator recalled that in the Depression, Maureen, a schoolteacher, persuaded him to give up mining and go to college, even though he had never gone past the eighth grade.



On the way to Mrs. Mansfield's home parish, the Roman Catholic Church of the Immaculate Conception, the senator detoured to look at some of the reminders of their youth.

"Look at the highlands, dear," he said, pointing out the car window at a snow-powdered mountain. "Your father had a gold claim there, didn't he?"

The car turned up a street lined with timbered homes that had seen better days. At the end, abruptly, stood the hulk of a mine shaft. "There's the Anselmo," the senator said in a tone bordering on awe. He was silent for a minute. Then he turned to his wife: "Just about where that fence is was where your house used to be." He fell silent again.

As the car turned up another block, Mrs. Mansfield pointed to still another house. "It was bombed once during a strike," she said matter of factly, as if the labor wars that made Butte a symbol of the class struggle in the Western United States had been part of everyone's childhood.

Sunday night, the Mansfields' eventful life was reviewed in a series of slides shown at a dinner at the University of Montana. The senator, a professor of Far Eastern history, has been on leave for three decades, and the school's president noted ruefully that Sen. Mansfield had not yet accepted an offer to return there to teach. (He tells everyone he intends to "loaf," although there are rumors he might become ambassador to China.)

Associated Press.

Sen. Mike Mansfield of Montana.

Brain Trustee

The slides were narrated by James Rowe, a Butte native who went to Washington to become one of President Franklin Roosevelt's "brain trust." The slides showed the former miner and his wife with five different presidents.

When he got to Missoula, Sen. Mansfield had been on the road for five days, stoically enduring testimonials and gray roast beef dinners at every stop. But as he left a church dinner Sunday afternoon to go to a dressy reception at the university president's house, he suddenly turned to a visitor and said in his clipped, Gary Cooperish delivery: "Now we're going to what you might call a joint. But I was going there long before I was a senator, and they've been good to me."

With that, he strolled comfortably into the Oxford Café, a smoky lunchcounter with a long bar, a pool table and a crowd of very un-university patrons.

Nobody made a fuss. They just came over, singly and in pairs, to say hello. Sen. Mansfield sipped a cup of coffee. Eventually, one of the regulars gave him a plain envelope that had been tucked into the side of the cash register.

"Fellow was in a couple of days ago. Said he thought you might be passing through Missoula, so he left this," the man said.

It was a personal note from a blind veteran. How did he know where to leave it? "Guess he knows me pretty well," the majority leader said. With no further explanation, he strolled out to endure one last testimonial.

In Contrast to Ford's Noninterventionist Policy

Carter Is Expected to Be an Economic Activist

By Leonard Silk

NEW YORK (NYT).—The ascendancy of Jimmy Carter to the presidency will bring with it a transformation of U.S. economic policy from caution and passivity toward greater experimentation and activism.

Although the specifics of the new economic policy will emerge only gradually—and, on many matters, exist only as a gleam in the eye of Mr. Carter or his advisers—there appears to be little doubt that a Carter administration will approach economic and social problems in a far more interventionist way.

President Ford sought to reduce the role of government in the economy. His doctrine, as expressed by a critic in the Carter camp, was, "spend less, do less, think small."

Mr. Ford believed that the main wish of the U.S. electorate was "to get government off its back and out of its pocket."

Awareness

An awareness of the strength of that public attitude was anything but foreign to Mr. Carter. The first part of his campaign for the presidential nomination was based upon it.

But Mr. Carter won the election as a result of his perception of an even stronger desire on the part of a majority of the voters, especially workers and members of the lower income groups, to get rid of the intense problems of unemployment, inflation and the social ills, ranging from urban decay to crime to labor unrest, that feed on prolonged economic stagnation.

The most sensitive of Mr. Ford's advisers recognized in the final hours of the campaign that the administration had projected too passive and negative an image on economic and social matters. William Seidman, Mr. Ford's White House political-economic adviser, said on Election Day that a new Ford administration would doubtless put more money into programs to ease the job problems of minority groups and other disadvantaged people.

Yet even Mr. Seidman said that the Ford administration would wait to see whether the recovery picked up speed next year. Mr. Ford's top economic advisers, Secretary of the Treasury William Simon and Alan Greenspan, chairman of the Council of Economic Advisers, maintained until the last that the economy was still in a healthy recovery and that next year it would be stronger. They contended that housing would soon be back to normal, that capital spending would pick up next year and that consumers would recover their appetites as inflation continued to moderate.

Less Hopeful

But Mr. Carter's advisers are less hopeful. Indeed many of them believe that the economy needs stronger stimulus if it is to avoid the danger of higher unemployment and an aborting of the recovery.

There was one major worry that troubled Mr. Ford's top advisers in the last days before the election—that of a looming international financial crisis. Their concern was that nations running huge balance-of-payments deficits—which may be exacerbated by a coming oil-price increase—would be unable to borrow more money from private sources and would be driven to default on their already huge loans. Mr. Simon is projecting a $50-billion deficit among oil-importing countries for next year.

However, the administration does not believe that it should bail out the debtor countries, any more than it wanted to bail out New York City. Mr. Seidman said: "We must not let the sinking ones drag us under. Simon's approach is the same as his philosophy on New York City—don't help people too soon, but wait till they make a plan to get out of trouble themselves, before you help them."

Both in the domestic and the international areas, Mr. Carter's advisers think this philosophy is not only dangerous but a way of prolonging or exacerbating crises.

A key Carter adviser on international economics, Prof. Richard Cooper of Yale University, thinks the United States must be prepared to take a "positive attitude" on the question of external debts.

Import Cuts

He holds that for all countries to try to "adjust" their imports downward, in order to meet payments deficits, as Mr. Simon appears to recommend, would be to slash the markets for other countries' exports and give the world economy a heavy shock.

"Mr. Simon," Prof. Cooper said, "is ignoring the adding-up problem. There is no way for the oil-importing countries to simply adjust to an OPEC [Organization of Petroleum Exporting Countries] surplus of $50 billion."

On the domestic front, a Carter administration seems certain to be more activist in both "macroeconomics" (overall fiscal and monetary policy to deal with the economy as a whole) and "microeconomics" (specific programs to deal with specific problems, such as joblessness, cost-push pressures of industry, urban decay, mass transit, health care and welfare reform).

But the painful and delicate job that Mr. Carter and his aides face is how to deal with all such problems within a noninflationary budget. Their problem will be how to phase in programs that they regard as urgent and how to get rid of programs that they regard as wasteful or of lower priority.

Mr. Carter will be in the fortunate position of working with a Congress controlled by his own party, and the fireworks and flak that hampered White House-congressional relations under both Presidents Richard Nixon and Gerald Ford will be gone.

Procedures

Yet Congress has its new budget procedures, and Mr. Carter himself comes in with the hope of being regarded as a relative conservative, or for that matter as a tax-cutter.

Mr. Carter did not promise a tax cut during the campaign, as did Mr. Ford, for next year. But his advisers, worried about the economy's slowdown, seem likely to push for one soon.

They will seek fiscal flexibility in order to keep the economy from falling into recession or, later on, to restrain any superboom.

Mr. Carter has given indications that he means to listen to his experts on such matters. In the final throes of the campaign when Mr. Ford said he would make a tax cut next year his "No. 1 priority," Mr. Carter sent an urgent call for a poll of his economic advisers to determine how he should respond. He took their advice, which was that it would not be responsible for him to promise a tax cut until the budget and economic situation clarified.

If Mr. Carter is to pursue the spending programs he regards as crucial and still achieve a balanced budget by the end of his term, as he has promised, he recognizes that he must be careful about giving away too much money through tax reduction. Mr. Carter also has promised tax reform, and knows that he must reserve some tax reduction to lubricate the reform.

Mr. Carter's highest priority will doubtless be, as John Kennedy's was in 1961, to "get the country moving again."

Mr. Carter and his men believe that economic growth and higher employment are the great solvent in the United States for social and psychological problems. They contend that it will also be good for business to have more steam in the economy's boiler. They insist that the price of greater production, investment and employment need not be more inflation, provided that overall policies are prudent and that inflation is curbed by specific pressures on prices and wages.

Although it will take months—perhaps even a couple of years—to mobilize and fully mount this new economic offensive, Mr. Carter's job of putting together a general staff and overall strategy to deal with the nation's economy is already well under way.

Modest Gains for Women Recorded in U.S. Elections

By Constance K. D'auVin

WASHINGTON (IHT).—Feminists felt discouraged after last Tuesday's election results were in and women officeholders had made only slight national gains. There are still no women in the Senate and though 54 women ran for House seats, their strength will decline from the present 19 to 18 in the new House.

Also discouraging was the fact that many of the races were close. Two could not be finally decided until Thursday.

On the state level, women scored only 6 wins out of 19 tries for statewide offices, such as governor, lieutenant governor, secretary of state and state treasurer. It was only in the contests for state legislature seats that feminists seemed satisfied with the modest gains that women made.

"We are making slow but steady progress in state legislatures," said Betsey Wright of the National Women's Education Fund. The fund is part of a women's coalition that distributed about $93,000 to female candidates this year. "Women doubled the number of seats they held between 1969 and 1975," she said.

The trend is continuing, with a 10-per-cent increase in the number of seats won this year. Women, who make up 51.3 per cent of the population, now hold 9.1 per cent of all state legislative offices. There are a total of 7,565 such seats in the 50 states and the two major parties nominated 1,262 women candidates this year.

Governor

Dixy Lee Ray, former head of the Atomic Energy Commission, gained the most impressive office this year by winning election as Democratic governor of Washington. She joins the only other woman governor, Ella Grasso of Connecticut, in being the only woman to win a governorship on her own, without having succeeded her husband to office. In Vermont, Democrat Stella Hackel lost the gubernatorial race to Republican opponent Richard Snelling.

The only woman who ran for the Senate this year, Democrat Gloria Schaffer, failed to beat incumbent Republican Lowell Weicker of Connecticut. The last woman to serve as a senator was Republican Margaret Chase Smith, who lost her 1972 campaign because of her age. She had served in Congress since 1940 and was 74 years old.

All 18 women who sought reelection to the House won. New York Democrat Shirley Chisholm was elected to her fifth term. Sources close to the House Democratic Caucus said she could be its next chairman. If so, she would be the first woman or black to chair the organization that enforces party discipline in the House.

Democrat Leonor Sullivan retired from Missouri's 3d Congressional District.

ERA Boosted

Feminists are hoping that the positive results of the two big tests of the Equal Rights Amendment movement in Colorado and Massachusetts will help it nationally. In a Massachusetts referendum, voters approved a state ERA. But the big psychological boost was the Colorado referendum because it was a proposed repeal of the state ERA which was adopted in 1972. In both states, ERA won by a 60-40 margin.

Fredi Wechsler of the National Women's Political Caucus felt the vote would be "a tremendous help in boosting the appeal of the ERA. These are voters who have lived with a state ERA for two years and have upheld it resoundingly," she said.

Two congressional races—one involving no women candidates—were watched closely by women's rights groups. Two Democratic members of Congress up for reelection this year were married two years ago—Rep. Martha Keys of Kansas and Rep. Andrew Jacobs of Indiana. In Kansas, a strong drive to defeat Rep. Keys was conducted on the ground that she could not promote Kansans' interests while married to an Indiana congressman. The issue was thought to have been reponsible for making her race the closest of any of the incumbents. It apparently had no effect on her husband's campaign. Both were re-elected.

lections Put Diverse New Talents on the U.S. Political Stage

By John M. Goshko

SHINGTON (WP).—A Harvard professor with an gift for florid oratory, a ruthless looter of corrupt politicians, a man who walked on surface of the moon—these some of the new faces apfly thrust to the forefront politics by elections last

every general election, a ber of the familiar figures the political scene give way newcomers. Some new arwill be relatively unnoticed broadly, but some will become political stars of tomorrow those whose every word and ement are recorded by the media and duly marked by electorate.

Some will achieve this status since the offices they have automatically give them erful leverage in the interof the political process. ers will become stars through sheer force of their peralities and ideas.

Among the Republicans, what to be the brightest new face ngs to James Thompson, 46, won the governorship of ois. By beating Chicago or Richard Daley's Demoatic machine, Mr. Thompson ediately became one of the men to will figure prominently in culation about the Republican nominee for president in 1980.

In Illinois, Mr. Thompson is known as "Big Jim." He is 6 feet 6, but it is also a nickname that seems to fit well with the image of sober moral rectitude and integrity that he projected throughout his campaign and that he has promised to bring to the governor's office.

Behind the image is Mr. Thompson's almost legendary reputation as a former U.S. attorney who successfully prosecuted several Illinois politicians associated with the Daley machine.

Agnew Case

Mr. Thompson also took part in the 1973 federal investigation of Spiro Agnew, then the Republican vice-president. It was he who, after examining the government's evidence against Agnew, told reporters, "The man is a crook, no question about it."

Another bright new face for the Republicans is that of Richard Lugar, 44, elected senator from Indiana. As a former mayor of Indianapolis, he is expected to give the Senate's Republican delegation a dimension in which it traditionally has been somewhat thin—expertise in the problems of the big cities.

In fact, Mr. Lugar's biggest liability during the campaign was having to live down a reputation as "President Nixon's favorite mayor." The boyish-looking Mr. Lugar turned the trick by convincing Indiana voters that he is an intelligent, competent and earnest spokesman for moderate Republicanism.

If anything, he impressed many political observers as perhaps a bit too earnest. They note that the former Rhodes scholar was so serious-minded and scholarly in his approach to the campaign that he sometimes seemed to be trying to overwhelm voters with voluminous recitations of economic data—a tendency that could blight in potential for making himself better known on the national scene.

In contrast to Mr. Lugar's soberness, one of his apparent new Democratic colleagues, Daniel Moynihan, will come bouncing into the Senate from New York with a flamboyant reputation as a political "Renaissance man."

Behind it is 49-year-old "Pat" Moynihan's multisided career as a Harvard University professor, a writer on governmental and sociological questions and a Washington jack-of-all-trades whose government experience has included stints as a White House aide to Richard Nixon, ambassador to the United Nations and to India and service in the administration of Democratic Presidents John Kennedy and Lyndon Johnson.

Along the way, Mr. Moynihan's tendency toward outspokenness has made him a frequent magnet for controversy. At different times, he has antagonized the black community through his unorthodox views on civil rights and won strong support among Jewish voters for his spirited defense of Israel in the UN.

In the Senate, Mr. Moynihan is expected to be a centrist Democrat. But he is also sure to make himself stand out in the crowd with his flair for the dramatic and his fondness for a baroque oratorical style peppered with quotations from obscure philosophers.

Vote-Getter

Republican John Danforth, elected a senator from Missouri, is only 40 but has established himself as one of the most powerful Republican vote-getters in his state's history.

Mr. Danforth is a lawyer and minister as well as an heir to the Ralston-Purina cereal fortune. Despite his wealth, his previous service as Missouri's attorney general brought him a reputation as a strong consumer and environmental advocate. In the Senate, he could emerge as a strong new voice for liberal Republicanism.

Another potentially noteworthy 40-year-old entering the Senate is James Sasser of Tennessee. He staged an upset victory by capitalizing on his image as a progressive young Southern Democrat cut from exactly the same bolt as Jimmy Carter.

Although a shade more conservative than Mr. Carter in some of his views, Mr. Sasser is sure to draw attention because of his resemblance, both politically and physically, to the Democratic president-elect. It could make him a leading spokesman in the Senate for "the new South."

Mr. Sasser seems to be keenly aware of this possibility. He tied his candidacy so closely to Mr. Carter's that he joked on the stump about not wanting to hold Mr. Carter's coattails. Instead, he said, he wanted to get inside the coat.

Probably the most unusual background of any of the new faces belongs to Harrison Schmitt, 41, elected a Republican senator from New Mexico. A former astronaut, he is the only civilian to have walked on the moon.

If his campaign is any indication, Mr. Schmitt's Senate career could be unique. He eschewed many of the traditional issues to present himself to voters as a man interested primarily in such technological problems as desalting water and providing rural electricity from commercial fuel cells.

City Investing's income climbs sharply in 3rd quarter of 1976

All of City Investing Company's businesses — manufacturing, housing and insurance — showed gains during the third quarter of 1976. Our insurance business was particularly strong, a sign that the company's underwriting activities have clearly rebounded. Here are some specifics:

Net income more than doubles

City Investing's third-quarter 1976 net income rose to $15.1 million, more than double the $7.3 million *for the same period last year.*

Primary net income per share was $.54 in 1976 compared to $.17 in last year's third quarter.

Total revenues for the third quarter rose to $649.7 million vs. $554.5 million for the third quarter of 1975 — an increase of 17%.

15% gain in manufacturing

Third-quarter pretax operating income of City Investing's *domestic* manufacturing activities rose 15% to $13.8 million compared to $11.9 million in 1975. The company's air-conditioning, container, and magazine printing operations continued to perform strongly, while the company's refrigeration operation reported a small loss.

City Investing's *international* manufacturing operations showed a 27% gain in pretax income in the third quarter. Income rose to $4.8 million from $3.8 million, after absorbing currency losses caused by devaluation of the Mexican peso.

24% gain in housing

City Investing's housing activities continued to rebound in the third period. Pretax income rose 24% *to $7.5 million from the $6.0 million* reported in 1975. Single-family home sales and mobile home shipments were both ahead of last year's figures.

Income from our budget motel operation is at record levels.

275% gain in insurance

The Company's third-quarter pretax income from insurance and financial activities rose to $15.2 million from $4.1 million in 1975 — an increase of 275%.

Property and casualty insurance underwriting losses dropped to $5.2 million compared to the $15 million loss in last year's third period, and the $13.5 million loss in the second quarter of 1976.

Property and casualty investment income rose 4% to $17.3 *million from* $16.6 million in last year's third quarter.

Strong performances were reported by the life insurance and savings and loan operations.

The positive impact of premium rate increases, lower rates of inflation, and the significantly improved cash flow in our insurance operations all indicate that underwriting activities will continue to improve.

These conditions, plus *continued gains in our manufacturing* and housing operations, provide for a very favorable outlook for this year and into 1977.

Financial Highlights (In Thousands)	9 months ended Sept. 30, 1976	Sept. 30, 1975
Total Revenues	$1,834,957	$1,582,653
Operating Income from Continuing Operations	35,052	16,964
Net Income	32,098	27,830
Primary Earnings Per Share		
Net Income	.98	.79
Average Shares	20,643	20,549
Total Assets	$4,176,672	$3,928,007

Sincerely,

Geo. T. Scharffenberger
Chairman and Chief Executive Officer

500 YEARS OF WATCHMAKING HISTORY SET THE SCENE FOR PULSAR. SINCE PULSAR THE ONLY REVOLUTION IS PULSAR.

To-day, "science fantasy" reaches your wrist: The new Pulsar with calculator and memory.

After the Master Time *Computer, the watch will* never be the same again. And nor will the calculator! Here you have a mini-computer, a veritable bank of information on your wrist.
The Pulsar displays the second, *the minute, the hour, the date* and the month.
And when you switch to its calculator, you control a fantastic instrument, programmed for all arithmetic operations, equipped with a "*memory*", *providing answers* in six large red figures on the screen of your watch!

Pulsar (watch) with Calculator! Addition... subtraction... multiplication... division... key for calculating percentages, profit margins etc... Continuous calculations and memory!

The facts that count

The module
Invented and patented by Pulsar, this Master Time Computer incorporates integrated circuits containing the equivalent of over *4,500 transistors.*

Its "quartz"
Each Pulsar watch is endowed with a specially selected, stabilized quartz, guaranteeing a frequency of *oscillation* of 32,768 impulses per second. Pulsar precision ultimately results from a marriage in which the "quartz" and the integrated circuit are skilfully matched to work in perfect harmony.

Its precision
Virtually absolute precision: 5 seconds per month, one minute in the whole year — here one is touching the limits of functional perfection.

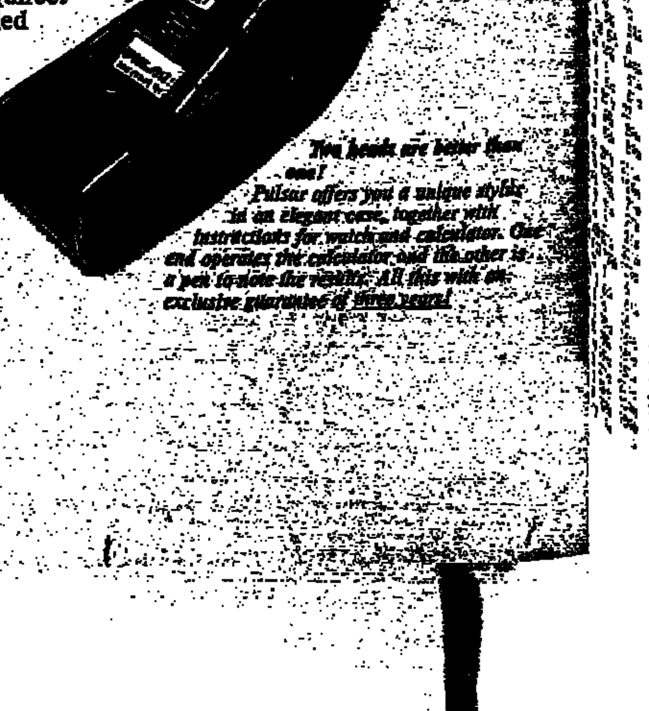
Its calendar
Its memory is programmed to distinguish between 30, 31 and 28-day months. Only once every four years do you need to correct it for leap year.

The calculator
The display screen has six digits, *representing a calculating capacity* up to 12 digits (i.e. 100 milliards, or one hundred thousand million). When the total exceeds six digits, an overflow dot lights up on the left; the floating decimal point then indicates the answer in millions, only the first six significant figures of the answer being displayed.

Its memory
You can store a figure in the memory for later reference. The contents of the memory can be changed (direct addition or subtraction) recalled or erased.

The electro-luminescent display
The Pulsar light-emitting diodes are renowned for their reliability and longevity. These solid-state lamps would still shine at 80% of their full power... even if you were to wear your Pulsar for 100 years!

Power source
With an average use of 25 time readouts and 25 calculations per day, the four RW42 mini-cells provide enough power to keep your Pulsar in action for at least a year.



Solid state
Pulsar is a watch free from the tribulations of mechanical movements. No more moving parts, so no wear, no oil, no maintenance nor costly repairs.

Water-resistance
With no mechanical parts or crown, and with a sealed glass the computer of your Pulsar with calculator is protected from dust and water by a special urethane shield.
(The calculator is not, however, intended for aquatic sports!)

Shock-resistance
The module of your Pulsar is a "brain" capable of shrugging off any shock encountered in day-to-day life.

Anti-magnetism
If your Pulsar should happen to be exposed to a powerful magnetic field, it will suffer no lasting ill effects. No need to have it demagnetized — *simply reset it.*

World Service
All these facts enable Pulsar to offer an exceptional service, issuing each watch with a three-year guarantee!

PULSAR

Uncertainties About U.S. Policies Take Some Steam Out of Market

By Carl Gewirtz

ARIS, Nov. 7 (IHT).—The ...ining acceleration of the ... money supply and un...inty about policy shifts that ...yet-to-be-formed Carter ad...istration is likely to make ...ed the buoyancy of the Euro...t market last week.

...st bankers profess to see ...hing on the immediate horizon ...justify any profound reap...isal of the outlook. Banks ...ain extremely liquid, demand ... loans is low and this is not ...ected to change abruptly. ...rt-term interest rates may ...e around but with economic ...wth in all the major in...trialised countries below par, ...bankers see little danger of ...sudden increase in the cost of ...ey.

For the syndicated bank-loan ...rket, these conditions are ex...ted to result in a lowering ...the spreads banks demand over ...inter-bank rate. Prime bor...ers now pay banks just over ...percentage point above the ...er-bank rate and this is seen ...ining to just under 1 point ...admission that it is now ...borrowers' market with the ...ks less able than before to ...ate terms. This is already ...dent in some of the recent ...ns concluded. However, bank...s indicate that they will be ...remely reluctant about ex...ding the life of these loans ...ond the five to seven years ...w current.

By contrast, they see condi...ns in the bond market be...ming much more favorable to ...rrowers.

10-Year Range

Coupons for prime names could ...ily slip by a further quarter ...a point, they believe. While they expect that it will remain difficult to float issues for 15 years, they see an increasing number marketed in the 10-year range. And many of these will be so-called "bullets," which provide for no early amortization and are redeemed in one operation at final maturity.

New Zealand, for example, is currently offering $100 million of 10-year "bullets" (if the price falls below par a purchase fund will operate to redeem up to 2 per cent of the issue in the first two years and 1 per cent in the next two years which would cut the average life to below 10 years) and a coupon of 8 1/4 per cent. The coupon is the lowest this year for straight 10-year debt and is 1 1/4 points below what a prime borrower had to pay in January.

Demand for this issue is reported to be already double the amount on offer and by the time the subscription period ends, managers believe it may be three times oversubscribed. Such demand would normally warrant either an increase in the principal amount or a cut in the coupon, or both. But the managers are agonizing over how real the demand is and are not yet sure they will make any adjustments. Some bankers, who say they have genuine retail demand for the bonds, warn that their clients will drop out of the issue if the coupon is cut.

Measured against recent issues, a cut in the coupon would be aggressive. Quebec Hydro's 8 1/2s of '86, sold at par, are trading at 99 bid-99 1/2 asked for a yield to maturity at the mid-price of 8.61 per cent.

And Canadian National Railway's 8 3/8s are trading at a mid-price of par. The demand for this issue was so heavy that managers not only reduced the coupon from the 8 1/2 per cent initially indicated but raised the amount to $85 million from $75 million.

But the $40-million loan for France's port authority, Ports Autonomes, guaranteed by the government, did less well. The 15-year bonds carried a 9-per-cent coupon and were sold at a discount of 99, raising the yield to maturity to 9.12 per cent.

Bankers offered three explanations for the poor reception: a diminishing enthusiasm for French government paper, dislike of the 15-year maturity and a coupon that was not sufficiently generous to overcome either of these drawbacks.

The only other 10-year straight-debt on offer is a $20-million loan for Sodra Skogsagarna, a Swedish forestry-products company, carrying a coupon of 9 1/4 per cent. A sinking fund will reduce the average life of this loan to 7 1/2 years.

At the short end of the fixed-rate market, OKI Electric Industry Co. of Japan, carrying the guarantee of Fuji Bank, is seek-

The World Economic Scene

Election of Carter Seen as No Great Change

By Thomas E. Mullaney

NEW YORK, Nov. 7 (NYT).—The country's financial markets took their lumps—briefly. New York's municipal bonds, however, found new favor. Labor was gleeful and so were the minorities. But the business and economic community shrugged it off as no great sea change.

Those were the immediate reactions following last Tuesday's narrow election of a former naval officer and Southern farmer-businessman, Jimmy Carter, as the 39th president of the United States.

One of the nation's and the world's major uncertainties was thus finally removed, though big questions remain on how the amiable, low-key Georgian will cope with the United States' worrisome economic difficulties when he begins to look at them from the vantage point of the White House next January.

While there has been no notable reaction abroad to the outcome of this country's national election, the whole world obviously has a big stake in the new course to be navigated in Washington the next four years.

In this increasingly interdependent world, the economic policies and philosophy pursued by the Western world's industrial leader have broad impact around the globe.

Although the President-elect is largely unknown beyond the nation's own borders, he brings the promise of activism with new people and new ideas to the increasingly complex array of international problems.

Mammoth Problems

Even more than the United States itself, most of the Western world has been beset with mammoth economic and political problems that call for greater attention here and elsewhere. America's partners have been hungering for new directions, fresh initiatives, inspiration and leadership from one of their principal economic fountainheads.

The general perception is that, as president, Mr. Carter will embrace somewhat more stimulative programs than his predecessor—a development that offers greater hope for stagnant economies everywhere if it can be kept within noninflationary bounds.

There can be no valid conclusion, however, on the future administration's policies until his cabinet, his staff and his nominees for a raft of agency jobs have been selected, installed and presented with the issues as they exist next January.

What the Carter administration does and how it proceeds must obviously await the unfolding of economic and political events in the next two months or so. An economy that seems sluggish in November may be more vibrant—or less so—after the turn of the year.

Tax Cut Promised

President-elect Carter showed his awareness of that fact when, in his first full-scale post-election news conference Thursday night, he promised a tax cut early next year if the nation's economy has not regained its vigor by that time. He said that it "would be heavily oriented toward the lower-payroll level."

In any event, one of the first things on his agenda when he takes residence in Washington is almost certain to be a program to reduce unemployment, particularly among the young and the minority groups, redeeming one of his principal campaign pledges.

Although the most recent economic data were discouraging enough to contribute to the defeat of President Ford, the consensus in the business and economic world is that significant improvement lies ahead. The unknowns are: How much and how soon?

One day after Mr. Carter's tax pledge, the Ford administration had to serve up some additional adverse economic news when it issued the monthly report on unemployment. It showed the jobless rate riding up to 7.9 per cent in October, while the total number of people at work declined slightly from its record height.

That unhappy statistic followed by a day the disclosure that wholesale prices in the U.S. economy had taken another sharp jump upward for the second month in a row—up 0.6 per cent. An even sharper rise (1 per cent)

(Continued on Page 29, Col. 1)

New York Stock Market

NEW YORK, Nov. 7 (NYT).—The stock market cast a negative, although possibly tentative, vote against President-elect Jimmy Carter last week.

On Wednesday—the first session following the election—the Dow Jones industrial average slumped nearly 10 points. On Thursday, when investors took a second look at the economic prospects surrounding the incoming Democratic administration, the Dow bounced back nearly 4 points.

Then came Friday's steep slide, when the blue-chip average lost more than 17 points—its third biggest decline of this year—to close at 943.07. This meant a net setback of 21.86 points for the week.

"It was a Carterized market," the research chief of one Wall Street house declared.

But other analysts noted that the stock market also was wrestling with the deep-seated realities of a slowing economy. On Friday, for example, the Labor Department reported that the nation's unemployment rate rose to 7.9 per cent in October from 7.8 per cent a month earlier.

The market had its bright spots, however. General Motors rose to its highest price so far in 1976 after directors declared a record $3-a-share year-end dividend on the common stock of the country's largest company.

Precious-metal stocks moved counter to the general downtrend on Friday. Even that session's decline, however, was marked more by a pulling back of bids to buy stock than concentrated selling pressure. Volume for the abbreviated, four-session week totaled 80.21 million shares, compared with the previous week's 78.81 million shares.

But the municipal sector of the fixed-income market, in effect, cast its vote for President-elect Carter in securities of the Municipal Assistance Corporation. His election assured a public sellout for a new issue of $256 million in MAC bonds with a tax-free yield of 10 1/4 per cent.

(Continued on Page 28, Col. 1.)

It's your business to know your growth objectives.

It's our business to help you achieve them.

With $13 billion in assets, Nippon Fudosan Bank is one of Japan's leading long-term credit banks. As such, we've provided financing and advice to practically every major industrial and commercial concern in the country. This experience makes us well qualified to help you achieve your growth objectives. In Japan. And worldwide.

Whether you're building a park or a petrochemical plant, seeking a joint venture partner or looking for financial assistance on world money markets, whatever your growth needs, you can rely on NFB's in-depth expertise to help you meet them.

(Continued from Page 27)

…15 million for five years …1/4 per cent. This compares …the 8 per cent that Nippon …an Bank just paid for $25 …n for five years. Fudosan's …ng was increased $5 million …the coupon was lowered …the 8 1/4 per cent initially …ted. Although OKI is …nteed by a bank, managers …e loan said that it is normal …commercial credit to carry …upon a quarter of a point …the terms a bank could …r itself.

Italian Issue

…etti's attempt to reopen …ixed-rate market to Italian …wers—the first since 1973 …received apathetically. Its …million of five-year notes …ing a coupon of 8 3/4 per …were sold at 99 1/2, raising …ield to maturity to 8.89 per

…e floating-rate note sector is …active. United Overseas …of Singapore is seeking …million for five years. The …n will be set at a quarter …point over the inter-bank …but is guaranteed to never …below 7 per cent.

This is the first floating note to be issued by an Asian borrower outside of Japan and it is the first Singapore paper to be sold without the guarantee of the government. The 7-per-cent minimum is considered by some bankers to be too skimpy.

The Spanish, by contrast, have won a warm reception from investors by offering minimum guarantees of 7 1/4 per cent. With the six-month interbank rate currently at just under 6 per cent, the standard offering of a quarter over inter-bank would put the rate near 6 1/4 per cent. The 7 1/4-per-cent minimum, therefore, means investors get a full point advantage by buying the Spanish loans. Banco Popular Espanol, like Banco de Vizcaya just before it, is seeking $25 million for five years. The next to tap the market is expected to be Banco Urquijo, which reportedly will seek $40 million.

But the Oesterreichische Kontrollbank showed that high minimums are not needed to win approval. Investors gobbled up its $40 million of six-year notes, which pay either a quarter over inter-bank or a minimum of 6 1/2 per cent.

The only other public issue on offer is a 15-year convertible for Ricoh Co. of Japan, which is seeking $15 million with a coupon of 6 1/4 per cent. The poor performance of the recent convertibles from other Japanese firms, however, makes marketing the Ricoh paper difficult. Sanyo Electric's 6 1/4s are trading at 94 3/4-96 3/4 and Sumitomo Metal's 6s are at 94 1/2-96 1/2.

Also being marketed is a private placement for Uddevellauarvet, guaranteed by Sweden. The $30-million, seven-year paper is being sold at par with a semi-annual coupon of 7 3/4 per cent.

Canadian Sector

Canada Trust Mortgage Co. is opening a new chapter in the Canadian-dollar sector of the market that bankers hope will revive investor enthusiasm for this type of paper. It is selling $Can. 25 million of five-year notes which are insured by the Canadian Deposit Insurance Corp., a government agency, for up to $Can. 20,000 per investor. Canada Trust is the nation's second target trust company and its deposits and financial instruments are covered by the insurance plan—provided the life of the instruments is not more than five years.

This indirect government guarantee, bankers believe, enables the borrower to tap the market at less than what it would have to pay if it borrowed without it—estimated at 9 1/2 to 9 3/4 per cent—but above what the government itself might have to pay—thought to be in the area of 8 3/4 per cent. Thus, Canada Trust Mortgage is offering a coupon of 9 1/4 per cent. Bankers expect that other qualified Canadian institutions will seek to follow the example.

Also on offer are $Can. 30 million of seven-year notes for Nova Scotia carrying a coupon of 9 per cent. Pancanadian Petroleum increased the principal amount of its loan to $Can. 35 million from $Can. 25 million. The seven-year notes carried a coupon of 9 3/4 per cent but were sold at a premium of 100 1/2, cutting the yield to 9.65 per cent.

In the deutsche-mark sector, interest rates are falling as investors compete to buy the limited amount of DM issues on offer. Hardly a month goes by now without one or more borrowers dropping out of the line, reducing the amount of paper coming on offer, because of the continuing appreciation of the mark.

North Sea Gas is scheduled to announce a 100-million-DM, 12-year loan tomorrow. The 12-year maturity has been seen only twice before this year, and in both previous issues (Norway and Norpipe) the coupon was 8 per cent. With Norpipe currently yielding 7 5/8 per cent to average life, North Sea Gas is not expected to offer more than 7 3/4 per cent and may try to squeeze by with 7 1/2 per cent.

Short-dated paper, meanwhile, is being offered at levels equal to the lows set earlier this year. Girozentrale und Bank der Oesterreichischen sold 60 million DM of five-year notes carrying a 7-per-cent coupon at par and is trading at 100 1/2. A companion 40 million DM of seven-year, 7 1/4-per-cent notes were sold at 99 1/2 and are trading at par.

Among the recent private placements, Arbed sold 60 million DM of seven-year notes at 99 1/2 with a coupon of 7 3/4 per cent and is now trading at 100 1/2. Banque Européenne de Crédit sold 60 million DM of seven-year notes at par with a coupon of 7 1/2 per cent and is trading at 100 1/4.

Still to be priced is the 100-million-DM, seven-year loan for Pemex, expected to carry a coupon of 8 3/4 per cent.

In the Euroguilder market, Amsterdam-Rotterdam Bank sold 75 million guilders of five-year notes with a coupon of 9 1/4 per cent. Priced at par, they are trading at 100 1/4-101 1/4.

In the Mideast market, South Korea sold 7 million Kuwaiti Dinar (about $24 million) of three-year notes with a coupon of 8 3/4 per cent at 99 3/4 and SAR, Morocco's refinery company, is seeking 10 million KD (about $34 million). The 10-year, 8 3/4-per-cent bonds can be redeemed at par at the end of the fifth year. Privredna Banka Sarajevo has arranged a six-year loan of 5 million KD with a coupon of 9 1/4 per cent and an issue price of 99 3/4.

As for the syndicated-loan market, the best evidence that it is becoming a borrower's market is the extent to which lenders are yielding to the demands of the borrowers. A key example is the $100-million, seven-year loan now being syndicated for Colombia, wherein the government got the banks to accept the jurisdiction of Colombian law for any dispute that might arise over the loan.

The international banking community has resisted yielding on issues such as these up to now and has succeeded in getting borrowers to accept U.S. or U.K. law for settling disputes. Colombia argued that a recent law made it unconstitutional to submit to such international arbitration and the banks accepted—as they did for the recent $1-billion loan for Venezuela.

The Colombian loan has been under negotiation since mid-year, with the banks showing substantial reluctance to accept these terms. The fact that it is now moving forward shows how eager banks are to put assets on their books.

Colombia will pay 1 5/8 over inter-bank, the same as in previous loans, with banks earning fees of 1/4 to 1/2 per cent, depending on the size of their participations.

Economic Scene

(Continued from Page 27)

…ned in the most sensitive …mportant component of that …the industrial commodity …ent.

Satisfactory Levels

…eral economists tended to …int the flare-up, saying that …wholesale index reflects list-…prices rather than the actual …action quotations in the real …d at the present time. The …ment, they say, may merely …et business decisions to get …ial prices to more satisfactory …s in the event some system …voluntary wage-price controls …ventually adopted by the new …ministration.

Nevertheless, that trend will bear close scrutiny in the months ahead, as will such other important indicators as industrial production, personal income, consumer prices, housing activity and business spending for new plant and equipment. One hopeful sign was the strength of chain-store sales.

For the economy as a whole, leading businessmen and their own economic advisers remain quite confident. A sounding taken last week immediately after the election among several leading corporate executives disclosed no great concern about economic prospects. And neither was there any feeling that the outcome of the election had greatly altered the general outlook for the U.S. economy.

Unless something startling happens in the next few months to unsettle the current picture in the domestic or international fields, the U.S. economy seems to be embarked on a course that assures a moderate improvement next year—5 to 6 per cent real growth and perhaps slightly higher inflation.

Whatever the Carter administration does in the early part of next year could not change that prospect very much, though the promised stimulus and innovations could have greater impact later on.

U.S. Firm Sued In Plutonium Worker's Case

WASHINGTON, Nov. 7 (NYT).—The parents and children of Karen Silkwood, an Oklahoma plutonium worker who died in a car crash two years ago, have filed suit in federal court, charging officials of the Kerr-McGee Corp. with conspiring to prevent her from organizing a union and reporting nuclear safety hazards to the government.

The civil action, filed in the U.S. District Court in Oklahoma City and made available here, also alleged that corporation officials, three agents of the FBI and a former newspaper reporter who cooperated with the FBI had conspired to suppress information about harassment and intimidation of Miss Silkwood.

The suit further charged Kerr-McGee with willful negligence for failing to exercise proper control over the plutonium located at its facility near Crescent, Okla., during an incident on Nov. 7, 1974, when Miss Silkwood and her apartment were contaminated with the poisonous nuclear material.

The suit asks for compensation and punitive damages totaling $160,000.

Miss Silkwood died a week after the contamination incident when her car crashed as she was on her way to meet the union official and a reporter for The New York Times with information she said would show that Kerr-McGee was manufacturing faulty plutonium fuel rods for an experimental reactor.

Sports

Young Scores Decision Over Lyle in 15 Rounds

SAN FRANCISCO, Nov. 7 (UPI).—Jimmy Young yesterday moved a step closer to a possible rematch with "retired" Muhammad Ali or a top ranking in a possible elimination series with a masterful 12-round decision over Ron Lyle.

Young, ranked No. 3 in the world and loser of a controversial decision to Ali last spring, put together a series of combinations from both inside and out to befuddle Lyle, rated No. 5.

Young, 210 1/2 pounds, failed to register a knockdown against Lyle, an 11th-round knockout victim to Ali, but he landed three solid rights that rocked Lyle in the eighth.

All three officials scored the fight heavily in favor of the 28-year-old Young, who ran up most of his points with well-placed combinations off left-jab leads throughout the bout.

Lyle, 215 pounds, just about eliminated himself from contention with the defeat, particularly since he is 34.

The victory, his 20th in 27 starts, put Young into a contending spot for either a return bout with the champion or serious consideration for a berth in a fight-off should Ali stick to his recent decision to retire.

In Young's previous 19 victories, he had recorded only 7 knockouts while Lyle, in 31 victories in 36 previous fights, had 22 knockouts.

Conteh-Quarry Bout

LAS VEGAS, Nov. 7 (UPI).—John Conteh of Britain, the World Boxing Council light-heavyweight champion, will defend his crown against American Mike Quarry in an internationally televised 15-rounder Dec. 11.

Quarry, the younger brother of retired heavyweight contender Jerry Quarry, earned a crack at Conteh by scoring a 10-round unanimous decision over Tom Bethea here last week.

Price, Adams Pace Braves No Victory Over Rockets

BUFFALO, Nov. 7 (UPI).—Newly acquired guard Jim Price and veteran forward Don Adams came off the bench last night to combine for 30 points and lead the Buffalo Braves to a 117-102 National Basketball Association victory over the Houston Rockets.

Price, playing his first home game since being acquired from Milwaukee, scored 17 points and turned in a sparkling floor game as the Braves led by as many as 22 points in the third quarter.

Adams added 13 points, while Buffalo's recovering star, Bob McAdoo, collected a game high 24 points. Rookie Adrian Dantley netted 18, John Shumate 17 and Ernie Digregorio 10 points for the Braves.

Bullets 109, Celtics 103

At Landover, Md., Elvin Hayes scored 36 points, grabbed 13 rebounds and blocked four shots to lead Washington to its second victory in two nights over Boston, 109-103.

Phil Chenier added 20 points for the Bullets, who evened their record at 4-4 with their third straight victory. Boston, now 4-4, has lost four games in a row.

Cavaliers 101, Nets 93

At Cleveland, Austin Carr came off the bench to toss in his season high of 21 points as the Cavaliers ran their unbeaten streak to eight games with a 101-93 victory over the New York Nets.

Carr, who sat out the first and third periods, put in 14 points in the second quarter and added 7 more in the final period to finish with 7 of 10 from the field.

Knicks 112, Warriors 111

At Oakland, Calif., the New York Knicks withstood a last second charge by Golden State to take a 112-111 victory at the Oakland Coliseum.

Trailing 112-111 with six seconds remaining, the Warriors fouled New York rookie Lonnie Shelton. Shelton missed both free throws and Golden State had one last opportunity to win. But Phil Smith's desperation 20-foot jumper fell short.

Nuggets 105, Bucks 103

At Milwaukee, Bobby Jones sank two free throws with three seconds left as Denver extended its undefeated record to seven games with a 105-103 victory over the Bucks.

Milwaukee, playing without injured center Elmore Smith and Kevin Restani, led at the half, 52-48. It was Milwaukee's third loss in a row.

Spurs 113, Pacers 94

At San Antonio, George Gervin scored a game-high 27 points to propel the Spurs to a 113-94 victory over Indiana.

The Spurs jumped off to a 32-25 first period lead and that was the closest the Pacers got the rest of the evening. San Antonio led the rebounding, 46-41, and outshot Indiana 51 per cent to 43 per cent in boosting its record to 3-6.

Pistons 110, Hawks 105

At Atlanta, Detroit, led by center Bob Lanier's 27 points, fought off a desperation comeback attempt by the Hawks for a 110-105 victory.

Atlanta cut a late third-quarter 15-point Detroit lead to two points at 106-104 with 1:27 remaining in the game.
